Short Course at Teeswater

Mr N. C. McKay and his new assistant, Mr. A. C. Moore, are conducting a short course in Agriculture at Teeswater this month.

✣ ✣ ✣

Daughters of the Empire.

The regular business meeting of the Walkerton Chapter I. O. D. E. will be held in the old Council Chamber, Town Hall on Saturday, Jan. 15th, at 3.30 P. M.

✣ ✣ ✣

Hockey Starts Monday

Walkerton will stick to the N. H. L. A double schedule has been framed between the local boys and Mildmay, which will open here on Monday next. Things are shaping up pretty well and Manager McCartney is very much encouraged over the prospects for a good team. The recruiting for the 160th is landing some good players in town and besides there are several promising youngsters who will be candidates for a place. First practice was held Tuesday night and several new men showed up well. A few of the available players are:—K. M. Taylor, Runstadler, Herris Rife, H. Henderson, W. Russell, S. Truax, S. Vogan, D. McKerracher, Bruder, LaFrance, Patten, M. Black, J. Clark Sewell and others. Jack Shea of Palmerston has been secured to referee the four games with Mildmay. Mildmay will play here on Monday Jan. 17th, and Tuesday, Jan. 25th. Walkerton will play at Mildmay, Friday, Jan. 21st, and Friday, Jan. 28th.

Sugar Case Up Again

Messrs Norman Walford, A. S. Royce, Wm. George and Joe Lindsay were summoned as witnesses to appear at Osgoode Hall, Toronto yesterday in the case of the G. T. R and St. Lawrence Sugar Co., of Wallaceburg against A. J. Smith, a former Walkerton merchant. Smith refused to pay for ten bags of sugar valued at $53, which were shipped to him while he was in business here in 1913, claiming that he had sold out before the goods arrived, and did not receive them. The case was up at Osgoode Hall on June 10th last and as Smith did not appear, the plaintiffs were awarded the verdict with costs. The defendant claimed afterwards that he did not receive proper notice of trial and the Judge granted a new trial which is on at Toronto on Wednesday of this week.

BORN

WELLS—In Toronto, on Thursday, January 6th, to Mr. and Mrs. Jack Wells, (nee Miss Cora Watts) a daughter.

✣ ✣ ✣

MARRIED

EAGER—BROWN— On Jan. 6th, in Waterdown, at high noon, by Rev, J. Douglas B. A., Rector of Grace Episcopal Church, Louise Barbara Brown, only daughter of Dr. W. M. Brown, Neustadt, to Dr. Joe. C. Eager (son of Mr. and Mrs. Wm. Jas. Eager, Merchant, Waterdown) and of 33rd Batt. Ambulance Corps, C. E. F.

KNAPP—BLUHM—At the residence of the bride's parents, on Dec. 29th, by Rev. G. C. Little, B. A., John M. Knapp, of Sullivan Tp., to Eleanor, daughter of Mr. and Mrs. Wm Bluhm, Brant.

HENDERSON—TAYLOR— At Calvary Presbyterian Church, Buffalo, N. Y., on January 3rd, 1916, Ethyle Elizabeth, only daughter of Mr. and Mrs. W. P. Taylor, formerly of Walkerton, to Mr. Franklin Vernet Henderson of Winnipeg.

TOWN FATHERS MEET

Mayor Lippert Says Cheap Power Will Be the Big Job for 1916—Electric Light Co. Offers Thousand Dollars Worth of Power Free for Saddlery Factory.

Walkerton's new Town Council assumed the reins of office on Monday. At 11 a. m. they met, took the oath of office, and appointed Councillors Douglas, Lettner and Arscott to name the Standing Committees of the year. At 8 p. m. the Council again assembled to complete the work of organization. Before beginning his inaugural address Mayor Lippert stated that he had chairs placed at the table for the use of the Town press representatives

Inaugural Address

Mayor Lippert outlined a number of matters which the Council would require to deal with the coming year and made a number of recommendations. He hoped the Council would be able to do some side-walk building, and urged the importance of improving the roadway to the G. T. R. station and to the cemetery. He hoped the Market Committee would do something to stimulate a town market, and that another exit or two be made to the Town Hall auditorium. An iron stairway on the West side might provide exits both from the ground floor and gallery. An important thing was to see to it that Walkerton is included in the proposed hydro radial line from London to Owen Sound, Sir Adam Beck or the Commission should be got in touch with. It was electric radial lines that had made Preston, Galt and Berlin such busy centres. Referring to power and lighting, Mayor Lippert said that up to the present time the town had been tied up on this question but now Walkerton had the alternative proposition of hydro. If we couldn't make a better arrangement with the Power Co. than at present, we would have to have hydro. The only thing people objected to at present was the price.

Treasurer Collins asked authority to borrow the sum of $15,000 from the Merchants Bank of Canada for current expenses of the town. Granted.

Night Watchman Swanston asked for an increase in salary. Instead of a raise, he was given authority to order a new uniform at the town's expense.

War News a "Luxury"

A largely signed petition was read, requesting the Council to bear the expense of continuing the daily war bulletin, which hitherto has been paid for by a few private individuals. The proposition was turned down by the finance committee on the ground that the war news service was a luxury.

A request was read from the local W. C. T. U. asking that the Council have a referendum vote taken on the question of giving married women votes on property. The Council turned a deaf ear to this request, filing the communication.

The Town Clerk of Leamington asked the co-operation of the Council in urging the Ontario Legislature to provide that town councils consist of a Mayor, Reeve and three Councillors, and that the members be paid. As the Walkerton Councillors are willing to give their best services gratis, they own on this petition, which was pigeon-holed.

Offers $1,000 Power Free

A letter was read from Mr. John Rowland urging that steps be taken to get the Saddlery-Hardware factory operating in some capacity. In order to assist the town in getting some manufacturers to take hold of it Mr. Rowland stated that he had secured the assent of the President of the Walkerton Electric Light Co. to supply 20 h. p. of current free of charge for two years. Mr. Rowland previously made an offer of one year's free power. The increase to two years means $1,000 free power.

Tax Collector N. Crawford reported that $24,207.[illegible] had been paid in to the Merchants Bank.

Improvements Needed For School Building

Major A. M. Moffat presented a request of the 160th. for certain improvements in the old school building to make it suitable for use as a Non.-Com. officers school, which it will be necessary to maintain for several months. The plans which were prepared by Sergeant James, who is an architect and surveyor, provide for a kitchen in the basement, laboratories, shower-baths, dining room, lecture room etc. on the first floor, and quarters in the building for 96 men. The building would be altered in no way except for the introduction of dumb-waiters. Major Moffat pointed out that within a short time between 300 and 400 men would be quartered in Walkerton including the machine gun attachment, pioneer section, cycle corps, headquarters staff, and local company. For the month ending December, 31st, some $10,000 was paid out to Walkerton, for January it would be $11,000. The cost of the improvements at the school was estimated at $1,500. The changes were made primarily for Non.-Coms. school but the privileges of the building would be extended to all the men. Major Moffat stated that private quarters could be obtained in the town for a very few men only, and as the men are prohibited from staying on premises where liquor was sold, the Regiment was thinking of taking over the old Royal Hotel. The Council named a committee composed of the Mayor, Reeve and Councillor Douglas, to confer with Major Moffat in the matter, with power to act.

A number of accounts were passed.

The Officials Appointed

Mr. W. H. McBurney and K. M. Taylor were named as auditors.

Mr. S. A. Rife was appointed to the Public Library Board for 1916, 1917, and 1918.

Dr. Porter was appointed Medical officer of Health, and Mr. R. H. McKay as member of the Board of health.

Mr. W. H. Shaw was appointed High school trustee for 1916, 1917, 1918.

All the town officials were re-appointed at their own salaries.

The standing Committees for 1916 were struck as follows:—

FINANCE, SALARIES AND SCHOOLS
McNab, Pletsch, McCarter.

STREETS, SIDEWALKS AND DRAINAGE.
Russell, Lettner, Arscott.

RELIEF AND CEMETERY
Lettner, McNab, Douglas.

MARKET AND PROPERTY
Arscott, Pletsch, McNab.

FIRE AND WATER
Douglas, Lettner, McCarter.

RAILWAYS
McCarter, Pletsch, Russell.

PRINTING AND LICENSE
Pletsch, Douglas, Arscott.

STREET LIGHTING
McCarter, Arscott, Lettner.

BOARD OF INDUSTRY
Mayor Lippert, Douglas, McNab, Russell.

COURT OF REVISION
Pletsch, McCarter, Russell, Lettner, Arscott.

Council adjourned to meet Monday Jan. 20th., at 8 p. m.

Big Live Stock Shipment

Walkerton is a busy shipping centre these days. On Monday no less than six cars of livestock went out by G. T. R. Irwin Bros. shipped a carload of stallions and two carloads of mixed horses to the West, and there were three other carloads of cattle and hogs.

✣ ✣ ✣

Big Sum Realized

The action of the East Bruce Teachers in voting a day's pay for the Motor Ambulance Fund has resulted in the neat sum of $275.15, being forwarded by the committee to Mrs. E. J. Skelton, treasurer of the I. O. D. E. Mrs. Skelton also acknowledges the receipt of $12 from Mrs Whitehead [illegible], and $5 from the Misses Hales.

✣ ✣ ✣

A Sorry Milkman

Mr. Noah Opperthausen, a Mildmay milkman, rather innocently got into a serious bit of trouble last week. Not having enough milk to supply his customers, he secured some from a neighbor which, the examination by the Dominion Inspector proved to be adulterated. Mr. Opperthausen appeared before Magistrates Tolton and Fisher here on Monday, and in accordance with the statutes was fined $50 and costs, a total of about seventy dollars. As the defendant appeared to be quite innocent in the matter, Mr. D. Robertson, who prosecuted, offered to take the [illegible] up with the government with a view to having a portion of the fine remitted.

✣ ✣ ✣

Young Life Cut Short.

Deep sympathy is felt for Mr. and Mrs. John Hogg of Carrick in their sudden bereavement last week. A telegram announced the death of their son, Charles, who had been farming in Saskatchewan for several years. No word had reached them previously of any illness, and further particulars are not expected until his brother Gordon, who is bringing back the body, arrives probably on Thursday. Charles was in his 27th year, unmarried, and had been farming about ten years in the West. He was a fine young fellow, highly regarded in the community and the news of his death was received with widespread regret.

✣ ✣ ✣

Citizens Organization Complete.

Every citizen of Walkerton, man or woman, in fact every citizen of the Province of Ontario, will have an opportunity during the week beginning January 24th of signing a petition to the Legislature to take a vote of the people to make Ontario Dry by July 1st. The Bruce County organization, Citizens Committee of One Hundred, of which Mr. L. O. Benton is president and Mr. John McCool is secretary, is now complete throughout the County, and canvassers in every polling subdivision in every municipality are ready to start the Canvass on Monday morning, Jan., 24th. The Canvass is to be completed within a week, and every eligible person will be invited to sign the petition. It is expected that the greatest petition in the history of this country will be the result of this province-wide effort next week.

News About Town

Mrs. Harry Watts, sr., is visiting in Toronto.

County Council meets Tuesday, January 25th.

Cleaning and pressing done.—S. A. Rife & Co.

The Telescope wants a correspondent for Greenock.

Mrs. George Gould has returned from Toronto.

Read the Walkerton merchants' ads. in the Telescope.

Boy wanted for permanent position. Apply at Telescope.

A big cut in overcoats and suits for the next 30 days.—S. A. Rife & Co.

Bruce County newspapers will be $1.50 a year in advance after January 31st.

Lieut. Patterson recruiting officer at Cargill, was home here over Sunday.

Mr. George Bingleman spent a few days with friends in town this week.

Miss Tilda Cain is spending this week with her brother, Pte. Joe Cain, in London.

D. C. Wilson of Toronto, piano tuner, will be in Walkerton on or about Jan. 18th.

Dr. W. H. Ross of Regina and Miss D. Ross of Chesley spent a few days at Dr. Hall's last week.

Butterick Fashion Books for spring, Delineator and February Fashion sheets at J. H. Appel.

You [illegible] intending to subscribe for the Telescope. [illegible] the price goes up on January 31st.

Mr. G. D. Stevens of Hartney, Manitoba, was a visitor at the home of Mr. A. S. Royce this week.

Mr. and Mrs. Frank Rennie, attended the funeral of the late Mrs. Young in Clifford on Friday last.

Mrs. Walton and babe of Guelph are here on a visit to her parents, Rev and Mrs. J. W. Sanderson.

R. E. Truax M. P. left on Tuesday afternoon for Ottawa to be present at the opening of parliament.

Mr. Chapman of Toronto, formerly with Mr. Havill, has taken a position as plumber with Patterson Bros.

James H. Parker and Thos. Symons of Greenock, are leaving shortly to take up land near Hearst, New Ontario.

Bruce County Newspapers will be $1.50 in advance after January 31st. Save half-a-dollar by renewing for the Telescope NOW.

Peerless pastry flour is especially milled for economy. Uses less lard and other shortening. All grocers or at the mill.

Lieut. Krug, recruiting officer at Formosa is making arrangements for a public recruiting meeting there on Friday night.

Mr. William Houston, an old Bruce County boy, has been elected chairman of the Toronto Board of Education. Mr. Houston is an editorial writer on the Globe.

Pte. Chester Cunningham underwent a surgical operation successfully at Galt Hospital and is now recuperating. He is expected home on leave in a few days.

To the ladies of Walkerton and vicinity—we have secured the services of Mr. McKim, a high class ladies' tailor. —S. A. Rife & Co.

"Jackie", the little three year old son of Coun. John Arscott, fell on the ice and broke one of the small bones of his arm on Friday. The injured member is recovering nicely.

A Patriotic Card Party will be held in the Town Hall on Friday, Jan. 21st, at 8 o'clock sharp. Euchre and five hundred. Admission 50c. Tickets on sale at McCrum's. Everybody welcome.

The first issue of John P. McConnell's new paper. "J. P's. Weekly" was published on Jan. 1st. The new publication is modeled along the lines of the Saturday Evening Sunset of which Mr. McConnell was formerly editor.

Mr. Arthur Collins had a letter this week from Capt. "Had" Robertson in which he spoke of having had a pleasant Christmas at Bramshott Camp, a part of the day being spent in the company of another Walkerton boy, Quartermaster Sergeant Harwaker.

Judge Klein went to Toronto on Friday owing to Mrs. Klein, who is visiting her daughter in the city, being threatened with pneumonia. Fortunately the malady was checked and her many friends will be glad to know that she is now making good progress towards recovery.

The services of the Rev. John McNeil have been secured by the Public Library and High School. Mr. McNeil is an old Bruce boy and received his early education in Walkerton High School. His many friends will be pleased at this opportunity to hear his address, "Napoleon and the Kaiser compared as to their aspirations for world power." This address was given a second time to crowded audiences in Toronto. The proceeds will go towards patriotic purposes.

Mr. Jack Haas is home from the West on a visit to his father, Mr. Alex Haas.

Judge Klein, John Rowland, of Walkerton and H. H. Miller of Hanover, addressed a rousing recruiting meeting at Mildmay, Monday night. Addressing himself to those of German descent, Judge Klein in a strong speech emphasized the fact that this war is waged not against the German people, but against Kaiserism and that it is the duty of the Germans who are loyal subjects of the King to rally to the colors. The Chairman, Dr. Wilson, is enlisting, and a number of recruits from the village are in sight. Capt. Todd, Lieut. Whitehead, and Major John Henderson accompanied the speakers.

✣ ✣ ✣

Wanted

A large sized Klondike stove, scales, show cases, etc.—Apply to C. Patrick.

✣ ✣ ✣

Wanted

An experienced grocery clerk wanted —I. Weber, general merchant, Walkerton.

✣ ✣ ✣

War Auxiliary

The office headquarters of the Bruce County War Auxiliary Executive Committee will be found in the offices over the Bell Telephone Agency, Phone No. 179. Geo. D. McKay, Secretary.

✣ ✣ ✣

Shutting Off Water

Chief Ferguson is shutting off the water of all users who are in arrears, without further notice. The Chief also wishes it understood that all persons dumping ashes on the roadway during the winter will be prosecuted.

✣ ✣ ✣

At Home

Court Bruce No. [illegible] will hold their annual "At Home" for the members and their families on Friday evening, Jan. 14th, in the Town Hall. Programme will commence at 8 o'clock. Members are requested to wear their badges.—A. S. Royce, Rec. Secy.

✣ ✣ ✣

Mr. Hall Enlists

Mr. E. R. Hall B. S. A., who has been assistant to Mr. McKay of the local Department of Agriculture since September, has decided to enlist and resigned his position with the Dept. to join the colors at Guelph. Mr. Hall is succeeded here by Mr. Moore B. S. A. of Islington.

✣ ✣ ✣

Judge Dismisses Case

Judge Klein handed down judgment on Friday in the case of W. H. McFarlane, registrar, against Geo. D. McKay, dismissing the case. On Mr. McKay's counter-claim he gave a verdict of $800 for Mr. McKay. The libel actions by Mr. McFarlane against the town newspapers are abandoned by Mr. McFarlane.

✣ ✣ ✣

New Insurance Office.

Mr. George McKay has opened an insurance office over the Bell Telephone Agency. Mr. McKay is one of Walkerton's best known citizens, and if the confidence and good will of the public count for anything, they should prove a valuable asset to Mr. McKay in his new venture, as he enjoys both in the largest measure.

✣ ✣ ✣

Distinguished Bruce Boy

Rev. John MacNeil, well-known throughout Canada as an eloquent speaker, will lecture in the Town Hall, Walkerton, Tuesday, Jan. 18th, on the attempts of Napoleon and the Kaiser to gain world power. As a graduate of the Walkerton High School, he will speak under the auspices of the school, the proceeds to be given for patriotic purposes. Admission 25 cents. A limited number of reserved seats at 35 cents. Plan open at McCrum's, at 9 a. m. Saturday.

✣ ✣ ✣

Heavy Liquor Fines.

The way of the unlicensed booze-seller is becoming harder and harder. On Monday two Teeswater hotel keepers were tried before Magistrates Tolton and Richardson of Walkerton and Magistrates McLean and Ferguson of Teeswater in the latter village and assessed nearly $1,300 for infringements of the liquor license law. Alexander Lambertus was fined $400 and costs on each of two charges of selling and keeping liquor for sale, totalling $808.30. William Leppin was fined $450 and costs on a similar charge. The charges were laid before Magistrate Tolton by License Inspector Jos. White.

✣ ✣ ✣

At Soldiers Aid Tea Room

The Soldiers Aid tea rooms, were auspiciously opened last Wednesday evening, Mr. John Rowland inviting a large company to luncheon including the officers and men of the 160th and a number of friends, about one hundred and fifty guests being present. After the dainty lunch prepared by the young ladies had been enjoyed, there were a number of short speeches by Messrs R. E. Truax M. P., W. D. Cargill M. P. P., Rev. Father Cummings, Mr. John Rowland, Mayor Lippert, and R. H. McKay. The speeches dealt with the necessities of the recruiting situation and the ways in which citizens can help.

RECRUITING NOTES

Major and Mrs. Moffat have taken Mrs McKillop's house.

✣ ✣ ✣

The Public Library Board has invited the boys to have the free use of the library.

✣ ✣ ✣

Lieut. Roy Whitehead has transferred from the Queen's Own Rifles to the 160th Bruce Regiment.

✣ ✣ ✣

Citizens are commenting on the fine orderly behavior of the boys in khaki around the town.

✣ ✣ ✣

The boys at the Armouries are enjoying [illegible] choice apples through the kindness of Mr. J. E. McGregor.

✣ ✣ ✣

Capt. Duncan, chaplain of the 160th Regiment, will address a recruiting rally at Paisley on Friday night. He has the reputation of being a capital speaker.

✣ ✣ ✣

There was a good sprinkling of khaki at the church services on Sunday. At the R. C. Church chairs were placed in the front row for the use of the soldier boys.

✣ ✣ ✣

The recruits thus far are a fine strapping, soldierly bunch. Col. Weir's promise that he would take out of Bruce one of the finest regiments that ever left Canada's shores is going to be fulfilled.

✣ ✣ ✣

The privileges of the Reading Room and also the free use of books have been extended to the officers, non-commissioned officers and men of the 160th Bruce Batt. and the Board trust that the men will take full advantage and make themselves at home at the Library during their stay in town.

✣ ✣ ✣

Messrs. Symons and Robinson of the Bank of Commerce staff, who have joined the 160th, are [illegible] by Messrs. F. D. Matchett of Toronto and T. M. How of Montreal. No less than 745 officers of the Bank of Commerce, representing 80 per cent of the male staff, have already joined the colors.

✣ ✣ ✣

"The Wiarton detachment of the 160th Bruce now numbers 71 and it is expected that it will soon reach 250. There are 40 Indians now in training at Cape Croker and 15 recruits at Hepworth. The Indians are as fine a lot of soldiers as can be found in the whole County.—Wiarton Echo.

✣ ✣ ✣

More recruits from Wiarton:—Geo. P. Shephard, H. D. Brady, W. J. Edwards, J. W. Hopkins, J. McPhail, H. B. Wellaughan, C. B. Golden, W. A. Young, Chas. Adair, T. A. Hopkins, W. S. McKay, D. D. McCallum, J. J. Heathers, Wesley McEachern, Wm. John Tilley, Robbins McEachren, Walter Johnston, Wm. McEachren, Norman Tilley, E. Lownds, J. E. (Burz) McEachern, Vesty Hales.

✣ ✣ ✣

Over 350 recruits have signed up with the 160th and every day brings a new quota from some of the various recruiting offices. Wiarton so far is leading the County with an enlistment well over the 70 mark. Yesterday it was reported that some twenty more men had enlisted in that northern burg. Reeve Kastner of that town who is a "live" wire gets credit for a good deal of the stirring up that is bringing down such a fine bunch of recruits from Wiarton.

✣ ✣ ✣

The Ripley recruiting meeting on Monday night was one of the most rousing gatherings ever held in this district. The building was jammed. Standing room was at a premium. Rousing addresses were made by Capt. McNally, Lieut. Roy Whitehead, Mr. Cameron of Lucknow, Pte. McKinnon and others. The last named speaker came home from North Dakota recently, after 17 years there and enlisted. After the meeting eight young men came forward and joined the colors and there are immediate prospects of as many more recruits.

This Week's Recruits

AARON PERCIVAL JENKINS, Walkerton, age 29, barber, born at Maple Hill.

JOSEPH ARCHIBALD REICHENBACH, W[illegible] age 21, watchmaker, born [illegible] Crag.

WALTER HAROLD EIDT, Walkerton, age 19, [illegible]-worker, born at Walkerton.

RALPH BRUNT GLEBE, Walkerton, age 18, electrician, born at Walkerton.

EDWARD FRANK ERNEST, Walkerton, age 18, laborer, born at Walkerton.

RALPH GEORGE OBERLE, Walkerton, age 18, book keeper, born at Formosa.

SAMUEL JEFFREY TRUAX, Walkerton, age 18, butcher, born at Walkerton.

JOHN HARVEY HOFFMAN, Walkerton, age 41, laborer, born at Riversdale.

HUGH ANDREW THRENDYLE, Walkerton, age 24, teamster, born in Brant Tp.

MISJUDGED

"My dear boy! . Your sudden attack of match-making is positively alarming. I understood that Mr. Vernon had taken a decided dislike to your tenant."

"It is safer to begin with a little aversion!" he quoted, laughing. "Besides, he did not dislike her, for he had never seen her; he only disliked the fancy picture he had conjured up in his own mind, which he had labelled with her name. They can agree to differ on all subjects relating to the present century and fall back upon the dark ages in which their favorite boks were written; there they can wander hand in hand."

The Rector would not be pleased to hear you. He would tell you that he was not a marrying man."

"Marrying men seldom marry. If they do it at all, they do it to excess, and sit up weeping over their dear fourth wife. Vernon believes he likes 'injured innocence' in white, fair but idiotic quite,' but he doesn't. It would bore him to death to be married to it."

"Talking about innocence, neither injured nor idiotic," said his mother, "I do not think Dora has been looking at all well lately."

"Nor do I. Come now, mother, this is not an artful excuse to reproach me because I want her to look round and find some better fellow as a husband."

"That she will never do," said Lady Weston, proudly. "No, I do not blame you in any way, although I think it would be better for both of you if your engagement were a settled thing. Why should it not be?"

"Mother, you are one of the cleverest of women: but you have one blind spot in your clear eyes, and that spot is where your boy is concerned. You think he has only to ask and have; but that is where you are wrong. Dora likes me well enough, but she never misses a chance to let me know that I am almost the same as a brother to her. She is terrified whenever she thinks I am about to propose to her. You need not smile. This is no pretty girlish wile; it is genuine. A year ago she would have said 'Yes'; to-day she would say 'No.' I am quite sure of that."

"But why?" asked his mother. "It must be only your fancy. There is no one else in the case. She was much admired in London last year and on the Riviera in the winter, but she certainly showed no special pleasure in the society of any man. As for this [illegible] you will not persuade me you have a rival in either the Rector or Mr. Rigby."

"No, it is certainly neither of them," he said. "I am not sure that it is another man at all; but she has some reason why she will not let me speak to her. Have you noticed no change?"

"I think she is not in very good spirits, nor does she look as well as she did."

"You had better find out if there is anything she wants. Our little Dora is too good a sort to be allowed to go about moping by herself and brooding over some will-o'-the-wisp of a trouble. She will tell you that it would be a funny thing if she could not, for you are a born Mother Confessor, and that is something very wonderful and very precious."

Lady Weston had not dreamed of telling her son, but she had one little cause for anxiety of the existence of which he was unaware.

During the last few months she had been forced to notice that Dora must be sending a lot of money in some curious manner, the effects of which were not visible. Miss Langton had a small income of her own, which had hitherto proved ample for all her personal wants. Latterly Lady Weston had been unpleasantly struck by the fact that Dora received a great many bills, and did not seem at all inclined to meet them. On more than one occasion she had even borrowed money from Lady Weston, laughingly alleging that the payment of one of her dividends had been delayed, and that she would repay it very shortly. The time had gone on, and no repayment had been made.

Lately she had celebrated her twenty-fourth birthday, and Lady Weston had asked her what present she would like, fully expecting to be called upon to buy some trinket or other. To her unspeakable amazement her little cousin had faltered out that if she might have the money she would rather wait and get something later on. Lady Weston gave it, but as far as she knew no purchase had been made.

CHAPTER III.

Dora Langton paid the call she had suggested, and saw Beryl in her pretty cottage. She went again, more than once, and ended by making it almost a habit to see Beryl during each day. The latter encouraged her visits and scrupulously refrained from asking her if she was in any sort of trouble.

"When she can no longer bear her fear—whatever it may be—she will speak," thought Beryl. "That is why she has taken such pains to know me; she feels she will one day want a safety valve."

Beryl passed on more than one occasion the long-haired lodger at the White Farm. His appearance did not at all please her, nor was she much pleased by the stare with which he favored her.

"Who is that man lodging at the White Farm?" she asked the now friendly Mrs. Budge, who, hearing that the "quality" had taken notice of Beryl, condescended to come in and do some washing for her.

"I don't rightly remember the name," said Mrs. Budge, "but it's foreign, and I'm sure he looks a foreigner with those big black eyes and his hair in such long curls as no decent Englishman would wear, let alone if he could grow them. But up at the White Farm they think a deal of him. Mr. Blake says he is the friend of good spirits and of all his folks that are dead and gone, and he can bring messages to tell him how they are getting on now."

"Spiritualism!" said Beryl. "I had never thought of that."

"It don't seem to amount to much when all is said and done," said Mrs. Budge. "He'll just bring a message, as if it had that moment come by the wires. 'Mr. Blake,' he says, 'your mother's very happy,' or 'Your father says he's better off than he was at Dalehurst.' That is about all. But because he described the shawl and the brooch the old lady used to wear—why, Mr. Blake is carried away! I did point out to his widowed sister, her who keeps the house, that her oil picture, done by one of the artist people that come round, was hanging up in the dining-room, and that the brooch came out capitally. But there, when a man has made up his mind you might as well talk to a marble mantlepiece!"

"You don't believe in these messages?" said Beryl.

"Me and Budge don't believe in nothing we can't see by day-light, miss, and not more than the half of that. If the spirits could do anything useful I'd think more of them. Why couldn't they say that night frost was coming a fortnight ago? Then Mr. Blake could have put some sacking over the peach-trees and not had all the blossom cut. Or why not have dropped in to mention that a whole bunch of heifers were in the meadow grass laid up for hay and eating until they were ill? The old Mr. Blake would have been interested fast enough, and would have had a lot to say about it. But now that he's dead it [illegible] silly and only wants to talk poetry."

"Does this foreign gentleman read old Mr. Blake's poetry to his son?"

"They say he did begin it: but even Mr. Blake got angry then. He said if his father hadn't found out how to make better rhyme he'd best leave it alone. Some thought the old gentleman's spirit was quite put out."

Mrs. Budge withdrew, leaving Beryl very much perplexed at the thought of a palmist and a dealer in spiritualism settled down in a little Kentish village.

The whole aspect of the man was to her very sinister.

She could never see him without feeling a jangling of her nerves. He had about him an indefinable air of tragedy and of bringing tragedy in his wake. Yet she never, in her wildest fancy, connected him with the shadow on the face of Dora Langton until one evening at the end of May.

Beryl had promised a friend in London to send her some bluebells, which she wished to take to a hospital for children in which she was interested. The flowers ought to go off by the very first post in the morning, just before her own breakfast hour. It was necessary to pick them the evening before and let them spend the night in water. Beryl put off getting them until the later afternoon, because she knew exactly where she would find them, and knew also that they would be better if picked when the sun was off them. Yet, owing to some callers having taken up part of her time, she was later in going than she had intended.

It was growing towards dusk when she started off along the road which lay in the direction of the Hall. A very few hundred yards out of the village lay an almost enchanted little sleepy hollow. Here were two deep pools, side by side, separated from each other by a grassy neck of ground bordered by wild brambles, clumps of fern and strewn with flowers. The sloping banks leading down on either side to the surface of the pools were starred with all sorts of wild flowers. The very first and the latest of the primroses bloomed here, mingled with clumps of the beautiful ill-named dog-violet and ranks of deep purple orchids. On the far side of the second pool, away from the road, the ground suggested that the old fable had come true, and that the sky had fallen, for it was a sheet of soft blue, the home of the bluebell.

Beryl, basket in hand, jumped lightly over the wooden fence which separated this flower paradise from the road and turned towards this second pool. When she was well within the shelter of the hollow she perceived that she was not alone. She saw ahead of her the figure of a man leaning against a tree. She was close to him before she noticed him at all, and in the dusk she did not at once realize who it was that she had surprised.

Apparently the unknown was also ignorant of her identity, for as she got up to him she heard an unpleasant voice say—

"If you think that I am going to wait half the day for your convenience, my lady, you are very much mistaken. You will keep any appointment in the future when I choose to make it, or it will be the worse——"

Then he stopped abruptly, for even through the dusk he saw that Beryl was not the person he was expecting.

She stopped, not exactly frightened, but decidedly startled at this address.

The man recovered his composure first. He raised his hat. Beryl recognized him as the man lodging at the White Farm, the man to whom she had taken an instinctive dislike.

"I beg your pardon!" he said. "It is getting so dark that I did not see who it was. I was expecting an old friend, and I was chaffing—him—about being late. It has been such a lovely evening, has it not?"

"Very," said Beryl, shortly. She decided in her own mind that she would be obliged to disappoint her friend in London.

"Oh, I am not driving you away, I hope?" said the man, as he saw her turn away. "You have come for flowers, I am sure. Do allow me to help you. You wanted bluebells, I feel convinced."

"I do not want anything now," said Beryl; "it is getting too late."

"You make me feel sure that it is my presence to which you object. I am quite unhappy. Let me make myself of use."

To Beryl's unmitigated disgust he stooped to pick the bluebells and began putting them into her basket.

"Really, I will not stay for them now," she said. "I would rather not. Good evening!"

She turned away and retraced her steps to the fence. He resolutely accompanied her, and even offered to his hand to help her.

"No, thank you, I manage better alone," she said.

But in some way he contrived to get possession of her basket and to hand it to her over the fence when she was on the other side again, taking off his hat and wishing her good evening.

Beryl's rage at his intrusive familiarity was by no means diminished by the fact that as she found herself once more on the road she came face to face with the Rector and Sir John, who were on their way up to the Hall.

They both took of their hats and greeted her, but they were both exceedingly astonished at the apparent fact that she had been on a flower-gathering expedition with the objectionable person who stood staring after her and who gazed next with insolence at them.

Neither of the men said anything to each other about the incident, but they both felt a little disturbed by it.

Beryl stalked along towards home, feeling highly irate and thinking that it was extraordinary how the presence of one man of this description could spoil a whole place. Then her thoughts turned back to the man's words, which had not been meant for her. Evidently this man had been expecting some one and had been kept waiting. She did not think the tone in which he had spoken argued any affection for the "old friend," nor did she think the words were used in the spirit of chaff; they were intended for a woman without doubt, but for what woman?

Her unspoken question received the most startling answer, for hurrying along towards her came Dora Langton. She was evidently in a desperate hurry, and the look of anxiety on her white face told of some reason which made her haste a matter of the gravest importance.

Beryl did not know what to do. It seemed to be an impertinence to warn her or to attempt to pry into her affairs; yet she simply could not let that poor weak girl keep an appointment with the unpleasant man she had just left in the hollow.

"Dora," she said, "you are very late, are you not? How will you manage to get dressed in time for dinner?"

"I know—I am hurrying. Good night!"

"I am coming part of the way back with you. Yes, I can hurry, too. There are lots of things I wanted to talk to you about."

Dora did her very best to shake her off, but without success. Beryl would not quit her until she had seen her well within the shelter of the lodge gates.

Then she spoke.

"Go on home, won't you, dear? Dora, I was in the hollow earlier this evening. I don't think it is a good place for you."

Dora looked at her in sudden terror.

"What do you mean? What do you know?"

"I know nothing, except that you are better at home this evening. I shall know to-morrow whatever you think well to tell me. I think you will trust me."

Truth to tell, as Beryl turned homewards once more she was not at all anxious for a second interview with the stranger in the hollow, especially as he might be aware that she had interfered with his plans for the evening. She was quite relieved to see some little way ahead the ungainly figure of Slade and to walk home a little way behind him. The stranger remained invisible.

The next morning Beryl expected to receive a visit from Dora and was not disappointed. She took her at once into her long, low drawing-room, with its harmonious cool coloring, and made her rest in the easiest chair in the room. Beryl sat by saying nothing, but looking with infinite pity at the white strained face.

Dora broke the silence abruptly and unexpectedly.

"Will you lend me a hundred pounds at once—to-day, if possible?" she said.

"A hundred pounds! I have nothing like that sum lying at the bank. Certainly I could sell out some of my securities and get it, but that would take time. And, Dora—don't think me an utter brute—I should want to know to whom the money was going. Is it to the man whom I saw in the hollow last night?"

"I must have it to-day," said Dora, wildly. "It will save me; but if I do not get it I am lost!"

"My dear, that is quite nonsense—forgive me for saying so. If that man has told you that, he is a blackmailer, and what is more he is a blackmailer who has begun to get frightened. Very likely he was disturbed at my having surprised him last night. Now that you have told me this tell me more, and tell me all. If this man is demanding money from you, he must have or think he has some hold over you. What is this hold?"

Dora's head was covered by her hands; she flung herself round so as to bury hands and face amongst the cushions of her chair and sobbed bitterly.

Beryl was now kneeling beside her, begging her not to cry so hopelessly.

"Tell me what it is, dear. There is sure to be some way out, even if you cannot see it yourself. Anything is better than remaining in the hands of this villain, for I know he is a villain."

"A villain! Oh, Beryl, if you only knew! That man is my husband!"

A silence settled on the room, for this was worse than Beryl had feared.

"How long have you been married?" she asked.

"Since last October, when I was up in town."

"And no one knows?"

"No one. I found out how mad I had been, and I have done everything, endured everything, to keep it quiet. He did not mind that—I paid him."

The tone of intense bitterness which she threw into her words made Beryl shudder.

"Where could you have met him?" she asked, for it was indeed difficult to imagine any circle of society, however catholic, which could have embraced Dora Langton and this stranger.

"I had better tell you all. I was trapped in the end by him and by a woman. You heard Mr. Rigby speak of a fortune-teller, a Madame Inconna?"

"Yes; the evening you felt so ill."

"Yes; the evening I felt so ill. That woman was my evil genius. I went to see her last autumn when I was in town. She made herself very pleasant to me, and was so sympathetic that I found myself telling her everything. She is the cleverest woman I have ever met. She talked to me about many occult subjects and seemed to open a door to me into another world. I can't explain why this should have fascinated me, but it did. You see I had never heard any of that sort of talk before. I thought her the most wonderful person on earth."

Beryl did understand what the girl meant. She knew that some natures long, even unconsciously, to break through the barriers of time and space and to see and hear something of the world which lies in the unknown direction.

[To be Continued.]

The answers to correspondents' editor was in a quandary. "Here's a communication from a woman who wants to know how long it takes to do up a shirt," he said. "That depends on the laundry," volunteered the sporting editor. "The one I patronize will do up a shirt in about three washings."—Judge.

SPLITTING PAINS IN THE MUSCLES DRIVEN OUT QUICKLY BY "NERVILINE"

Rheumatic Pains Go—Suffering Ceases—Cure Comes in Even Chronic Cases.

For aching bones and sore muscles nothing will soothe away the pain like Nerviline.

For nerve-wracking twinges in the muscles, for torturing backache or lumbago, you'll find Nerviline is full of amazing power.

You see, Nerviline has the power—it's about five times stronger than ordinary remedies, and can penetrate very deeply. It contains juices and extracts of certain herbs that give it a strange power to drive out congestion, inflammation or pain.

You are safe in using Nerviline. Just rub it on—it won't blister or burn, and can do nothing but good.

Whenever there is pain or suffering Nerviline will go and will drive it out. It penetrates to every cell of a sore muscle; it sinks to the heart of every stiff sore joint; it searches out the pain of rheumatism quickly.

Give Nerviline a trial. See how fast it will limber your lame back, how quickly it will cure neuralgic headache, how fast it will break up a bad cold or ease a sore throat.

The best family pain-remedy ever made is Nerviline. Forty years of great success proves this.

For emergent ills, when the doctor isn't handy, there is nothing better than the 50c family size bottle; trial size 25c., all dealers or the Catarrhozone Co., Kingston, Canada.

MILITARY TOUCH TO CHAPEAU.

Priscilla is the name given to this saucy chapeau of black pressed beaver with its deep crown and rather narrow rolling brim. The black feather ball that "buttons" the chin strap is a quaint detail.

How Much Rye Do You Eat?

Most people eat little, if any, rye. Yet rye is one of the most healthful and nutritious cereals.

Dr. Jackson's Roman Meal, the most nutritious cereal food known to science, contains 25 per cent. whole kernel of rye.

In addition it contains whole wheat, deodorized flax seed, and bran. It distinctly differs in composition from any other food on the market. It will positively relieve constipation, or money back.

Roman Meal looks different and requires a simpler way of preparation. To be absolutely certain to follow directions on package and do not stir while cooking porridge or you spoil it.

Sold by grocers at 10c and 25c.

Made by Roman Meal Co., Toronto.

Are You a Book Borrower?

Have you borrowed a book? Read and return it. If you cannot read it soon, return it and trust to your being able to borrow it again. In keeping it an unreasonable time you may be keeping some one else from the pleasure reading it may afford. Look over your shelves and see what you have there that should be returned. The men who would borrow so little as a quarter of a dollar from a neighbor and fail to return it would not invite respect. Yet it is quite as bad not to return a book or magazine. Who has not had anguish of heart to have some choice, some dearly prized volume returned, soiled or torn, with pages lacking? That "Tom upset his inkstand" or "the baby got hold of it" or similar excuse does not mend the matter. The borrowed book should be protected from such accidents. What was worth borrowing is certainly worth returning. Certainly it should be clear in your mind that it is not yours, but the property of another.

KEEP YOUR BABY WELL

Mothers can keep their little ones happy and healthy by the occasional use of Baby's Own Tablets. There is no minor ailment of little ones that the Tablets will not cure, and above all they are absolutely safe and positively no injury can result from their use. Concerning them Mrs. Henri Huard, Kingston, Ont., writes: "There is no medicine I know of so good for little ones as is Baby's Own Tablets. They have certainly been of great service to me." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Brown Eyes and Color Blindness.

Color blindness is one of the great drawbacks to a large percentage of men who would enlist in the United States marine corps, according to the recruiting officers.

"We have a box filled with different colored yarn," said an officer of that branch of the service. "We ask the prospective recruit to pick out green, for instance. If he is color blind he will invariably pick all the red yarn. We place it all back in the box again and ask him to pick out the red. In nine cases out of ten out will come the green.

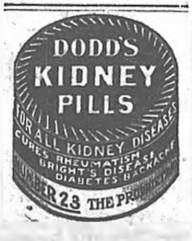
Another strange thing I have noticed is that most persons who are color blind have brown eyes. Once in awhile a person with eyes of a different color is afflicted that way, but as a general rule they are persons with brown eyes."—Kansas City Star.

AFTER THE FALL.

(Judge)

Observant Kiddy—Oh, look at that funny man, mother. He's sitting on the sidewalk talkin' to a banana peel!

The smallest men are not always those who have shrinking dispositions.



UPHOLSTERING.

Use to Which Room is Dedicated Should Govern Choice.

There is such an infinite variety of materials for furniture covering that it is almost impossible to include all types in a brief discussion. Leather, wool, silk, linen, and cotton are all used. Leather is dignified looking, and the good qualities are double, but in the cheaper grades the surface tends to wear off and crack, and it is often rather stiff and uncomfortable. Silk materials are appropriate in certain places, but are too expensive for common use, except perhaps for cushion covers, hangings and possibly for the covering of a choice piece of furniture. Cotton is inexpensive and does not wear through quickly, but often it does not hold its color well and also catches dirt easily. Nevertheless it is frequently used in cretonnes, chintzes and similar printed goods and in low-priced velours, tapestries, etc.

It is worth noting that mercerizing and some of the other new methods of treating cotton during its manufacture have improved its appearance and also its wearing qualities. Linen is occasionally used in materials similar to chintzes, but its most common use in furniture coverings and draperies is in velours, a sort of heavy velvet material which is also made in cotton, but which is more durable in linen.

Except for the fact that moths and buffalo beetles are so likely to damage it, wool is probably the most satisfactory fibre for upholstery. It is more durable than silk or cotton, does not catch the dirt as easily as the latter, and holds its color excellently. It is made into a great variety of materials—damask, tapestries, plushes, etc.

The use to which the room is to be put influences the selection of materials in furniture coverings and draperies. Gay, light chintzes or cretonnes are appropriate for a bedroom, which one wishes to have clean and airy looking, whereas for a living room substantial looking materials like velours or tapestry would be more suitable.

Fairville, Sept. 30, 1902.

Minard's Liniment Co., Limited.

Dear Sirs,—We wish to inform you that we consider your MINARD'S LINIMENT a very superior article, and we use it as a sure relief for sore throat and chest. When I tell you I would not be without it if the price was one dollar a bottle, I mean it.

Yours truly,

CHAS. F. TILTON.

PAVED WITH GOLD.

There's Money in the Street Scrapings of an African Town.

Travelers declare, says Harper Weekly, that at Axim, on the Gold Coast of Africa, gold may actually be picked up in the streets. When one visitor, an Englishman took the statement as a mere figure of speech his host immediately bade a woman servant go out into the main street, gather a basketful of road scrapings and work it for gold dust.

In ten minutes the servant returned with two galvanized iron buckets, one filled with road scrapings and the other with water. She also brought three or four platters, varying in size from large plate to a saucer.

Removing several handfuls of the road scrapings and placing them in the largest platter, the woman picked out and threw aside the large stones, pebbles and bits of sticks and then moistened the remainder with water from the other bucket. This enabled her to remove smaller refuse.

The residuum she put into the next smaller platter, and she repeated the process until there was a quantity of sand and gravel ready for treatment. This she sprinkled freely with water and by deft circular movement of the platter brought the small gravel to the outside, where it could be thrust over the edge. When she had repeated this operation three or four times she treated the material, which now looked more like mud than anything else, in a still smaller platter.

At last, in the smallest platter of all, she had the bucket full of sweepings reduced to a handful or two of black sand. This she carefully washed and sifted. At last with a dexterous twist she brought the sand into a crescent, the outer edge of which showed a thin rim of yellow. It was unmistakably gold dust. The whole operation had taken half an hour, and it had produced about a shilling's worth of gold.

Minard's Liniment Cures Colds, Etc.

SCIENCE NOTES.

Pick-Ups of Interest From Here, There and Roundabout.

The heat units of the soldiers' rations as issued to-day are as follows: Russian, 4329; American, 4139; French, 3340; British, 3222; German, 3141; Austrian, 2633.

Some of the largest Canadian steamers in the Great Lakes trade are to be turned into ocean carriers and will ply between Montreal and England.

So far as is known, says the Connellsville Courier, the first American coke to be shipped to South America will be an official order for 4,500 tons from the Connellsville Coke Company to the Argentine Republic, to go from Baltimore. It is a trial order, and the success of the experiment with it will determine whether there will be more orders.

The latest issue of the directory of radio stations of the world lists 7,000 ships' wireless stations, which require the services of more than 15,000 licensed radio operators. The regular land stations required to handle the business of these marine stations number more than 1,000, with a working force of 3,200 men. In addition, the records show about 2,000 amateur stations in the United States to be licensed, although this is but a small percentage of the total number of amateur stations in the country.

Throughout the United States and Canada there are 300,000 miles of electric wire stretched overhead, which require the support of no less than 25,000,000 poles. It is said that about 4,000,000 poles are needed annually for renewals and new lines. Well-stocked German forests, which are the best-managed forests in the world, produce only 200 trees to the acre; the poles now standing would thus represent all the timber growing on more than 125,000 acres. In Canada considerably less than 100 poles are cut to the acre.

SEED SUPPLIES

Farm and Garden Needs for 1916 Practically Assured.

Field and garden seed supplies are practically assured for the 1916 planting. There is a scarcity in American grown crops, including beans, onions, and to a lesser extent sweet corn. Amongst the imported stocks, Swede turnips are rather short, also spinach and salsify and some varieties of carrots. Red clover and alfalfa are unusually short and show an advance in price from 30 to 75 per cent. Other kinds that might be used as a clover substitute, as alsike, are higher in price than the supply would otherwise warrant. Well-established Canadian seed houses, with contracts made two or three years in advance will have no serious trouble this season in taking care of their regular trade. Seed merchants, who depend from year to year on the surplus stocks that may be offered, may have less assurance as to the character of their supplies.—Seed Branch, Ottawa.

$1,000.00 Reward Forfeited If Remedy Fails

We hope this notice will reach the eyes of people who are troubled with constipation and bowel trouble. Dr. Hamilton's Pills have been guaranteed to cure any case within three days, and the above reward will be paid for any case resisting this greatest of all remedies.

No prescription ever written could surpass Dr. Hamilton's Pills of Mandrake and Butternut. For years they have been curing the most obstinate cases of constipation, biliousness, headaches and sour stomach. Here is your chance to test Dr. Hamilton's Pills. If they fail—your money back for the asking. Be sure you get the yellow box, and insist on being supplied with only Dr. Hamilton's Pills of Mandrake and Butternut, 25c at all dealers.

Saw It in a Dream.

For many years ivory manufacturers were trying to devise a machine for turning out a billiard ball as nearly perfect as possible and at the same time avoiding waste. Among those who strove to perfect such a machine was Mr. John Carter, of the firm of John Carter & Son, well known ivory manufacturers of half a century ago, whose premises still stand in Bishopsgate. One night after Mr. Carter had been striving to solve the problem for some time he suddenly awoke his wife by shouting out, "I have got it!" and rushed downstairs into his study, where he made a drawing of the last knife, for the want of which he had been so long waiting in order to complete his machine. It appears that he had fallen asleep and dreamed about the machine, and in the dream the solution of the difficulty was revealed to him.—London Standard.

Minard's Liniment Cures Distemper.

Drifting.

The days pass along as if never to end,
But the evenings are filled with delight,
For a smile on the lips of the gay dancing girl
Brings a joy mid the dazzle of night
So we drift and forget all the science we know
And the things that we ought to have done,
Till the charms of the fireside and love for the home
Are all killed by the frivolous fun.

Thus we drift to the East and we drift to the West
With our rudder and centre-board gone,
For our ideals of all that mean love and success
Are unknowingly trampled upon.
Yes it's easy to drift with the flow of the tide
And the will of the winds in their play,
But it's hard to admit at the end of the night
That we've nothing to show for the day.

So at last we arouse from the stupor of wine,
From the sin and the waste of it all,
And we fight to get back on the straight narrow path
And some do, but the most of us fall.
Then it's hard to admit that we've lost in the game.
So we bluff it the best that we can,
Till the devil who waits with a sarcastic grin
Stakes his claim on what's left of the man.

—Tom Sawyer.

Minard's Liniment Cures Garget in Cows.

A CHEERING VIEW.

(Rochester Post-Express)

Never has humanity been without its dream of a golden age, and ever has it been conceived as lying ahead in a far-off, happy time. No doubt it will always lie before us, since conditions must grow fairer with the centuries, and no generation can hope to see them in their full fruition. Progress to perfection is interminably slow and a thousand years for us is as a day with God. But are there not multiplying indications that such a horror and hatred of war will grow out of this one that an age of international amity and honorable dealing may follow in natural reaction on this unparalleled outburst of rage and hate?

A man must be pretty sharp to fool a sharper.

"The Perfect Day" is the day when you work in harmony with law. Health comes from Harmony. Get in harmony with Nature's laws by eating Shredded Wheat, a simple, natural, elemental food which supplies the greatest nutriment with the least tax upon the digestion. Try it for breakfast with hot milk or cream. Delicious with sliced bananas or other fruit. Made in Canada.

FACED FOUR LIONS.

Coolness and Daring of a Plucky Kaffir Herdboy.

Four lions attacked a herd of cattle on a farm at Romsey, South Africa, says the Rhodesia Herald. The herdboy was standing on an anthill examining a pair of boots he had got the day previous, when he heard a low growl near him. On looking up he saw that three lions had got hold of three cows, while another lion was looking on.

The boy pulled off his boots to throw them at the nearest lion, and then made a rush for them with a stick, shouting at the same time to the top of his voice to another herd boy to bring a gun.

In the meantime two lions had got their cows down, but, nothing daunted, the Kaffir made a rush for them, and the lions moved away from their prey. The boy then rounded up his cattle (he had 104 head), and while he was doing so had to chase the lions away several times. While he was at the side the lions would try to catch the cattle on the other. However, he brought all his cattle safely home, though one of the cows afterwards died, the claw of a lion having penetrated her [illegible].

For cool daring it would be hard to beat the chasing of four lions single-handed, and with no weapons except a pair of boots and a stick.

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength and happiness by this method. Write to-day. Address: Mrs. M. Summers, Box [illegible], Windsor, Ont.

HUNTING THE CARIBOU.

Curiosity Often Lures the Watchful Animal to Its Fate.

In hunting the caribou quietness is essential. Never break a twig if you can avoid it, for a cracking branch makes a noise which carries far and may give warning of your approach to the very stag you particularly want. Equally important is it to keep a sharp lookout at all times, especially when entering a barren, where a deer may be sleeping, for under such conditions they are hard to see. Among the numerous gray dead stumps and moss covered low trees the color of the caribou is so inconspicuous that the untrained eye will fail to detect the animal even at close range. The first intimation will be a glimpse of a disappearing patch of white as the caribou vanishes into the woods.

All these things considered, the caribou of Newfoundland is not as alert as any other deer that I know of and is therefore more readily approached. There is, of course, great variation among them, some being extremely alert and difficult to approach, while others are so absurdly tame that they will allow a man to walk right up to within a few yards before taking flight. Curiosity is often noticeable failing with them. When once it is aroused they will go to almost any length to satisfy it. I do not, however, advise the hunter to count too much on it, for the very thing which you imagine will tend to this curiosity will as likely as not frighten them away. Sometimes a strange noise will make them very inquisitive and they will come within a few feet to find out what it is. Then, occasionally a white handkerchief will have the same effect.—Radcliffe Dugmore, in "The Romance of the Newfoundland Caribou."

The Honeymoon.

The honeymoon has no definite duration, but is longer or shorter according as the temper of the high contracting parties determines, or their relatives or the weather, or the mode, or the comparative cost of travelling and staying at home. Briefly, it is the interval during which the man, going out in the morning, remembers his kiss and forgets his overshoes as distinguished from the interval during which he remembers his overshoes and forgets his kiss.

Minard's Liniment Cures Diphtheria.

LEARNING TO UNLEARN.

Modern Scientists Harking Back to Thales of Miletus.

When we were young and knew without doubt that the molecule is composed of two or three subatomic parts, called atoms, we listened complacently to the statement that "science progresses in a straight line, philosophy around in a circle, or best along a helical spiral." Now that we are older and believe that the simplest atom has nearly 1,900 parts, we find that perhaps the helix is the prerogative of science as well, observes the editor of the Engineering and Mining Journal.

We believe, with the alchemists, that the so-called elements are fundamentally the same. Whether we can transmute one to another remains to be seen; we follow the alchemists in attempting it.

Were one of the Greek philosophers, Thales, of Miletus, for instance, to stroll into a modern assembly of physicists and chemists, the language would be more troublesome than the ideas. He would hear the physical chemist remarking cheerfully that there is no matter, for that which we call matter is only energy, and Thales would remark, "Plagiarist." The disciples of relativity, the ultra modern physicist, would tell him that space and time are one, and Thales would sigh to think of his boyish debates.

...Richard took up the pen, stead... ...ne parchment with the fingers of ...mall, white hand, and signed his ...ential name, with its well-known ...ish.

...en Lord Marmion nervously ...ed his name.

...s. Newton came smiling up and ...in her name with a self satisfied ...

...t was Stella's turn, and the lawyers ...ked patiently at her as she rose ...d came toward the table, on Lord ...armion's arm.

"You sign here," whispered the ...awyer, "just along this pencil line ...our full name, if you please."

She seated herself, took the pen, ...hich Lord Marmion handed her, and ...ent her head to write.

Then her hand trembled, and she paused as if about to refuse.

But the next moment she set the pen to the paper, and the words which would have bound her for life would have started up on the parchment had not a voice, which seemed to thrill through the room like the deep, clear clang of a midnight bell, started the pen from her hand.

"Stella! Stop! I am here!"

She turned with a wild, mad cry, half of fear, half of joy, and rose with outstretched hands.

All eyes were turned likewise, and every one, lawyers, Lord Marmion, Mrs. Newton, Sir Richard himself, seemed terrified into action.

There in the doorway stood two men: a young gentleman in rough traveling dress; a man, grim and ferocious, behind him.

Sir Richard's stupefaction lasted for only a minute.

"Mr. Felton, this intrusion is an insult which I shall know well how to punish."

Louis struck his arm from his grasp, and, taking Stella on his own, led her to the table.

"Gentlemen, my lord—I am Louis Felton, the master of Heavithorne, and this lady's affianced husband. Silence!" he added, suddenly, as Sir Richard moved toward him, and white with fear or passion, seemed about to speak.

"Silence! Interrupt me at your peril! Gentlemen, I demand to see those deeds!"

Lord Marmion, all courage now that there was some tangible work in hand, came forward, stern and proud.

"You demand! By what right, Mr. Felton?"

"By the right of this lady's plighted troth. Is it not so?" he murmured, in Stella's ear.

"It is true, let him see the deeds."

The lawyers glanced at Sir Richard, but, without waiting for their permission, Louis took up the deed, glanced at it, then turning to Lord Marmion, said, in distinct tones:

"As I suspected. My lord, you have narrowly escaped a fraud. The deed is a fraud from beginning to end. There are no such moneys, no such estates, as are here set forth. Sir Richard Wildfang is a bankrupt, a rogue, a swindler, and will soon, if justice be not balked, be a felon!"

Sir Richard strode forward, but the other figure advanced.

"Stephen Hargrave!" breathed Sir Richard.

The man did not smile in triumph, but kept his hungry eyes fixed in hatred upon the smooth face and nodded sullenly.

"You doubt my word?" said Louis. "I prove it. Mr. Dewlap, be good enough to produce Sir Richard's books."

The door opened, Mr. Dewlap entered.

"You——" said Sir Richard.

"Silence!" said Louis. "He was compelled. The law is stronger than even you, Sir Richard Wildfang."

"Explain those entries," said Louis.

"Stop!" said Sir Richard, with a malignant smile. "I will save you that trouble. It is quite true, Lord Marmion. I am a broken man. I fail to-morrow."

Lord Marmion turned pale, and caught him by the arm.

"Scoundrel! Where is Stella's fortune?" he breathed, in an agitated whisper.

"Gone!" retorted Sir Richard, "every penny."

"Then you are guilty of embezzlement, Sir Richard!" broke out Lord Marmion's lawyer.

"And forgery," exclaimed another, tapping a document, excitedly.

Mrs. Newton screamed and rushed to Lord Marmion.

"Lord Marmion, who are these dreadful people? What does it all mean?"

"It means, madam," said Louis, "that the mask is stripped from the face of a plausible villain. I am Louis Felton, whom you know as the master of ruined Heavithorne, whom you may remember as the suitor for your daughter's hand. That man is Sir Richard's accomplice, dupe and tool. He it was who worked out the vile plan which branded me with [illegible]; he it was who lured me by a false tale to hire a carriage and appear at the scene at the moment at which my presence was required to carry out the scheme which that villain had planned. The man can tell you the story at some future time. If you seek confirmation of my words, look on that face and find it," and he pointed to Sir Richard Wildfang, who stood with white face, biting his lip and struggling for calm.

"So you have betrayed me, have you?" he hissed at Stephen Hargrave. "Traitor! let those believe you who are blind enough. As for me, I shall seek justice where I am at more liberty to obtain it than here," and he glared at Lord Marmion.

Stephen Hargrave stretched out his hand and with main force held him back.

"Not yet!" he breathed, hoarsely, "not yet!"

Louis held up his hand to restrain him and, addressing Lord Marmion, said:

"This assertion you hear proves [illegible], my lord, the culprit confesses as much of his crime. He is bankrupt, penniless, he says; therefore Miss Newton's fortune is——"

"Lost, lost! oh, heaven!" shrieked Mrs. Newton.

"Not lost!" said Louis, quietly.

All the lawyers rose breathless.

"It is here," said Louis, taking a bag from Stephen Hargrave and placing it on the table.

"The scheme, more scheme, after scheme, and the webs of all are broken. These books have been falsified to suit his purpose. The money which is here set forth as expended he buried under the shrubbery of the Hut! Look at his face! Ask him how we have discovered that, and if he can't tell you, I can. An old man and a child were taking shelter within a dozen yards from him. They saw him bury the money! Then saw him, maddened by his guilty fear, try to escape from them. Alas! far worse! They were in his path, and as was his wont, he swept them from it. The old man and his child fell. The child died, murdered by the hand of its father."

Sir Richard started, and turned his white face toward the group.

"Father!" he said, with a hollow [illegible]. "It was Lucy's child, then! Lucy's child!"

"It was," said Louis sternly. "Your bad deeds, your cruelty, have returned upon your own head. Have you no remorse?"

"It was them, then," he muttered, "it was their ghost! I saw it! I knew it!"

He covered his face for a moment with his hands and all were silent. Then, suddenly, he sprang at Stephen Hargrave, and, clutching his coat, glared at him.

"All this is your doing! You have betrayed me, have found him and brought him here! Why did you do it? Did I ever do you any harm? Had you any spite to satisfy, any jealousy, any hatred? I paid you—I bought you. Why did you play traitor?"

"Do you ask me? Do you want to know?" said Stephen Hargrave, in a hoarse whisper.

"You can, I do!" snarled Sir Richard.

"Look back, then!" said Stephen Hargrave. "Look back to the night you stole an innocent girl from her home and the man who loved her! Lucy was that girl! I am the man you stole her from!"

"You," said Sir Richard. "Lucy's lover!"

"Ay, Lucy's lover and Lucy's avenger," retorted Stephen Hargrave.

Sir Richard looked around helplessly, then moved toward the door.

One of the lawyers rose as if to stop him, but Lord Marmion held up his hand.

"Let him go," he said.

Sir Richard, with a [illegible] smile, slowly passed out at the door.

The moment his hated presence had left the room Stella's strong [illegible] gave way. With a cry of relief and joy she fell back in her lover's arms. Mrs. Newton rushed toward her, the lawyers crowded around, folding up their parchments as they did so.

Lord Marmion rang the bell for water, and a messenger to send for a doctor. All was in confusion. For some minutes the swoon lasted, then Stella opened her eyes.

"He has come!" she murmured, looking up at Louis' face with deep, loving truthfulness.

"Forever!" he said.

"And you are here," she said, with a soft sigh.

"Forever," he breathed again.

Then all at once, and at the same moment, they missed Stephen Hargrave.

Louis' face turned grave, and, placing Stella beside her mother, he beckoned Lord Marmion aside.

"Let someone go after and secure him, my lord, or there will be mischief!" he whispered.

Lord Marmion hurried from the room and the search and pursuit commenced.

But Stephen Hargrave had got the start, and used it fatally.

The detectives found the dead body of Sir Richard Wildfang, lying shot through the head in his private room. But Stephen Hargrave was never more seen by any whom this story concerns.

* * * *

It is Christmas eve once again.

Christmas at the Hut, which is now resplendent with all the glories a great upholsterer can produce.

In the hall blazes a fire whose ruddy light falls upon a happy group.

There are the cousins, the schoolgirl, Trittie, and all. There is the old cousin, sitting smiling in his corner, and Mrs. Newton opposite, smiling—really smiling, too. Above their heads hangs a picture of an old man, humpbacked and misshapen, with a child's face peeping from his coat. Both the old man and the child are sleeping together in the little churchyard in the Vale, waiting till they awaken in the country of eternal summer, but the firelight seems to endow their faces with life, and they look down smilingly.

"Eight o'clock," [illegible] Trottie, her voice breaking in through the laughter and chatter. "Eight o'clock, and Cousin Stella and Louis will soon be here!"

They are all waiting. The fire blazes higher, the excitement of suspense and expectation rises with the fire.

Suddenly Trottie's sharp ears catch the rattle of carriage wheels. There are sounds outside, men cheering, boys hurrahing. Instantly the cousin, Mrs. Newton, the old man himself, all rush out into the hall; the carriage dashes up, the hall door is thrown open, and there enter Stella and Louis, the bride and bridegroom, just returned from their wedding tour, returned to spend their Christmas at home!

With all three cousins clinging to Stella, happy, blushing Stella is dragged into the firelight.

All the voices seem to talk and laugh at the same time. There is such kissing and hand-shaking, such wishing of Merry Christmases and Happy New Years as never were before, and no one can speak distinctly or intelligently until the happy welcome has been got through, and Louis returns to the room with his beautiful Stella upon his arm.

Then they crowd around them again, and it is not until the question has been put for the fifth time that the old cousin can croon forth:

"And what about the law suit, Mr. Felton?"

"Oh, the law suit!" laughs Louis, drawing his wife toward him. "We've won it, Cousin John! We've won it, and everything else. We are rich now in money, in friends and in love. Listen! There are the bells! Girls, children, all, a Merry Christmas and a Happy New Year!"

"Yes, it is Christmas day," murmurs Stella, an hour later, when they stood locked heart to heart in the now silent room. "Do you remember our last Christmas, Louis?"

"Shall I ever forget, my own?" he breathes.

"How we feared—also, too truly!"

"Yet how we loved," he breaks in, stopping her with a kiss. "Christmas has been a happy season for us, my darling. This is the happiest of all, for it is Love's Christmas!"

THE END

Cream, Butter and Yellow.

Scientific experiments have demonstrated that, contrary to the general belief, the yellow color of cream and butter is not necessarily an indication of their richness. It was discovered long ago that most yellow matter contains a yellow substance called "carrotin" because it exists abundantly in carrots. It is this substance contained in the cow's feed that gives rise to the color of milk and butter. Carotin is most abundant in the green forage available in spring and summer, so that milk and butter produced then are more yellow than in the winter, although the percentage of fat in winter milk often is higher than in the rich looking produce obtained in summer.

SUNDAY SCHOOL LESSON

Lesson III. January 16, 1916

Peter's Sermon in Pentecost.—Acts 2. 11-47. Print 2. 22-24, 29-41.

Commentary.—I. Prophecy fulfilled (vs. 14-21). The charge the mockers made, that those upon whom the Holy Spirit came were filled with wine, gave occasion for Peter to meet the accusation and declare to the people the great truths of the gospel. Orientals did not eat or drink early in the morning, which fact was a sufficient answer to their wicked charge. Peter in his discourse had a far deeper purpose than to clear himself and his fellow Christians of this accusation. He wished to show that the marvelous manifestations of that day were the fulfillment of prophecy. He quoted the words of the prophet Joel and applied them to the outpouring of the Spirit on the day of Pentecost. The joy of the believers, their efforts to express them to the outpouring of the Spirit on the day of Pentecost. The joy of the believers, their efforts to express that joy and their ability to declare in many languages the wonderful works of God, came as a result of their receiving the Holy Ghost.

II. Jesus, the Messiah (vs. 22-38). 22. Ye men of Israel—Peter addressed his hearers in a most respectful manner. They could have been called by no more exalted name than Israel. A man approved of God—Jesus is spoken of here as a man, as he really was, but is later shown to be the Son of God. He was approved of God in that he wrought miracles publicly. Miracles and wonders and signs—These distinct names are given to Christ's marvelous works according to the light in which they are viewed. The first name, miracles, literally, powers, is applied to them because they proclaimed the might of him who wrought them; they are named wonders, because they called forth that feeling when they were wrought; and signs because they point out their author as divine.—Cam. Bib. Know.—The works of our Lord were public and so numerous that all knew about them. 23. Being delivered—Jesus permitted himself to be delivered into the hands of men. Judas was the voluntary agent in betraying him. Determinate counsel—It was necessary to show the Jews that it was not through Christ's weakness or inability to defend himself that he was taken, nor was it through their malice merely that he was slain; for God had determined long before, from the foundation of the world (Rev. 13: 8) to give his Son a sacrifice for sin, and the treachery of Judas and the malice of the Jews were only the incidental means by which the great counsel of God was fulfilled; the counsel of God intending the sacrifice, but never ordering that it should be brought about by such wretched means.—Clarke. Ye ... by wicked hands have crucified—Peter charged home the crime upon his hearers. The Jews were responsible for his death. They had condemned him and wicked, lawless men had inflicted the death penalty. 24. Whom God hath raised up—The doctrine of Christ's resurrection was an essential part of the gospel message, and the apostle was bold in its declaration. Loosed the pains of death—God undid the work that death had accomplished. Not possible—Jesus is divine and from the very nature of his being death could not claim him permanently. He had power to lay down his life and he had power to take it again. 25-28. To prove his declaration Peter quoted from Psa. 16, this scripture having direct application to Christ.

29. Men and brethren—Peter was addressing his fellow Jews and he knew that they recognized the authority of the scriptures. Patriarch David—One of the great personages in Jewish history. His sepulchre is with us—His burial-place is in the southern part of Jerusalem. 30. Being a prophet—Although David is not classed among the prophets, yet he foretold future events and declared the word of the Lord. Raise up Christ—The promise of an everlasting kingdom is given in 2 Sam. 7. 12, 13, 16. His soul was not left in hell—"Neither was he left unto Hades."—R. V. The best manuscripts have no words for "his soul." Jesus did not remain in the abode of the dead. 32. This Jesus—He who is prophesied of in the scriptures and He whom Peter's hearers had known and had put to death, and of whose resurrection the apostles were witnesses. 33. Exalted—Jesus had finished His earthly ministry and had ascended to the right hand of the Father. He hath shed forth this—Jesus had sent the Comforter, the Holy Ghost, as he had promised (John 16, 26), and His coming had made the stir that brought the multitudes together. 34. David is not ascended—But Christ has ascended. The Lord said unto my Lord—The Father said to Christ the Son, "Sit Thou on My right hand." 35. Thy foes thy footstool—It was a custom of ancient conquerors to place their feet upon the necks of those whom they had conquered. 36. Therefore—Peter is about to draw the powerful and inescapable conclusion from his argument that he whom the Jews had slain was the Messiah, Christ—The anointed One.

III. The church founded (vs. 37-41). 37. Pricked in their heart—The Holy Spirit had spoken through Peter and his hearers were awakened and deeply convicted. What shall we do—It was not enough that they felt deeply. There was a call to do something. They felt their guilt and desired relief. 38. Repent—Turn away utterly from your sins. Be baptized ... In the name of Jesus Christ—They were directed to declare publicly their faith in him whom they had put to death less than two months previously. For the remission of sins—Baptism was the external act which signified the internal work of deliverance from sin. Shall receive the gift of the Holy Ghost—By the gift of the Holy Ghost they become truly one with the sanctified hundred and twenty, and are empowered to do mighty wonders in behalf of Christ the exalted Lord.—Whedon. 39. The promise—The promise quoted from the prophet Joel and the promise of the gift of the Holy Ghost. Shall call ... God has invited all mankind to come to him. 40. Save yourselves—Salvation is provided, therefore take the steps necessary to salvation. Untoward—Crooked, perverse. 41. Received his word—They not only heard the word, but believed and obeyed it. Were added—To the one hundred twenty believers in Jesus there were added in one day three thousand more, as a result of the gift of the Holy Ghost in His fulness of the world.

IV. Christian fellowship (vs. 42-47). The fellowship that came to exist among the disciples and converts was produced by all partaking of the Holy Spirit. They became at once one in nature and purpose. The occasion demanded that those who had possessions should share with those who were destitute. Multitudes were present from a distance and must be provided for. There was a recognition of the need and a hearty response on the part of those who were able to assist. They were all like one great family. They were daily gathered in religious meetings in the temple and in other places, and the Lord gave them great success.

QUESTIONS.—What was the occasion of Peter's address? Give the leading points in the address. What effect did it have? What question did the people ask? What was Peter's reply? How could they save themselves? How many were converted on that day? How did they prosper? How did they keep the unity of the Spirit? Who were added to the church? What is the duty of the church to-day with respect to supporting the work of the Lord?

PRACTICAL SURVEY.

Topic—Expository preaching.

I. Upon ancient prophecy.

II. Upon personal experience.

I. Upon ancient prophecy. Peter spake to an audience of different nations who expressed every variety of surprise, doubt and curiosity. His discourse was a disclosure of the purpose of the ages past. He challenged the knowledge of those to whom he spoke in a summary of indisputable historic facts. However prejudiced they might be, none could object to his citation from the prophet Joel. Peter began where his hearers could begin. He set before Israel their remaining opportunity. From the very first, gospel preaching was made to rest upon an historical basis. The whole gospel of man's salvation was included in Peter's discourse. His subject claimed attention by the importance of the blessing which it set forth. He made his hearers feel that Jesus was God's messenger. He affirmed that, regardless of appearance as they viewed them, Jesus had gained a complete victory. The multitude felt the application to themselves of the apostle's appeal. What they heard was a narration of facts. What they understood by them was a summons to action. All was seen to be clear and consistent though the inference was one of shame and condemnation to them. Compunction was the first fruit of Peter's preaching. His hearers were stung with remorse at the enormity of the wickedness which had been committed in the crucifixion and at the blindness with which the whole nation had closed their eyes to the teaching of the prophecies concerning the Messiah. Their words indicated an intelligent, conscientious, heartfelt awakening. Consciousness was repressed. Reverent respect was produced. Earnest inquiry was awakened. That which followed immediately on Peter's preaching brought out the truths of the gospel as fully and forcibly as the discourse itself.

II. Upon personal experience. The gift of the Holy Spirit brought forth abounding evidences of spiritual life. The brave, outspoken tone of Peter's discourse evidenced the power and influence of the Holy Spirit upon his mind. His sermon was remarkable because of its enlarged and enlightened spirituality. It proved the Spirit's power in illuminating the human consciousness. There were elements of power in Peter's discourse noticed in its adaptation to circumstances, its scriptural basis, its unsparing rebuke of sin, its faithful setting forth of the life, death and resurrection of Christ, and the acknowledged presence of the Holy Spirit. The change in Peter gave a true idea of the effect of the outpouring of the Holy Spirit. The ardent, impulsive, enthusiastic, cowardly Peter was the subject of Pentecostal power. He was transformed into a profound expositor of the divine purpose in the creation and education of the church. Peter calmly and kindly routed out the false charge of drunkenness as the actual opinion of intelligent men. He then interpreted the facts which the mockers had misinterpreted. His position was that of spokesman for and defender of the brethren. With him there was no trace of hesitation or embarrassment. There was calm, concentrated force in his sermon. He wrought no miracle to astonish or impress the people. He prevailed in the world of his testimony. He declared to the astonished world that they were not witnessing the fulfilment of an ancient Jewish prophet's prediction. He uttered the words of Joel on the very day of their fulfilment, the day on which God had poured out his Spirit upon the apostles in the bestowment of the great gift of the Holy Ghost. It was the giving of a new life, a new energy, the spirit of truth, the spirit of love which enabled them at once to see things as they were and as they ought to be. They saw how dark, how sad, how imperfect, how sin-stained men's lives were. They were impelled to make the call to repentance. That first sermon preached on the day of Pentecost was a great event in the history of the church. Three thousand felt the power of truth and yielded to it. Peter demanded repentance, faith and obedience. The results of that Pentecostal day were evidenced in the permanence of discipleship, a general spirit of reverence and a new mode of life.

T. R. A.

A Reason for Tears.

An amusing story about Dr. Archibald Pitcairne, the physician, Jacobite and scholar is told by Francis Watt in "The Book of Edinburgh Anecdote."

Dr. Pitcairn was not often a churchgoer, but on one occasion he took refuge in a church from a shower of rain. The sermon was commonplace, but the preacher was emotional, and he wept copiously and, as it seemed to Pitcairne irrelevantly. He turned to the only other occupant of the pew, a stolid countryman, and whispered, "What on earth gars the man greet (weep)?"

"You would maybe greet yoursell," was the solemn answer, "if you was up there and had as little to say."

MAKING TOMMY ATTRACTIVE.

(Youth's Companion)

Ethel, the 12-year-old daughter of a family that resides in an uptown apartment house, recently said to her mother:

"Mother, I wish you'd wash Tommy's face."

Now Tommy was the son of the man whose apartment adjoining theirs. So mother was both alarmed and astonished.

"The idea!" she exclaimed. "Why, he's a neighbor's child! I have nothing to do with him."

"But I have!" exclaimed Ethel. "We've become engaged, and I want to kiss him for the purpose.—Harper's Weekly for the purpose.—Washington Post.

Dog Hero of French Army

An American correspondent in Paris writes as follows:

Before the war the French made very little use of dogs for military purposes. The Germans began training them for war as long ago as 1885, while the French paid no attention to the subject until a dozen years later, and then only for ambulance work. At the outbreak of the war the Germans had 25,000 dogs ready to be mobilized. To-day there are over 1,200 dogs employed along the whole French front.

It was the old story—the French failed to learn from the enemy. They even ridiculed the Germans about their war dogs. A French author, Aurelien Scholl, describing German manoeuvres, made fun of the company of ambulance dogs as follows:

"Before Gen. Waldersee there passed in review the Second Bulldog Brigade, the First Regiment of Bow-wows and the Second Regiment of Imperial Poodles, those over seven years enter the Landwehr, and all those who have their tails in the shape of a trumpet are enrolled in the band."

"Three classes of dogs are now being used at the front," said Secretary G. Bert of the French Association for Training War Dogs to The World correspondent. Bert, who is back wounded from the front, was in charge of the detachment of war dogs at Arras last December. "They are patrol dogs, linking dogs and ambulance dogs," he said. "The first class are always of the sheepdog breed, chiefly from Picardy or Flanders, and noted for their intelligence and sense of smell. Their calm temperament, too, counts. The fox terrier also was tried but his nervous system was found to be too delicate and highly strung and consequently his temperament is too excitable. The sheepdog's sense of smell is wonderful, he easily detects the presence of an enemy a hundred or even a hundred and fifty yards away.

TRAINING FOR SERVICE.

"The training of the dog for sentinel and patrol work, when he is always accompanied by soldiers, is simple and speedy. Of course, there is, first of all, a selection of specially intelligent dogs made in Paris, but when the dogs selected have been sent to the front it requires only four nights' teaching to make them fit for their work. The chief difficulty is to only growl. Violence is never used; make them learn not to bark, but a tap or two on the head is enough when they start barking.

"The training of dogs for linking purposes—that is for keeping two bodies of soldiers in touch with one another—requires two months. The course for an ambulance dog is nearly a year. The ambulance dog, unlike the patrol or linking dog, must be taught to bark so as to give notice to the battlefield searchers when he has found a wounded man.

"In the case of patrol and linking dogs there must always be some one whom the dogs know at the point to which he is to be sent. The dog must have exceptional qualities if he is to act independently; if he is to be used, for instance, for dragging a stretcher out to wounded men under fire or small portable kitchens on broad wheels to men in advanced fighting line, or at a listening post. They cannot be used for independent work where woods or forests have to be negotiated.

THE SENTINEL DOG.

In linking work the dog at the outset always makes first for his point of departure and from there starts for the detachment to which he is to carry his message; but on his second or third journey his sense of smell enables him to make a short cut between the two points. The speed shown by the linking dog is sometimes remarkable. One strong dog has been known to cover a mile in less than five minutes, and at French manoeuvres before the war dogs sent out on linking duty returned thirty-five minutes before a squad of cavalry despatched on the same duty at the same time.

"The patrol, or sentinel, dog works only at night. During the day he stays in the trenches with the men, most of his time asleep. Then, when night descends he leaps out of the trenches and passes the hours till down in the perilous work of patrolling the four or five hundred yard front the party is assigned to cover. Thanks to him, the party is insured against surprise by an enemy patrol."

War dogs are recruited from all parts of France, the majority being loaned by peasant farmers for the duration of the war.

"I have already three sons and a son-in-law with the colors; now I give my dog—and vive la France!" wrote one father of a family to the association when offering his dog.

AMBULANCE DOGS.

Some ambulance dogs are famous. To mention only three. There is "Loulou," the gift of the poet Edmund Rostand to the French army; "Stop," of the Fifteenth Army Corps, who has saved scores of lives, and "Flore," of the Twelfth Alpine Chasseurs, who did linking work for four days running under a rain of shell without receiving a wound.

Dogs have not yet been quoted in Army Orders. When they are, there is one dog that will not be forgotten—"Marquis," who, though wounded by shrapnel, kept on his way to a far-off detachment and arrived breathless and panting at his destination, only to die as the despatch he carried was taken from his neck. "That dog deserved the Legion of Honor," many remarked.

THE FUNNY SIDE.

Boston has decided that a woman ceases to be young at 40. But with all due respect to the omniscience of the Hub it depends on the woman. Some men are younger at 40 than others at 25.—Kansas City Journal.

"Mamma, did you say the baby came from Heaven?" "Yes, why?" "I don't think he came, I think he was fired. How could the angels sing with him puttin' up that holler all the time?"—Houston Post.

Judge—This is the tenth time you have come before me, Kelly! Prisoner—I'm sorry, Judge; but the cops don't seem to care how much work they make you.—Puck.

Mrs. Buggins—It's a relief to find some people out when you call. Mr. Buggins—Yes, especially when you are playing poker.

Blobbs—Bjones is generous to a fault. Slobbs—Yes; he even gives his friends away.

Wigwag—What is you wife mad about now? Henpeckke—Her absentmindedness. She was going to scold me for something, and now she can't remember what it was.

"I hope, Uncle Mose, you are not a misanthrope." "No, sah; I'se a Baptis'."—Baltimore American.

Professor Watson is doubtless right about its being possible to teach animals to talk. Why, even human animals talk, sometimes just like monkeys.—Baltimore Sun.

"I hear old Gotrox has lost every dollar he had in the world." "You don't say! What was it, failure?" "Yes; heart failure."—Boston Transcript.

"Alas! I am blind," wailed Love. "Why don't you consult a doctor?" demanded Experience. "I know a famous specialist who could cure you." "What is his name?" asked Love. "Marriage," replied Experience.

"Have you no friends?" asked the Recorder. "No, Judge, nuthin' but relatives."—Newburgh Journal.

Mrs. Homespun—What'll we contribute to the minister's donation party? Farmer Homespun—Wal, I dunno, Mandy. Taters is 'way up, pork is 'way up, fuel is 'way up—we'll turn money by giving him money.—St. Paul Dispatch.

The Aurora Borealis.

The aurora borealis, or northern dawn, is an electrical phenomenon which in high northern latitudes, especially in winter, illuminates the skies with streamers of light. As the streams of light have a tremendous motion, they are called in many places the "merry dancers." They assume many shapes and a variety of colors, from a pale red or yellow to a deep red or blood color, and in the northern latitudes they serve to illuminate the earth and cheer the gloom of the long winter nights. The connection of the aurora displays with the disturbance of the magnetic needle is now regarded as an ascertained fact.

Could Hardly Br...

BRONCHITIS

Was The Cause; The Cure Was

DR. WOOD'S

Norway Pine Syrup.

Mrs. Garnet Barns, North Augusta, Ont., writes: "I caught a dreadful cold, going to town, and about a week after I became all choked up, and could hardly breathe, and could scarcely sleep at night for coughing. I went to the doctor, and he told me that I was getting bronchitis. My husband went to the druggists, and asked them if they had a cough medicine of any kind that they could recommend. The druggist brought out a bottle of Dr. Wood's Norway Pine Syrup. I started using it, and it completely cured me of my cold. I cannot tell you how thankful I was to get rid of that awful nasty cold. I shall always keep a bottle of Dr. Wood's Norway Pine Syrup on hand, and I shall only be too glad to recommend it to all others."

Dr. Wood's Norway Pine Syrup is a remedy that has been on the market for the past twenty-five years, and we can recommend it, without a doubt, as being the best cure for coughs and colds that you can possibly procure.

There are a lot of imitations on the market, so when you go to your druggist or dealer see that you get "Dr. Wood's;" put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

The genuine is manufactured by The T. Milburn Co., Limited, Toronto, Ont.

HE GOT HIS DOG.

Stalwart Albertan Took His Pet Back, After All.

A dirty, big-eyed, little mongrel fox-terrier that had cringed and bidden all through the German front, and finally, with a whole skin, found his way across their trenches and into ours, had been adopted by a big, brawny private from Alberta, writes Edwin Cleary, in the London Express.

The dog, the Canadian and a bow-legged, squatty Tommy of the barges type walked down to the quay to the ship that was to take them home on leave. When the six-foot-six Albertar and his one-foot dog were crossing the gangway, the mongrel was lifted from him by a policeman, who explained in several languages that the dog could not embark. Then the bargee, feeling that the Canadian, being a stranger, was under his immediate attention, grabbed the dog and squared off for fight. Gendarme whistles blew, and in a jiffy the mongrel and his loyal mates were surrounded by soldiers, police, passengers and a motley throng.

The bargee entered the arena like a star turn and sang out: "My mate is a Canadian, an' 'e's orf to Lunnon for a rest, 'e is, 'n' 'e's talken the little tyke to 'is loidy"—holding up the dog—"my mate owt to 'ave medals on him, 'e owt. When them tight 'undred Germans got funky at Aubur, this little tyke led 'em into our trenches, and they surrendered. 'E's a weddin' present my mate's a-talken to his loidy luv in Lunnon, an' yet ain't goin' to stop 'im doin' of it—is ye?"

While this was going on all eyes were centred on the large-eyed little mongrel fidgeting to be in the strong arms of the big-hearted, pathetic-looking soldier from the shadow of the far-away Rocky Mountains.

The police not relenting, the bargee made a last appeal to 300 passengers, looking over the ship's side: "My mate 'as been gassed, 'e 'as, by goin' in efter comrides as was done, an' 'e niver stopped goin' in after 'em until 'e wuz done hisself. This 'ere dawg 'as slept agin 'is 'art in the trenches f' three months, an' 'e luvs the tyke just loike a fust'b'rn, 'e does. The whole regiment kissed that pup good-bye, an' now just as 'e is a-goin' 'ome ye cop 'im, y' do. It ain't playin' the game, it ain't."

The packet whistle blew; two soldiers took the dog, and the Alberta man hung his head down as he walked up the gangway alone. When he lifted his face tears dimmed his sight, and as the packet pulled out from the dock the bargee pal, who remained ashore, grabbed the mongrel from the soldiers and threw him across the water—a full ten feet—into the arms of his master, who held him up and kissed the mongrel's face, amid the cheers of a dock full and a deck full, for the little refugee that led the Hun surrender and his big-hearted pal from Alberta.

"Come comin' over in the next 'un," shouted the bargee.—Winnipeg Tribune.

He Smoked.

"What a smell of smoke is about! Do you allow your husband to smoke in the parlor?"

"He doesn't, as a rule, but this morning"—

"You are very wrong to allow any exceptions whatever, my dear woman. You ought not to allow him to smoke under any possible circumstances, even once."

"But, my dear woman, this morning he simply had to smoke. His coat was on fire."—New York Journal.

Heart Would Beat Violently.

Nerves Seemed to Be Out of Order.

The heart always works in sympathy with the nerves, and unless the heart is working properly the whole nerve system is liable to become unstrung, and the heart itself become affected.

Milburn's Heart and Nerve Pills will build up the unstrung nervous system, and strengthen the weak heart, so that the sufferer will enjoy the very best of health for years to come.

Mrs. John N. Hicks, Huntsville, Ont., writes: "I am sending you my testimony for the benefit I have received from using Milburn's Heart and Nerve Pills. As a nerve and heart builder they have done wonders for me. At times my heart would beat violently, and my nerves seemed to be all out of order, but after using a few boxes of Milburn's Heart and Nerve Pills I feel like recommending them to others that they might receive benefit as I did."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years, and are universally considered to be unrivalled as a medicine for all disorders of the heart or nerves.

Milburn's Heart and Nerve Pills, 50c per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

WALKERTON, JANUARY 13th, '16

EDITORIAL NOTES

OUR GERMAN CITIZENS

A great injustice is done Canadian citizens of German descent, by those who insist on regarding with suspicion everying and everybody of German origin. The Telescope has no sympathy with those Germans who are enjoying the benefits of Canadian citizenship and uphold Kaiserism. But we must remember that the great majority of our German citizens are proving themselves true Canadians. If we admire the Canadians of Anglo-Saxon descent who give their sons for the Empire's battles, we must admire still more the sacrifice and patriotism of those German Canadians, of whom so many are giving their sons to go with the Canadian Contingents to battle against their own flesh and blood. These men realize that the fight is not against the German people, but against militarism, against a murderous principle, and they are willing to make the supreme sacrifice on behalf of what they believe is a righteous cause. All honor to these people!

EDITORIAL COMMENT

Some of us are still writing it "1915."

+ + +

Good will toward men, all men, was never needed more than it will be through the year of grace nineteen hundred and sixteen.

+ + +

Farmer's Advocate:—Every farmer should plan to make the winter just as busy and profitable as the summer, and the way is by keeping live stock.

+ + +

The United States will soon be dry if it keeps up the present clip much longer. The New Year saw seven more states in the dry column, putting 3000 saloons out of business.

+ + +

With nearly every factory busy in Walkerton, and the surrounding country enjoying the fruits of a recent harvest, the people of this community have a great deal to be thankful for.

+ + +

Now is the time for the young man to act who wishes to do his bit in preserving the Empire's freedom. No credit is due the man who enlists at the eleventh hour, never expecting to get to the front

+ + +

Medicine Hat Times:—The editor of a newspaper may blow his town sky high; it may soar in rhapsodical flight to the stars, but if the paper is without live advertisers, people say the town is a dead one.

+ + +

Sixteen municipalities carried local option last week, wiping out fifty public drinking places. In fifteen places the majority wanted prohibition, but the measure was defeated because of the three-fifths requirement.

+ + +

Every little helps. The $1.50 rate for weekly papers comes into force in Bruce County on February 1st, 1916. The raise will be general throughout Canada, all country weeklies announcing the advance in their respective districts not later than May 1st. The setting of February 1st in this section will give all a chance to pay their subscriptions in advance for 1916, so that all have the opportunity to get their home paper without extra charge.

+ + +

After God had finished making the rattlesnake, the toad, and the vampire, He had some awful substance left, with which He made a knocker. A knocker is a two-legged animal with a corkscrew soul, water-logged brain and a combination backbone made of jelly and glue. Where other men have their heads, he carries a tumor of decayed principles. When the knocker comes down the street, honest men turn their backs, angels weep tears in Heaven and the devil shuts the gates of hell to keep him out.—Exchange.

Glad To Get It.

Automobile Fees Raised

The automobile fees for 1916 will range from $10 to $30. For 25 horse-power or less the fee will be raised from $1.00 to $10.00; more than 25 horse-power and up to 35, from $10.00 to $15.00; more than 35 horse power and up to 50, from $20.00 to $25.00; more than 50 horsepower, $25 to $30.

+ + +

Good Sportsman Gone

The news of the death of Alex. Yule of Harriston on New Years Day was received here with genuine regret. Mr. Yule was one of the keenest lovers of curling and bowling in all Canada, and frequently played here. In fact he was secretary of the last big tournament here. Not in many years had there been a gathering of the Ontario Curling Association that the Harriston veteran failed to attend, and he had a large hand in making the rules of the roaring game as they govern the competitions in this Province. A good sportsman, and a good citizen, he will be greatly missed by the community in which he had spent the last 40 years of his life. Mr. Yule was prominent in the service of the town in many capacities, and occupied the office of Mayor for several terms.

ELECTION MEETING

Mayor Lippert Says He is Out to Get Cheaper Light Rates. Would Give Local Company a Chance to Sell Power to the Town in Bulk.

(Intended for last issue.)

The post-election meeting held at the Town Hall after the vote almost equalled in interest the nomination gathering of the week before, although the atmosphere was different. Bouquets instead of brick bats were the order of the evening. Very few contentious remarks were made, the successful candidates giving their attention largely to thanking the electors for the confidence shown, the defeated candidates vying with another to prove what good losers they were, and they were good losers every one, and the audience apparently convinced that they had done a pretty good days work in electing the 1916 Council, applauding every speaker, winners and losers alike. It may be that the good cheer which exuded from the person of the veteran chairman, Mr. R. H. McKay had something to do with the harmony and good feeling which characterized the meeting. At any rate it was a highly harmonious gathering.

Will Tackle Power Problem

In thanking the people for re-electing him, Mayor Fred Lippert expressed the opinion that the Councillors elected would make a good working Council of sane men. The next problem to tackle was cheaper power and light for Walkerton. In spite of everything, he would serve the people in this matter. The power company had had things their own way, but now with hydro in view the town was no longer at the mercy of the company. He had no fault to find with the street lighting rate. The commercial and private lighting rates were where the kick came. At Formosa and Mildmay the Walkerton Power Co. sold power to the municipalities by the horse power, these villages looking after their own distribution. Some such scheme should work better in Walkerton than the present arrangement. The matter would have to be taken up, and he did not see how any councillor should or could stand against the wishes of the people in this thing.

A Good Loser.

A. P. Johnston said he was defeated for the Mayoralty but not conquered. There was another year coming. When he had first decided to run he had understood that Mayor Lippert was dropping out, and he certainly found Mayor Lippert a hard man to run against. He thanked very heartily those who supported him and wished all the electors a very Happy New Year.

Chairman McKay compared Mr. Johnston to King Robert Bruce who though defeated, was never conquered and finally won.

Reeve A. E. McMab spoke very briefly, stating that he considered the people had made a good selection of men for the Council for 1916

Mr. Robert Russell, who headed the pole with a magnificent vote, thought it was partly due to the fact that being a new man he had no sins to answer for. He was very grateful for the handsome vote.

Mr. George Leitner thought it pretty hard running against the milkman, Mr. Russell had no doubt been putting cream in the milk lately. He thanked the electors heartily for the good vote received

"Will Finish His Work"

Douglas will "finish his work." Coun John Douglas expressed his appreciation of the fine vote which the electors rolled up for him. It was a pleasure to him after the way he had been attacked last fall on a private matter that the people had spoken by their votes as they had. Mayor Lippert knew that he (Douglas) would back him up the coming year. He had always done so and always would do so, so long as he "travelled right."

Councillor-Elect (Alex. McCarter confessed that he was "feeling pretty good tonight." With the little canvassing he had done, he was greatly pleased with the vote. He had promised that if elected he would do his very best and and he intended to stick to that promise.

In thanking the people for re-electing him for a third term, Coun. Henry Pletsch said he had not made any preelection pledges, and he did not make any now. By work rather than by promises he hoped to retain the confidence of the electors the coming year.

Major John Henderson thanked the good people of Walkerton for having left him at home. He had enjoyed all the municipal honors in past years, and had entered the present contest reluctantly at the instigation of friends The people said at the polls that they wanted the young. He believed the people had made a good choice for 1916. He suggested that the improvement of the streets be undertaken gradually, and emphasized the importance of a lower tax-rate.

Speakers From Brant

Walkerton people took a lively interest in the election in Brant, and moreover was greatly pleased with the results, the general impression being that that grand old township did herself proud Reeve Elect Spence Nesbitt was given a great reception, and thanked those Brant electors who were present for the honor conferred on him in re-electing him. He had been more or less at sea before the vote owing to his stand on patriotic grants not knowing how it was going to pan out. Of one thing he was convinced, that the German voters of Brant were just as patriotic as any. In the day's vote, he had gained in every German polling-subdivision.

Deputy Reeve Arch. Weir's great victory was one of the notable feats of the day. Mr. Weir thanked the electors of Brant heartily and assured them that he would do his very best for the interests of Brant.

Mr. Walter Findlay, one of the unsuccessful candidates, proved a very game loser. Some of the features of the results were so gratifying to him, he said that they more than counteracted his disappointment. He had great confidence in the men elected and believed Brant would have an excellent council this year. Mr. Findlay intimated that he might be heard from another year.

Mr. Frank Rennie moved a resolution of thanks to the Chairman for his excellent service which was very heartily carried.

In reply, Chairman McKay said the meeting was harmonious enough for a gathering in the Presbyterian church, and hoped that he might be spared for another hundred years to preside at such meetings.

The meeting closed with three ringing cheers for the King.

GREAT PUBLIC WELCOME

Was Extended to Capt. A. J. McNally and Private Weidner, Walkerton Boys Back From the Front—W. H. Price, M. P. P. Speaks

Walkerton turned out en masse Friday night to do honor to two of her boys from the front, Capt. A. J. McNally and Private Wm. Weidner. Half an hour before the time of meeting, the Town Hall was packed to the doors, with an audience of men, women and children from town and the surrounding countryside. In the unavoidable absence of Judge Klein owing to the serious illness of his daughter, Mr. David Robertson occupied the chair.

The program opened with a smart military drill, by the High School cadets. Then came a well rendered quartette, by Messrs Leeson, Robinson, Wilson and Taylor.

Lt.-Col. Weir told of the difficult position he had been put in to secure his staff for the 160th. Almost all of the 32nd officers being either at the front or on the reserve list. He spoke proudly of the men he had secured to be staff officers. He was pleased with the enlistment thus far. In fourteen days' recruiting 280 men had joined the colors, 65 at Walkerton. But the Walkerton recruits only 29 were real residents of the town, the remainder coming from Brant and the surrounding Country. Now that the holidays were over he hoped that Walkerton would furnish fifty recruits within the next few days. The Col expressed himself as proud of the way the 160th conducted themselves in the town. He thanked the citizens of Walkerton for their kindness, referring especially to the Walkerton Electric Light Co. who had offered lights for lighting and decorative purposes without cost.

Chairman Robertson said the commanding officer of the 160th Regt. was a real soldier. He had served in the ranks as a private under him (Robertson) thirty-four years ago. A splendid cornet solo was rendered by Bandmaster Wright of the 160th Regimental Band, a good marching song was sung by Private Geo. Wilson, who presented a fine strapping appearance in the khaki, and was heartily applauded.

A rousing recruiting speech was made by Mr. W. H. Price, M. P. P. of Toronto, who recently paid a visit to the Canadian troops in France.

Mayor Lippert then presented to Capt. McNally and Private Weidner, on behalf of the town of Walkerton, addresses of welcome.

Appropriately Worded Addresses

Capt. McNally who was warmly greeted by the audience, was grateful for the welcome accorded him. He gave a vivid description of life in the trenches. He spoke of the atrocities, the use of gas bombs etc. The speaker favored the use of gas on the part of the Allies, stating that the way to beat the enemy was to outdo him at his own game. Capt McNally related that once in the Festubert fight, when gap after gap had been blown in in his trenches, and finally a large gap where the trench had been blown completely away, the engineers rushing in to make good the damage, he had recognized the officer in charge of the engineers. "Hello Art," "Hello Roy," was the salutation of the two Walkerton boys in the midst of that unspeakable scene. Capt. McNally spoke forcefully of the need for men, and strongly resented the attitude of some men in his neighbourhood, who, he said were pro-German and stated that "This is not our war" at the same time that other men's sons were at the front facing shrapnel. He did not wish however, to offend the good German people. He had noticed over one half of the recruits from Walkerton to the 71st. were of German descent. He would like to have the man who got up at County Council to oppose the patriotic grant, stand up in front of a few shrapnel shots. He was glad that man got badly defeated at the polls as he deserved. Capt. McNally thanked the ladies of Bruce County for the many comforts which they had sent to him and the other soldiers at the front, and he presented to Miss McGregor, for the Walkerton I. O. D. E. a silver spoon with historical significance which he brought home from the Tower of London. Capt. McNally expressed himself in favor of conscription. We had to have trained men to win and if men would not come forward to fight, they would be made to fight.

Pte. Weidner in thanking the citizens for their kindness, told of a gathering of eighteen Walkerton boys which took place at Shorncliffe Camp, England, about three months ago, when they gave a send off to Huck, Anderson and Cartwright who were to leave for France. Private Weidner spoke well for an inexperienced speaker. He hoped, he said, when his leave expired to return to France, and get into the fight again.

The meeting dispersed about 10.45 with the singing of the National Anthem.

Golden Wedding

A very happy event took place at the home of Mr. and Mrs. Wm. Muschl of Brant-Tp. on Wednesday, Dec. 29th, the occasion being the Golden Wedding of Mr. and Mrs. Christian Ahrens of Elmwood. Rev. Mr. Henkel was the officiating clergyman. Fifty years ago they were married in Germany, emigrating to Canada about forty-five years ago. Among those present at the Golden Wedding were Mr. and Mrs. Henry Ahrens, Elmira Mr. and Mrs. Christian Ahrens, Elizabeth, N. J.; Mr. and Mrs. John Ahrens of Lethbridge, Alta., Mr. and Mrs. Fred Ahrens of Rosetown, Sask. Mr. and Mrs. Herman Ahrens, Brant, Mr and Mrs. William Ahrens, Elmwood and Mr. and Mrs. Clarence Krueger, Walkerton. There were four generations represented in the gathering. After the ceremony Mr and Mrs. Ahrens were each presented with a pair of gold-rimmed spectacles. Mrs. Muschl had a capital supper for her guests and the evening was a very happy one indeed.

Mrs. Kembke of Chesley has been visiting her parents, Mr. and Mrs. R. Weiss.

Mr. Robert Reed of Lavergne, Sask., is home on a visit to his parents, Mr. and Mrs. Wm. A. Reed of Cargill.

Miss Forma Graf of Rochester, N. Y., has been visiting her parents, Mr. and Mrs. Joseph M. Graf of Chepstow.

Mr. and Mrs. H. S. Sanderson, and little son Jack, of Chesley, were recent visitors with Rev. and Mrs. Sanderson.

Rev. C. L. Poole of Harriston preached at the Methodist church on Sunday, Rev. Mr. Walker taking the Missionary Anniversary Sermons at Harriston.

Mr. and Mrs. William Arnold and their youngest son Roy, are here from Killfield, Sask. on a visit to old friends around Walkerton and Greenock. Mr. Arnold who is well known throughout this district, has a grown-up family of sons in the West, who are all doing well. Mr. Arnold likes the East pretty well himself but swears by the West as the young man's country.

+ + +

Card of Thanks.

Coun. Wm. Johnston of Brant wishes through the Telescope to express his sincere thanks to the electors for the splendid support given him at the polls.

FORMOSA

This neighborhood is to lose an old and highly respected resident shortly, Mr Joseph Dosmann having arranged to remove with his family to Mildmay. His son, Mr Henry Dosmann is taking over the farm which his father has worked for the last thirty-years. Mr and Mrs Dosmann and their daughters, Isabella and Melinda, will take with them the best wishes of a large circle of friends to their new home.

SUBSCRIPTIONS TO THE TELESCOPE

All subscriptions to the Telescope, whether in arrears or otherwise, are payable to the present publisher of the Telescope. We make this explanation again for the benefit of a few readers who do not appear to be clear on that point. If paid now (before Jan. 31st, 1916) all subscriptions will be $1 per year. After January 31st., all subscriptions, whether in arrears or advance, will be at the rate of $1.50 per year. Subscribers have only to see to it that their subscriptions to the Telescope for 1916 are paid NOW to avoid paying $1.50 for the coming year.

Byron Pink Tomato

FREE

A post card addressed to us as below, with your name and address on the other side, will cost but one cent. Drop it in the nearest mail box, and it will bring promptly a copy of our illustrated 80-page catalogue for 1916. With it will come also—free—a 15c. packet of

Byron Pink Tomato

A perfectly formed tomato, the Byron Pink is uniform, large, and attractive. The flesh is firm, and the flavor delicious and full-bodied. It is a robust grower and a heavy cropper. It is an ideal tomato for forcing. You are going to buy seeds anyway; then you might just as well send for our catalogue and get this free premium for yourself.

The Catalogue tells about the other valuable premiums which we give with every order.

POETS' CORNER

IT ISN'T THE TOWN: IT'S YOU

If you want to live in the kind of a town
Like the kind of a town you like,
You needn't slip your clothes in a grip
And start on a long, long hike.
You'll only find what you left behind,
For there's nothing that's really new.
It's a knock at yourself when you knock your town.
It isn't the town—it's you.
Real towns are not made by men afraid
Lest somebody else gets ahead.
When everyone works and nobody shirks
You can raise a town from the dead.
And if while you make your personal stake
Your neighbors can make one, too,
Your town will be what you want to see.
It isn't the town —its you.

News About Town

Mr. D. H. McDonald of Toronto, in renewing his subscription, writes "I must congratulate you on the decidid improvement in the Telescope."

Mr. Joseph Becker has sold his 100 acre farm at Deemerton to Mr. Peter Kunkel of the B Line for the sum of $7,500 and the buyer gets possession within thirty days. Mr. Becker has purchased a fruit farm near Clinton.

Quite a number of new subscribers have been added to the Telescope lists the past month, but there is room for more. Now is the time to subscribe before the subscription price goes up to $1.50 on January 31st.

Respected Resident Gone

The death occurred at her residence, Jackson St., on January 4th, of Eliza Coutts, wife of Mr. Thomas Darling, in her 63rd year. She had been in poor health since last Easter and her death was not unexpected. The late Mrs. Darling was born at Aberdeen, Scotland, and was a very small child when her parents came to this country. They settled in Carrick when the whole township was bush. The greater part of her life was spent on the farm until fourteen years ago when she and her husband removed to Walkerton. She was a woman of sterling character, and a faithful member of the Presbyterian church. Besides her husband, she leaves to mourn two sons, Adam, of Toronto, and John of Calgary, and Mrs. Aitkens of Manitoba. Mr. John Coutts of Mildmay is an only brother.

BORN

SCHMIDT—In Carrick, on December 31st, to Mr. and Mrs. Chas. Schmidt a daughter.

+ + +

DIED

SOMERVILLE—In Brant on Dec. 25th, Mrs. David Somerville, aged 72 yrs., 4 months.

DIRSTEIN—At Elmwood, on December 28th, Lydia Eby, widow of the late John Dirstein, aged 70 years.

+ + +

MARRIED

LINES—REIS—At the Methodist Parsonage, Hanover, on January 3rd, by Rev. J. W. Cooley, Miss Arnetta O. Reis, daughter of Mr. and Mrs. John Reis of Carrick, to Mr. Elmer Lines of Brant Tp.

Mr. and Mrs. Wm. Black and little son Wallace, are home from Saskatchewan, on a visit to relatives at Riversdale.

+ + +

Late Mrs. Jenkins.

An old and respected resident passed away on Jan. 3rd in the person of Mrs. Anne Jane Jenkins who has been living with her son, Mr. Thomas J. Jenkins here for a number of years. The deceased who was in her 83rd year, was born in County Down, Ireland, coming to Canada as a child with her parents. After the marriage she and her husband made their home near Hanover, where she resided until about twelve years ago. Mrs. Jenkins was a woman of fine personal qualities devoted to her family and household. She was a member of the Anglican Church. Two sons survive, Thos. J. of Walkerton and J. H. of Alabama. The funeral was held on Thursday last, interment being made in Hanover Cemetery.

+ + +

Michell—Thompson

A quiet but pretty wedding was solemnized at the home of Mr. and Mrs. Jas. Thompson, Harriston, Ont. on Jan. 1st at high noon, when their eldest daughter Agnes Mann, was married to Mr. Thos. Michell of Cobalt, son of Mr. Thomas Michell of Solway. The ceremony was performed by Rev. Mr. Mason in the presence of the immediate friends and relatives. The bride entered the drawing room on the arm of her father to the strains of the wedding march played by Miss Lottie Michell of Toronto, cousin of the groom. The bride looked charming in a white dress of duchess satin and ninon. She carried a bouquet of bridal roses and lily of the valley. After the ceremony they returned to the dining-room where they partook of a sumptuous repast after which they left amid showers of confetti, for a trip to Toronto, Buffalo and other points, the bride travelling in a navy blue serge suit with hat to match. They were accompanied as far as Toronto by Miss Lottie Michell. On their return they will visit friends in Walkerton and vicinity prior to leaving for their new home in Cobalt.

FACTS FOR MEN ENLISTING

1 WHEN DO I BECOME A SOLDIER?

Immediately. You are sworn in at once.

2 HOW LONG AM I TO SERVE?

Until the end of the war and six months after if required.

3 WHAT PAY SHALL I RECEIVE?

Privates, $1.10 a day.
Corporal, $1.20 a day.
Sergeant, $1.50 a day.

Also subsistance or separation allowance from the Government.

Pay begins the moment you enlist, separation allowance at $20 a month is sent to the wife, together with any money the soldier may assign her.

4 WHAT WILL MY WIFE RECEIVE DURING MY ABSENCE?

Every month there will be paid to your wife $25, and if this is not sufficient to comfortably maintain your family, the Canadian Patriotic Fund will further assist them.

Married men who enlist and live at home, will draw, in addition to the $1.10 a day, the subsistance allowance, but they will not get separation allowance as well. When married men are compelled to live in Government Camp then the 85 cents will cease and separation allowance at $21 a month is sent to the wife, together with any money the soldier may assign to her.

5 WHERE WILL I LIVE AFTER ENLISTING?

In the town or village nearest your home—providing 25 or more men have been recruited from that vicinity; otherwise you will live at the place most applicable to the exigencies of the service.

6 WHO PAYS FOR MY CLOTHING?

The Government provides you with complete outfit from head to foot. $10 is deducted from your first month's pay, which is returned to you at the end of six months' service. If you are discharged within six months, $8 is deducted to furnish you with civilian clothing and $2 goes to the Government.

7 WHAT WILL HAPPEN IF I AM WOUNDED, SICK OR TAKEN PRISONER?

You will be cared for by the Government in first-class hospitals, have expert medical attention, your pay to continue until you are discharged. If you are permanently disabled a pension will be paid to you of $264, $192, $132, or $75 a year, according to the extent of your injury or disability. In case of total incapacitation your wife will draw in addition to the foregoing, $11 a month, and each child $5 a month. The above pensions are increased by approximately 25 per cent. for sergeants. If taken prisoner, your pay and allowance will continue as if you were still in the field.

8 WHAT WILL BE DONE FOR MY WIFE AND CHILDREN IF I DIE WHILE ON ACTIVE SERVICE?

The Government will provide a pension of $22 monthly, for a widow and $5 for each child. The widowed mother of a single man, if the son be her sole support, is treated in the same way as a wife.

9 Separation allowances are paid to the wives and children of married, children of widowers, if such children are under sixteen years of age, and to widowed mothers of sons who are their sole support.

CARGILL

Mr. J. Campbell was a visitor in Ailsa Craig for a few days last week.

Mr. and Mrs. Wm. Grainger and family, who have been here the past month, returned to Stratford on Friday.

Mrs. Henry Young spent the past week in Harriston with Rev. and Mrs. Mason.

Mr. John Mahoney, of Belmore, is visiting his brother, Thomas.

Dr. J. G. Bricker spent a day in Toronto, last week and returned home with a life partner, formerly Miss Annie Gray, of Toronto. We welcome Dr. and Mrs. Bricker to our burg.

Mr. James Taylor left on Monday for Southampton where he has secured a position with Bell Furniture Co.

Mr. Austin Jordon, of G. T. R., Port Colborne, spent the week-end here with his parents.

Mr. Bob Reid, who spent the past year at Laverna, Sask., arrived home on Saturday to spend the winter with his parents, Mr. and Mrs. Wm. Reid.

The school remains closed until further notice on account of measles in the section.

Mr. W. T. Clancy, of Toronto, spent New Year's with his brothers, John and Joseph.

Mr. Geo. Sillers was a visitor in our burg on New Year's day.

Mr. Lorne Keeling returned to Toronto on Tuesday after spending the past two weeks here.

A meeting was held in the Foresters' Hall on Monday night when a committee was appointed to aid recruiting. A register of all males between the ages of 18 and 45 will be taken with reasons for not enlisting.

Now that the elections are past and gone, excitement has dropped and we extend our hearty congratulations to the successful candidates.

Mrs. Dr. Bricker is spending a few days in Toronto.

Mr. M. L. Ziegler made a business trip to Toronto on Tuesday.

At the annual congregation gathering of Holy Trinity Church, Cargill, Miss Maud McCay, the organist, was presented with a beautiful mahogany dressing table and the following address:

Dear Miss McCay —

We the members of Holy Trinity church, Cargill, have much pleasure in asking you to accept this dressing table as a small token of our appreciation of your kind services as organist. We wish you much happiness for the coming Christmas and for the New Year, and trust you will be able to continue your good work for many years.

On behalf of the congregation.

J. LIONEL HUMBER, Incumbent
JAS. A. GARLAND
THOS. ABELL } Wardens

SOLWAY

Mr. and Mrs. E. A. O'Connor and daughter, Lizzie, spent the week-end with friends in Toronto and Hamilton.

Messrs. Ambrose and Wilfred Detrich spent their Xmas holidays with friends in Berlin.

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so life-like, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others.

R. L. Gibson - Jeweler

Old Country News

TWO MORE V. C.'s.

The following awards of the Victoria Cross for conspicuous bravery and devotion to duty were announced in a supplement to the London Gazette.

Corporal J. L. Dawson, 187th Co. R. E.

During a gas attack at the Hohenzollern Redoubt on October 13, when the trenches were full of men, he walked backwards and forwards along the parados, fully exposed to a very heavy fire, in order to give directions to his own sappers and to clear the infantry out of the sections of the trenches that were full of gas. Finding three leaking gas cylinders, he rolled them some 16 yards away from the trench, again under very heavy fire, and then fired rifle bullets into them to let the gas escape. His cool gallantry saved many men from being gassed.

Private T. Kenny, 13th (Service) Bn. Durham L. I.

When on patrol in a thick fog with Lieutenant Brown, 13th Battalion Durham L. I., near La Houssoie, on November 4, some Germans, who were lying in a ditch in front of their parapet, opened fire and shot Lieutenant Brown through both thighs. Private Kenny, although heavily and repeatedly fired upon, crawled about for more than an hour with his wounded officer on his back, trying to find his way through the fog to our trenches. He refused more than once to go on alone, although told by Lieutenant Brown to do so. At last, when utterly exhausted, he came to a ditch which he recognized, placed Lieutenant Brown in it, and went to look for help. He found an officer and a few men of his battalion at a listening post, and with their assistance Lieutenant Brown was brought in, although the Germans again opened heavy fire with rifles and machine guns and threw bombs at 30 yards distance. Private Kenny's pluck, endurance and devotion to duty were beyond praise.

VETERAN NAVAL V. C.'S "BIT."

How Israel Harding, V. C., late chief gunner in the Royal Navy, has "done his bit" in the present war at the age of eighty-four is told in the the Sheffield Daily Telegraph. Harding, when his ship was blown up at the Dardanelles while mine-sweeping, had his leg broken. He is now in a convalescent home.

Harding ran away to sea when a boy, and after working in a trawler joined the Navy. He took part in the bombardment of Sebastopol and was wounded in the Naval Brigade's landing. He was in the Indian Mutiny and was again wounded in the thigh. After service in the Zulu War he took part in the bombardment of Alexandria in 1882 and gained the V. C. for throwing overboard a shell which dropped near the magazine. Everyone over forty will remember how Britain rang with the exploit.

Leaving the Navy in 1883, he took part in Admiral Markham's Arctic Expedition. At the beginning of the war he offered his services and was engaged in mine-sweeping. Three ships under his command were blown up, and last summer he was transferred to the Dardanelles.

Two of Harding's sons were kill at Loos, one is a petty officer in the Queen Elizabeth, and another a seaman in the Achilles.

UNDER STATE CONTROL.

A remarkable scheme of State control has been inaugurated at a centre in the north, where 20,000 men are expected to be at work.

To provide for them the Government have acquired all shops in the district and will either allow the late proprietors to sell goods under license only or will in most cases run them under direct control. The Government will thus be butchers, bakers, grocers and milkmen to the inhabitants. The main object is to regulate prices and prevent extortion.

The Liquor Control Board has already bought all the public houses—about thirty in number—and thus has a monopoly in the district. In some the sale of intoxicants will continue under close restriction; in others it has been suspended, and some have been turned into lodging-houses for workmen.

FAMINE IN DOCTORS.

The war has led to a great and growing shortage of civilian doctors.

Out of about 30,000 qualified men in the country, a medical authority estimates that fully a third are now on war service. A serious feature of the situation is the dearth of medical students. In London medical schools there is a general falling off in the number of entrants.

To a limited extent women doctors are helping to fill the gap. There are over 1,000 women doctors on the medical register, and most of these are engaged in hospital work.

NOTES.

The dead body of Charles Steel, 31, boiler fireman, Park street, Rotherham, was found badly mutilated on the railway line near Masbro' Midland Station.

Women postmen are delivering letters at Hull.

Six sons of Mrs. Richard Watson, of Swinton, are in the forces, and two of them have been wounded.

At Rossington, near Doncaster, Miss Annette Streatfield, of Rossington Hall, laid the foundation stone of a new church for the miners employed at Rossington Colliery, the latest of the new pits in the Doncaster district.

John William McCartney, who at York Assizes was sentenced to death for murdering his wife, at Pocklington, unsuccessfully appealed against his conviction.

When George Lockley, farm laborer, was at Stafford committed to the Assizes charged with shooting at a 12-year-old boy named Thomas Rance, it was stated that at night Lockley fired a gun at a trap driven by the boy and containing—unknown to the prisoner—his own wife and two children.

The Rev. S. G. Davies, of the Albert Hall Presbyterian Church, Oswestry, has accepted the pastorate at Brecon.

Dr. Herbert Louis Wild, formerly Archdeacon of Nottingham, was enthroned Bishop of Newcastle.

The Rev. Charles Mansfield Owen, D. D., of Edgbaston, Birmingham, has been instituted and installed as Dean of Ripon.

The Rev. G. Milner, vicar of Stannington, has been appointed to the vicariate of Loversall, near Doncaster.

Probate has been granted of the will of the famous cricketer, Dr. William Gilbert Grace, the value of the estate being £7,278. The will is written on a sixpenny form in Dr. Grace's handwriting, and the testator left all his property to his wife, or, should she predecease him, to his two sons.

Mr. Duke, K. C., M. P., has been appointed by the Prince of Wales as his attorney-general and as a member of his council, in succession to Sir George Cave, the new Solicitor-General.

A minor effect of the war, but one which illustrates vividly the wide extent of the calamity it has wrought, is the practical abolition of mourning notepaper.

James White, of Sowerby Bridge, has just returned to his home on his discharge from the army. After four months' strenuous work in the trenches in Flanders he fell sick, and inquiry revealed the fact that he was 70 years of age! He saw his first service in the Zulu war in 1878.

John Douglas, a Sheffield fitter, to save himself from falling off a scaffold on which he was standing, grasped a "live" wire and was instantly electrocuted.

Victor Carroll, 31, boilermaker at the Midland Hotel, Bradford, fell from his bedroom window in the top storey of the hotel, a distance of 80 feet, and was killed instantly.

Great regret has been occasioned in Bolsover by the death of Mr. I. Howell, headmaster of the Bolsover Colliery Schools, who passed away at the age of 55.

A German flag captured in the East African expedition by Major Webb, of the Legion of Frontiersmen, was unfurled at Newstead Abbey, Nottinghamshire, the old home of the Webb family, on the occasion of a tenants' dinner given Sir Arthur Markham, M. P., who now resides at the abbey.

The South Wales tin plate trade is experiencing quite a boom, chiefly through orders from France, where the plates are manufactured into bombs for trench warfare.

General Booth has received £25 from the King to assist in the furtherance of the Salvation Army's work amongst the poor.

Diphtheria cases in the Metropolitan Asylum Board's hospitals have reached the unusually high total of 1,543.

As the army have acquired all the hay they want, private trading in England, Scotland and Wales can now be resumed.

The rivers in North Wales were in heavy flood lately, and considerable damage has been done in the valleys of the Severn and the Dee.

Hearing rifle shots from the house of a soldier named Davis at Brading, Isle of Wight, neighbors entered and found Davis and his wife dead.

Over 900 old boys of the Church of England Waifs and Strays Society are now serving in the army and navy. One of them has been promoted to a captaincy.

Mr. J. W. Taylor, a Newcastle architect and former president of the Northern Architectural Association, has died at Silloth.

The death took place at his name in Cork of Mr. Augustine Roche, Nationalist M. P. for North Louth, in his 60th year.

Rev. W. H. Ewald, M. A., for 30 years vicar of St. John's, Lancaster, a position he resigned four years ago through enfeebled health, was found dead in bed at his residence in Morecambe. He was a bachelor, aged 75.

The death has occurred at Ryde, Isle of Wight, of Sir George Francis Coventry Pocock, Bart. Sir George, who was in his 85th year, served in the Crimean war, where he lost his left arm and was severely wounded in the right wrist.

The death has occurred at the age of 57 of Rev. Thomas Cooper, superintendent of the Newcastle-on-Tyne United Methodist Central Church.

The death occurred of Lady Abercromby at Camperdown House, near Dundee, the residence of her brother, Lord Camperdown.

The King has knighted Mr. George Cave, M. P., Solicitor-General, and Mr. Justice Arthur F. Peterson.

As a result of the heavy rains, the Thames at Hampton Court recently was about 5 feet above summer level, and the gardens and lawns at the rear of the Mitre Hotel by Hampton Court Bridge were partly submerged.

People with homes near the River Ouse are fearing a repetition of the floods of last winter, when so much damage was done in Norfolk. Land flooded at that time is still uncultivated, and the wrecked homes are un restored.

Mrs. Anne Allan died at Bath lately, aged 101. She was a native of Wiltshire, and to the end followed the progress of the war with great interest. She had tied her hair with red, white and blue ribbon, declaring that she would remain so adorned until England won the war.

The death is announced at Hatfield of Charles Lambert, who since 1869 had been tennis professional at Lord Salisbury's court at Hatfield. Charles Lambert, who was born on June 24, 1850, was the youngest son of John Lambert, who had managed the court since 1849. Charles was assistant to his father for many years, and in the last seventeen years has managed the court.

Bishop Welldon, the Dean of Manchester, has given up his official residence so that it may be used as a Red Cross hospital.

The chair manufacturers of High Wycombe have, through the mayor, been requested by the War Office to make 50,000 Windsor chairs for the use of soldiers.

Mr. Sidney Hill, a Somerset landowner, has at his own expense erected at his residence a heavy lathe, where he is making single handed 18 pounder shells. He has already delivered a quantity.

Shillington Manor, a Hertfordshire country house, standing on the borders of Hertfordshire and Bedfordshire, was completely destroyed by fire.

A Crimean veteran, William Richards, living at Perrots avenue, Haverfordwest, died suddenly from heart failure. Since the war began he had tolled the parish church bells for five minutes at noon daily in honor of our brave soldiers who have fallen fighting for their country.

The King's fat stock from the royal farms at Windsor were sold at Slough Christmas market. The stock, which was of splendid quality, comprised 27 Devon and Hereford bullocks and heifers, 200 sheep, and 66 bacon hogs and porkers. The whole realized £1,836 14s. The 27 Devon and Hereford bullocks realized £886. The top price was £52, given for a splendid Devon bullock. Two hundred Hampshire sheep fetched £579 10s.

A shortage of wedding rings in jewellers' shops and in wholesale factories is experienced throughout Britain, although the shortage has nothing to do with a scarcity of gold. There are three main causes for the wedding ring famine. There has been a very great number of war weddings; the working classes, owing to high wages, have bought cheap gem rings in great numbers, and there is a serious shortage of skilled jewellers' workmen.

A skate weighing 124 lbs. has been taken in Weymouth Bay.

The two daughters of the Dean of Rochester, Miss M. and Miss P. Storrs, are among the workers who on Sundays make shells.

Mrs. Catherine Morrison, Greenock, who was one hundred six months ago, and kept a shop until September, died last Thursday week.

Mr. James Neil Hart, Procurator Fiscal for Lanarkshire for thirty years, has handed his resignation to the Secretary for Scotland, to take effect at the end of the year.

The death took place, at the age of 85, of the Right Hon. John Young, D. L., at Galgorm Castle, Ballymena. He was a former High Sheriff of County Antrim and was chairman of the Northern Counties Committee, Midland Railway, and a director of the Braidwater Spinning Mill, Ballymena.

Glasgow Corporation Tramway receipts for the past six months totalled £568,000, or almost £40,000 more than in the corresponding six months last year. The passengers carried exceeded 171,600,000, an increase of nearly 13 millions. The remarkable traffic is largely due to munition work on Clydeside.

Five hundred pounds of sizeable fish was taken at Deal and Walmer Angling Association's eleventh annual open-boat fishing festival at Deal. Mr. Reynolds, of London, was first, with a total gross weight of 75 pounds 6 ounces his catch including ten cod weighing 70 pounds 13 ounces. Mr. Culver caught a cod weighing over 16 pounds, and another of over 10 pounds was taken by Mrs. Argles.

The King has congratulated Mr. Thomas Goodburn, of Nottingham, on having six sons and a son-in-law serving with the colors.

One of the best known ship-builders in Scotland, Dr. Robert Caird, of Messrs. Caird & Co., Greenock, died last Wednesday week, aged 64.

Five sheep have been discovered in a snowdrift in Knott Rigg, on Buttermere fells, near Keswick, where they had been entombed for twenty-two days. Three were still alive, and one was able to walk.

A war list of Aldenham School, Elstree, Herts, contains the names of 627 old boys who are serving in the navy or army. Of these, 35 have been killed in action or died, 56 have been wounded, two have obtained the D. S. O., three the military cross, one the D. C. M., and nine have been mentioned in despatches.

In presenting one of the German guns captured at Loos by the 2nd Border Regiment to the Carlisle Corporation Colonel Nash said that the Border Regiment had gained in the war two V.C.'s, one C.M.G., three D. S.O.'s eleven Military Crosses, twenty D.C.M.'s, forty six special mentions in despatches, and four Russian distinctions.

Two men, Tom Parker and John McGinn, were killed in an accident which occurred at the Snowdown Colliery, between Dover and Canterbury.

Private A. Brace, of the Duke of Cornwall's Regiment, through exposure to cold in the trenches, lost the use of his legs. He has been using a presentation wheelchair at Fishponds, Bristol. He and the person wheeling him were startled by the sudden dash past them of a taxicab. The shock made the soldier temporarily ill, but next morning he found he could walk again with ease.

Colonel Henry Byrne, the newly-elected Mayor of New Romney, Kent, who has died at West Kensington, aged 78, served under Garibaldi in the Italian War of Independence. Later he fought in the American Civil War, entering the United States army as captain of the 54th Regiment of Infantry in the Army of the Potomac. He raised and commanded the 24th Battalion Imperial Yeomanry for South Africa, and commanded the column which provisioned Fraserburg.

The Glasgow Daily Record has been found guilty on the charge under the Defence of the Realm Act of having on the premises a secret cipher code. The Daily Record and Mr. Jas. Lumsden were each fined £10.

Two landslides have occurred in the Rhymney Valley, South Wales, blocking the roads and threatening the railway.

Four hundred and fifty men at Ammanford Colliery, South Wales, struck work because one non-unionist was employed.

A remarkable effect of the war, according to Mr. Robert Parr, a director of the N. S. P. C. C., is the virtual disappearance from country districts of the child tramp.

Mr. William Guy, of High Wycombe, who has died, aged 93, was the oldest registrar of births and deaths in England, filling the office for thirty years, and registering 31,000 births and deaths.

Brynamman Public Hall, near Swansea, was destroyed by fire.

An old Crimean veteran in the person of the Earl of Glasgow has died at his residence at Fairlie.

The death is announced of the Hon. John Boscawen, of Tregye, third and younger son of the sixth Viscount Falmouth.

Anglers fishing in Blagdon Lake, Somerset, during the past season caught 765 trout weighing 2,336 lb.

A parsnip 47in. long has been dug from his garden by an allotment holder at Littlehampton. It was perfectly straight.

Mr. Alexander Isles, a well-known Liverpool marine engineer, fell 10 ft. into the dry dock at Newport, and was instantly killed.

Out of a population of about 150, twenty four men of Stretton-under-Fosse, Warwickshire are serving with the colors, while four have enlisted in their groups, leaving the village without a single young man eligible for military service.

Professor David Jenkins, Mus. Bac., Camb., Professor of Music at University College, Aberystwyth, died at Aberystwyth, in his sixty-seventh year.

Many dogs have been turned adrift in consequence of a rumor which has obtained currency that the dog tax is to be doubled in January.

At the annual distribution of money known as Haycock's Charity at Wells, Norfolk, for which only persons upwards of 64 years of age are eligible, there were 176 approved applicants out of a total population of 2,560. Of these only 50 were under 70 years of age, and a further 94 were between 70 and 80 years old. Of the remaining 32 there were 26 octogenarians and six nonagenarians, their average age being 85½ years. The amount received by each successful applicant was 1s. 4d.

The late Lord Armitstead, once M. P. for Dundee, has left the city about £60,000.

Owing to a strike at the local gasworks, Aberdare, on Sunday week, was practically in complete darkness. Sunday night services were suspended at most of the places of worship, and where meetings were held candles had to be used.

After Mr. Charles Brown, Medham Farm, Cowes, Isle of Wight, had released a bull from wire in which it had become entangled the animal attacked him and tossed him in the air.

James Jamieson, assistant coxswain of the Berwick lifeboat, was awarded the silver medal of the Royal National Lifeboat Institution, with extra monetary rewards to him and the crew, for saving six lives from the Redhand in very severe weather on November 10.

For the first time since the foundation of the Royal Academy 144 years ago, the competitions for gold medals have this year been suspended. One hundred and thirty-four past and present students—55 painters and sculptors and 79 architects—have joined the colors abroad.

The Rev. Samuel Woodhouse Sanders, LL.D., honorary canon of Peterborough, has died at Rothley Vicarage, Leicestershire, aged 69.

Seven thousand Welsh miners were idle last week owing to the scarcity of ships for the export of coal. The loss of output is estimated at over 55,000 tons.

The bronze statue of Oliver Cromwell at St. Ives, Huntingdonshire, says the Huntingdonshire Gazette, was found one day last week with its legs encased in puttees.

"To save expenditure in printing," the Northfleet (Kent) Urban Council decided some time ago not to punctuate the official reports of their proceedings. In the minutes of the last meeting there is not a single comma or full stop.

Hull is the only city in which soldiers are allowed to ride six days a week free.

A goose which was raffled at Hitchin market was sold and resold until it eventually realized £100 on behalf of the Farmers' Red Cross Society.

At a Red Cross sale at Birmingham a khaki colored mouse in a small vase was sold for £30.

Paupers in England and Wales at the end of October numbered 582,491, a reduction of 71,171 compared with 1914.

Mr. and Mrs. Cowlard, of Addlestone, have ten sons, eight of whom are serving in the army, while one of the others fought in the South African War.

Mrs. Ann Macalister, widow of Mr. Robert Macalister, a South American merchant, died at her residence in Allerton, Liverpool, where she had lived for fifty years, in her 101st year.

It is announced that the bill has been introduced by the Government to prevent the raising of rents or mortgage interest in respect of small houses during war time will apply to the whole United Kingdom instead of to specified areas.

A youth of sixteen was bound over at Radcliffe, Lancashire, on a charge of trying to commit suicide; his father and brother had joined the army, and because he had been rejected six times his conduct, said his mother, had become unbearable.

"Two pennyworth of bread and pea soup or bread and cheese is more nourishing than sixpennyworth of sirloin and vegetables, and more wholesome and nourishing than pastries costing 9d." says a circular issued by the Woolwich Council to residents advising them on how to be well nourished and yet save money.

TWENTIETH CENTURY COYNESS.

(Woman's Home Companion)

"There is a very excellent reason why a girl shouldn't smoke."

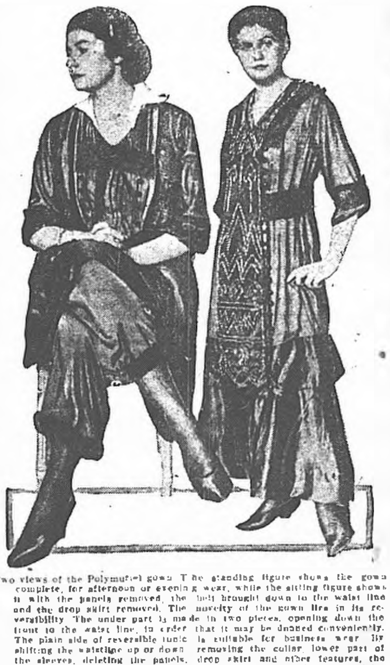
"What?" she demanded.

"Makes her less agreeable to kiss."

"Well, I'll wait till somebody wants to kiss me," she said; "when they do, I'll give up cigarettes—and take to a pipe!"

Health and cheerfulness mutually beget each other.—Addison.

NEW GOWN FOR UNIVERSAL WEAR ON VIEW AT LAST



Two views of the Polymutiel gown. The standing figure shows the gown complete, for afternoon or evening wear, while the sitting figure shows it with the panels removed, the belt brought down to the waist line and the drop skirt removed. The novelty of the gown lies in its reversibility. The under part is made in two pieces, opening down the front to the waist line, in order that it may be donned conveniently. The plain side of reversible tunic is suitable for business wear. By shifting the waistline up or down, removing the collar, lower part of the sleeves, deleting the panels, drop skirt and other features, the gown can be made to do duty for any occasion during the day or night.

The Talk of Peace

(From the London, England, Spectator)

During the past week the atmosphere has been surcharged with peace talk, peace rumors, and a growing sense that peace may be coming a good deal nearer than has hitherto been supposed possible. When we say this we are not of course, thinking of Mr. Ford's ridiculous "Peace Jolly." Mr. Ford is a great advertiser and a great industrial organizer, but the notion of his being able to make peace is about as sensible as the notion of Mr. Asquith or Lord Lansdowne making a motor-car. It is an amusing example of the Transatlantic view, or rather the view of a portion of our American kinsfolk, that because a man is very rich he is therefore entitled to thrust his hand into the delicate machinery of peace and war and to forbid a struggle which, judging from the point of view of dollar diplomacy, he considers wasteful and unnecessary. We need not, however, bother about Mr. Ford. He will soon find that he has entered a region where private wealth will not serve him, and where men will not serve him, and where men whom he could buy up a thousand times over will have far more power in the ultimate decision than he and all his fellow-millionaires and fellow-self-advertisers. The mighty issues fraught with the destinies of Europe—that is, of half mankind—will be handled in the first place, by great statesmen, great soldiers, great sailors, and great diplomatists, and the final verdict will be given by the general voice of the contending peoples. Self-important and boisterous, if well-meaning gentlemen like Mr. Ford will exercise no more real influence upon them than the fly who sits upon the wheel and imagines that it makes it go round. One of the most popular of mediaeval comic poems was Brandt's "Ship of Fools". Most men would have been content to set afloat one variety of this vessel. Mr. Ford will apparently not rest till he has doubled the record. Therefore he is preparing two ships, to be crammed with all the male and female cranks of America intent to voyage to neutral countries and there make fatuous speeches and hold platitudinous congresses.

Speech-making for some persons is its own reward and therefore Mr. Ford, possibly accompanied by the arch-speechmaker Mr. Bryan, will have a fine time. We sincerely trust, however, that his light-headed squadron will bear a distinguishing mark, which will preserve it from the fate of the Lusitania. No doubt the thrifty German will be anxious to safeguard the lives of those whom he imagines are working with him, and no doubt also the British navy has so thoroughly cleared the Atlantic and the North Sea that there is very little danger now from Teutonic submarines. Still, an under-sea prowler might come by accident across Mr. Ford's ships and, not identifying them and their precious freight of folly, send them to the bottom without parley. We suggest, therefore, in all seriousness, that the ships should have the letters "F.O.F." painted in gigantic letters on the bows, and stern, and the sides. The initials would serve to indicate the "Ship of Ford," as well as the older and more picturesque phrase which we have ventured to apply from the literature of mediaeval Germany.

If we turn from Mr. Ford's comic relief to the serious side of the peace problem, it may be worth while to lay down once more some of the conditions which will govern the Allies in dealing with German and Austrian offers when they do come, either directly or indirectly, for their "first feelers" will, we fancy, not be long delayed. This does not mean, of course, that there is any immediate prospect of peace, but, just as happened in the Seven Years' War, the Germans will in all probability think that they may cut themselves right with some of the neutrals and especially improve their much-damaged position in America, if they appear to be very reasonable in regard to peace terms. Now to make a peace you have not only to consider the terms of peace, but with whom the peace is to be made. We want on the present occasion to deal shortly with the matter from both these points of view. First as to terms. This is a comparatively easy problem. They remain in principle the terms stated by Mr. Asquith at the beginning of the war:

"We shall never sheathe the sword until Belgium recovers in full measure all and more than all, that she has sacrificed, until France is adequately secured against the menace, smaller nationalities of Europe are placed upon an unassailable foundation, and until the military domination of Prussia is wholly and finally destroyed."

To this of course, must now be added the condition that Serbia must not merely be re-established among the nations, but that her courage, her constancy, and her loyalty to the Allies must be rewarded by the creation of a Greater Serbia, while the unhappy Bulgarian people must, if they persist in their policy of treachery and cruelty, receive the punishment they deserve. Again, Poland must be evacuated by Germany, and when we say Poland we mean not only Russian Poland but Prussian Poland also. It is, however, premature to go further beyond Mr. Asquith's general statement. More important at the present moment is it to make it clear that when we make peace we mean to make a lasting and not a patched-up peace. We are fighting for the security and for nothing else and that security we must obtain unless our peace terms are to form but a stepping stone to a new war such as is already being looked forward to by many Germans. For example, the Times correspondent in New York tells us that the well-known professor of Harvard, Dr. Munsterberg, after declaring that peace will come sooner than most of us expected, adds that the first feeling of Germany when she comes home from the war will be to rebuild her barracks, and that "ultimately the physical test will have to be renewed." In other words, Germany will prepare for a second war, as Rome after first Punic war prepared for second, and after second, for the third. We can tell Professor Munsterberg that the Allies fully realize this without his kind enlightenment, and mean to take steps to prevent a recurrent war.

The first perhaps the most important step in making peace a real peace is to take care that it is made with the right and not with the wrong people. If we make peace with the German emperor and the ruling military and Junker caste in Germany, or rather in Prussia, all we shall do will be to help to keep in place the enemies of peace and of mankind—the men who willed the war, and made the war, and very nearly succeeded in crushing out human liberty. We are not going to help to rivet Prussian chains and Prussian tyranny upon the rest of Germany, and to allow the sharpening of a new sword against ourselves, merely for the pedantic reason that we can only deal with the de facto government and must not look beyond the lords of war. What we must do is to follow the example set, and wisely set by Germany herself in 1871. The newly founded German empire refused to make peace with Gambetta's heroic provisional government represented the people of France. Accordingly they stated that they could only treat with a body elected ad hoc by the nation. The National Assembly was called into existence by the Germans in order that Germany might secure a firm foundation for peace, and bind the whole country, not merely the government, by the treaty of Frankfort. We must do the same. When we make peace it must be with the German people.

Once more, the terms of peace must provide security, and security not merely for the allies, but for the whole world. The Germans have set fire to one-half of the globe, and we must not give them any opportunity to try to coup themselves for their disaster—for such it is—by setting fire to the other half. No doubt if we were to be so mad as to leave the Germans with their fleet intact, even if we had diminished their territory, exacted a huge indemnity, and reinstated the possessors of the land they had ruined, they would try, like a logical people they are, to call a new Germany into existence to redress the balance in their favor. Europe having proved too hard a nut to crack, they would turn their [illegible] upon America. They would say of the South American continent as Marshal Blucher said of London: "What a continent to plunder!"

Next, they would methodically work out plans for the conquest and control of South America, a preliminary, if the United States objected, being, of course, the destruction of the American fleet and the holding of the great coastal cities to ransom. A certain number of people here and in France and Russia who take superficial views of world-policy, and who have been annoyed by President Wilson's type of neutrality, will no doubt be inclined to declare that action of this kind would be no business of ours, and that the Americans owing to their indirect encouragement of Germany by protesting against our blockade and so forth, would merit all they got. That, however, would be a very ignoble way of looking at the matter. In the first place the moment the harrying of America actually began, the feeling for our own flesh and blood—far stronger in the parent than in the child—would flame up here and make us stand forth as the protagonists of the Monroe Doctrine. Whatever some of our people might say owing to temporary annoyance with America for the somewhat sorry part played by her government during the war, we should never stand aside [illegible] New York and Boston bombarded by the German fleet or the Panama canal seized and fortified by Germany.

We must not only conquer the Germans, and conquer them thoroughly, and make it impossible for them to relight the flames of war in Europe. We must muzzle the savage dog when we have tide him u and so prevent his fastening his teeth on any part of the globe. Even if our determination to do this should prolong the war by another six months, it will be worth while. We have had enough war for one generation, and we must be prepared to make any sacrifice required to prevent its recurrence. We have told the world that we are fighting for the cause of humanity, and we must prove it by our acts. The peace must be a real peace, and not merely a breathing-space in which to prepare for fresh wars.

Use MILBURN'S LAXA-LIVER PILLS

FOR A SLUGGISH LIVER.

When the liver becomes sluggish it is an indication that the bowels are not working properly, and if they do not move regularly many complications are liable to set in.

Constipation, sick headache, bilious headache, jaundice, heartburn, water brash, catarrh of the stomach, etc., all come from a disordered liver.

Milburn's Laxa-Liver Pills stimulate the sluggish liver, clean the coated tongue, sweeten the obnoxious breath, clean away all waste and poisonous matter from the system, and prevent as well as cure all complaints arising from a liver which has become inactive.

Mr. John V. Tanton, Burnam, Ont., writes: "I take great pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad, I would have severe headaches, but after using a couple of vials, I am not bothered with them any more."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

A Bird's Barbed Wire Fences.

There may be seen along the road sides in Central America a brown wren about the size of a canary which builds a nest out of all proportion to its apparent needs. It selects a small tree with horizontal branches growing close together. Across two of the branches it lays sticks fastened together with tough fibre until a platform about six feet long by two feet wide has been constructed. On the end of this platform nearest the tree trunk it then builds a huge dome shaped nest a foot or so high with thick sides of interwoven thorns. A covered passageway is then made from the nest to the end of the platform in as crooked a manner as possible. Across the outer end, as well as at short intervals along the inside of this tunnel, are placed cunning little fences of thorns with just space enough for the owners to pass through. On going out this opening is closed by the owner by placing thorns across the gateway, and thus the safety of the eggs or young is assured.—Brooklyn Eagle.

Little pains, in a great hour employed, great profit yield.—John Philips.

Had Dyspepsia.

Says: HE NEARLY TURNED UP HIS TOES.

Burdock Blood Bitters CURED HIM.

Mr. H. N. Manderson, Stettler, Alta., writes: "About twenty-five years ago in the Province of Quebec, I came pretty near turning up my toes with dyspepsia. A cousin of mine persuaded me to try Burdock Blood Bitters. In about two weeks I could eat anything, from raw fat pork to unleavened bread. Three bottles did the job, and I have never been troubled with my stomach since. You would say that this is wonderful if you could only see what we sometimes have to live on in this country, bannock, half cooked beans, etc."

Burdock Blood Bitters has been on the market for the past forty years, and cannot be excelled as a medicine for all diseases or disorders of the stomach.

B.B.B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Oct. 19—Sir Edward Carson resigned from the British Cabinet.

Sir Ian Hamilton vacated the Dardanelles command.

Oct. 22—Ontario raised over one million dollars for the British Red Cross.

Oct. 24—Botha's supporters won the South African election decisively.

SIR JAMES WATSON'S OPINION CONSIDERED MOST VALUABLE

He says that the commonest of all disorders, and one from which few escape is Catarrh. Sir James firmly believes in local treatment, which is best supplied by "Catarrhozone." No case of Catarrh can exist where Catarrhozone is used; it is a miracle-worker, relieves almost instantly, and cures after other remedies fail. Other treatments can't reach the diseased parts like Catarrhozone, because it goes to the source of the trouble along with the air you breathe. Catarrhozone is free from cocaine; it leaves no bad after-effects, it is simply nature's own cure.

Beware of dangerous substitutes offered under misleading names and meant to deceive you for genuine Catarrhozone, which is sold everywhere; large size, containing two months' treatment costs $1.00; small size, 50c; trial size, 25 cents.

Oct. 28—Briand succeeded Viviani as French Premier, Gallieni becoming War Minister.

Oct. 29—King George was injured at a review in France by a fall from a startled horse.

NOVEMBER.

Nov. 4—British cavalry joined the allied army in southern Serbia.

Nov. 6—Venizelos defeated the Zaimis Government on Greece's war stand.

Nov. 8—Skouloudis formed a Greek Cabinet acceptable to King Constantine.

Nov. 9—Britain's war council was composed of Asquith, Balfour, Lloyd-George, Bonar Law and McKenna.

Nov. 11—Many American lives were lost by the torpedoing of the Italian liner Ancona.

Nov. 13—Winston Churchill resigned from the Cabinet to join his regiment in France.

Nov. 17—The Anglo-French War Council held its first session.

No. 25—The British Expedition won a hard battle near Bagdad and advanced.

Nov. 27—The Canadian Government commandeered fifteen million bushels of western wheat.

Nov. 29—The Imperial Munitions Board with J. W. Flavelle as head, replaced the Canadian Shell Committee.

Turkish reinforcements forced the British Bagdad expedition to retreat.

DECEMBER.

Dec. 1—Canada's war loan was found subscribed twice over.

Dec. 4—Von Papen and Boy-Ed, attaches of the German embassy at Washington, were asked to leave the United States.

Dec. 7—The Teuton-Bulgar offensive opened in southern Serbia.

Dec. 8—The United States demanded the disavowal of the sinking of the Ancona.

Dec. 9—The Franco-British forces in Serbia retired into Greece.

Dec. 11—Several Irish regiments sacrificed themselves to permit the successful retreat of the British in Macedonia.

Yuan Shi Kai accepted the throne of China.

Dec. 13—The British House of Commons voted to "mobilize" Canadian and American securities.

Dec. 15—Sir Douglas Haig was appointed to command the British forces on the continent.

General French was made a Viscount.

Dec. 17—Several arrests were made in New York in connection with a conspiracy to blow up the Welland Canal.

Dec. 18—British submarines sank the German cruiser Bremen in the Baltic.

Dec. 20—All British troops withdrew from the Suvla Bay and Anzac fronts on the Gallipoli.

Dec. 21—General De Wet and 118 others convicted of treason in South Africa were released on parole.

FARM AND GARDEN

HOG-KILLING TIME.

Butchering time is near at hand, and the popular handling of the pork supply, after the usual killing and cleaning the carcass, is a subject well worth considering. Before curing is begun, meat must be thoroughly cooled, but not frozen. If the animal heat is not out of it the salt will cause shrinkage of the muscles. On the other hand, salt will not penetrate frozen meat, and uneven curing will result. The most suitable vessel for curing meat is a good clean barrel, tight enough to prevent leakage, though for small quantities a stone jar is good.

For 100 pounds of meat thoroughly mix five pounds of salt, two pounds of granulated sugar and two ounces of saltpeter. Every three days the meat should be rubbed with one-third of this mixture, and after the last rubbing it is left in the barrel for a week or ten days. Then it is ready to be smoked. This receipt should be used only when there is a cool and moist place in which to keep the meat. If a warm or dry place is used the preservatives do not penetrate evenly. For plain salt pork every piece of meat is rubbed with salt, packed closely in a barrel and allowed to stand overnight. For every 100 pounds of pork a brine is made, consisting of ten pounds of salt and two pounds of saltpeter dissolved in four gallons of boiling water. When the brine is cold it is poured over the meat, which is then covered and weighted down to keep it under the solution.

To prepare sugar-cured meat rub every piece with dry salt and allow it to drain overnight. Pack it in a barrel, and for every 100 pounds of meat add a brine of eight pounds of salt, two pounds of brown sugar and two ounces of saltpeter dissolved in four gallons of hot water. In summer the brine must be boiled, but that is not necessary in winter. Let the brine cool before using. Bacon strips should be left in the solution from four to six weeks, and ham from six to eight weeks.

Sausage should be made of clean, fresh pork. To every three pounds of lean meat add one pound of fat and mix them together by chopping. When this is done, spread the meat out thinly and season with a mixture of one ounce of fine salt, one-half ounce of ground black pepper and one-half ounce of pure leaf sage, rubbed fine, for every four pounds of meat. The seasoning should be sprinkled over the meat and the two mixed together by running them through a food chopper. The sausage may then be packed in jars or casings.

If large quantities of meat are to be smoked, a permanent smoke house is necessary, but for small quantities a large dry goods box serves the purpose. A smoke house should be eight or ten feet high and should have plenty of ventilation, so that the warm air may be carried off and the meat prevented from overheating. It is best to have the fire-pot outside, with a flue to conduct the smoke into the meat chamber, but if this cannot be arranged the fire is built on the floor of the house and the meat shielded in some way. The construction should allow the smoke to pass freely over the meat and out, though too rapid a circulation is a waste of fuel. The best fuel for smoking meat is green maple or hickory smothered with sawdust. Hard wood is always preferable to soft, and resinous wood should never be used, for it will give meat a bad flavor. Corncobs are the best substitute for hard wood.

Meat to be smoked is removed from the brine two or three days before it is put into the smokehouse. Two pieces should not be allowed to hang in contact, as this prevents uniform smoking. After the smoking has started the fire should be kept as constant as possible, for if there is any great variation in temperature the smoke does not penetrate evenly, the outer portions being heavily smoked and the inner portions lightly. At all times the house should be kept dark to prevent flies and other insects from getting in it.

FARM NEWS AND VIEWS.

The strawberry mulch should be put on in early winter. Scatter the straw over the entire surface, covering the spaces between the rows as you cover the plants. Do not cover the plants heavily, but put enough on to prevent them from the freezing and thawing in early spring.

Canadian farmers know well the value of rutabaga turnips for feeding sheep. Lambs weighing 75 to 100 pounds will consume three or four pounds of roots daily, and from one to two pounds of grain ration. Two parts of oats to one of bran is considered a good grain ration when connection with roots. Sheep will consume 15 or 20 when given little else.

The "Shepherd's Bulletin" points out that it doesn't need a heavy soil to raise heavy sheep. The Cotswolds in England range on a thin limestone, stoney soil, 4,000 or 6,000 feet above the sea level. Moreover, some of England's best Hampshire farms are of very thin soil.

Sugar exists not only in the cane, the beet sugar and maple, but also in the sap of about 190 other plants and trees.

A Missouri farmer increased the income from his orchard from $6.35 to $0 an acre by spraying the trees. All costs deducted, a profit of $161.50 was left. The work was done in co-operation with the Missouri Experiment Station. The difference between $6.35 and $161.50 shows what it may cost per acre to board insects in an orchard —$115.15. That's too much of a bad thing!

You grow fruit for the insects or you grow it for yourself—just according to whether or not you spray.

Colts can be economically raised on the farm where their dams are used as work animals, provided they have pasture and are fed grain and hay in sufficient amounts to stimulate growth and normal development. This is the cheapest and best way to secure efficient teams for farm work. Good teams are very desirable for good farming.

"An acre foot" of water, a term commonly used in irrigation, is 43,560 cubic feet, or the amount needed to cover an acre one foot deep.

Every farmer should have a pair of scales. The kind will depend upon the different uses he may have for them. In the smaller towns and communities it will be profitable for a number to go in together and purchase a pair of stock or wagon scales. No other test is so convincing as to what progress we are or not making as in putting the stock across the scales at regular intervals. Many other scales can be found for scales on the farm.

Beef, pork, mutton, butterfat, wool, etc., are finished products that should afford a double profit, one for producing the raw materials as, for instance, the feed for the stock, and the other the manufacturing, as in cheese, butter, beef, mutton, pork, etc. Why not engage in this kind of manufacturing on the farm?

The United States Department of Agriculture announces that a peach which bears an edible fruit containing a smooth stone has been brought from China and may be used to improve the commercial peach.

The deeper the farmer goes into the soil the higher his success will be as a business man and producer.

The man who takes pride in plowing a straight furrow is very apt to take equal pride in all the rest of his farm operations.

PAIN IN THE BACK

Usually Comes from Muscular Rheumatism.

Do not worry about pain in the back. The worry will do you more harm than the pains. The cause of most backaches is muscular rheumatism, which is painful enough, but not fatal. Lumbago is a form of muscular rheumatism, so is a stiff neck. Sufferers from any form of rheumatism should keep their general health up to the highest standard by the use of a blood building tonic like Dr. Williams' Pink Pills, while taking good, nourishing food, without too much meat. Proper nutrition and pure blood are the best means of fighting rheumatism. Rheumatism comes from an acid in the blood, build it up, strengthen the system, and drive out the poisonous acid that causes rheumatism. In this way sufferers have found complete recovery as is shown by the following case: Mrs. Samuel Childerhouse, Orillia, Ont., says:—"About three years ago I was greatly afflicted with a severe pain in the back, which I thought at first was due to kidney trouble. I tried a number of remedies but they did not help me any; in fact, the pain was growing worse, and got so bad that I was quite unable to do my housework. I could not even sweep a floor. I was advised to try Dr. Williams' Pink Pills, and I am glad I acted upon the advice, for before I had been taking the pills long the pain began to subside, and under the continued use disappeared entirely, and I have not since been bothered with it in any way. My husband was also cured of a severe attack of indigestion by this same medicine, so that we both have much reason to be grateful for it."

You can get Dr. Williams' Pink Pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Backache

The artist sketched this picture from life in a Toronto blacksmith shop, in order to get the correct pose of the smith at the anvil and shoeing a horse. Is it any wonder that the blacksmith's greatest troubles are backache and derangements of the kidneys? The constant strain on the muscles of the back and kidneys interferes with the filtering action of these organs. The uric acid poisons left in the blood cause pains and aches, backache and rheumatism, and such serious diseases as Bright's disease and hardening of the arteries result.

But it is not the blacksmith alone who is tortured by backache, for there are many occupations in which the continuous strain on the back leads to much suffering, and also to serious disease.

Blacksmiths have always been strong in their praise of Dr. Chase's Kidney-Liver Pills, and by telling others of the good results accomplished by this treatment have added much to its popularity among farmers and horsemen generally.

Being direct and prompt in their action, Dr. Chase's Kidney-Liver Pills appeal to the man of action. The liver is awakened, the bowels aroused and the kidneys strengthened by the influence of this medicine. The filtering and excretory organs lose no time in cleansing the system of the poisonous matter which gives rise to pain and disease. Constipation is overcome, kidney derangements corrected, digestion improved, and you feel fine. Put them to the test when you are feeling out of sorts. Let them prove their value. One pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Dr. A. W. Chase's Kidney-Liver Pills

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free, if you mention this paper.

Sale of Women's Winter Coats

Smart New Models Worth $10.00 to $14.00, on Sale at $7.50 to $10.50.

TOWN AND COUNTRYSIDE

News From the Neighboring Towns and Villages Written for The Telescope by a Staff of Live Correspondents.

CLAMIS

Miss Edith Howson has returned to Clifford.

Lieut. McKay has been very successful in securing recruits. Among those who have enlisted from here and vicinity are:—Messrs Clyde McKeeman, Edward (Ted) Chapman, James Symon, Mac Campbell.

Mr John Graves has been spending a few days with friends in Greenock.

A week of prayer will be held in the Baptist Church next week, followed by Evangelistic services.

Miss Eliza Colwell of Lorne, has been spending a few days with her sister Mrs. J. D. Robertson.

Mr. Will Passmore of Woodrow, Sask., is visiting his sister Mrs. A. J. Smith.

The Public Library here has had forty-five new books placed on the shelves this week.

Mr. Crube Lattimat of Wilkie, Sask. is visiting his sister Mrs. Alex McSween.

Quite a number from here attended the Box Social in the new school on the 6th Con. Bruce on Friday evening. All report a good time and a splendid program.

Miss Margaret Symons spent last week in Paisley.

Mr. John A. Howson returned to Toronto on Friday.

Mr. and Mrs. Peter McKinnon and family are visiting friends, on the 7th. of Kincardine.

The Ladies Missionary Society of St. Pauls Church met at the home of Mrs. Thos. J. Gamble on Wednesday.

Messrs James and D. A. C. McLennan spent Friday in the County town.

Mr. and Miss Campbell of Chesley, have been visitors at Mr. Jas. Thompson's.

Mr. and Mrs. Dan Finlayson and son spent the week end in Port Elgin.

On Saturday evening forty friends and neighbors gathered at the home of Miss Armour Boundary West, and presented her with the following address and presentation:—

To Miss Armour,

Dear Friend,

After a long residence at the Boundary of Kincardine and Bruce, you have decided to take up your residence and make your future home in another land and we, your friends, and neighbors, have met on this occasion to manifest to you in thus congregating our sincere regret at your departure from among us. As a good neighbor and true friend, hospitable and kind, you have lived in our midst in the years that have gone. No one was ever let go hungry or cold from your home, you have shared trials and triumphs in common with neighbors, friends, and acquaintances, in the community, and you leave us all with no unkind feelings lurking behind. We trust and pray that your new home may prove congenial to your desires and that new friends may prove to you as true as the old ones you leave behind.

It is with reluctance we part with you. We hope your health, vigour and ambition may continue and that a kind Providence will favour you with many happy days and years to come.

As a token of our sincerity and good will we present you this suit case and purse and in saying a parting Good-bye, we wish you both health and happiness hereafter.

Signed on behalf of the donors and dated at Glamis on Jan. 8th. 1916.

D. A. C. McLennan
Hector McLean.

CARGILL

Mrs Rogers of New York returned home on Friday after spending the past week with her sister, Mrs Ed Campbell.

A number from here attended the funeral of the late Mrs John McKee of Pinkerton, to Douglas Hill Cemetery on Friday.

Mrs G F Saunders spent the past week visiting in Galt.

Mr Henry Winkless left on Saturday for Ravenna, Ohio. Mrs Winkless and family will remain here for another week or so.

Master A Findlay of Ailsa Craig, who spent the holidays at Mr J D Campbell's, returned home on Monday.

Mrs Bell was in Toronto on Wednesday.

License Inspector White of Walkerton was a caller in our burg on Wednesday of last week.

Mrs W D Cargill and daughters are visiting in Toronto.

Mrs Walter Clark was in Paisley on Thursday.

Misses Lizzie Sieling, Rose Helwig, Dora Wendt, Mrs Reba Schwalm, and Messrs C E Wendt and E R Schwalm were visitors at Hanover on Sunday.

Mrs Chas. Wicke, who has spent several weeks at Milverton has returned to her home here.

The funeral of Mr August Kliest of the Elora Road took place on Jan 5th, interment being made in the Lutheran cemetery. The funeral service was held in the Mildmay Lutheran Church.

Rev Mr Williams occupied the pulpit of the Methodist Church on Sunday last.

Automobiles were running in Mildmay on Sunday.

Mr Edgar Herringer and Robert McNamara have enlisted during the past week. Lieut H. B. Krug of Chesley is recruiting officer here.

OTTER CREEK

Miss Melvina Gress, left for Brantford Friday past.

Miss Nettie Gress returned Sunday after a week's visit with her sister on the second concession of Carrick, and friends on the fourth concession.

Mr and Mrs Hall, and Mr and Mrs Ramshaw from the West, are visiting their parents Mr and Mrs Wolfe.

Mr Roy Teglar is home from the West at present, visiting his parents.

A telegram has arrived announcing the death of Mr Charles Hogg, son of Mr John Hogg. We extend our sympathy to the family.

TELESCOPE LETTER BOX

PUBLIC LECTURE FOR THE 160TH BATTALION

Editor Telescope

Dear Sir:—

Would it not be a good plan for the leading and public men of our town to arrange for a series of lectures on various subjects to be delivered to our soldiers? These lectures or addresses could be given on topics that would both edify and interest the men, and we think that they would be pleased for such, as they have so much time on their hands, especially in the evenings. Perhaps some of our leading citizens would take the matter up, and act on it.

CITIZEN.

FORMOSA ELECTRIC LIGHT MATTERS

Formosa, Jan. 8th, 1916

To the Editor of the Walkerton Telescope

The Herald and Times in quoting Mayor Lippert's post election speech, attributes to His Worship some statements which are so false and misleading as to call for correction in the most public manner. It was stated that the Formosa Electric Light Co. after paying interest on their investment, etc., have a snug dividend for themselves. A very rosy report for the Formosa Electric Light Co. indeed. Let us look at the facts.

In the spring of 1915 a few of our citizens believing that the time had arrived for brightening up in accord with the rest of the province, got together and entered with a contract with the Walkerton Electric Light and Power Co. That company met us in a friendly spirit and stated their terms. We then looked for capital and after some difficulty secured sufficient to warrant our entering with a contract with the Walkerton Co. We subscribed our money with no notion of making large dividends and even in doubt of any return of our original investment, which doubt we still have. Construction was begun in May 1915 and our power was turned on in August 1915. The construction of our line cost us approximately nine hundred dollars more than we had estimated, part of which was due to the rise in price of copper wire and other necessaries. We have also found the cost of maintenance much higher than we had expected. We have not received one cent of interest on our investment and far from having paid a snug dividend are about six hundred in debt at the moment.

Our prices to our customers are not the same as in Walkerton as stated by Mayor Lippert but higher. Our minimum is twenty-five cents per month higher than in Walkerton and we do not give the same discount for cash as obtained there.

Our contract with the Walkerton Co. calls for a minimum of ten horse power which must be paid whether we are able to distribute it or not and for all we ever use over ten horse power we must pay at the same rate.

We might also say that for all the vast amount of work and worry expended on the construction of our line neither for time, travelling or other expenses, nor for any other service whatsoever has any member of our company ever received one cent compensation. Our Directors' Board, our Secretary, our Manager who reads the meters and collects the rates, and one of our number who attends to the street lighting all have served so far entirely without renumeration. Had these services to be paid for as they most certainly would have to be paid for in Walkerton, we could not expect to come out even, at our present rates and with our limited number of patrons.

We have excellent lights and uninterrupted service and we and our patrons are proud of our system. We hope the day may come when we will be able to get interest on our investment and even dividends, but that day is far in the future. Wherever Mayor Lippert got his information, he is unfortunately far astray.

Signed by the Directors of the Formosa Electric Light Co.

FRANK A. HEISZ, president
GREGORY G. BENNINGER, sec.-treas.

Frame Residence Burned

A double frame house across the West End bridge owned by Mrs. Wisler, and occupied by herself and a tenant, Mr Joe Hewitt, was gutted by fire yesterday. Fire is thought to have caught from stove pipes upstairs and before the brigade could arrive, the interior was a mass of flame. Mr. Hewitt was sick in bed when the fire started. The contents of both premises were mostly saved. The building was insured.

Walkerton Honor Roll

The Telescope is endeavoring to get a complete Honor Roll of Walkerton boys in the King's Service. We made a beginning last week by publishing 138 names. Quite a few more names have since been handed in to us. If you noticed any omissions in the list published in last week's issue kindly let us know. We intend to publish the list again shortly and we are depending upon our readers to help us make the list as complete as possible.

At Methodist Church

The Methodist Congregation enjoyed very much a visit on Sunday from Rev. A. I. Terryberry B. A. of Preston, who delivered thoughtful and stirring messages. At night he urged the necessity of living up to the opportunities of Christian living in these days, taking the words of Paul to Timothy "Stir up the gift of God which is in thee". Vital connection with the Almighty through the prayer life was the urgent need.

NAPOLEONISM TO-DAY

And One Hundred Years Ago Depicted By Rev. John McNeil in a Masterful Address

The people of Walkerton paid a striking tribute to an illustrious graduate of our High School, Rev. John McNeil of Toronto on Monday night. In spite of the severe storm an audience that taxed the seating capacity of the Town Hall turned out to hear his famous lecture on Napoleon. The affair was given under the joint auspices of the High School and the Public Library Board, the proceeds going to swell the patriotic funds. Mr. McNeil's address was magnificent. He made the Little Corporal live again in the imaginations of his audience. His descriptions were wonderful, notably that of Paris' greatest sight, Napoleon's tomb, which was most vivid and impressive and a masterly bit of word painting. The story of Waterloo, as told by the speaker, brought that memorable conflict almost as clearly before the audience as if they saw it before their eyes. The speaker conceded to Napoleon, amazing genius, as a soldier, statesman and administrator, pointing out at the same time his supreme folly in misusing those gifts. Today we have a similar situation, and the speaker pointed out many striking parallels. We have Napoleonism today without a Napoleon. The Kaiser has the ambition of Napoleon, without a smattering of his gifts. Just as Britain is the chief bone in the Kaiser's crop today, so did she in the Napoleon wars bear the brunt. Just as she finances the Allies today, so did her resources supply her Allies then. Just as Napoleon's doom was really sealed not at Waterloo, but at Trafalgar, so today it is Britain's high fleet that stands in the way of the Kaiser's scheme of world conquest. Just as Britain fought not the French people, but a tyrant, so today they fight, not against the German people, but against a tyrannous system. The speaker expressed his confidence that right would triumph. In referring to his old school days at Walkerton, Mr. McNeil mentioned the debt of gratitude which he and many other men now scattered throughout the length and breadth of Canada and beyond, owe to their old principal, Mr. Morgan. Mr. H. M. Lay, chairman of the Board, acted as chairman, and at the conclusion of the address, after the applause which had finally subsided, a hearty vote of thanks was tendered the speaker on the motion of Mr. W. M. Shaw, an old fellow student, seconded by Clayton Fortune, on behalf of the pupils of the High School.

LETTER FROM ALFRED TOLTON

Mrs. Jas. Tolton heard from her son, Alfred, of the Canadian Expeditionary Forces, somewhere in Belgium. We publish some interesting extracts herewith:—

Dear Mother:—Your letters of 28th and 29th ulto. were received last night and believe me I was very glad to get them. I don't get them so often that I get tired reading them, but I guess you write about as often as I do. Of course as you say, I write to quite a few people now, and I have to get a letter away every other day at least to keep up with my correspondence. I have to acknowledge the receipt of the many Xmas parcels I have received in which I have been very lucky indeed.

Well, things have not been quite so quiet here last night and today. The heaviest bombardment of artillery fire I have heard since being here started early this morning and gas was detected even at this distance of the enemies lines. We do not know yet just how the tide of battle goes but rumors have reached our ears that our side have taken some trenches and that the Germans have lost a large number of men killed and wounded. We may have to move ourselves if the men holding our trenches make any considerable advance. Of course we don't look for any retreat because we have undoubted faith that the British and Canadians can hold their ground. The order has gone out that everyone must wear gas helmets when going on any trip from camp. The noise of the guns last night and this morning sounded very similiar to that of a very electrical storm when the thunder continually rolls, and the ground is always quivering. They say to-day was the birthday of the German Princess, and that the army at the front were ordered to make some kind of a bluff at driving the allies back. I don't think the celebration was altogether a success from their stand-point.

The weather to-day was fine and we had a cosy day of it. My partner and I worked hard yesterday enlarging our little shack. It was much too small for us. The job is not finished yet but we did not work at it to day for there were other things to attend to and the wheelright, my partner, was not feeling well after yesterdays labor. My feet last night were so wet I wrung water out of my socks and they are a little wet to-night. The rubber boots I was expecting have not been issued to the Company drivers yet, I guess they will be along some day soon. I have had one attack of what might be called La-grippe which I believe I mentioned in a previous letter, otherwise I have been as well as I might expect to be at home, with as damp an atmosphere and so much rain. Yes, I got the socks you sent all O. K. Well I must conclude and I hope this finds father in better health and yourself as well, as can be is the wish of

Your affectionate son,
Alfred.

MILDMAY TOOK FIRST

Visitors Won the First Contest of the N. H. L. Series Here Monday Night

Mildmay took the first game of the N. H. L. Series here on Monday night by 9—1. The visitors were a heavy bunch and had it on the local boys in team play and staying ability. Walkerton had very little practice and they showed it. Berry, and Pletsch were strong on the defence for Mildmay and Zinn on the forward was too much for his oponents. The local team has a big bunch of players available this year, and with a few shifts in the line-up will be in a position to give Mildmay a good argument on Friday night.

Considering the fact that they had never played together before, the boys made a good showing, and were fairly beaten, the score being a pretty good indication of the play. That does not signify what they will do at Mildmay, Friday night, when they hope to revive the old custom of turning the tables on Mildmay in their own territory. Referee Jack Shea of Palmerston, gave good satisfaction. The line up:—

LaFrance	Goal	Diebel
Devlin	point	Berry
Rife	cover	Pletsch
Black	centre	Gowdy
Hussell	rover	Godfrey
Wesley	left	Wendt
Romstadler	right	Zinn

MAYOR LIPPERT REPLIES

To the Editor of the Walkerton Telescope.

Sir:—

In reply to a communication in last weeks issue of the Telescope from the Directors of the Formosa Electric Light Company, attributing to me the making of *some* statements at my post election speech as being so false and misleading to call for the most public correction, I wish to say that I will give you the statements as they were given to me and leave it to the good sound judgement of the general public to judge whether false and misleading statements if any were made. Following are the statements that were made to me:—

1. A Company was formed in Formosa which built a line to and wired the village, put in a street lighting system at a cost of $3000.00.

2. That the way matters were looking at the present time, they the Company, would be able to pay interest on their investment and have a nice little amount left to pay a dividend to the shareholders, which they expected to do.

3. That after they got using the full 10 H. P. which they had bargained for they would also reduce the price of light to the user and would start by reducing the meter rental which at present is 25 cts. a month.

4. That the rate in Formosa was as low as the one in Walkerton, the Formosa one being 10 cts. per K. W. H. for hotels, stores and dwelling houses with 10 p. c. off in certain conditions.

These are the statements made to me by none other than Mr. Frank Heisz, President of the Formosa Company in presence of Mr. John Kormann and others and if anyone is not satisfied they may ask Mr. Kormann. Mr. Heisz asked me not to use his name in connection with these statements, but as he saw fit to sign his name to a letter that I consider reflects upon my character, I must divulge his name in the matter.

I do not wish to cast any reflection on Mr. Heisz, the President of the Formosa Company, as I have always found him a good honourable fellow and as the Company had not held their annual meeting, he no doubt made these statements in good faith but after the tallying up was done the report may not have looked so rosy as he had at first imagined and as he had stated to me and others.

In conclusion, I may state, if the light users in Formosa would like to be shown the difference (in good hard cash), between $30.00 per H. P. and 10 cts. per K. W. H., ask your President to have the Hydro engineers show you when they come to Walkerton to give us Hydro rates for this town. I feel satisfied it would be very acceptable information for the good people of Formosa, the rates the commission would give no doubt would be reduced in time especially, when the Hydro Radial line between London and Owen Sound via Formosa becomes a reality, and here's hoping it does for our as well as your sake.

Yours truly,
Fred W. Lippert.

News About Town

Good sleighing again.

Recruiting notes on page 5.

Don't miss McBurney's sale.

Mrs. (Dr.) Stalker is quite ill.

Last week of McBurney's sale.

Local news on page 1, 4, 5, and 8.

News about Town on pages 1 and 5.

50c neckwear at 25c at Rourke's sale.

1916 should be a good year for Walkerton.

Mr. John Harkley, is reported to be very poorly.

Get your printed butter wrappers at the Telescope.

Mr. John Vogt spent the first of the week at Guelph.

Mrs. Farquhar Shaw has arrived from Winnipeg.

Mr. Hugh Bell went to Buffalo on business Monday.

Jos. Eckenswiller is the latest Walkerton recruit.

Big discount on ladies' and childrens' coats at McBurney's.

Knox Church annual meeting is being held Wednesday night.

Read Rourke's 14 days slack season sale ad on back page.

A big cut in prices, overcoats and suits.—S. A. Rife & Co.

Mr. McKim high class ladies tailor with S. A. Rife and Co.

Mrs Giesler left on a visit to relatives at New Hamburg on Saturday.

Verdict In Sugar Case.

The case of the St. Lawrence Sugar Co., against A. J. Smith, a former Walkerton merchant, for the payment of $53 for ten bags of sugar which Smith claimed were not delivered, was finally disposed of at division court, Toronto, before Judge Morson, who gave a verdict for the plaintiff with costs. The case lasted only about an hour. Messrs A. J. Royce, N. Walford Wm. George and J. Lindsay of Walkerton were examined as witnesses.

Bought Another Paper

Mr Geo E Hudson publisher of the Beamsville Express, has sold his paper to two members of his staff and has bought a larger business, The Haldimand Advocate, of Cayuga. The Advocate is the only newspaper published in the county town of Haldimand and has a large circulation. Mr Hudson succeeds Capt. R. H. Davey, Quartermaster of the Haldimand Co. Regiment, as publisher of the Advocate. Capt Davey is the same man from which he bought the Beamsville Express several years ago. The Telescope joins with George's many old friends in Walkerton in wishing him every success in his new field.

+ + +

Col. Douglass Stands High.

Walkerton people will all be interested to learn of a distinction that has befallen Lt.-Col. W. J. Douglass, who is Major of the 34th Batt., on Overseas Service. Col. Douglas was fortunate in standing second in the list of the officers passing the military examination at Shorncliffe recently, having received 426 marks out of a possible 500. Col. Douglass started in soldiering as a bugler in the 32nd Regiment. He won his advancement step by step and if he does not fall a prey to German bullets will no doubt win further advancement at the front. Col. Douglass is a native of Bruce and a son of Capt. John Douglass of Tara.

Griffith Jones Dead

Mr. Griffith Jones, a well-known citizen, passed away on Sunday, in his 66th year. Mr. Jones was formerly manager of the old rink and had been a resident of Walkerton for many years. He had been serious ill for some time and his death was not unexpected. Besides his wife he leaves a family of four sons and three daughters:—Leslie of United States, Stanley of Calgary, Mack and Paul of Walkerton, Mrs. James Bell of Brant, Mrs. Thornton of Toronto and Miss Ruth at home. The funeral was held on Tuesday afternoon from the family residence, service being conducted by Rev. Mr. Chart of Guelph.

ANSWER TO ENQUIRER

Yes. The $1.50 rate applies to arrears, after January 31st.

The rate for subscription in arrears was always $1.50 but it was not enforced, as it should have been.

There still remains two weeks to get the dollar rate for arrears and in advance.

But don't ask for that rate after January 31st for it cannot be granted.

For Sale

Two good rabbit hounds. Cheap. Apply at this office.

The Farmers' Parliament

Interesting meetings of the Farmers' Institute and Womens' Institute were held in the Town Hall last Thursday. Mr. A. R. G. Smith, a progressive young farmer, from New Hamburg, spoke on "beef cattle and milking shorthorns" branching out into other agriculture problems. His address was followed by interesting discussion. Mr. James Lamb occupied the chair. In the evening, Mr. Smith, who is a fluent and pleasing speaker spoke on the problem of the young Agriculturist. He advocated making the schools the social centre of the rural community, spoke of the value of the Country Church in the community, urged higher ideals of life, and concluded with a stirring appeal to the young men to see the Empire through in the present crisis. Mrs. Moorehouse gave a thoughtful address on the Home which was very much enjoyed.

+ + +

C. O. F. at Home

The Annual "At Home" of the Canadian Order of Foresters, which is always looked forward to with pleasure, by those who have attended them in the past, was held last Friday evening in the Town Hall. Rev. Thos. Wilson who has been a member of the Order for a long time, presided, in his usual efficent manner and the programme was a very enjoyable one indeed. Solos were rendered by Miss Hilda Ernst, Miss Vera Dippel and A. S. Royce, a reading by Miss Sebel and recitation by Miss Jean Norrish and Miss Irene Everett. Little Miss Corean Kolbe sang a couple of songs which delighted everybody, and the mouth organ selection by Mr. Ammon certainly brought down the house. The Starlight Orchestra was present and contributed much to the pleasure of the evening. Mr. J. B. Campbell the C. O. F. Organizer in a very worthy manner, advanced the interest of the C. O. F. At the conclusion of the program, lunch was served after which a large number remained and enjoyed themselves tripping the light Fantastic.

Death of Mrs. Clark

Death claimed a highly esteemed resident of the town on Monday in the person of Mrs. Henry Clark. She had been in rather delicate health for several years, and the shock of a very sad bereavement in October, when her only daughter passed away very suddenly, proved too much for her enfeebled forces. Mrs. Clark was born in Dumfriesshire, Scotland, and came as a child to Canada, living with her parents at Galt, until her marriage thirty-nine years ago, when she became a resident of Walkerton. Mrs. Clark was a woman of quiet tastes and sterling qualities, and a lifelong faithful member of the Presbyterian Church. Besides her husband, two sons survive, Wallace of Lethbridge, and Robert of Galt. The Misses Wightman of Galt are sisters. Owing to the home being quarantined through the illness of the grandchildren with measles, the funeral which was held on Wednesday afternoon was private. Rev. Thos. Wilson, Pastor of Knox Church, conducted the service.

Accidently Shot

Particulars of the death of Charles Hogg, the 27 year old son of Mr. and Mrs. J. A. Hogg of Carrick, were learned when his brother, Gordon, arrived here from Saskatchewan with the body on Saturday. It appears that the young man who was always a keen hunter, went out rabbit shooting and as he did not return, his brother went in search of him, and found him a short distance away in an unconscious condition. His gun had apparently discharged accidentally, wounding him in the abdomen so seriously that twenty minutes after being found, life became extinct. Great delay was experienced in shipping the body East as the train which runs only once a week from that locality had gone and the remains had to be taken some sixty miles to be shipped from Maple Lake, Sask. The funeral took place on Monday afternoon, from the family home in Carrick, Rev. Thos. Wilson, pastor of Knox Church conducting the service. A large concourse of sorrowing friends of the young man and of the family followed the remains to their last resting place.

MISJUDGED

"I think I was flattered, too," went on Dora, in the saddest of little voices. "No one had ever seen anything extraordinary in me before; you know I am not clever. I see now that Madame Inconna did not find anything extraordinary in me herself; she saw I was a poor silly goose, and a goose she could pluck. She began to pretend to find that I had great occult power, and to speak of my magnetic nature and my psychic insight. The worst of it was that I began to believe her, and it turned my head a little. Bit by bit she found out everything about me, especially about my money affairs. Then she somehow guessed—I did not tell her that—about Sir John Weston and our friendship. She poured out warnings on the subject of the unhappy life I should lead if I stifled what she called my 'higher nature' and married a man whom she described as an earthbound. Oh, Beryl, what a fool I was."

"Go on, dear."

"Then—then she began to ask me to come and see her, just for a little talk on spiritual things. She was not always alone. She introduced me to a man who, she said, was even more advanced than herself, and said I should find myself mystically akin to him. I found out that he was her brother. He was a new type to me, and he was even more alluring in his manner than she was. He spoke of all sorts of occult matters as if he were already living and moving on a higher plane than the ordinary people one meets. I met him often at her rooms, and sometimes Madame would not be there herself, or would come in later, with many apologies. So it went on until one day——"

"One day he asked you to marry him?"

"Yes; he told me it was already settled in our horoscopes and that we were mated for all eternity. I was frightened. I did not want to marry him at all. I did not want him to be in love with me. I had only been attracted by his so-called spiritual gifts. I knew he was not even a gentleman. I said 'No.'"

"And then Madame appeared?"

"Exactly. She came in, and told me I was breaking his heart and ruining his life. She argued with me, first of all quite kindly, saying how fond she was of me. But as I kept on saying 'No' she changed. When I said I must go home she gave me a look I shall never forget and said:

"'And how do you propose to explain to your relations, Lady Weston and her son, the many hours you have spent here in these rooms alone with my brother? I shall let them know that I should certainly never have permitted it unless I had understood you were engaged to be married.' Beryl, I felt as if I were in the power of a snake."

"So you were, you poor child."

"Well, they talked to me until I was driven distracted. He left her to do the threatening, whilst he did the imploring. I was to marry him, but it was impossible for him to make a home for me as yet, as we were to be married secretly at a registrar's, just that his mind might be set at rest, and he might be relieved of his great fear of losing me. That, he said, was paralysing his work. Beryl, I was as wax in their hands. I had been so foolish that I dared not confess my folly to the only people who could have helped me. I could never tell all this to cousin Grace, for they frightened me into believing that she would be sure to think the very worst of me. I yielded; I had not a chance."

"No, you had not a chance. Oh, poor, poor child!"

"They made me write him a line saying that I would marry him, and then they let me go. I promised I would meet him and marry him in a fortnight's time. Then he said he was going straight away to India to do some deep studying and would not be back for years. Beryl, I believed even that. I was a coward, and, like other cowards, I snatched at the idea of the respite. I thought that perhaps something would turn up which would not make it necessary for me to confess, after all, to cousin Grace. To avoid that I went deeper and deeper into misery. Well, I married him; he has the certificate."

"What is his name?" asked Beryl.

"James Richardson. He does not call himself by anything so unromantic. He has a made-up name; but that was his name on the certificate. His sister was one of the witnesses, and a friend was another. It was all legal enough; they left me no loop of escape."

"He did not go to India, I suppose?"

"No, he had never meant to. It was only one of the lies. But he let me go home that morning after the marriage. I felt like a thief as I stole in. Cousin Grace met me in the hall. She thought I had been to the London Library, for I used to go there sometimes to read when I first began to study the books of which Madame Inconna spoke. It was nearly lunch-time, and as I was going upstairs she said: 'Are you getting on well with your studies, little Dora?' She always laughed a little at me for taking it all so seriously, though she did not know how seriously. She thought the whole subject such nonsense and only a passing fad of the day. I said, 'I am getting rather tired of them, I think.' She laughed and told me to get ready for luncheon."

"Were you left long in peace?"

"No, indeed. He began to send me notes telling me he must see me at some place or another. I dared not refuse lest he should come there and ask for me. He told me he was short of money for his journey, and I let him have all the ready money I had. Then he wanted me to sell out some of my securities and let him have the money to reinvest for me; but I told him that I simply could not do it without letting everyone know, as I had never managed my own money affairs. Finally, he used to take all my income as it came in."

"Did no one notice that you were short of money?"

"I don't know. They thought I had changed in lots of ways. One day he said he would like to have a few bits of my jewelry as 'souvenirs of his dear wife.' He could always make me do anything when he spoke like that and threatened to call and demand my friends' congratulations. We were on the eve of going abroad to Riviera, and I let him have everything I possessed, except the watch and one or two little things I wore every day, which would have been missed. I do not know if Cousin Grace noticed that I spent very little money on my things for Nice—she never said anything. We went abroad, and I almost began to live again."

"He did not follow you?"

"No. I suppose he knew he had me safe, and that he had only to wait for my return. We stayed away a long time, the longer the better for me. I begged cousin Grace not to stay in London on our return, but to come straight down here. And the first thing I heard when we got to Dalehurst was that a stranger of mysterious appearance had been lodging at the White Farm in March, and had said he would return later in the spring."

"I know now why you looked so distressed and what the hunted look in your eyes meant."

"Had I not cause?"

"Yes, ample. You have seen him again, I suppose?"

"Yes, and heard from him. He wanted money. I had none to give him, as he had already drained my income dry. Then he threatened me, and told me to borrow some for him. I did borrow what I could—borrowed without any hope of ever being able to repay it. That is the depth to which I have fallen, and I once thought I was honorable!"

"You were to have met him yesterday?" asked Beryl.

"Yes, and to have brought him more money. I had some thoughts of getting it from you. I would almost steal money to keep him away!"

Beryl shook her head.

"It is no use, my dear; you will never get enough to do that. You will only wind yourself up more tightly in the web they have spun round you. Dora, there is only one thing you can do. I think you must know what that is."

"I think the only thing I can do is to take an overdose of sleeping draught!" said Dora miserably.

"And leave all the pain and deep regret to those who have loved you truly and who have done nothing to deserve it. No, you will not do anything so cowardly as that. The only thing to do is to break loose. Go back and tell Lady Weston everything. She will be grieved and hurt, naturally, that you did not trust her long ago, but she will forget her wrong in thinking of your troubles. When he again threatens you with telling his tale, take the wind out of his sails by telling him that you have already told yours."

"I will think it over," said Dora. "Perhaps I will do it if I can't make him go any other way. Beryl, you promise me on your word of honor that you will not mention what I have told you to anyone unless I give you leave?"

"I promise," said Beryl.

CHAPTER IV.

On the second day in June Beryl was at work in her garden, weeding some of the borders. A step sounding on the gravel near her made her look up, and she saw with surprise and indignation the man of whom she had been thinking, the man who had brought the shadow over her friend's life.

He slightly raised his hat as she arose from her knees and faced him. Before she could speak he began—

"Please do not trouble to ask me to what you are indebted for the honor of my visit, nor to tell me that you are not at home. I have made up my mind to speak to you somewhere, and I should imagine you would as soon I did so here in your own garden, as anywhere else."

"I do not wish to speak to you at all!" she said.

"That I can well believe. But since you have taken upon yourself to interfere between me and my wife you must put up with having to listen to the injured husband for some minutes. If you will not do so, you will only precipitate the scandal you are so anxious to avoid."

"The only person, as far as I can see, who is likely to suffer by everything being known is yourself," said Beryl. "But if you have anything to say you can say it."

"I have a great deal to say. I saw you pass that evening with that little fool, my wife. I knew then that you suspected something. When she refused to meet me, as I directed, I knew she had been indiscreet enough to confide in some one and was hanging on to that person's strength. However, a rather more serious letter than usual did bring her so far to her senses as to make her meet me. I then found out that she had, as she said, 'told you everything.'"

"I quite understand that you were annoyed. You have been bullying her, and naturally resent its being known."

"I resent your action. Interference between husband and wife is nearly invariably bad—for the third party. What right have you to try to make her disobey my lawful commands?"

"Your lawful commands!" said Beryl. "Do you not mean your unlawful and cowardly attempts to make the poor child's life a burden to her and to rob her not only of all she possesses, but also of the respect and love of her friends?"

"Rob her? Really that is a very strong expression! I have been unfortunate enough to have been out of employment lately. It is only natural that my wife, having means of her own, should have been delighted to assist me."

Beryl made one attempt to see if there were any softer side to the man's nature.

"Mr. Richardson—" she began.

"Oh, she told you that, did she?" he said, angrily.

"Yes, I think she told me all. I cannot believe that you are really as cruel as you seem. When I told you that you were making her life a burden to her I used no figure of speech. She has actually spoken of taking refuge in death. She has never injured you: cannot you spare her?"

"In death? I have no objection at all. The English law is very kind and considerate to the husband of a woman who dies intestate. Please beg her to make no change on my account in her plans. But if she dies and leaves a will which I cannot approve I shall be forced to let her sorrowing relations know of our tie."

"You cannot mean this. You must have had some glimmer of affection for her once."

"Affection? For a woman who plainly let me see that the very thought of marriage to me was a degradation in her eyes! I am sorry to disillusion you, Miss Daintree, but indeed I am not the angel of light you think me. I have had to struggle pretty hard all my life to keep my head above water, and I have no sentimental sympathy for the imaginary woes of people who have been lapped in luxury all their lives. Perhaps you think it would be nice for me to go away for ever and to quietly acquiesce in the idea that she will one day marry the gilded puppy and be called 'My lady'?"

"No, that is impossible. You and your sister have effectually spoilt her life. But go away and leave her in some measure of peace."

"Your morals stand in need of repair—they do, indeed, Miss Daintree! A young husband and a young wife should not be separated for long. It exposes both of them to temptation!"

"Yet you do not even wish to make a home for her!"

"Alas, I fear her income is too slender to support us both! But since the Westons keep her that little income must be dedicated to me. I intend to have it, and if it is insufficient she must beg, borrow, or—I really hardly likely to mention the other alternative to you—and supplement it."

"Will you be so good as to go away at once?" said Beryl. "My advice to Miss Langton—"

"Ah, is there a Miss Langton? A relation of my wife's perhaps?"

"My advice will be to defy you at all risks. Anything is better than to remain the wretched victim of a blackmailer!"

"That is a declaration of war, and I accept it. On my part I will tell you that I shall have my way in spite of you. In any case I will have that little fool's money. If she likes to give it up sensibly, without making a fuss, well and good. I shall let her stay on in the well-feathered nest in which she now is. If she does not behave sensibly I will use against her every weapon which the ingenuity of the English law provides. I will use the weapon of the exposure of the nature of the clandestine meetings which we had before I was honorable enough—you understand me?—to marry her. In fact, I will let loose the whole armory of wickedness, and engage a counsel who shall do my case justice!"

"And I shall still advise her to tell the whole of the truth—that weapon will prove fatal to you."

A change in the man's expression told Beryl that he had heard some one coming. She turned quickly and saw Slade approaching from the field which lay beyond the edge of her garden. His steps had been almost noiseless over the thick grass, and he was close to them before they saw him.

The intruder turned away at once and left without another word.

Slade looked wonderingly at them both.

"They've been having a pretty stiff quarrel," he said to himself. "One is as angry as the other. There, there—when we were all beginning to think better of her! After being took up by the gentry it is falling off badly to take up with the likes of that."

It was not in accordance with Slade's ideal of neighborly conduct to keep such an experience to himself. He and the Budges were close friends, and he usually saw them some time during the evening.

On this occasion he wandered to their gate and passed up the couple of yards of garden path which led to their door. Here he found the good constable, not on duty, indulging in an evening pipe. Mrs. Budge, like some stout guardian angel, hovered in the background—sometimes in the house, sometimes in the doorway.

Slade was an artist in his way; he did not introduce the subject of Miss Daintree. He knew that in the ordinary course of events her name was sure to crop up during the talk. When it was mentioned he gave vent to a long-drawn "Ah!"

His hearers immediately stood at attention.

"What's the matter with her?" asked Budge.

Slade only sighed more deeply.

"What are you going on like a windmill for?" asked his friend.

"I haven't noticed anything wrong," said Mrs. Budge

"Oh, no, you wouldn't! It's nothing in your way," said Slade very slowly and solemnly. "No, if 'tis a job at all it will have to be left to your master."

Mr. Slade here referred to Mr. Budge.

"A job for me!" said Budge. "Why, what is she after now? She has given no trouble yet to the police."

"Not as yet," agreed Slade, with an even more sinister intonation. "Ah, one never knows! We're all flowers of the field, as the Bible says."

Here Mr. Slade relapsed into ostentatious thoughtfulness, as if he were meditating whether he would be classed with the daisies or the buttercups.

"If you have anything official to say I shall note it as an official," said Budge, with dignity. "If it is only one of your fancies I shall take on myself to remember that the lady tied up my arm and saved my life."

"Fiddlesticks!" said Mrs. Budge. The remark appeared on its face a little irrelevant.

"She has done nothing for me to make a complaint of as yet," said Slade.

"Then what are you talking about?"

"Speaking as a man to a constable, what would your notion be of a threat?"

"Chuck it out, man!" said Budge. "You will keep us all night. Has she been threatening the police?"

"No. What do you say to the long-haired chap who is lodging up at the White Farm?"

"If he's been annoying of her let her speak the word to me. There is something about that man's hair that I don't like. But how has she got to know him?"

"Ah, how?" said Slade, who did not know himself, but wished it to be thought that he did.

"Don't go spoiling his tale!" said Mrs. Budge, who scented a mystery. "They are both strangers here, but goodness alone knows if they ever met before!"

"Tell us what you know," said Budge.

(To be Continued.)

WANTED—TEMPERANCE TIPPLE

(Buffalo News)

Whether prohibition is a complete answer to the drink problem is an open question. But we believe in providing sound measures for the prevention of intemperance.

And we suggest that one of the great auxiliaries of temperance would be the provision of a wholesome temperance tipple.

For is it not a fact that to satisfy this innate craving for alcoholic drinks where it is not to be procured, often a substitute is used that is even more evil in its effects than the prohibited beverage?

ACHING BONES AND SORE JOINTS CURED! ALL RHEUMATIC TENDENCIES DESTROYED!

Away Go the Crutches, Every Sufferer Made Well Quickly.

Old age is usually afflicted with rheumatism. Very few past fifty escape its tortures.

Many it bends and deforms. Upon the countenances of others it marks the effects of its awful suffering. Nerviline will cure rheumatism. It takes the pain out of throbbing muscles and swollen joints. It untwists gnarled knuckles. It does this quickly and surely.

Nerviline is not used internally. You just rub it on—lots of hard rubbing is required for a minute or two, and then you feel Nerviline penetrating through the tissues; you feel it drawing out the congestion, feel it sink in deeper and deeper till at last it touches the core of the joint or the heart of the muscles affected.

You won't stay in pain with Nerviline—no one ever does. Just try it—you will be amazed at its magical power over pain, a power it gets from the extracts and juices of certain rare herbs and roots it contains. It's harmless—any child can use Nerviline, can rub it on for a sore throat, for a bad cold, for stiff neck, for earache. No family remedy half as useful.

The large 50 cent bottle is the most economical; trial size 25 cents. All dealers, or the Catarrhozone Co., Kingston, Canada.

Antiquity of Smyrna.

Smyrna can lay claim to a loftier lineage than perhaps any other city on the earth. It is her proud boast that from the earliest dawn of history her continuity of name and fame is unbroken. It is in this spirit that she claims Homer for a citizen. His river, the Meles, which gave him a name, runs near the city, and the cave is still shown where he wrote his poems. Smyrna has not been slack in appropriating Homer, endowing him even with a local temple. The saddest chapters in the history of the city are those which record earthquakes and massacres of Greeks by Turks.

PILES CURED at HOME by New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

Strathcona's Romantic Marriage.

The marriage of Lord Strathcona was a romance. He met the lady when he was twenty-nine and living on the coast of Labrador. She was a widow and had a little son. There was no priest or church within 1,000 miles, and the marriage was a simple contract without ceremony. It was for this reason that when the high commissioner became a peer in 1897 a remarriage was held to be necessary and it was solemnized with the full ritual of the Church of England. The Labrador marriage was, however, ratified by special act of parliament.—London Tatler.

ZAM-BUK

Purely Herbal—No poisonous coloring matter.
Antiseptic—Stops blood-poisoning, festering, etc.
Soothing—Ends quickly the pain and smarting.
Heals all sores.

50c. Box. All Druggists and Stores

Growth of Eucalyptus.

In a period of ten years the eucalyptus tree will grow twelve inches in diameter and ninety feet in height, while it will take white oak and hickory 90 to 100 years to attain the same growth, and other hard woods, such as walnut, will take fifty to sixty years to attain the same size. This in itself is a tremendous advantage, and together with the fact that it reproduces itself from the same stump makes it of special commercial value.

Willie—No; I'm going down to the Faculty Club and let him beat me a couple games of pool.

ITS KIND.

(Baltimore American)

"The conductor is going to pack this car to suffocation," said one suburbanite as the car stopped to take another waiting crowd aboard.

"Yes," replied another, with a rueful glance at his somewhat large pedal extremities, "he is going to set plenty of trouble on foot."

ANTIQUES

The word "antiques" is more elastic than any other in our vocabulary; its meaning stretches back to the remotest period of the world's history, and it embraces a greater volume of objects than any other word.

It appropriately begins with the initial letter of our alphabet and is applicable to every product of mankind's ingenuity from the very earliest time that art began to assist nature in establishing and developing the handicrafts which carried mankind from the barbaric to the civilized state.

It is only through antiques that we can preserve object lessons of the traditions of the industries have enabled the world to advance, every period adding to its wealth of usefulness, and each accomplished foundation giving birth to further necessities demanded to ensure our creature comforts.

We have only to look around our own homes to see the evidences of these advances, and particularly is this so when we approach the subject of antiques from the most homely examples, as for instance the chair we sit upon, the platter we eat off, and the glass we drink from. A study of these simple subjects from the antiquarian point of view will be well worth the trouble; it is as instructive to the young and entertaining—sometimes even amusing—for young and old, and will go far towards giving more than a sentimental interest and value to our more or less treasured heirlooms handed down to us maybe through many generations.

Linking these commodities together for illustration, we find wood carving and pottery making as combined crafts from the very beginning.

As in most authenticated facts in history, we can go to the bible for our proofs. Four thousand years ago the wood carver and the potter were at work—Genesis vi.-14. "Make thee an ark of gopher wood"—Genesis xi., 3—"let us make brick and burn them thoroughly." The potter's wheel was a very early devised aid to craftmanship—Jeremiah xviii.-3. "Then I went down to the potter's house, and, behold, he wrought a work on the wheels." These antique wheels were of carved wood, made to revolve, one upon the other by a motion of the foot of the operating potter. Incidentally it may be observed that a potter's wheel of exactly this form and turned by the foot is still operated at the porcelain factory of Sevres, France.

The Egyptians and the Greeks used the potter's wheel in very remote periods, the latter producing upon it most beautiful forms, unsurpassed even to this day.

The implements of the wood-cutters' craft are also of great antiquity, as we know from ancient Greek lore. Many of the tools used in the present day can be traced to their ancient origin. We are all familiar with the saying "necessity is the mother of invention," but how few of us ever give a thought to the inventions of such commonplace articles as the axe, the level, the saw and the compass, tools of absolute necessity.

Daedalus and his nephew, Talos, Greek sculptors, who lived thirty-one hundred years ago, are accredited with being the inventors of these tools, and it is possibly owing to their inventive powers that some historians have attributed to them the first use of the potter's wheel. The story of antiques is a record of the world's inventions and handicrafts, from which many chapters may be written, full of enlightenment and instruction and it is not difficult to connect these records with the efforts of our "Wedgwoods" and our "Spodes," our "Chippendales" and our "Sheratons," who gave us in their day the objects of beauty, comfort and usefulness we now regard as our most cherished "antiques."

Spurgeon Was Noncommittal.

The Rev. W. Williams, in his "Personal Reminiscences of C. H. Spurgeon," tells an anecdote concerning the great preacher as a smoker. Some gentleman wrote to Mr. Spurgeon, saying: "He had heard he smoked and could not believe it was true. Would Mr. Spurgeon write and tell if it really was so?" The reply sent was as follows: "Dear ——, I cultivate my flowers and burn my weeds. Yours truly, C. H. Spurgeon."

Minard's Liniment Cures Colds, Etc.

Famous Dams.

The construction of the gigantic storage wall, known as the Burrinjuck dam, the most interesting part of the New South Wales irrigation scheme, was a clever piece of engineering work. Indeed, it ranks as one of the greatest dams in the world, both in regard to height and volume of water impounded. It is 236 feet high, 168 feet thick at the base, tapering to 18 feet at the top and some 780 feet in length. The famous dam at Assuan, on the Nile, has a total height of only 150 feet, while the great Croton and Roosevelt dams in America eclipse the Burrinjuck structure by only a few feet. It is a massive wall of concrete over thirty feet higher than the London monument. This colossal structure, however, had to be built across the bed of a river subjected to floods, in a deep gorge whose sides were so steep that it was impossible to establish workshops upon them.—London Mail.

Tired Business Man—Take dancing lessons! Well, I guess not! There are too many other ways by which I can make a fool of myself. His Loving Wife—Yes, dear, but you have tried all of those.—Judge.

NAILS IN STONE WALLS.

Easy Method of Placing Them So They Will Remain Firm.

Few women know how to drive a nail into a brick wall, and yet it is what they often need to do for themselves if there is no man about.

The following method is easy and has been found entirely satisfactory: Having decided upon the exact spot into which the nail is desired to be driven, which must be in the plaster between the bricks, provide yourself with a hammer and screwdriver. With these tools commence working out the hard plaster by tapping the handle of the screwdriver. As the plaster turns to dust it must be blown or dusted out so that the size of the hole may be seen.

When a space about one inch long and nearly one inch deep has been worked out get a small piece of wood about the same size and with the hammer wedge it tightly into the space. When it seems firm take the nail and drive it into the wood. It will go in nicely without bending and remain firm and indefinite length of time. This same method was used at one time when it was decided to hang a hammock between the fence and the wall, with the exception that the hole was dug out a little longer and deeper than for an ordinary nail.—Minneapolis Journal.

Why People Feel Depressed in the Cold Weather

Why is tiredness and langour so prevalent just now? A physician explained that the cold of winter drives blood from the surface of the body to the liver. Normally one-fourth of the whole blood supply is in the liver, and when more blood is accumulated in that organ everything goes wrong.

No better remedy exists than Dr. Hamilton's Pills which are composed of such vegetable extracts as Mandrake and Butternut, and possess wonderful liver stimulating powers. It's a marvel the way Hamilton's Pills clear the blood of the poisonous humors. They put new life into worn out bodies, build up the appetite, bring back a reserve of nerve energy, tide folks over the cold days of winter and the depressing days of spring. For your health and body comfort get a 25c box of Dr. Hamilton's Pills to-day.

The Remedy for Anger.

The greatest remedy for anger is delay; beg anger to grant you this at the first, not in order that it may pardon the offense, but that it may form a right judgment about it; if it delays it will come to an end. Do not attempt to quell it all at once, for its first impulses are fierce; by plucking away its parts we shall remove the whole. We are made angry by some things which we learn at second hand and by some things which we ourselves hear or see. Now, we ought to be slow to believe what is told us. * * * If you were about to give sentence in court about ever so small a sum of money you would take nothing as proved without a witness, and a witness would count for nothing except on his oath. You would allow both sides to be heard; you would allow them time.—Seneca.

The Nova Scotia "Lumberman" says:

"I consider MINARD'S LINIMENT the best LINIMENT in use.

I got my foot badly jammed lately. I bathed it well with MINARD'S LINIMENT and it was as well as ever next day.

Yours very truly,
T. G. McMULLEN.

More Effective Than Cursing.

Babylonian tablets, declared to be the oldest writings in existence, relate how farmers of 6,000 years ago fought locusts and caterpillars in their fields. The translator avers that they called in a necromancer, who thus brought his artillery into play:

"He broke a jar, cut open a sacrifice, a word of cursing he repeated, and the locusts and caterpillars fled."

It must have been a powerful "word of cursing" he repeated. Pity it is that it has been lost. These plagues have been "cussed out" good and plenty in all modern tongues, but they have calmly continued their work of crop devastation. Possibly through the centuries they gradually became hardened to such verbal warfare and declined to abdicate until the man came with the insecticide spray. Then is the time for disappearing certainly. Breeder's Gazette.

Minard's Liniment Cures Diphtheria.

Three Atmospheres.

The atmosphere is divided by scientists into three parts. The first extends from sea level to about 10,000 feet high. In this layer are almost all the water vapors or clouds and all the wet. In it all the storms take place. The temperature tends to decrease, but very irregularly. The second layer extends to between six and seven miles high. In it are the "cirrus" clouds, and the temperature decreases uniformly. Man cannot go beyond it.

These two layers together are called the troposphere, because in them all the vertical movements of the air take place. Beyond them is the stratosphere, in which occur any movement of the air in planes parallel to the earth's surface.

"Mamma!" "Yes daughter." "Who was Cinderella?" "Why, Cinderella, my child, was the first female to get a No. 4 foot into a No. 2 shoe, I believe. —Yonkers Statesman.

You Can't Work with hand or brain when the body is poorly nourished. Get warmth and strength for the day's work by eating for breakfast Shredded Wheat with hot milk. Contains all the body-building material in the whole wheat grain prepared in a digestible form. Its crisp goodness is a delight to the palate and a life-giver to tired brain and jaded stomach. Made in Canada.

France's National Museum.

The Musee Carnavalet of Paris also known as the National musem for it contains objects pertaining the history of France and especially the French revolution. The sacredn of antiquity clings to the building self, which was begun in 1544 and larged in 1660, by Mansart, the fam architect of Louis XIV. In 1677 became the home of Mme. de Sevig who lived there for eighteen ye and after whom the street is na that faces the principal entra Among the contents of this muse are fragments and statues from old buildings which no longer e There are also a weird portrait in wax of Henry IV., made the after his assassination, and an au graph order from Louis XVI. for t defenders of the Tuileries to cease ing. Things of historic interest a numerous, but none more sanguinar than the copy of the constitution 1793, bound in human skin.

Breadfruit Tree.

The south sea island housewife doe not have to make bread. There is tree in those islands called the bread fruit tree, the fruit of which when baked looks just like wheat bread. It is very palatable and nourishing.

He—How is it you have never married? She—You never asked me before! —Boston Transcript.

ELLA'S RECOMPENSE

CHAPTER I.

A bright, warm July morning; a wide footway between a wall and high railings, over which branches of forest trees extended the gracious shelter of their leafy wreaths, the distant roar of Kensington on the one side, and Notting Hill on the other; a scent of mown grass on the left hand, and of mignonette from the gardens beyond the wall on the right: this is the opening scene of our little drama.

Our heroine is discovered walking slowly up the lane, a slight girl about middle height, in mourning; a black straw hat trimmed with crape shaded her face, making an extremely fair complexion look still fairer; a pair of soft laughing eyes, of no particular color, yet which looked dark compared with the red gold tinge of her gently-waved hair; a neat ladylike figure, moving with ease and grace. Young ladies do not easily soliloquize, but the author of her being knows of course what this one is thinking about. Nothing very abstruse, nothing sentimental, no conscientious introspections, nor, I regret to say, noble aspirations toward a higher life. She was saying to herself, "what a quantity of money it costs to buy respectable clothes! but how delightful it is to have them! I do hope Kitty will try and take care of hers, poor dear! How proud she is of being as well dressed as the rest! It is awfully depressing to be shabby. How deliciously the grass smells! I should like to go to the country and take Kitty; but I am afraid that cannot be managed. How pleasant it is this morning! After all, if one is just not too dreadfully poor, mere existence is very delightful." Then, after a pause, an interval of indistinct thought, "I wonder is that man drunk?"

This last mental question was elicited by the sight of a man in a dirty fustian suit and a cloth cap, coquettishly on one side of a rough shock head, who was leaning helplessly against the wall, in a condition not uncommon to the British workman on a Monday morning.

It was at the top of a gentle ascent, where a private road debouched on the footway. The young lady hesitated, shrinking from the idea of passing him, and feeling it would be useless to turn back; and she had not too much time to spare, so she forced herself to proceed, [illegible]

The British workman, who seemed half asleep, roused himself at the sight of the slight dark figure, and starting forward with alarming unsteadiness, announced his intention of taking a walk with "a nice respectable young woman, who ought not to be left alone."

The girl had sense enough to perceive the uselessness of speaking to him, and endeavored to slip past without heeding; but he was too quick for her, and staggered across her path with a derisive shout: "Come, now, none of your dodging! What, are you going to run away?" for she had turned to fly, when a quick-approaching tread made her pause, as a gentleman came quickly from the side road and placed himself between her and her assailant—a tall, long, upright man, with iron-gray hair, and exceedingly dark, sunburned face, and deep-set, angry-looking eyes. "Come," he said, "let the young lady pass."

"Whatsh 'at to you?" said the man, thickly; "you're not my mashter"; and he lurched heavily toward his interlocutor. "Just go on, if you please," said the gentleman in a tone of command. "I'll keep this drunken brute back." "Brute yourself!" cried the tipsy one, making a desperate effort to pull off his coat; "come on and let's see which is the best man of the two"; and he stumbled against his antagonist, who, putting his foot forward dexterously, contrived to trip him, and he fell heavily to the ground. "There," said the gentleman, overtaking the girl he had assisted, "he will not soon attain the perpendicular. In the meantime, if you will allow me, I will see you out of this lonely path."

"Oh, thank you! I do not think it is necessary; I do not like to take you out of your way."

"That is of no consequence," he returned, and continued to walk beside her. She made no further opposition, feeling a little amused at the indescribable air of authority with which he spoke, his "if you will allow me" being much belied by the tone in which it was spoken. "This is not a nice place for a young lady to walk by herself," he said after a pause. "I shouldn't let a daughter of mine come here alone."

She glanced at him, thinking he was probably a severe father, and yet rather young to have grown-up daughters. His tread was firm and elastic, his air alert, his eyes keen.

"I have often walked here and never met anything unpleasant before."

"Ha! how often can a pitcher go safely to the well and yet be broken at last! The fact is, young ladies have grown so deucedly independent, so different from what I remember them before I left England, they can't be surprised when they get more than they bargained for."

"If you had stayed in England you would have kept pace with the times and understood them better," smiling at him saucily.

"You are one of the independent young ladies, are you?"

"Not particularly independent; I wish I were."

"Well, don't. It's enough to turn a man into a misogamist to see women tramping about the world fighting their own battles, asserting their own rights, hunting, shooting, and God knows what."

"Misogamist! That's an awful word," returned the young lady, with much gravity. "I wouldn't be a mis— what is it? if I were you."

"But one can't help it; one's ideal is destroyed. Now, how much better for a nice young lady like you"—and he smiled rather grimly—"to wait at home till your father or your brother was ready to go out with you, or—"

"And if both were busy, must I sit at home, when the sun is shining, in a stuffy room?"

"You might open the window."

"Oh, thank you; I do not think any girl would submit to such imprisonment now. Don't you think it argues a very low state of civilization if women can not walk abroad with impunity?"

"I can't call it civilization to turn women into men. I should like them to be delicate and refined; creatures whom one would have a pride in shielding from the roughness of life and—"

"And how about those poor things who are unfit to take care of themselves, and can find no one to do it for them?"

"These are rare cases, I imagine."

"Not in the England of to-day, as you will find. I do not like strong-minded women myself, creatures that cut their hair short and wear frightful gowns; but I would rather not be a doll, and only move when my wires were pulled."

"Well, I don't know much about young ladies. I rather like a doll, a pretty, good-humored doll."

"There are plenty still to be found for big boys," she returned, laughing gayly. "But contradiction is a bad return for your kindness. No doubt you take excellent care of your own daughters! Now, you need not come any further. Notting Hill is scarce a hundred yards off, and if you come so far, your feelings will be wounded by seeing me mount an omnibus, the outside of an omnibus."

The dark, stern face relaxed into a smile. "Yes, I understand," he said. "I'll just come on and help you up."

"Thank you," was the demure reply; "I am quite able to take care of myself, even in so difficult an ascent."

"In all cases except a drunken man's assault. I suppose a little later on, athletic exercises will be added to female accomplishments, and the noble art of self-defence; then we inferior animals shall sink to our proper level."

"Perhaps."

They walked a few paces in silence, and then turned into the main road. "There! there is the omnibus," cried the young lady. "Pray stop it for me. Good-morning, and thank you. I will show my gratitude by deference to your opinion, and go inside this time." She bowed, and sprung lightly into the vehicle, where she was lost to view.

The iron-gray gentleman replaced the hat he had raised in a parting salutation, slowly, and turning, retraced his steps to the point where he had come to the young lady's rescue. "Saucy little devil," he thought; evidently considers me a regular old buffer, and father of a family! A pretty piece of feminine goods, in spite of her independent airs, though. Awful fools, these emancipated women, if they knew but all"; and memory conjured up a certain image that once occupied his fancy, or perhaps heart, a good deal; a small, graceful figure, a delicate little face, ready to sparkle into smiles at a word of compliment or any overt attempt to be witty; soft, fluffy light brown curls, and a [illegible] beseeching eyes, almost spaniel-like in their expression.

He had been devotedly fond of that woman, and would have gladly married her, had she not been provided with a husband—a brute, a Tartar, who tyrannized over his charming wife, contradicted her in public, and pooh-poohed her in private, and yet, by Jove! how fond she was of him. Her devotion was quite touching. And that was the sort of woman a man would lay down his life for. These self-asserting masculine girls were abhorrent enough to make a man forswear the sex forever!" and absorbed in memories of early days in India, the hero of this little adventure went on his way.

* * * *

Meantime the young lady descended from the omnibus at one of the short streets running parallel with Edgware Road, walked quickly up it to a half-circle of handsome houses and rang the door-bell of one. It was flung open to its widest extent by a lanky, pale-faced lad in a many-buttoned jacket, who looked as if he slept in the oven.

"Is Mrs. Vereker at home?"

"I don't know'm. Just step in, and—here, Susan," to a young woman in a print dress and apron, who, duster in hand, was going upstairs, "Is Mrs. Vereker at home?"

"Yes."

"Well, just tell her, will you, there's a lady for her?" and the youth threw open the door of a well-furnished, but exceedingly dusty, front parlor. Before the visitor had time to look at the prints which adorned the walls, the young woman aforesaid looked in.

"Mrs. Vereker says will you please go up to her room?"

Our heroine followed her guide up four flights of stairs, and was ushered into a large, comfortable front bedroom, where at a writing table sat a lady in the profoundest widow's mourning—a small, neat woman, with a pretty, faded face, and large eyes, from which the color seemed to have been washed out; her gray, nearly white, but abundant hair was turned back from her brow over a sort of cushion, in the style called, twenty years ago, "de l'imperatrice," and surmounted by a diaphanous widow's cap, from which broadly hemmed gauzy white streamers floated. At the sight of her visitor she sprang up, with a quick staccato movement, and made a dart to meet her.

"Ella Marston! I should have known you anywhere! You are so like your lost mother! I am quite glad to see you! In my wretched, lonely, bereaved condition, I am thankful to see any one belonging to me. Why, I had no idea you were so old! Do you remember me at all?"

"I think I do; I remember you calling with Colonel Vereker—"

"General," put in the widow.

"Not long before my dear mother's death, but—" she hesitated, looking at the nearly white hair of her interrogator.

"Oh!" cried Mrs. Vereker, with a sort of a very small shriek, "I am sadly altered, I know I am! I have nearly cried my eyes out. I have gone through such sorrows, such trials! My dear husband, the best, the most devoted! Ah, such a man! He was long a sufferer, and I nursed him day and night. I never rested, never; and now I am a poor, miserable, lonely wretch!" Her pretty little mouth twitched, and pulled out a black-bordered handkerchief.

"Sit down," she said, with a sob, "do sit down and tell me everything."

Ella Marston's eyes filled with sympathetic moisture.

"It must be indeed sad for you; I am sorry," she said, gently.

"Ah! you feel for me; I see you do; and goodness knows I have had little or no sympathy; my brother James has behaved abominably, brutally. I shall never speak to him again. He came to see me in black-and-white check trousers, for the first time after the death of my darling! Was it not base to insult me in my deep affliction?"

"Perhaps he did not intend it; men do not think much about their dress."

"Do not try to excuse him. I know the world too well to be blinded by ordinary excuses. Now tell me all about your poor father. I was quite glad he left you well off. I was afraid, from what I heard, your step-mother got everything; but a Mr. Dimsdale I met the other day told me about you, so I thought I would ask you to call; and I am sure I am very glad to see you. By the way, who is Mr. Dimsdale?"

"He was my father's partner. He has been my best friend. Only for him Mrs. Marston, my step-mother, would have robbed me of everything. She has been most cruel; she made my life a burden to me. She drove me from my father's house before I was seventeen. I would not have stayed so long, only I could not bear to leave poor Kitty—you know Kitty is nearly ten years younger than I am. It was Mrs. Dimsdale who got me an engagement as pupil-teacher in a school at Blois. I was half-starved there and oh! so cold in winter! Still, the girls and teachers were not unkind; it was infinitely better than home. Home! I have never known what home was since my mother died; and oh! Mrs. Vereker, you have a look of her. I do not know where the likeness is, but there is a likeness, and it is delightful to look at you. There was a picture of you my mother always had in the drawing-room; such a pretty picture," continued Ella, with unconscious flattery. "It must have been very like, too. I wanted to have it when every thing was divided, or rather everything was taken away, and Mrs. Marston would not give it up."

"What an odious, unprincipled woman!" cried Mrs. Vereker with energy, throwing back her muslin lappets as she spoke. "She deserves to—to—oh! I don't know what she deserves! But I will give you my photograph, dear, the last I had taken before my darling's death; and he liked it, though it did not do me justice, he said; but he liked it. And she took your picture from you? What a barbarous, unfeeling monster! I dare say I am like your poor mother. We were cousins, you know, first cousins, and great friends when we were girls, only she was a good deal elder than I was. Then I married earlier than she did, and went away to India. Ah! that was a happy day for me when I married my dear saint. Not that he was exactly a saint; he swore a little sometimes—it was only a habit. He was truly pious in his heart, only he did not show it. But your poor dear mother, she had not so much proper pride as I had, and married—that is—you'll not be offended, for it is the truth, though I ought not perhaps to say so—" These sentences were jerked out brokenly and exceedingly staccato—"she married rather beneath the family; I mean a solicitor."

"Oh," said Ella, indifferently, "I should not mind what my father was, so long as he did not take a second wife, and she made poor little Kitty so miserable. Oh, Mrs. Vereker, I used sometimes to feel quite wild and wicked, when I was far away at Blois, and thought what the child was suffering—that child my mother committed to my care with her last words."

"But how could you help her?"

"I managed at last. When I came back from France I went to teach French at Miss Griffin's, and when she found I understood music, and was willing to take all the junior pupils, and to teach history as well if she would take Kitty, she agreed to do so. And oh, the struggle it was to get the poor child clothes! Mrs. Dimsdale used to send me old things, and after the girls went to bed I used to cut them down. After a while Miss Griffin—who is rather an awful woman in spectacles—grew quite kind and helped me. Still, it was a tremendous grind. But, thank God, Kitty is getting a good education. Why, she didn't know how to spell c-a-t, 'cat,' when she came to Bayshill House at ten years old."

"Well, well," said Mrs. Vereker, who had grown a little impatient at the length of this speech, "I am glad your father left you something, and that you are independent now."

"He did not leave me anything," said Ella, shaking her head. "My grandmother left me a little money, to be mine after my father's death, but I did not get it till a few months ago—more than a year after my father died. Mrs. Marston did her best to keep it, but Mr. Dimsdale insisted on my rights and made her pay it, and a year's interest which she had used, so that enabled me to dress Kitty and myself; and we wanted every thing. However, with management, eighty-five pounds a year will do a good deal."

"Eighty-five pounds! Is that all you have to live on? Why, it is nothing! poverty, beggary! How people exaggerate! That Mr. Dimsdale talked as if you had come into a fortune."

"I know it is not much," returned Ella Marston, flushing a little at her cousin's contemptuous tone; but I assure you it is a great improvement on nothing. I am going to look for an engagement in a family, and pay for Kitty for a year or two; then she can give some lessons herself; besides," coloring more deeply, "I have written a children's story—a very simple thing—and a publisher has given me five pounds for it. I think I might write other things if I could go about a little."

"You have written a book!" cried Mrs. Vereker. What in the world put that into your head! I wouldn't waste my time on such things if I were you! Five pounds is a mere bagatelle! and, take my advice, do not work the flesh off your bones for your sister—sisters are heartless and ungrateful. Look at mine—they make my life a burden to me, quarrelling with the dear general about the Pitts fortune we had among us."

"Kitty and I will have none to quarrel about; but I have wearied you with all this talk about myself. You cannot think how pleased I was to have your note. It is pleasant to find there is one among my mother's people who acknowledges me."

"Well, I am sure I always will," cried Mrs. Vereker, with an air of noble generosity; "I don't care what any one says! and I am sure you will do your best to help me."

[To be Continued.]

SUNDAY SCHOOL LESSON

LESSON IV.

January 23, 1916.

The Spirit of Life.—Romans 8: 12-30. Print 8: 12-17, 20-30.—Commentary.—I. The spirit and sonship (vs. 12-17). 12. therefore, brethren, we are debtors—Paul is addressing fellow Jews. He here refers to the discussion included in the few preceding verses that the soul's salvation and true life come through the operation of the Holy Spirit, therefore we are debtors to the Holy Spirit and are to honor him. The flesh, the earthly, can do nothing for us by way of giving spiritual life. 13. If we live after the flesh—To live after the flesh is to obey the suggestions of the lower nature, or the carnal mind. It means that one disregards the highest interests of his being. He does not look to the future welfare. His creed is to make the most of the present life in the way of self-gratification. He follows pleasure, wealth or fame, and lets his soul starve and shrivel. ye shall die—This does not mean physical death alone. It declares that the penalty of living after the flesh is eternal death. but if ye....mortify the deeds of the body—The body is analogous to, but not identical to the body, but including the entire tendency to sin.—Whedon. To mortify the deeds of the body is to kill them as far as they are not in harmony with the will and word of God. This is done, not by ones own power, but through the Spirit. ye shall live—Shall live spiritually and shall have everlasting life. Those who are in the service of Satan are dead in sins. It is God's gracious purpose to bring true life to the soul.

14. led by the Spirit of God—One of the offices of the Spirit is to guide (John 16: 13), and his leadings are always in harmony with the word of God. In fact the Holy Spirit often makes use of the word to direct Christians in the way that is best for them and that is for the glory of God. He is ever ready to lead, and will lead all who willingly and trustfully commit themselves to his guidance. He may lead in ways that to the natural mind appear strange and hard, but he always leads where the best results for time and eternity are realized. are the sons of God—A close and blessed relationship is presented in this expression. It indicates a likeness to the support and protection by the Father and a share in the Father's wealth. 15. spirit of bondage again to fear—An escape has been realized from the cruel bondage of sin and Satan, and although the child of God is "led" by the Spirit, it is not as a slave nor is there any sense of bondage. He renders a giving, not a servile, obedience to the Father. the spirit of adoption—There is a wide contrast between the spirit of bondage and the spirit of adoption. The sons of God are conscious of their sonship. whereby we cry, Abba, Father—It is the natural cry of those who have been saved from the guilt of sin. "And because ye are sons, God has sent forth the Spirit of his Son into your hearts, crying, Abba, Father" (Gal. 4: 6). Those who are saved from their sins call God their Father, because they have a blessed sense of sonship. The cry, Abba, Father," comes spontaneously from their hearts. They delight in the knowledge that they belong to the heavenly family.

16. the Spirit itself—"The Spirit himself."—R.V. beareth witness with our spirit—As the child of God views his desires and disposition, he is certain that he has become a new creature in Christ Jesus; but this is not the only assurance he has, for the Holy Spirit adds his witness that regeneration and adoption have taken place. The same fact is confirmed by two witnesses, the human and the divine. There is great comfort in the fact that our sonship with God is made thus evident to ourselves. There is no other item of knowledge that it is so essential for us to possess as this. 17. If children then heirs—A child is heir to his father's estate. This principle is readily admitted and thoroughly understood. If we become the children of God, then we are heirs to the inheritance which he has in store for us. joint-heirs with Christ—Not only are we honored with being made sons of God, but we are also counted as brethren of Christ, and are constituted heirs with him of the Father's glory. if so be that we suffer with him—There is a condition set forth upon which we receive the inheritance. We are to bear the reproach of Christ, and that to the end of our earthly pilgrimage. glorified together—Suffering with Christ is the necessary antecedent to glorification with him; by way not of merit, but of preparation. The eternal bliss is a gift in the most absolute sense; but the capacity to enjoy it, certainly in a great measure, imparted only in the school of trial (1 Peter 1:6-7).—Cam. Bible.

II. The glory to be revealed (vs. 18-25). The apostle pursues the thought of suffering just mentioned and considers it of small moment in comparison with the final glory to be enjoyed by the children of God. The entire nature longs for the revelation of that glory. Not only so, but the whole creation is in an expectant and longing attitude for the perfect adjustment of all things to the will and purpose of God. The works of the devil shall be fully destroyed. The Son of God was manifested for that purpose. The Christian does not see the consummation of his desires but he hopes for it, and goes forward in his life of suffering and triumph, knowing that the glory of God shall be revealed in the fulness of time. Sometimes there comes a desire to the believing soul to depart and be with Jesus in his glory, yet he is in full accord with the divine purpose concerning him.

III. The Spirit and prayer (vs. 26, 27). 26. the Spirit also helpeth our infirmities—In addition to all that has already been mentioned, the Spirit will give the help needed in every direction. The infirmity here mentioned has direct reference to our lack of knowledge as to what to pray for. We may desire many things that would not be for our good if we should receive them; but if we let the Holy Spirit guide us in our praying, we shall have right views of the nature and manner of prayer. The Spirit will lead us to place higher value upon spiritual blessings than upon temporal good. maketh intercession—While Christ "maketh intercession" for us above, the blessed Spirit frameth our own intercession for us within. His prayer is an inner prayer within our prayer, a silent, divine voice within our voice, the soul of which our prayer is the body.—Whedon. with groanings which cannot be uttered—The promptings of the Holy Spirit have a depth that cannot be expressed by human speech. 27. he that searcheth the hearts—The Father. knoweth.... the mind of the Spirit—God knows what the Spirit prompts us to pray for, although we are unable to express our petitions. he maketh intercession ....according to the will of God. The Holy Spirit is in perfect harmony with the Father's will in what he prompts us to pay for.

IV. Called to Salvation (vs. 28-30). 28. we know. This is full assurance. Sonship with God, the indwelling Spirit and the unfathomable grace and glory promised to us lead us to a full knowledge of the fact that all things are working together for good if we love God. to them who are the called according to his purpose—This clause explains "to them that love God." The called are they who obey the divine invitation to become the children of God. His purpose is to save as many as will accept salvation. 29. foreknow To know beforehand. God knows what is in the future as well as what is past. predestinate—God not only knew humanity and its needs, but he provided before the foundation of the world for its salvation. He determined before man's creation that he would redeem and save him. among many brethren—Jesus became brother to those saved through his blood. 30. glorified—We observe that these verbs are all in the past, and the apostle is standing in His thought at the close of human history on earth, and viewing the consummation of man's redemption. He views the redeemed in glory.

Questions.—Who wrote the Epistle to the Romans? What is the purpose of this epistle? Whom does the apostle call brethren? What is meant by the flesh? What shows that one is led by the Spirit? What is the twofold witness that believers have that they are the children of God? In what ways does the Spirit help us? Whom does God call to be saved? What promises is given to God's children regarding all the experiences that enter into their lives?

PRACTICAL SURVEY.

Topic—The Christian life.
I. Relationship determined.
II. Inheritance contemplated.

I. Relationship determined. In this chapter the Apostle Paul makes a high claim for believers, the claim of being sons of God. He affirms that the witness of divine adoption is the surest pledge of eternal life. Distinction between sonship and servantship runs all through the lesson. The spirit of bondage and the spirit of adoption are shown to be distinctly opposite. There is much emphasis as to the work of the Holy Spirit. The aim of the apostle is to exhibit the sublime privileges of the child of God amid all the trials of earthly life. The wisdom of the Father, the redeeming work of Christ and the operations of the Holy Spirit are shown to be combined in the uplift of man into the family of God. We observe a remarkable distinction of character. Those in the natural state are described as in the flesh, as carnally minded. Those in the state of grace are said to be of the Spirit, to be spiritually minded, led by the Spirit. The child of God in this life gathers first fruits. He is saved from the guilt of sin, from its defilement, its reigning power and its penalty. Death to sin is to be effected by the life of God in the soul. It perfectly annuls all covenant with sin. The Holy Spirit reveals the existence of indwelling sin and deepens the aspiration after deliverance. Mortification of sin is the work of the Spirit in us and is effected in no other way. Sin is deceitful and dangerous. It makes us slaves to Satan and enemies to God. It must have no reprieve. Prompt and uninterrupted severity must be used. Man must be an agent in his work, but it is the strength of the Spirit only that can render him victorious. The difficulty of this work is manifested by the necessity of the Spirit's efficacy. Mortification involves the breaking of the league naturally held with sin, a declaration of open hostility backed by a powerful resistance. The Spirit reveals his presence by the life he brings and the influence he exerts. He bears testimony by which doubt is put away. Such assurance is the basis of Christian life. There is an inseparable oneness between the mind of the Spirit and the will of the Father. The Spirit leads with great exactness and wisdom, with infinite truth and faithfulness resulting in an intimate and tender relation between man and God.

II. Inheritance contemplated. Having affirmed the divine relationship of the believer, the apostle proceeds to adduce the divine evidence of a truth so great. God had pledged himself to the relationship of a father. All his children are heirs. No greater blessing could be bestowed. There could be no inheritance without sonship and no spiritual birth without Christ, who paid the penalty of sin and purchased all blessings. Christianity discovers a wise and loving Father directing all the mixed processes of life to a beneficent issue. God deals with his children after a fixed and definite plan. He has determined to bring his children to the glorious consummation of perfect likeness to his Son. It is his purpose to restore his people to their original rectitude. Salvation is not only a work for us, but in us. A willing acquiescence in his wise arrangements is one of the best proofs of a filial spirit. Paul beheld a universe working out with expectance a divinely appointed end, from the bondage of corruption to the liberty of glory. He advanced from the proclamation of sonship to the redemption of the body, affirming with certainty that spiritual blessings are pledges of future possession; that earthly attainments are not the end of God's design; that the body redeemed by price is yet to be redeemed by power, and that it is for such consummation the believing heart is groaning. The whole creation is represented as longing for the glorious period when all its misery shall be over. It is with a pitying and compassionate eye that Paul looked upon humanity, regarding every symptom of ruin as a prophecy of reconstruction, and all suffering as temporal, while he proclaimed the gospel of hope, the divine dispensation of encouragement, thus transforming the discrepancy between the ideal and the actual into a means of grace. His declaration, "We know," is a talisman changing the aspect of every conflict of life, inspiring courage and girding with strength. T. R. A.

Eastern paper has started a contest to decide what is the most useful thing in the world. Easy. The most useful thing in the world is a pair of trousers.—Grand Rapids News.

We still feel that a fortune awaits the inventor of a rural automobile with a seat as narrow as that of the old-fashioned buggy.— Washington Post

What Constitutes A Coward?

(By Andrew G. Ewing.)

During the Civil War a party of Federal officers were sitting on camp chairs before the tent of the regimental surgeon, Curran, chatting, and the conversation turned on what constituted courage. Some of the party advocated the theory that physical bravery meant a want of appreciation of the danger incurred, mentioning in support of the opinion that the younger the man the less his fear. Others averred that bravery meant resolution to withstand fear and face danger without flinching. Some one asked the surgeon's view of the matter.

"I think, or, rather, I know, that all men are cowards physically. Frederick the Great was right about it when he said that any man who had not known fear had never snuffed a candle with his fingers. But this does not mean that some men are not more cowardly than others. What I mean is that there are nerve centres in us that act in face of danger independently of our will. I have understood that our president has said that he never knew of a race between the head and the heels but that the heels won. What he means is that when sensible of danger, danger always gets the better of us. Most of you line officers know that when you go into a fight you feel afraid. After you get battle mad you lose that fear. Why? Because you become insensible of the danger.

"Lieutenant Eldridge of D Company has been court-martialed for cowardice and sentenced to be cashiered. He will suffer under his disgrace so long as he lives. He is no more to blame than if he had been born deaf or blind. It simply means that at the approach of danger certain nerve centres in his brain order his nerves to deprive him of bravery."

"What's this you're scattering among my officers!" said the Colonel sternly, coming out of his tent. "That sort of talk will induce every man who don't wish to do his duty to find an excuse for not doing it."

"I'm interested in Eldridge Colonel, and have a great deal of sympathy for him. I think he should be permitted to resign rather than be disgraced. His trouble is that before he gets in the battle madness we all need to make us brave, the strain on his nerves is too much for him."

"Nonsense. Eldridge is a coward, and that's all there is about it. He's been tried for it; it has been proved on him, and he has been cashiered. The next man in my regiment that flinches shall be served in the same way."

The doctor said nothing for a few moments. He seemed to be turning something over in his mind. Presently he said:

"Colonel, if I can prove you a coward will you permit Eldridge to resign?"

"What? Prove me a coward!"

"That's what I said. No disrespect, Colonel. We are all cowards instinctively."

"How are you going to prove it?"

"If you will wait here a few minutes I will bring the means of doing so."

The doctor arose, went to his tent and brought back with him a bottle of clear white glass in which was a little rattlesnake. The reptile eyed the party viciously, evidently considering them his natural enemies. The doctor carried the bottle by a string tied to its neck and hung the bottle to a tent pole.

"Now Colonel," he said "if by means of this little fellow, who is perfectly safe behind glass and can't hurt any one, I can prove that you are an instinctive coward will you promise me to take steps to have Eldridge's resignation accepted instead of his being cashiered?"

"Yes, I will; and I'll do more than that, I'll give him another chance—half a dozen if he likes."

"More chances won't help him. His is an exaggerated case of physical defect so far as bravery goes. All I ask is to let him out of it without disgrace. Now, I shall give you the advantage of preparation, Colonel. I shall permit you to see others flinch before you flinch yourself."

"I shall not flinch, sir. Should I flinch at any test I would not be fit to command this regiment."

The doctor asked one of the officers to put a finger on the bottle. He did so. The snake struck at the finger and the officer recoiled, for the moment losing his color. One after another the members of the party were requested to touch the glass, and not one could resist an impulse to snatch away his finger when the serpent struck the glass on the other side of it.

When all had been put to the test except the Colonel the doctor invited him to step up and show his courage. Being prepared, he made a strong effort to keep his finger on the glass when the snake struck, but involuntarily withdrew it. He looked mortified and crestfallen.

"And now gentlemen," said the doctor, "I will show you of what bravery consists. It is unconsciousness of danger. We must either not see it or have our attention diverted from it."

Turning his back to the bottle, he placed his hand on the bottle and kept it there while the reptile struck at it repeatedly.

"I do not intend," he said, "that this demonstration shall be considered exhaustive, but it is enough to prove my case."

"I confess myself beaten doctor, and will keep my agreement with you." said the Colonel.

Wood Half as Heavy as Cork.

A wood so light that it is only half as heavy as cork is Porto Rico's latest contribution to the commercial world. It is known as balsa wood, the Porto Rican name being goano, which is "corkwood" when translated, while in Martinique the term applied to it is floating wood.

Samples of balso wood have been put on exhibition in the museum at the Missouri Botanical Garden in St. Louis, from which institution a bulletin describing it has just been issued.

Coated with paraffin to render it impervious to water balsa wood is now taking the place of cork in the manufacture of life preservers, and modern life rafts constructed entirely of the Porto Rican product are being made. Being extremely porous, balsa wood acts as a neutral insulator against both heat and cold. Fireless cookers made of it are found to require no additional insulation, and a piece of ice placed in a box made of goano withstood the heat of an intensely hot day, for five or six hours recently. The United States Government already is using it for the construction of buoys used in the coast service.

Up to the time of the introduction of balsa wood, the scientific name of which is Ochroma lagopus, a Missouri tree was believed to be the lightest wood grown. This is the corkwood, otherwise Leitneria floridana. Balsa wood weighs only about a third as much as Missouri corkwood, however. Cypress is four times as heavy. Maple weighs six times, hickory nearly eight times and ebony more than ten times as much as balsa wood. Prof. John C. Gifford, in a letter to the Missouri Botanical Gardens, writes from Porto Rico that the balsa trees grow to be a foot in diameter and There are no knots or other defects in the wood.—Kansas City Star.

A COLD
Settled On Her Lungs.
Causing Great Pain.

THE CURE WAS
DR. WOOD'S
Norway Pine Syrup.

Miss D. M. Pickering, St. Catharines, Ont., writes: "Having derived great benefit from Dr. Wood's Norway Pine Syrup, I thought I would write and tell you of my experience. When I first came out from England I contracted a severe cold, owing to the change of climate. It settled on my lungs, and caused me a great deal of pain. I tried every remedy I could think of, but got no relief. My father, who had heard a great deal about the good qualities of Dr. Wood's Norway Pine Syrup, advised me to try it. I did so, and I am pleased to say, found immediate relief. I only took one bottle and it cured me completely. My mother had a severe cold also, and Dr. Wood's Norway Pine Syrup cured her, so we never fail to keep a bottle of it in the house."

See that none of those so-called "pine syrups" are handed out to you when you go to your druggist or dealer and ask for "Dr. Wood's." It is put up in a yellow wrapper; three pine trees the trade mark; price, 25c and 50c.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

HOW WORMS LIVE.

The Common or Garden Worm Has Funny Habits.

Many people who have had no previous taste or inclination for gardening, have taken to growing vegetables and in their work with the fork and spade continually come across the common or garden worm. There are thousands of different classes of worms inhabiting both land and water, and there are over a thousand different species of earthworm alone. How many people, for instance, know how the worm, which has neither eyes, limbs, or anything which corresponds to teeth, manages to get about so easily in its underground life?

To begin with, a worm is divided into a large number of segments, or joints. The first of these acts as a mouth, and by means of this he eats his way through the earth, obtaining nourishment as he does so, and at the same time casting out all unnecessary matter or earth. The earth passes through no fewer than five distinct chambers in the worm, the last of which is filled with minute stones that grind the food. According to Darwin, as much as ten tons of soil an acre passes through the bodies of worms. The earth is therefore, continually being turned about, more effectually than man could do it. In the course of years the underneath earth is brought to the surface, and the wornout earth on top is sent to the bottom to be fertilized again.

The worm is a glutton for food, and if kept on a stony path where he is unable to carry out his natural powers of earth-eating he will die from hunger in a few hours. Although the worm is very fond of moisture, yet he will soon drown if unable to get out of a puddle or pool of water. This is due to the fact that he breathes by means of pores in the skin through the whole of his body. Owing to the segments, a worm can be pulled in and out concertina fashion, so that he can be made very fat or very thin. But near the head there is always one fairly thick portion; this is where the worm's eggs are contained. When not on the prowl worms like to nest among the roots of decayed plants, or in a hole in the ground, or anywhere where the earth is not too closely pressed together. It will be seen, then, that even the despised worm has its purpose in life, although it is better to rid the earth of them as much as possible, for near the surface they are injurious to seed and plants, and however many you destroy there will always be a sufficient number left to keep the ground fertilized.

In life it is difficult to say who do the most mischief, enemies with the worst intentions or friends with the best.—Bulwer Lytton.

In their eagerness for high life some people patronize roof gardens, and others take up aviation.

When the Back Becomes Lame
IT IS A SIGN OF KIDNEY TROUBLE

Doan's Kidney Pills cure the aching back by curing the aching kidneys beneath—for it is really the kidneys aching and not the back.

Doan's Kidney Pills are a special kidney and bladder medicine for the cure of all kidney troubles.

Mrs. Louisa Gonshaw, 683 Manning Ave., Toronto, Ont., writes: "I take great pleasure in writing you, stating the benefit I have received by using Doan's Kidney Pills. About three years ago I was terribly afflicted with lame back, and was so bad I could not even sweep the floor. I was advised to try your pills, and before I had used one box there was a great improvement, and my back was much better. However, I kept on taking them until my back was completely cured. I highly recommend "Doan's" for lame back."

Doan's Kidney Pills are the original pill for the kidneys. See that our trade mark the "Maple Leaf" appears on the wrapper.

Doan's Kidney Pills are 50c per box, 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

EDITORIAL COMMENT

THAT POPULAR THREE-FIFTHS!

"The ball and chain of the three-fifths clause fastened to the legs of the temperance people of Ontario."—Sarnia Observer.

"The three-fifths clause was the chief victor yesterday."—Port Arthur Chronicle.

There is little use in some people praying for a "dry Brantford" so long as they are willing to continue in office the men who are responsible for maintaining that great fortress of the liquor traffic in this province, the three-fifths handicap. In Manitoba the three-fifths prevailed at one time, having been copied from Ontario, but even the Roblin Government saw its unfairness and returned to the bare majority principle. Is it not time the people of this province insisted upon the Hearst Government giving them a fair deal in this matter."—Brantford Expositor.

"Sisyphus, everlastingly rolling his boulder up the hill by patient toil only to see it go crashing down again just as it neared the top, had no harder task than the temperance men of Ontario who are endeavoring, in the face of the three-fifths handicap, to abolish the bar. What is Mr. Hearst going to do about it? The Premier of Ontario had better wake up. If Premier Hearst stands by the bar he cannot remain Premier Hearst."—Toronto Globe.

+ + +

NEXT WEEKS CANVAS

Starting Monday morning, January 24th, the town of Walkerton, every municipality in Bruce and in fact, every municipality in Ontario will be systematically canvassed by representatives of the Citizens' Committee of One Hundred. The canvass will be completed before the end of the week. The Committee of One Hundred is a non-partisan organization consisting of 50 Conservatives and 50 Liberals. The aim of this committee is a dry Ontario by the 1st of July next. This end it hopes to bring about by exerting the pressure of public opinion upon the Ontario Legislature at its next session. This it proposes to do by the presentation to that body of a petition, or rather two petitions, requesting that a law prohibiting the liquor traffic so far as the Provincial Legislature can prohibit it, be enacted. The petition will further ask that should the Legislature fail to pass such a law, it shall then submit the question of prohibition to the electorate by way of a referendum.

Two petitions making the same request on the government are to be circulated. One of these will be for the signatures of electors only, and the other for the signatures of those not qualified to vote—that is, for young men over 18 years of age and for all women over 18 years of age.

Every municipality in the province is being organized for the purpose of getting signatures to the petition, and it is expected that the petition will be the largest ever presented to the Provincial Government. It will be presented by a deputation consisting of a representative from each municipality.

THE $1.50 WEEKLY

The Seaforth Expositor announced last week that in three months' time it will put in force the $1.50 subscription rate. Among other things it says:—

Hereafter the subscription price of The Expositor will be One Dollar and Fifty Cents per year instead of One Dollar as formerly. The reason for this is that ever since the subscription price was reduced from One Dollar and Fifty Cents to One Dollar, some years ago, the cost of living and the price of everything that goes into the make-up of a newspaper has gradually, year by year advanced, until now it is fully fifty per cent. higher than at that time. In other words, we have been giving what costs us, as nearly as we can figure it, One Dollar and Sixty Cents, for One Dollar. * * * The dry goods merchant, the grocer, the baker, the butcher, the blacksmith, have all been obliged to advance their prices to a paying basis. Even the farmer receives much larger prices for everything he raises. In view of these facts, which are patent to all, it should not be a matter for surprise that the newspaper man should also require to increase the price of his product. * * * We have not taken this step in connection with any combination or organization, but entirely on our own initiative, dictated by stern necessity, and we rely upon the intelligence and fairness of our subscribers to back us up. We believe they will do it. After all, the increased price is a mere bagatelle to the individual subscriber, amounting to scarcely a cent a week, while the whole price does not amount to five cents. The difference, while insignificant to the individual, in the aggregate will make the difference to us of enabling us to pay our way and avoid a heavy annual loss.

+ + +

ASSISTING THE COUNTRY PUBLISHER

Rural weeklies throughout Canada recognizing that the selling price must be somewhere near the cost of production, have decided to increase the price from $1.00 to $1.50. The raise will be general. In British Columbia the $2 rate is pretty general. In the rest of the western provinces the $1 rate was the general charge, although some weekly publishers had put into effect the $1.50 rate long ago. The aim is to make each department, advertising, job printing and subscriptions support itself. It is no longer possible to charge to the advertiser the loss brought about by the reader. Daily papers are recognizing this. Then, too, the changing conditions have convinced publishers that to remain in business strict attention to costs must be paid. There is not one reader in the rural districts, who would like to see his home / town without its home paper, and yet a number of rural weeklies have ceased publication, all because the publishers had not the confidence to put the matter of increased subscriptions before the people. Bruce County publishers are asking the consideration of their readers, when the new rate is effective January 31st, 1916.

+ + +

EDITORIAL NOTES

+ + +

General retail business during December was more satisfactory throughout Canada than for many years past.

+ + +

With the increased license fees and the higher price of gasoline, automobile-owners will have to dig a little deeper into their pockets this year.

+ + +

Every citizen will hold up both hands to the Mayor's suggestion that the roads to the G. T. R. Station and Cemetery, be fixed. These important thoroughfares need it badly.

+ + +

Higher ideals of life, the home, the country church, and the country school, were the kind of topics discussed at the evening meeting of the Farmers Institute here last Thursday. After all, the country folk are the moral leaven of this Dominion.

+ + +

There is no doubt as to where Archbishop Bruchesi stands in this war. He declares that "it is the solemn duty of every Canadian citizen, to the utmost limit of his force, to stand side by side with the Motherland in her heroic effort to crush the tyrant who wishes to trample small nations and states beneath his iron heel.

+ + +

It would have been the fair thing for the Walkerton Council to agree to pay for the daily war bulletin service. Any other arrangement must mean saddling the expense on a few people because nobody is going to collect a cent a month each from the ratepayers of Walkerton. That is all it would cost each ratepayer if the Council agreed to provide the service.

+ + +

The Boston News Bureau, a financial journal of repute, sums up the war situation, "If Germany," it says, "is strong in the field she is weak everywhere else, while the Allies are strong everywhere save in the field, and growing stronger there all the time." Quite true. But the Allies must still grow greatly stronger before they can put Germany down and out. If the war is not to end in a draw the British Empire must put every atom of its human power into the fight.

+ + +

The new editor of The Telescope, Mr. Lorne Eedy, remarks editorially that councillors should see that every facility is given newspapers to report the council proceedings, and that the press has a separate table or that chairs are provided for them at the clerk's desk, "so that the reporter will not have to suck his thumb in some dark corner or balance his writing council board, convenient to the pad on his knee." The Telescope editor is right. Too often small town council proceedings are carried on in some place unknown to the public. The people have a right to know about the council meetings, or court sessions, either, for that matter, and the local paper that misses the opportunity of "writing up" the council rather than publishing some dry minutes is serving its subscribers in any sense of the word. It takes the personal attention of the editor to get the most out of the council meetings.—Port Elgin Times.

+ + +

The Farmer's Advocate demands a straightforward statement from the Government authorities in explanation of the peculiar situation in the Canadian horse market. It says:

Canadian horsemen, who cannot dispose of their horses because of lack of market demand, will wonder, when they read our English correspondent's article in the live stock department of this issue, why they cannot sell their horses. In Britain, in 1915, horses have sold for at least $120 each more than heretofore. Such is the statement of a man familiar with the trade over there. The average for foal sales showed an advance of nearly $55 per head over similar sales in 1914. Our horsemen will be pleased to know that the British horsebreeder is finding ready sale at high prices, but this does not help matters. It is more than likely that the British Government could buy horses at less money in Canada than it is costing them at home and in neutral countries, but, for some reason, outside buyers have not operated extensively in Canada. Do they not want our horses or do we not want them to get them? There is no doubt about the farmer's wishes in the matter. He is anxious for and deserving of a market for his surplus horses, and if he cannot get it, be rightfully asks why. While marketing commissions and authorities are investigating other marketing problems, it might be as well if they threw a little light on the horse-market situation. And the market of United States horses going through in bond and free of duty and the cripples unloaded and dumped on Canada, if such be the case, should be looked into. A little action, or, at least, a straightforward statement would appreciated by Canadian farmers and horsemen.

Walkerton has a Christmas Fair that is the pride of the town and surrounding community. With a little encouragement it would assume greater proportions. The approaching meeting of the Northern Fair Board suggests the advisability of amalgamating the two Walkerton fairs and uniting all our efforts towards building up one big fair that will be a credit to the town and country. We trust that the directors of the Northern Fair, when they meet next week, will give this matter consideration. We understand that the Northern Fair is now financially out of the hole as a result of the military demonstration last year. If that is the case, this is an excellent time to join forces.

+ + +

To our good friend the farmer's wife: Dear Madam,—If you make butter, that is, if you make good butter, you would be wise to put your name on it. Get a thousand butter wrappers printed. It will cost you very little more to have them done at the printing office with your name on than you have to pay for the indefinite label of "Dairy Butter," required by law. If you could hear and see what goes on in the stores you would understand. "Have you good butter?" the customer asks. "Yes; first class. Would you like to taste it"? A pound square is produced. "Ah! Mrs T's make, I see; no need to taste it. We have had her butter before." Even if you got no more than your neighbor gets for a poorer article, it is pleasant to know that your butter is eagerly sought for; and by-and-bye, when everybody knows that Mrs T's name on a pound of butter is a guarantee of the highest quality, you will get more if you don't get it now. It is the poorest sort of business to send out your butter unidentified to save a few cents on each thousand pounds. Of course, if you don't make good butter, you will be wise to do as the dealers do who have no extra values to offer that is, "keep dark"—don't advertise!—Orillia Packet.

VICTOR BELL WRITES

Mr. Henry Williams has received the following letter from Victor Bell

Somewhere in France, 21, 12, 15.

Just a line to let you know I am real well and trust you are the same. Well it is near Christmas now and we expect to have some time as we are back at a rest billet for a month. We had a pretty hard four weeks' work digging reserve trenches and it rained steadily for two weeks. The rest of the time you couldn't put your foot outside of the tent but you were up to your knees in mud. The boys never had a dry foot for three weeks, although for me, I was alright because I was on guard for three weeks all through the rainy spell, so I was dry. I did only three days work all the time, then they brought us back into France for a rest. It is alright here but it is still raining. We are in barns so it can rain for a month and we will be dry.

Don't get anxious if you don't receive a letter for a couple of weeks at a stretch as sometimes we are in places where we are not allowed to write letters and we have not always got cards as only one is issued each week, but I will write once or twice a week whenever I can, but sometimes we run out of paper and it is quite a while before we get any more. In the billets where we are now over 100,000 Canadians were billeted last year. In the valley just beside them 15,000 Germans camped this time last year. Have received one parcel from Walkerton so far; it was from the Soldier's Aid Society.

Well as there is not much news, I will have to close, hoping to hear from you soon.

Yours sincerely,
Victor Bell R. C. R.

Phone your news items to the Telescope. We are always glad to get them.

After January 31st subscriptions to the Telescope in arrears for 1915 or in advance for 1916 will be $1.50.

The North Bruce and Saugeen Agricultural Society voted its surplus of $103 to the Red Cross Society and Patriotic Fund on Saturday.

It is not generally known here that the wife of a former Walkertonian, Mr. Jack Lines, is a second cousin of General Sir John, now Viscount, French.

+ + +

The 3 Cent Stamp

The Postal Department, in response to the repeated appeals of the press for a more convenient stamp, have now issued a three cent stamp, which will be much appreciated by the general public. The new stamp, which is in reality the old 2 cent stamp, with the letters 1Tc printed across the face of it is now on sale.

+ + +

Answer to Enquirer

Yes. The $1.50 rate applies to arrears, after January 31st. The rate for subscriptions in arrears was always $1.50, but was not enforced as it should have been. There still remains two weeks to get the dollar rate for arrears and in advance. But don't ask for that rate after January 31st for it cannot be granted. The Telescope.

+ + +

From Sunny Alberta.

In renewing their subscription to the Telescope, McCallum Bros., of Mannville, Alta, write:—We are having a beautiful winter in Alta, just enough snow for sleighing. Crops around Mannville and Vermillion were unusually good this past season, consequently business of all kinds is good. Was pleased to see the appointment of Allan Todd in the Bruce Regiment. He is a favorite with Mannville people. Wishing you and all the dear old friends in Brant the Compliments of the season.

Township Councils Hold Their Inaugural Meetings

GREENOCK TP. COUNCIL

McNab's Hotel, Chepstow, Jan. 10 1916.

HOW LONG WILL THE WAR LAST?

The War Against Health Is Quickly Ended By "Fruit-a-tives".

MRS. DEWOLFE

East Ship Harbour, N.S.

"It is with great pleasure that I write to tell you of the wonderful benefit I have received from taking 'Fruit-a-tives'. For years I was a dreadful sufferer from *Constipation and Headaches*, and I was miserable in every way. Nothing in the way of medicines seemed to help me. Then I finally tried 'Fruit-a-tives' and the effect was splendid. After taking one box, *I feel like a new person* and I am deeply thankful to have relief from those sickening Headaches".

Mrs. MARTHA DEWOLFE.

"FRUIT-A-TIVES", the medicine made from fruit juices, has relieved more sufferers from *Headaches, Constipation, Stomach, Liver, Kidney and Skin Troubles than any other medicine.*

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

POETS' CORNER

IN THE NEW YEAR.

I would be true, for there are those
who trust me;
I would be pure, for there are those
who care;
I would be strong, for there is much
to suffer;
I would be brave, for there is much
to dare;
I would be friend of all—the foe, the
friendless;
I would be giving, and forget the
gift;
I would be humble, for I know my
weakness;
I would look up, and laugh, and love,
and lift.

News About Town

Have you had the grippe yet?

County Council meets Tuesday, January 25th.

After January 31st subscriptions to the Telescope in arrears for 1915 or in advance for 1916 will be $1.50.

Walkerton merchants have much that is worth while to say to you through the columns of the Telescope each week.

A self-registering thermometer at N. P. Schmidt's fruit farm registered zero under shelter Friday morning. That was the coldest dip so far this winter.

Herbert J. Wilton son of Mr. F. J. Wilton, of Carrick, who gave up his position with the Merchants Bank at Thorold to enlist, is now a member of the 86th machine gun battalion at Hamilton.

Mrs. Geo. A. Sutherland, an old "Bruce Girl" of Windthorst, Sask., writes:—
"Trust you will continue to keep the Telescope as newsy as it has been the last few months, we wish you a prosperous New Year. We could not get along without the Telescope."

Any persons who have not taken out naturalization papers would be wise to do so without further delay, as under the new law which comes into force after 1917, there is a fee of $10 attached. Naturalization papers are obtained through Mr. Thomas Dixon, Clerk of the Peace.

Bruce Boy Vancouver's Mayor

Mr Malcolm McBeath, a Bruce county boy, has just been elected Mayor of Vancouver, B. C., over Joseph Martin ex-M P and two other candidates by a substantial plurality. Mr. McBeath is over 50 years of age and is a son of the late Thos McBeath, formerly of Park Head in Amabel township. He went West over twenty years ago and engaged in newspaper work and for a time was part owner of the Portage la Prairie Daily Review. About ten or twelve years ago he drifted to the Golden West where he made good in real estate during the boom days. He has been Alderman of Vancouver for a number of years ago. Two years ago he made an exposure of fradulent deals in which several Aldermen and officials were concerned with the result that they were driven from public life. His determination to have a clean council strengthened him in public opinion and last year he was strongly urged to become a candidate for the Mayoralty, but he declined. This year however he fell to the overtures with the result that he was made Chief Magistrate of the Western city. The position carries with it a honorarium of $4000. Mayor McBeath is a nephew of Mr. Andrew McBeath of Allenford, and of Mrs. John Harper of Paisley. Mr. Malcolm McBeth, postmaster of Milverton and publisher of the Milverton Sun, is a cousin.

Bruce Takes Up Pen Again.

John P. McConnell, "Bruce" in his first issue of "J. P's. Weekly," published at Vancouver B. C., says in his introductory editorial:—In June, 1907, I founded the Saturday Sunset. It achieved a wide circulation and some influence. The paper was my idea and its developement was the result of my work alone. In 1911 it passed into the hands of the Burrard Publishing Co., and both it and myself became subject to the control of a board of directors composed mostly of lawyers. Following my exposure of a wildcat real estate scheme, for which the Saturday Sunset had been unscrupulously used and in which I subsequently learned one of the directors, R. S. Ford had a personal interest, the directors passed a resolution giving the same director control over me and the paper. F. C. Wade, K. C., president of the Company, settled the matter by declaring he owned lots in the vicinity of the wild cat which were worth $1,000 apiece. From that time I ceased to write the front page, and the paper started down hill. It died under the gentle ministrations of that distinguished journalist, Ex Ald. Walter Hepburn last fall. Later on a conspiracy which for some time previously had been in the hatching, came to a head and I was forced out of my position as editor of the Sun, which was promptly seized by the present editor of that "valued" organ. He and others not satisfied with throwing me out of my job, also combined to vote me out of the directorate of the company, although I was the second largest shareholder in it, with all I possessed at stake in it. The foregoing is a brief explanation of why I quit the Saturday Sunset, why it died, and why I intend to publish many unpalatable truths about the Sun and its mismanagement, for which I was untruthfully and unjustly accused.

The Chesley Enterprise has figured out that there are 21 liberals and 10 conservatives in the Bruce County Council.

L. O. L. Elects Officers

Cargill District L. O. L. met in annual session in the village of Cargill, on Jan. 13, 1916. In the absence of the Worshipful District Master, Bro. John Nelson, Worshipful Bro. Jas. A. Garland occupied the chair, assisted by Wor. Bro. F. E. Bolden in the District Deputy Master's chair. After the regular business of the District Lodge was disposed of, an order was drawn on the Treasurer for five dollars in favour of the Cargill branch of the Canadian Red Cross Society, after which Wor. Bro. J. S. White and Wor. Bro. D. E. Crawford conducted the election and installation of officers for the ensuing year, which resulted as follows:—

Dist. Master	Bro. F. E. Bolden;
" Deputy Master	" R. M. White;
" Chaplain	" Geo. Carbert;
" Rec. Sect.	" Wm. Van Horne;
" Fin. "	" Wm. Dobson;
" Lecturer	" Sylvester Parker;

" Director of Ceremonies, Bro. I. Chambers.

At the conclusion of the installation of officers, the newly elected officers gave short addresses pertaining to the duties of their respective offices. It was decided that the next annual meeting would be held in the village of Paisley, on the second Tuesday in January, 1917, at two o'clock P. M.

The District Lodge then closed in regular order with the singing of "God Save the King."

Wm. Van Horne,
Dist. Rec. Secy.

THE BOYS IN KHAKI

Enlist to-day!

+ + +

Now's the Day—Now's the Hour.

+ + +

Wear the khaki and the uniform smile.

+ + +

Daddy, what did you do in the great war

+ + +

Have you talked to him, girls? What did he say?

+ + +

The regimental strength up to Saturday night was 816.

+ + +

Come along boys and fill up the ranks of the 160th!

+ + +

The 160th Bruce is calling for men. Do you hear the call?

+ + +

Capt. Todd outfitted the men at Kincardine and Port Elgin the past week.

+ + +

Private Fred Anderson has been made military policeman for the town.

+ + +

Join now as volunteers in defence of your Country and all that it stands for.

+ + +

Bandmaster Wright has now 14 bandsmen and practice will begin this week.

+ + +

Don the khaki now and help keep up the traditions of Glorious Old Bruce.

+ + +

It is not usually the want of courage that keeps men from enlisting but the failure to appreciate the seriousness of the situation.

* * *

On Wednesday night Capt. McNally will hold a joint recruiting meeting with the Huron County organization at Whitechurch. On Thursday night night Capt McNally and Lieut. Whitehead will speak at Bervie and at Armow, on Friday.

+ + +

All eligible men offering themselves for service with the 160th who are disqualified by reason of physical defects are being furnished with a neat little card, called the "Certificate of Offer of Service," signed by Lt.-Col., Weir, the Medical officer and the recruiting officer.

+ + +

Recruiting for the 160th is now begun in earnest and the organization is in full swing throughout the County. The County war auxiliary is holding meetings at various points nearly every night which are producing a good effect and resulting directly in many enlistments.

+ + +

Capt. McNally and Lieut. Whitehead attended a rousing recruiting meeting at Port Elgin. Lieut. Logie Foster formerly manager of the bank at Port Elgin is recruiting officer there and is getting results.

+ + +

Mr. Meredith R. Hunter underwent an operation in Kincardine General Hospital on Monday. It was necessary before he would be finally accepted as a member of the 160th Bruce Batt. He is doing very nicely.—Kincardine Reporter.

+ + +

Everybody shirks but father,
But then he's used to war;
He scraps all day with mother,
Though goodness knows what for,
And now, at this here writing,
He'll do the best he can;
For if anyone's used to fighting,
It's our old man.

+ + +

Capt. McNally said at Ripley that he wanted men from Ripley and Huron township. He expected at least 60 from this magnificent audience to come forward. Col. Weir, who was an ideal officer, had started to raise a Battalion in Bruce (1200 men) and he was going to get them. We want you—you must come, and I know you will come without being forced.

+ + +

There is a big battle going on in the home of A. H. Hamilton of Kinloss. Andy is of the opinion that he is called to defend his King and country, and decided last week to hold an auction sale and sell his stock and get into a khaki suit. Andy is being strongly opposed by his wife and members of the family, who pointed out that he will do more to keep the old flag flying by tilling the soil. Andrew is a fine specimen of manhood, stands 6 ft. and is 40 years of age.—Ripley Express.

+ + +

The Chesley recruits:—Herbert Whitman, George Mink, George D. Jones, Robert Gray, George Marsh, Jas. Kincaid, Wm. Rundle, Jas. McConald, Wilfred Armstong, Louis Clifton, Harold Hammond, Frank Dobson, Stewart Garner, Charles Roberts, Hugh Parker, Charles Parker, Jr., Stewart McDonald, Jasper Clifton, William Dobson, Jack Walke, Bert Cole, Fred Bennett, Douglas Campbell. Signed with 160th Band, Walkerton:—Alex McCombe, Ernie Wright.

+ + +

A great meeting was held at Paisley Friday night. Capt. Duncan, Chaplain of the 126th Regt., a very fine speaker, brought home the needs of the situation very strongly to his audience. The Capt. had a son killed in battle at Festubert and his other two sons are training for the front. Capt. McNally and Lieut. Roy Whitehead also made strong appeals. Lieut. Col. Weir arrived before the close of the meeting and was given a rousing reception. Paisley has been slow in getting started but the indications are that the community will come on with the goods.

+ + +

Private McKinnon at Lucknow:—He had heard men say that the object of the war was to whip the Kaiser. He did not like that way of putting it. He preferred to think rather that this great war was a sort of world housecleaning. The British Empire was one of the big brooms used in that housecleaning, and Canada and the other colonies were lesser brooms. We, the soldiers, he said, might be regarded as straws in one of those brooms, each doing its part in the great housecleaning which was to free the world from militarism, which was a curse to the people of Germany as well as to other nations.

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so life-like, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others.

R. L. Gibson - Jeweler

ENLIST TO-DAY

in the 160th. Overseas (Bruce) Battalion, C. E. F.

SCALE OF PAY

Rank	Pay Per Day	Field Allowance Per Day	Separation Allowance Per Month
Sergeants	1.35	15c	$20.00
Corporals	1.10	10c	20.00
Privates, buglers, drummers, etc	1.00	10c	20.00

Men are fed and clothed by the Government.

The Patriotic Fund has been created to assist those dependents of a soldier who need more help than the Government gives.

Many employers have pledged themselves to give preference to returned soldiers when engaging men.

PENSIONS—In case of death $22.00 a month is paid to the widow, and $5.00 a month for each child. A widowed mother whose son was her sole support receives $22.00 a month. Pensions are also paid for partial and permanent disablement:

CONDITIONS OF ENLISTMENT—Age, 18 years to 45 years. Height, 5 feet 2 inches, minimum.

HOW TO ENLIST—Apply to the nearest recruiting officer:

160th. OVERSEAS (BRUCE) BATTALION
Canadian Expeditionary Force.

William the Emperor and William the Man

With the German Emperor looming larger than any other man in the eyes of the world at the moment, Octave Mirbeau's pen portrait of him becomes of unusual interest. It was published in the "American Magazine" two years before the war began and is here reproduced in part by permission of the editor of the magazine.

(BY OCTAVE MIRBEAU.)

Translated and Arranged by Ada and Julian Street.

One does not really feel the fatigue of a ten hours' run in a motor car until one's feet sink into the cream and red roses of a hotel carpet. Then things begin to whirl in a blinding sort of way, and one staggers.

This was my condition when, coming into the corridor of a German hotel, I encountered my friend Von B——" a German baron whom I have often met in his own country, but more frequently in Paris.

"I have just come from Essen in my motor," said Von B——, "Let's dine together."

Twenty minutes after our meeting we were at table.

I know no better companion than Baron Von B——. Not only is he particularly well informed on German affairs, but he is able to discuss them in excellent French. After lecturing on philosophy in a famous university, he has retired to practise it. He is young, shrewd, diplomatic, brilliant and—what interests me particularly—he has access to the German Emperor. I do not know whether it is his birth or his work which has given him this privilege, though I think I have heard him say he was William's fellow student at the University of Bonn.

When I asked him to talk about the Kaiser he drew from a pail of ice a bottle of Moselle, in its dusty dress, and filled our glasses with the sparkling wine, which makes a pretty little noise in the mouth like the sea upon the pebbles.

He sipped his wine and presently began:

In order to understand our Emperor one must remember that he dates from the time of what we Germans call the Gruenderzeit: that is, the period of the founders, the conquerors—excuse me—of the Franco-Prussian war. But though he dates from the Gruenderzeit we no longer date from it; that is, not all of us.

Our men left for the frontier poor Prussians; they returned rich Germans. The period of multi-millionaires dates from '71; the very term itself first came into our language then. Germany began to be built up. Inflated with success, we ate, drank and built. We built forts and cannon; ports, ships and cannon; roads, canals and cannon; barracks, factories, palaces and always cannon.

If the Gruenderzeit disappears, little by little, from the souls of men, it still lives in the souls of stones, and in the soul of William II., who dates absolutely from these years of megal- [illegible] inflation, uproar and cheap [illegible]

He was very young in '70, but one keeps all the ideas that were put in one's head before the age of 20, unless one has in one's self the material for the remoulding of those ideas.

William I, the "unforgettable grandfather," had none of this foolishness about him. He was by taste a simple country squire; by force of circumstances a conqueror. In Bismarck, Moltke and Roon he had ambitious servants who pressed him on. Did you know that he crossed the Rhine gloomily, and that it seemed to him an outrage to bombard Paris? They had to beg him; they even got out of him by trickery the order to fire the first cannon.

Frederick never spoke of his father's campaigns, and the brawlers of '71 were always displeased with his reticence. As for the present William, he gives his father scant honor, pushing him outside of history as an undutiful son sends his old mother to her bedroom because he doesn't consider her dressed well enough to be seen. He reproaches his mother with her English blood and his father with his imprudence, besides which he reproaches them jointly with the rickets, an affliction which makes his pride suffer cruelly.

I am going to be indiscreet enough to tell you a little anecdote about William. It was told to me one night at Friedrichsruhe by the late Bismarck, who had been drinking. That is to say, that it can be believed, for there was never any one more brutally sincere than he was under the influence of wine.

The tale deals with William's first act of authority.

To begin with, you probably already know of the feverish anxiety he showed when as son of the heir apparent he watched the progress of his father's illness at San Remo while the old grandfather was slowly petrifying on the throne. You have heard, too, of his parricidal fever during the hundred days' reign of his poor cancerous father, Frederick. Ah, William had escaped his parents long before that time. Bismarck had got him away from them; an easy game for the old diplomat in whom ferocious energy and supreme cunning were blended.

Bismarck never cared for the Emperor Frederick, who he thought wished to change the order of things, and as for the Empress he abominated her because of her English ideas and referred to her as "the stranger." He devoted himself to filling William with the appetite for power, taught him to criticise every written and spoken word of his father and to believe that the influence of his English mother was anti-national and therefore dangerous. But Bismarck, shrewd as he was, could not foresee how far the young man's love of power would lead him.

The relations between the Empress Frederick and her son became at last so bitter that William placed spies about her—even in the bedroom of his invalided father.

Through one of these spies William learned of the existence of a journal which his father had kept for some years. Frederick had a taste for writing, and the fact that there was coldness between him and his son led William to fear that this secret journal might contain some criticism of his conduct. The fear of it haunted him and he bent all his thoughts to obtaining possession of it.

The Empress, however, was clever enough to conceal the diary before her husband's death. Eluding the surveillance of her son, she sent the papers to her mother, Queen Victoria, or to her brother, then Prince of Wales—I don't remember which.

Hardly had his father drawn his last breath when William, over the dead body, performed his first official act.

It was to demand of his widowed mother the journal, which he termed a "memorial."

The Empress feigned ignorance. William insisted. He spoke as master, giving his mother the order to obey. She persisted in declaring that she knew nothing of the paper. Her son menaced her brutally with his wrath. To his dry eyes her tears were only stratagem. The more she resisted the more determined he became. It seemed to him that the importance of the papers might be measured by the stubbornness of her opposition, besides which he was enraged that in the first hour of the reign he had so feverishly awaited some one dared thwart him.

Was not his mother merely a princess of the house of which he was the head? Was she not merely lady Colonel of one of his regiments? Was she not his subject? Anger drove him stark mad.

"Well," he commanded, purple with wrath, "you will remain under close arrest until you have obeyed me."

Bismarck, arriving at Potsdam two hours after this, found the palace surrounded by squadrons of armed cavalry.

The Emperor, whom he found still excited, told the old Chancellor how he had met the disobedience of his mother.

"And she need not expect pity or consideration until she has obeyed me!" he declared. "You understand that, Mr. Chancellor? Until she has obeyed me!"

The pupil had gone much too far. Bismarck saw at once that the buffoonery continued might mar the whole of William's reign. Later, in life, he said, he used to wonder how he kept from laughing in his sovereign's face.

What he did was to receive William's news with deferential silence, and later, when the Emperor was calmer, show him that his course was sure to meet with general disapproval. There was a way he thought, of proceeding much more rigorously and at the same time efficaciously. Why not rather cut down the income of the Empress? Suspend her appanages?

"I know her Majesty," said the good Bismarck. "She has pride. Forced arrest she can brave out, accepting it as a sort of martyrdom; but the money, Sire, the money!—who can resist money?"

Further he laid tactful stress upon the probable representations of England. "Is it really the moment, Sire?"

The Kaiser, becoming appeased, listened to Bismarck's counsel. The arrest of the Empress was removed. The officers led their cavalry back to quarters, and William turned his attention to the details of his father's obsequies, which he wished to be most fastidious!

The struggle between the Dowager Empress and her son lasted for several months; six at least. Finally the Emperor obtained the manuscript and the Empress her money.

Was it not a worthy debut, I ask you, for an Emperor, who, despairing of ever attaining the glory of having made a Bismarck, discerned that the glory of daring to dismiss him was the only thing that could be thrown into the balance?

What did he risk, after all? Germany was already made!

And so it comes about that the Gruenderzeit has, in William II., the first new fashioned Emperor of Germany; an Emperor of brilliancy and noise. He squares himself majestically upon the imperial throne and caracoles spectacularly upon the field of manoeuvres.

His character is paradoxical. Sometimes I think of him as a good German boy. He has some true friends, too; some of them obscure people, absolutely disinterested. To hear him talk intimately, without arrogance or pomp, his body slouching in a low armchair and his legs crossed high, smoking his pipe and laughing boisterously, one can hardly realize that he is actually the formidable autocrat who terrorizes not only his own country, but the whole world with the tumult of his personality.

In the last few years he has changed a good deal. His trembling fits exasperate him, and he grimaces until one might almost call it facial ague. He has formed a habit of snapping his fingers and making convulsive movements with his hand when speaking. His laugh, formerly so buoyant, has acquired a false tone. Likewise he shows less tolerance, less kindness toward his friends, in short, the Emperor is outrunning the man. It spells the end of our friendship.

They said of him at first that—the opposite of Fenelon—he had "a hand of velvet in a glove of steel." Lately it has too often happened that the hand has hardened, while the glove is changed even oftener than the uniform.

I attribute these alterations in him to three principal causes:

His mischief-making statecraft.

His sickly condition, which preoccupies him more than is believed.

The slow, tenacious influence of the Empress.

The Empress influences him in spite of himself. She fights doggedly against any ease or comfort at court, and stands out grimly for the stiff old feudal spirit. She is the personification of virtue, and, as is sometimes the case with aggressively virtuous persons, is sad, rather dull, determined and sectarian, and uncharitable in her estimates of those around her. To me she is the most boresome person in the world.

The fetes and receptions at the palace are so loaded with heavy pomp and icy etiquette as to be entirely funereal, Yet all this does not prevent intrigue and scandal; on the contrary, there is no court in Europe which is more unbridled in this respect, and—as any one can see—they never succeed in hushing up the scandals.

I'll not speak much of William's taste in art. You know about it. All Europe has been convulsed with laughter over it. The average German is lacking in taste; Berlin is a city without tradition in art. However, it had until recent years the merit of being a nice large provincial town. What little adornment it had was good, for Frederick the Great brought some notable architects from Paris and built several fine palaces, around which clever landscape gardeners worked with excellent effect.

But alas! Berlin did not stop there. What between William and the Gruenderzeit we have developed a national art which makes us a universal laughing stock. It is the style of William II., heaven help and pity it! There are streets bordered by houses that look like colossal pipe organs, and, among other absurdities, the gigantic statue of Bismarck, in porphyry, which is uglier than one could believe men could make anything. Then there is the carnival-like horde of the Emperor's ancestors in the Street of Victory, William loves to review these figures.

Another peculiarity of William's is his dislike for flowers. Though they are the object of a veritable worship in Germany, the Emperor abominates them. It is not that he thinks them dangerous —like Socialists—but that he thinks them ugly; just as he thinks Rodin's sculpture and Renoir's paintings ugly. He likes to see lawns and parks decorated with groups of swords, baskets of shells, plat bands of bayonets and cannon.

Do you know the large fountain which stands in the Schlossplatz? It was bequeathed to the city of Berlin by a very rich gentleman. The Mayor, in accordance with the usual ceremonial custom, invited the Emperor to take part in the dedication exercises. The Emperor was absolutely outraged. He could hardly believe that they would dare to erect in Berlin a monument which had not originated with him.

He exhausted all the administrative and legal tricks that he could think of to prevent the acceptance of the legacy, and failing to arrest the project sent a curt refusal to attend the dedication.

Imagine the surprise of the crowd and of the officials when on the day of the unveiling they saw the Emperor appear. His face was sombre and threatening and his moustaches were more warlike than ever. Hurling himself upon the platform, he interrupted the good man who happened to be expatiating upon the virtues of the donor.

"An evil spirit is hovering over this city!" cried William. "Socialism is lifting its head. I will not tolerate it. I wish every one to know that I have given orders for an immense barracks to be built right in the heart of Berlin. It will be filled with my loyal troops and my faithful cannon. If the Socialists stir I will not hesitate to mow them down. Let them look out! I will mow them down. I have had enough of it!"

With this he turned his back on the crowd and looked scornfully at the fountain.

"As for this fountain," he said, addressing the dignitaries on the platform with a shrug of his shoulders, "it is simply ridiculous—absurd!" So saying, he went as he had come, like a tempest, leaving the crowd stupefied.

Strange to say, the story of this affair was not broadly circulated, even in Germany. I sometimes think we have a national modesty which causes us to cover with our mantle the ridiculous doings of the Emperor, as Noah's sons covered the nakedness of their father.

Like all neurasthenics, the Emperor shows—even in his most unbalanced deeds—a sort of topsyturvy logic. He gets people's minds off one thing by doing another.

The fact is that the Emperor is not nearly so popular as he was. We don't trust him and believe in him as we once did. He fatigues and discourages us, besides plaguing all the rest of the world like a nightmare.

We Germans are a quiet, prosperous people, and in order to continue so we wish to be let alone. Nevertheless we live in constant fear of imbecile complications which may be stirred up at any moment by this blunderer, who is far from being the master of his slaves.

I must do William the justice to say that he understands, like every one else, that industry and commerce are the vital organs and the vascular system of a country. But the Emperor, in his feverish, incoherent activity, has made the country giddy by driving it madly on toward all sorts of economic conquests.

In order to make her first in everything he has forced her to produce, produce, produce. The products are piled up in the shops, on the docks and in the granaries. Sales are slow and an enormous stock is left on hand.

Some people fancy that the Emperor plans wars, but in spite of his uniforms and his fanfares this is not so. He is not a warrior, but a military man, which is very different. He is not even brave. William II.'s wild discourses and menaces are only commercial tricks intended to frighten Europe and by so doing strengthen our great manufacturers who live by armament. The industry is colossal; unclouded peace would destroy it.

Another thing which keeps him from making war is the fear he has of the result. Every one admits that our army is the strongest in the world. It is drilled and kept up to the mark; our arsenals are full, our armament complete, our fortresses perfect. But, sad to say, we have no real officers. The German army is to-day commanded by mere parade officers, who are very similar to the pretty coxcombs of France's Second Empire. They do not work and only occupy themselves with their pleasures, which are none of the best, as there is great corruption among them.

In case of war William would have no one to command his armies. Doubtless he would try to do it himself, for he has war plans of his own, just as he has plans of statues, pictures, operas and everything else, all his own—his own. With William in command, we should be beaten by Switzerland, or less than Switzerland. At the manoeuvres, where everything is carefully arranged in advance to make a perfect mise en scene with the Emperor a majestic figure in the centre, well, the Generals have the greatest difficulty to keep from running William down. They sweat blood to keep from surrounding him, even on absolutely flat ground. I have assisted at some of the manoeuvres, and I can assure you it is nothing but buffoonery.

Thus it comes about that there are combined in William II. two separate men seemingly incompatible. One is the charming personal man, whom I have loved; the other is the Emperor, whom I consider detestable. William the man is fascinating; he is agreeably, gay, simple, generous and loyal to his friends. I am only afraid that William the Emperor, who is such a very different person, will end by alienating my affects from William the man. He annoys me more and more, and in the last few years I have seen him as seldom as possible.

"Why do you oppose a reasonable amount of preparedness?" demanded Senator Wombat. "Ain't you for it?" "Privately, yes," stated Representative Flubdub. "But I expect to trade my objections for an arsenal for my district, or a wireless station, at the very least."—Louisville Courier-Journal.

CORDUROY EVENING WRAP.

Evening wraps are shown in the most exquisite fabrics and colors, and while there is a lack of novelty in fur for street and afternoon wear there is a wide variety in the use of fur for these gorgeous evening wraps. The wrap shown is of silk corduroy in a peach shade with collar and cuffs of seal. The lines are quite simple.

Chats With the Doctor

BY A PHYSICIAN

CHILBLAINS.

I was once consulted by an elderly (German) professor of languages for a small red swelling which had appeared on one of his toes. He was a man over 50. I had no hesitation in pronouncing it a chilblain. He had never seen anything like it before, at least on his own person. I envied him greatly.

Chilblains are indeed a terrible plague to the young folks of both sexes—very often a perfect torment to little boys and girls. In the majority of cases they denote a certain degree of bad feeding and malnutrition; resulting in poorness of the blood. Also they often signify improper treatment in other respects; insufficient warmth and forbidden access to the fire. I well remember that as a boy I suffered horribly from chilblains on the feet, but my hands were always free, until I left the comforts of a home for a boarding-school, where no boy was allowed to go near the fire. Then my hands became so swollen that I could not turn the key of a lock.

Then, on the other hand, they are very commonly brought on by putting the feet to the fire, or by washing the hands in warm water— conditions quite opposite to the preceding. This is almost always, I think, the exciting cause in the adult, who arranges conditions in that respect for him or herself as children cannot. It goes without saying that people with weak circulation are most liable; and that those who take plenty of vigorous outdoor exercise mostly escape. It is easy with the grown-ups to prevent this trouble in any marked degree. If they suffer continuously and severely there is something wrong with their diet; and usually a couple of glasses of good port wine every day for a fortnight will work wonders.

The local applications recommended to cure chilblains are legion. Oil of turpentine and essence of mustard are most frequently recommended. I have tried these, and many more, and have found them almost useless. The best remedy is iodine in one form or another. You can paint the chilblains every night with the tincture of iodine; but the ointment of iodine well rubbed in is said to act better still. Also liniment of aconite, used night and morning, is efficient. It stops immediately the troublesome itching.

BROKEN CHILBLAINS.

When a chilblain suppurates—in popular parlance, becomes "a broken chilblain"—you know at once that the victim, nearly always a child, is badly fed. I do not think the condition is met with except among the neglected children of the poor. At any rate it ought not to be, and directly it is seen measures should be promptly taken to feed up the little victim. Give the child plenty of oatmeal, cocoa, eggs, milk, with say a dessertspoonful of sound port wine or Madeira twice daily.

For local measures, apply a bread poultice for a couple of days. Then dress twice a day with a resin ointment, thickly spread on lint.

CHAPPED HANDS.

You get your wrists chapped only because you do not wipe them thoroughly dry when you have washed. Take proper precaution in this way, and you escape the trouble that comes only in cold weather, simply because in the warm your skin dries quickly, and so it is unnecessary to rub hard with the towel as in winter.

Glycerine cures promptly. Rub it well in night and morning and do not wash the hands oftener than is absolutely necessary—when you do, use warm water. Wear gloves whenever you go out of doors.

COLDS.

There is a great deal of ambiguity about colds and their cause. I hardly think that either the public or the average doctor fuly appreciates the many points which arise; and which from the health point view, it is necessary to understand. This vagueness is enhanced by the ambiguities of language, which, for a conspicuous example, is accustomed to style that abominable plumage influenza, a "bad cold," and vice versa.

The popular notion is that you "catch cold" by exposure to a chill—even to a draught, or slight current of cold air. And in the acutis fact, imagination has often played a prominent part. Numerous people have caught cold through the draught that they had felt from an imaginary open window behind them.

You may, indeed, catch a slight cold in this way; but it is always trivial, soon passes off, and never attacks anybody but yourself. With the genuine roaring cold, however — technically termed "coryza"—the case is altogether different. That never proceeds from a mere chill. You always catch it from someone else—or at least many others are affected besides you. When once brought in, it always to all intents and purposes, an epidemic fever, like measles or scarlatina. In Africa they indeed call it "the English fever"—recognizing the analogy to their own malaria.

The coryza—the sneezing, snorting cold—runs its allotted course, usually about three days, exactly as do the febrile disorders above mentioned. Relapses may occur, and then the duration is longer—sometimes two or three weeks. Nothing you can do in the way of treatment makes any particular difference that I know of. If you succeed in stopping one attack, another very shortly supervenes. The only plan is to brave the thing out, take as much active exercise as possible out of doors, and avoid exposure to cold indoors.

For the far slighter cold, which has really followed a chill, you try of course, to procure a good perspiration by one method or another. A vapor-bath and Turkish ditto, some hot drink at bedtime, an extra blanket on the bed, etc., etc., are household remedies which everybody knows. If you must resort to physic take 10 to 20 drops of spirits of camphor with a lump of sugar at bed-time.

THE POPULAR FICHU.

There is no style in neckwear so universally becoming as the fichu In this instance, a double frill of fine silk net attached to a foundation of self material, is effectively developed. These crochet buttons lend a dainty finishing note, and wing ends fall in careless tie effect.

HALF THE ILLS OF LIFE

Are Caused By CONSTIPATION.

When the bowels become constipated the stomach gets out of order, the liver does not work properly, and then follows the violent sick headaches, the sourness of the stomach, belching of wind, heartburn, water brash, biliousness, and a general feeling that you do not care to do anything.

Keep your bowels regular by using Milburn's Laxa-Liver Pills. They will clear away all the effete matter which collects in the system and make you think that "life is worth living."

Mr. B. W. Watson, St. John, N.B., writes: "I have been troubled with constipation, for the last three years, and during that time have tried several remedies, all of which failed to help me. A friend recommended Milburn's Laxa-Liver Pills, and after using three or four vials, I felt like a new man. I am now still taking them, and am positively sure that I am on the road to recovery. I strongly recommend Milburn's Laxa-Liver Pills."

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all drug stores or dealers, or will be mailed on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FORTUNE'S FAVORITE.

(Tit-Bits)

First Coster—Well, poor old Bill's gone.

Second Coster (mournfully)—Poor, indeed! Luckiest bloke in the market. Couldn't touch nuffink without it turned to money. Insured 'is 'ouse—burned in a month. Insure 'isself again' [illegible] —broke 'is harm first week. Joined the burial society last Tuesday, and now 'e's 'opped it. I call it luck.

PALPITATION OF THE HEART.

Sudden fright or emotion may cause a momentary arrest of the heart's action, or some excitement or apprehension may set up a rapid action of the heart thereby causing palpitation.

Palpitation, again, is often the result of digestive disorders arising from the stomach, or may be the result of over indulgence of tobacco or alcoholic drinks.

The only way to regulate this serious heart trouble is to use Milburn's Heart and Nerve Pills.

Mrs. J. S. Nicholls, Listowell, Ont., writes: "I was weak and run down, my heart would palpitate and I would take weak and dizzy spells. A friend advised me to try Milburn's Heart and Nerve Pills, so I started at once to use them, and found that I felt much stronger. I cannot praise your medicine too highly, for it has done me a world of good."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25, at all dealers, or mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

A Glossary of War Term

(Cut This Out and Keep For Reference)

Many military terms employed in the war despatches are mystifying to the civilian reader, who will find the following simple explanations very useful. The list should be cut out and kept for reference:

A

Asphyxiating Gas—Chlorine, a heavy yellow gas, intensely poisonous, discharged from steel cylinders, in which it has been compressed.

Automatic Rifle—A rifle which reloads itself automatically by the force of the recoil or the gas produced by the discharge. It is fired from the shoulder, whereas the machine gun is used on a light carriage or tripod. The enemy are said to be arming snipers with automatic rifles.

B

Battalion—A unit of infantry, usually 1,000 strong, and divided into four companies, each of 250 men.

Battery—Means (1) a number of guns placed in position to attack an enemy; (2) a unit of artillery generally consisting of six (or in the French army) four guns.

Battle-Plane—A large aeroplane carrying a gun armament (generally a machine gun, but occasionally a small piece of artillery).

Bridge-Head—A fortified work protecting the end of a bridge. All the German bridges over the Rhine are defended by very strong works of this character on the western bank.

Brigade—In the British army, for the infantry, has a strength of 4,000; in the German and most continental armies, of 6,000.

C

Cadre—A nucleus of trained officers, sergeants and corporals, which in war may be expanded into a regiment of infantry or a force of artillery.

Calibre—Bore or diameter of a gun or shell. Thus a "75" is a gun of 75 millimetres bore (firing shells of that diameter), or about 3 inches. An 18-inch howitzer is a howitzer firing shells 18 inches in diameter.

Chasseur—A rifleman or a light infantryman.

Company—One-fourth of a battalion of infantry, or 240 to 250 men.

Consolidate a Position, To—To rearrange the defences of a captured position, place fresh barbed-wire entanglements about it, and alter it so that it can be held against a counter-attack.

Corps—An army corps is a body of troops, infantry, artillery and cavalry, usually numbering from 25,000 to 50,000 men, with 110 to 150 guns.

Cupola—A turret with armor containing a gun or machine gun.

Curtain of Fire—Is when a large number of guns so direct their shells as to cut off the enemy's approach or retreat by a line of shells descending steadily in his front or rear. A curtain of shells is generally used in the attack on first-line trenches to prevent the arrival of supports.

D

Division—A smaller body of troops than an army corps, usually containing infantry and artillery, with a strength of about 15,000 men.

Dug-Out—A shelter in the trenches below the level of the earth, out of which it is dug. Men take refuge in it during a bombardment, and live in it when not required for the defence of the trenches.

E

Echelon—Bodies of troops are said to be en echelon when they occupy positions behind or in advance of the other flank, just as the black or white squares follow each other diagonally across a chess-board.

Emplacement—A position, usually in the trenches, or separately entrenched, for a gun or machine gun.

Enfilade—Is to scour with fire the whole length of a work or line of men. To prevent trenches from being enfiladed by an enemy who has reached one or other end they are usually made of curved form with obstacles to enfilading fire in the shape of Traverses.

F

Fascines—Faggots or bundles of sticks bound together and used for constructing earthworks, building saps and filling ditches or obstacles.

Fuse—The mechanism by which shells are exploded. A Percussion Fuse detonates the shell when the nose strikes the ground, the shock firing a cap in the fuse and the flame travelling to the charge in the shell. A Time Fuse detonates the shell a certain number of seconds or fractions of a second after the shell has left the gun. The shock of firing is made to ignite a slow-burning composition in the fuse; after a certain time, which can be varied according as a screw in the nose of the shell is set by the gunners, the flame in the composition reaches the charge in the shell and explodes it. Many shots and shrapnel have both a time and percussion fuse.

G

Glacis—The smooth slope outside a line of trenches or fortifications which is cleared, as far as possible, of all shelter for the enemy, so as to give a good field of fire from the trenches or fortifications.

Grenades—Bombs or small projectiles thrown by hand, containing high explosive, which is fired either by a time or percussion fuse.

H

Heavy Artillery —Applied to those guns and howitzers which cannot easily accompany troops over country. In the German Army 6 in., 8 in., 11 in., and 17 in. howitzers, and 6 in. and heavier guns.

High Explosive —Explosives of greater power than those used in guns for propelling projectiles. The best known are lyddite and mellnite, both of which are made by treating carbolic acid with nitric acid; and trinitrotoluol, made by treating toluol, which is obtained from coal in the manufacture of coke or gas, with nitric acid.

High-Explosive Shell—A shell with thick steel walls containing a charge of high explosive, such as lyddite, melinite, or trinitrotoluol. The explosion is very violent, shattering the shell into many pieces and destroying everything near. Of use against buildings and fortifications.

Howitzer—A short, squat gun which tosses its shells high in the air so that they fall on the enemy at a steep angle. The fire of such guns is most effective against trenches and forts. Howitzers are of all sizes, from the 4.5 inch German field howitzer to the 18 inch, throws a shell of over 2,000

L

Lachrymatory Shells—A type which on bursting blinds tho it whom it does not kill.

Lazaret—A hospital.

Left Bank of a River—Is to coming down stream fro source to the sea.

Lift—A technical artillery meaning to raise the angle guns firing so as to thr shells farther away. Thus an attack the guns sh enemy's trenches; when th ing line reaches the trench, guns lift or throw their pr farther back, to avoid hittin own men and prevent the up of enemy reinforcements.

Listening Post—A post, as n possible to the enemy's lin advance of the trenches, men are stationed at nigh guard against surprise and, if sible hear what the enemy doing.

M

Machine Gun—A gun which fires ammunition automatically, the ur gas produced by each disc mechanically reloading the gun discharging it if the trigger is back. A good machine gun can 600 rounds a minute.

Mine Gallery—Is a tunnel under ground leading to a mine or of mines. Each of these wh when a serious attack is made on an enemy's position, contain a ton or more of explosive.

Minenwerfer or Trench Mortar small smooth-bore gun for th ing a large shell a very short tance, used in trench fighting.

Mortar—E very short gun for engle fire, generally not rifled, and thus differing from a howitzer.

O

Outflank—To get round the extr of a line of troops so as to them by enfilading fire and th ening their rear.

P

Parapet— A breastwork protec troops.

Park—In technical military lang means a collection of wheeled hicles —aguns, wagons or cars.

Platoon—One-fourth of a compan infantry, or 60 men.

Pioneer — Troops who remove stacles, clear roads, dig trenc and construct camps or entan ments. In the British army t work is usually carried out by gineers; though pioneer have been raised in this war.

Point d'Appui — A fortified positi of special strength, in a line trenches or defences, such as stout building, loopholed a strengthened with concrete.

R

Redoubt—An earthwork which is co pletely enclosed, such as the Hoh zollern Redoubt on Hill 70. This almost square and can resist attack from the rear. Such earthworks are surrounded with elaborate en tanglements of barbed wire ar generally contain armored shelte mounting machine guns, and du outs or bomb-proofs to give shel during a bombardment.

Re-Entrant—Is an angle in a positi the point or apex of which is rected inwards towards the int of the position.

Regiment—Of infantry usually co sists of 3 or 4 battalions, or 3,000 4,000 men; of cavalry usually c sists of 3 or 4 squadrons.

Ricochet—When a shell or b glances or rebounds it is said ricochet.

S

Sap—In a trench running ou wards the enemy's positi usually shows on the maj zigzag, the object of this zig being to prevent the enem sweeping or enfilading it w as he certainly would if it carried straight out toward The work of carrying out a one of the most hazardous it troops can engage.

Sap-Head —The end or termin towards the enemy of such a Sa

Salient—Is an angle in a positio point or apex of which juts from the position. A salient difficult to hold because it will u ally be swept by a cross-fire.

Sector—A portion of a front; stric ly speaking that part of a circ which is bounded by two radii the part of the circumferenc tween them.

T

Tamp—To beat down earth o charge of explosive in a hole nel. If the charge is not tampe of its force is lost through out by the hole or tunnel.

Trench—First Line—Is the [illegible]most line of trenches in the posit defended The trench may be a sl low excavation in the earth with soil removed thrown in front, so to shelter men lying down against fire, or an elaborate work, excava deeply, with protection for the he of the men firing, known as headco In many of the German trenches c crete and steel armour are employ to give security against shells.

Trench—Second Line—Is an inn series of trenches where supports usually kept or bodies of men ready go to the aid of the men in the first line trenches when the enemy attacks.

Trench—Third Line—Are the inmos series of trenches, as usually there are not more than three distinct line in the defences of any position o front. The German third line trench es on the British and French front are reported to be of immense strength.

Trench—Communication—A line of earthworks or a tunnel or passage in the earth by which the first, second, or third line trenches are reached and which gives men moving along it shelter from hostile fire.

Trench Mortar—A small smooth gun for throwing a large shell a ver short distance, used in trench fightin

U

Unit—An organized military force a certain size, as a platoon (60), company (240), a battalion (1, ment, etc

W

Weight of Shells—The follo table is only approximate, as weight varies in different patter guns: 3 in., 12 or 14 lb.; 4.5 in., 4.7 in., 50 lbs.; 6 in., 100 lb.; 8 lb.; 10 in., 600 lb.; 11 in., 78 12 in., 800 lb.; 15 in., 1,600 lb.; 17 1,700 lb.: 18 in., 3,000 lb.

THE POULTRY WORLD

PARASITES ON FOWLS.

t least nine different species of several species of mites, and at two species of fleas attack the according to entomologists at the York State College of Agricul- at Cornell University. Hens, ae, ducks, and in fact all kinds of hestic fowls are likely to be in- fed. Water fowl are popularly posed to be free from such pest, ugh the experts say they are al- infested. Some of these cause ry to the fowls, with a consequent of profit to their owners. e bird lice that are found on poul- are known as permanent para- ; that is, they spend their entire on the bodies of the fowls. They biting, not sucking, mouth ts, and their feet have sharp claws, ch scrape the skin of the fowls in constant movements of the lice the fowls' bodies. The constant ritation caused by the presence of e lice, it is stated, eventually weak- s the fowls infested and renders em susceptible to such diseases as apes, cholera, roup and others.

Of mites there are at least eighteen pecies parasitic on poultry. Some of ese are not permanent parasites, t attack the fowls only at night, ding during the day in cracks about e poultry house. Some of the spe- ies of mites are blood seeking; others use affections of the skin. Under rtain conditions they become ex- eedingly abundant and great loss to e poultry owner results from their fect on the fowls.

The most potent cause of the pre- nce and the increase of these para- tes is filth. This statement is not nly the result of common observa- ions, but of experiments in control easures made by the college experts. ilth as here used includes decaying and decayed eggs, and bits of decayed matter of all kinds. The poultry house nd the nests should be always kept lean, and there should be ample pro- ision for light and air. Poultry par- sites, like most other pests, thrive much better and increase much more rapidly in dim than in well lighted places. If a poultry house is infested with mites and is too valuable to be burned down and rebuilt, it may be sprayed inside with kerosene or crude petroleum, which may be made into an emulsion if desired. Two, and sometimes three, applications should be made.

FORCING LATE PULLETS.

The following advice by C. S. Anderson, of the Colorado Agricultural College, will be found interesting to those who have pullets which were not [illegible]-hatch, and, therefore, have begun to take on the appearances which give promise of early laying.

Are your pullets laying? Pullets that do not begin to lay by the time freezing weather sets in will usually wait until spring. This means a dead loss for several months. The average poultryman cannot afford this loss if he is raising poultry for egg production.

Pullets of the Mediterranean breeds hatched not later than May 1, and that have been reasonably well cared for during the growing period will be laying before early winter.

It sometimes happens that force of circumstances necessitate late hatching and it is these pullets that must be pushed to get them ready to lay in the fall.

Feed a ration of high protein content including such feed as beef scraps, bran, middlings and oil meal. If skimmed or buttermilk is available, it will be of value. Give the birds free range whenever it is possible. If they must be confined supplement their ration with some green feed such as sprouted oats, green alfalfa, beets, cabbage, etc. Birds fed such feeds as e, kept free from disease, lice and , and given plenty of exercise develop amazingly.

NOTES.

tering to a demand for cheap try feeds, the feed merchants in many cases been compelled urnish a feed that cannot always the desired results. Poultry keep- should realize that they cannot pect A-1 goods in cheap packages. good grade of poultry feed will give ults that mean profit. Avoid cheap ds.

Possibly no poultry equipment has de the rapid improvement in late ars, as much as brooders, especially e coal and gas-burning stoves. here are now quite a few on the arket that will do good work. The brooder problem, always a hard one, fast being solved.

The poultry outlook for 1916 is en- uraging. The price of poultry and s is firm, and at a profit-making re. While it is true that poultry s are above normal, there is yet margin of profit to be derived for e poultry keeper who has hens that oduce a fair number of eggs in win- r time. The poultry business has ver yet been overdone, and always ll there be a profit for the poul- ry-keeper who uses good business dgment and properly manages his ocks.

There is no good reason why anyone should fail in poultry in this day of enlightenment. No industry is given so much free advice, no line of business is given so much aid. With a little understanding of the right kind, a small start, working carefully up each year, anyone should be able to place the balance on the right side of the ledger in poultry.

Those who are getting a good egg yield this winter will tell you that there is money in poultry. The poultry keeper who is not obtaining a fair egg yield throughout the greater part of the winter will say there is no money in poultry. It was ever thus, and the blame always is laid to the little "American hen" and not to the keeper, who, through some mismanagement, has neglected to provide the essentials that go toward success.

Proper poultry equipment plays an important part in successful poultry. The day of haphazard poultry houses, cheap brooders, incubators so cheap that they can not properly hold together after one season has passed. The well-informed poultry keeper will purchase poultry supplies that will give service not only for one season, but several. It pays to purchase good equipment in the long run.

Private Hawkins—Why is it that Germans have begun to call their pelins "jokes?" Private Lefevre— at is so the English won't be le to see them, I suppose.—Harvard Lampoon.

A COMPLETE BREAKDOWN AFTER LA GRIPPE

It Leaves the Sufferer a Victim o Many Forms of Weakness.

Ask those who have had la grippe regarding the present condition of their health and most of them will answer: "Since I had the grip I have never been well." There is a persistent weakness of the limbs, bad digestion, shortness of breath and palpitation of the heart caused by the thin-blooded condition in which grip almost always leaves its victims after the fever and influenza have subsided. They are at the mercy of relapses and complications, often very serious. This condition will continue until the blood is built up again, and for this purpose nothing can equal a fair treatment with Dr. Williams' Pink Pills, which quickly make the blood rich and red, drive the lingering germs from the system and transform despondent grip victims into cheerful, healthy, happy men and women. Mr. John Battersby, London, Ont., says: "Just before Christmas, 1914, I was taken down with an attack of la grippe, and the trouble left me in a deplorable condition. I was almost too weak to walk about, as I was then working on a farm in Western Ontario, I was quite unable to follow my usual work. I tried several kinds of medicine, but it did not help me. As a matter of fact, I felt steadily growing weaker, and in this condition, when reading a paper, I saw Dr. Williams' Pink Pills advertised and decided to try them. I got a supply and by the time the second box was finished I felt considerably better, and after continuing the pills for some time longer I felt better than I had done for months. This was my first experience with Dr. Williams' Pink Pills, but you may depend upon it that if I find medicine necessary again I will know just what to take."

You can get these pills from any dealer in medicine or by mail, post paid, at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

THE RIGHT COLOR.

Here is a Good Way for Madame to Choose the Proper Shades.

The becomingness of new colors is one of the chief worries of women who prefer to buy materials rather than ready-to-wear frocks and suits. It makes no difference how becoming the style; if the color is unbecoming the wearer usually finds it impossible to feel thoroughly comfortable in the dress.

One of the easiest and most satisfactory ways of settling this question of becomingness is by using tissue paper. This paper can be had at a very slight cost and in practically every shade in any stationery shop, or any shop where supplies for fancy work are sold. A single sheet of each shade is ample. Stand in a strong light before a truth-telling mirror, and with your shoulders bare crush the paper up around your neck. Try each shade, one at a time. Then try them together. It will be found that some colors, though unbecoming when alone, are quite the reverse when used in certain combinations.

Some colors intensify the color of your eyes and enhance the gloss of your hair. While others will make your eyes look washed out and your hair rusty. Sometimes this effect may be lessened to become almost unnoticeable by the use of white next the face. Make this test before discarding a favored color by crushing a sheet of white paper about your neck and draping the desired color about your shoulders.

Again, some colors can be worn over the face when under the face they are decidedly unbecoming. This is often true of various shades of rose, the browns and the more delicate shades of green. A woman who would look ghastly with unrelieved green about her throat can often wear a green hat with a black facing or a black or white hat with green trimmings with the best results. Several shades of rose worn under the face bring out all the tell-tale wrinkles and lines, while if placed over the face it gives a becoming glow.

When using tissue paper for finding becoming colors be sure to match the color when buying dress materials. If buying personally take a scrap of the paper with you. If ordering enclose a piece large enough so that the person who fills your order cannot make a mistake. In both cases keep a part of the paper, not only to make sure of the match, but for future reference.

What is becoming one season is not always so the next. One of the commonest mistakes made by women is fancying that a color once becoming is always so. Age, illness, the addition of half a score more pounds of flesh, as well as the loss of it, all tend to change our appearance. Hence the becoming colors. The woman who aims to be well dressed does well to study herself and the becomingness of colors.

THE STRASSBURG CLOCK.

Its Many Remarkable Features That Make it Famous.

Strassburg, the capital of Alsace-Lorraine, is remarkable for the great clock of its cathedral.

This clock, which is twenty feet in height, was made by Jean Baptiste Schwilgue in 1842. Besides various astronomical devices indicating true solar time, it has a great planetarium in which the evolutions of the planets are represented, so that the relative positions of each at any time can be seen at a glance.

Then on a platform above are movable figures representing the four ages of man. At the first quarter of an hour a child strikes the bell with a rattle; a youth in the garb of a hunter strikes it with an arrow at the half hour; at the third quarter a warrior strikes it with his sword, and at the fourth quarter an old man strikes it with his crutch. Then a figure of Death appears and strikes the full hour with a fleshless bone.

On the highest platform is a natural sized figure of Christ, and when Death strike the hour at noon the twelve apostles pass before the feet of their master, bowing as they do so. As Peter passes a large cock perched off on one side flaps his wings, ruffles his neck and gives three times a loud and perfectly natural crow.—London Standard.

W. L. George, the novelist, says woman isn't a mystery. Poor fellow! What a lot he has missed!—Charleston News and Courier.

FARM GARDEN

TRY SWEET CLOVER.

On too many farms, sweet clover is apt to be a neglected crop. While much remains to be understood before this legume can be recommended as a valuable crop, it seems that with our present knowledge sweet clover should have a place on more farms than what it has.

White sweet clover is the only variety worth mentioning as a crop. It is very hardy; has a long tap root that establishes itself very deep in the soil. The plant is commonly a biennial or sometimes an annual, according to Beale, under some conditions, but it reseeds itself and may become a weed under very favorable conditions.

Sweet clover has an upright habit of growth, and may attain a height of from two to three feet. The leaves are truncated, the stems somewhat weedy. The plant resembles alfalfa more than it does any of the clovers. The blossoms do not usually appear the first year, but sometimes they may bloom the summer following fall planting.

About four uses might be mentioned for sweet clover: (1) It may be planted for soil improvement; (2) for grazing; (3) for hay; (4) for hogs. It is a well-known fact that stock does not always eat the plant until they have acquired a taste for it. But they usualy learn to eat the green plants when confined on the pasture. It has a bitter taste at first that stock do not seem to like, but they nevertheless soon acquire a taste for it and eat it greedily.

The feeding constituents of sweet clover hay are about equal to that of alfalfa, and dairymen in some of the Northern States are planting and saving considerable hay. This plant will grow where alfalfa will not. And as it will sometimes yield two cuttings a year, it is not surprising that dairymen are planting more of it.

Sweet clover is said to tolerate alkali land better than most plants, and it has been claimed that sweet clover will reclaim alkali land, but there are not facts sufficient to sustain this, so far as we know.

For hog pasture, sweet clover should be suitable for many localities where the land is not well adapted to other legumes. It is known to endure thin, rocky and low lands better than other legumes, and for this reason, where such conditions prevail, it should be tried.

For soil improvement there is no question but that it is valuable. Being a tap-rooted plant, a legume and adapted to adverse conditions, it is suitable to renovate land in helping restore it in nitrogen and humus. It would not be desirable to plant it where root rot is in the soil, as it would most likely be injured by this disease.

Bee men claim that sweet clover is a very valuable plant for honey.

Sowing should be made broadcast like alfalfa, either in the fall or spring. About fifteen pounds of good seed should be planted per acre.

Those who have thin land and fields that are beginning to wash badly should try sweet clover. There is very little danger in letting it spread over other portions of the field in such a manner as to become a weed pest. It is not very difficult to kill when this becomes desirable, and if the land needs humus and nitrogen, and many fields do, it would not be a dangerous plan to have it growing all over such fields.

HOW PNEUMONIA STARTS AND HOW IT IS OFTEN PREVENTED

You catch a little cold to-day and by to-morrow it has reached the throat, next day the lungs are affected and you wish you had used "Catarrhozone" which kills colds in five minutes. In the first place Catarrhozone soothes the irritated membranes and relieves congestion—then it cuts out the phlegm and destroys the germ. It enables the blood to retain a natural supply of oxygen, lung food and vitality. In any cough, bronchitis or catarrh, it's guaranteed to positively cure. Beware of dangerous substitutes offered under misleading names for genuine CATARRHOZONE which is sold everywhere. Large size, containing two months' treatment costs $1; small size 50c; trial size, 25c.

FARM NEWS AND VIEWS.

Birds are the farmers' best friends. Instead of purchasing a gun for the kid to practise the fine art of marksmanship on birds, it would be better to purchase a good book for him to study the value of birds as destroyers of worms and injurious insects.

No colt should be kept for a stock horse, be his form ever so perfect, whose parents do not combine absolute soundness with good disposition, for any defect may hide itself for one generation and develop in all its intensity in the next.

A man who has not good control of his temper should not attempt to make horse training a business.

The judicious use of the disc and harrow will conserve more moisture than all the irrigation ditches will pour upon the land.

The more rapidly an animal is fattened the less quantity of food is necessary to sustain its vitality.

One way to make the farm produce all it is capable of is to plant every square foot of land in some crop useful in the rotation and as soon as one crop is taken off, plant another. The second or third crops should be crops that improve the soil if possible. In the event it is not possible to plant before fall, clover, vetch, etc., might be planted after small grains. The

A calf of just as fine appearance as one raised on whole milk may be raised on skim milk, linseed meal, a little ground corn. Begin feeding a quarter of a teaspoonful of linseed meal in the milk, when the calf is a week old. Gradually increase the amount until a tablespoonful of meal is fed when the calf is three weeks old. A little ground corn should be fed, dry, as soon as the calf will eat it—this to take the place of the butter fat removed from the milk. Overfeed-legumes are very valuable crops for feed and fertility and they should be planted whenever possible.

The best regulated dairy stables are those in which the same cow is milked by the same man at each milking. Milkers have individuality and the cow soon comes to expect to be milked in the same way and will give down her milk more freely and with less worry.

In order to prevent thrush or other disease of the frog from accumulation of filth it is wise to clean out the foot regularly with a foot hook.

Red top is a grass adapted to low wet lands. It is hardy and produces a fine quality of hay. It does well alone or in mixtures. When sown 12 to 15 pounds of seed per acre is required.

The fight against hog cholera is the farmer's job. Don't depend on serum. Clean up and keep clean, disinfect the premises and keep them disinfected. Use care and sense in feeding and watering your hogs and the disease over the country will be materially reduced.

Don't make any abrupt change in the feed for your hogs; especially, don't change at once from old to new corn. If you do you will be almost your hogs out of fix and have them in splendid condition to contract disease ing and dirty feed pails are two things to guard against. They never yet have made the calf that makes the cow that makes the money.

There is no better way of stimulating the appetite of any animal than by giving a variety and frequent changes of food, and with no particular animal is this so apparent and beneficial as with fattening sheep.

A dull hoe; slow work. Five minutes with a file in the morning may double a man's efficience for all day.

Much of the profit made from live stock is found in the bigger crops made where manure is used.

Do some of your weed killing with the fanning mill. It costs less to clean the weed seeds out of the seed grain than it does to sow them and kill the weeds with the cultivator.

These are the rules for success in gardening—rich, mellow soil; good seed, frequent shallow cultivation, freedom from weeds and thinning out so as to give the plants room to grow.

When the soil does not have enough phosphorus in it, an application of about 400 pounds of acid phosphate per acre should be made every three or four years. If manure is spread so that the entire farm is covered in the length of time employed by the crop rotation, acid phosphate can be applied preferably by scattering it on the top of each load of manure. Otherwise it can be applied very easily by means of a machine much similar to a wheelbarrow grass seeder.

Reckon what it costs to raise a calf to table age. Then reckon what it costs to raise either a chicken, or turkey or duck or goose or guinea or capon to table age. Then do a small sum in mathematics and see if it be worth while to let the poultry side of the farm go by in happy-go-lucky fashion.

A LIVING TORPEDO.

That Odd Fish, the Electric Ray, is a Terror in His Own Way.

There is a queer fish bearing the name torpedo, that in its own peculiar way is a good deal of a terror. This is the torpedo, or electric ray, a dweller in the southern seas, which grows to a large size, sometimes weighing 70 or 80 pounds. This peculiar fish has a nearly circular body, a short tail and a very small mouth.

The back is brownish in color, and the underneath parts are white.

The torpedo obtains its name from its power of giving a violent shock, similar to an electric shock, to anything with which it comes in contact. Whenever an enemy approaches the fish emits from its body a kind of electricity, which incapacitates the attacker immediately.

In capturing its food the torpedo finds this power of use. Being very inactive, it cannot pursue the small fish which form its diet, so it lies in wait until they swim close by and then throws out its powerful shock, which instantly renders them helpless.

If a person touches this strange fish he is attacked by cramp, which affects the stomach, producing a kind of convulsion. For this reason the torpedo is sometimes known as the "cramp fish."—London Answers.

Read it in the Faces of the People You Meet

The Irritability, the Worry, the Gloom, the Despair of Nerve and Brain Troubles. The Blood is Watery, the Nerves Are Starved.

This is the age of nervous troubles, of brain fag, of heart failure, of paralysis and bodily weakness. You can read it in the faces of the people you meet.

The business man, the factory hand, the professional man, the woman in the home, all find their nervous systems giving way before the terrible strain of modern life and keen competition. Nervous force is consumed at a terrible rate, and the blood which must make good this loss becomes thin and watery, lacking in quality as well as quantity.

The whole secret of preserving health and curing disease in all such cases is to supply an abundance of rich, red blood. Stimulants may drive the heart at a more rapid pace for a time, but the breakdown will come with greater force.

The blood demands nourishment, the nerves cry for sustenance. They call for just such help as is supplied by Dr. Chase's Nerve Food, the great blood builder and nerve restorative.

In many, many thousands of cases of this kind Dr. Chase's Nerve Food has proven exactly what was needed. In using it you are not experimenting, but are supplying to the system the very ingredients from which Nature reconstructs the wasted nervous system. For this reason its cures are both thorough and lasting.

50c a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto.

Clean, bright utensils mean clean appetizing food—use Old Dutch

The HouseKeeper

When next scrambling eggs, add just a few slices of sweet green pepper, chopped fine, and cook in a little butter.

A good way to bleach handkerchiefs when it is not convenient to hang them out of doors is to wash them and then let them soak over night in water in which a little cream of tartar has been dissolved.

Brown bread, cut in thin slices and spread with strawberry jam or peach marmalade and covered with a layer of cream cheese, makes a novel and delicious luncheon sandwich.

If silver which is not to be used often is kept in dry flour it will not tarnish and will need only to be brushed off when wanted for use at a moment's notice.

Rub your nickel stove trimmings with whiting and kerosene and see how nice they look after polishing with dry cloth.

A gas stove should be thoroughly cleaned once a week. The best things to wash the inside fixtures with is strong soda water. Dry well.

To test bread for baking, pinch up a little on the top of the loaf, and if it stays up, its ready for the oven.

The most stubborn glass stopper can be removed from a bottle by inserting the stopper in the crack of a door at the hinged side. Close the door as tightly as you can on the stopper without breaking it, and then gently twist the bottle back and forth until it is loosened. Patience may be necessary, but the plan is bound to succeed.

Cut flowers, particularly hard-stemmed ones, such as roses or carnations, may be kept fresh for many days by burying the stems in a vase filled with a mixture of powdered charcoal and sand. Keep the soil moist all the time.

CANADA AT PANAMA EXP.

(An appreciation culled from the Los Angeles Times.)

The Canadian Government has every reason to be proud of the phenomenal success of Canada's participation at the Panama-Pacific International Exposition at San Francisco. But the world at large has already been apprised through Canada's achievements at previous international expositions for the last fifteen years, that as an exponent of the art of exhibiting nature's products in a practical, interesting and instructive manner, Canada has no peer.

It is now a matter of record and the unanimous verdict of millions of people who have visited the Canadian pavilion at San Francisco, that Canada has here surpassed herself.

It is evident from Canada's efforts that if Canada does anything at all she does it well. The Canadian Government has set an example for other nations in the art and methods of exhibiting in order to obtain the most desirable results, i. e., to interest and instruct the visitors by means of an attractive display of her natural wealth and resources, and, thereby, not only provoking admiration and wonder, but also creating with every one an earnest desire to learn more of a country, which, like Canada, is only superficially known by many dwellers in the United States and other countries.

To carry out this work practically and successfuly, the Canadian Government has appointed a permanent exhibition commissioner, and a staff of officers and employees, who have been continually engaged in exhibition work for the last fifteen years. The Commissioner-General is Col. William Hutchison, who is an expert in the art of combining the useful with the beautiful as an advertisement.

We shall not attempt in this short article to give a detailed description of the many features of interest in the Canadian pavilion. Briefly outlined, the exhibit is a display of the resources of the Dominion of Canada as a whole. In the words of a distinguished visitor, "the display represents general, rather than specific, conditions; community, rather than individual products. So you see no cards exploiting any particular farm, factory or mine. It is not the products of Canadians, you see; it is the products of Canada. It is not a county fair. It is a country affair, a national institution. It takes you from Vancouver to Halifax, but you do not stop at any one's place for a little personal inspection. You view the country, its topography, products, mineral, animal and vegetable, and methods, in a manner that is rarely afforded one when you consider the vast extent of the dominion. What a great impression this exhibit must make wherever shown, and surely it must be in no small measure responsible for Canada's steady progress and development.

No attempt is made to show the industries, arts and educational system of the country. The exhibit is exclusively one of the natural resources, or pertaining to the agricultural, horticultural, forestry, fish, game and mineral wealth of Canada.

To render attractive such an exhibit, which, from its nature, would be uninteresting to most of the visitors, grain, grasses and leaf decorations worked upon a ground of the colored satins adorn every part of the building. Huge panoramas, masterpieces of perspective landscape, blend happily with the real scenery, thereby giving a realistic idea of the nature and productive wealth of the country, while richly decorated cases, containing innumerable specimens of ore from over 500 different mines and localities, testify eloquently its unlimited mineral resources.

Panels and easels, with statistics and descriptive reading matter about the area of Canada, its population, climate and resources, meet the visitors' eye at every step. Beautiful photographs bromides and transparencies, depicting rural landscapes and beautiful lake, river, mountain and prairie scenery, are seen everywhere.

Miniature railway trains crossing the prairies, and steamships plying in the lakes and harbors, all in full operation, give an excellent idea of the great transportation facilities.

One of the best exhibits is the fruit display. The visitor has hardly entered the Canadian pavilion than the delicious aroma of Canada's unexcelled apples invites him to seek this section, which is surely the most artistic layout of fresh and preserved fruit that has ever been seen at an exhibition. A realistic scenery of fruit gathering in peach and apple orchards serves as background to an area of over 2,000 square feet of green and lawn, over which is disposed an attractive area of large baskets and trays containing an infinite variety of the fruit of the country. "California has the trees that grow the rich-flavored sun-kist oranges. Canada has the frost and sun-kist trees that produce the rich-flavored apples," says the reading matter. And nothing could give a better idea of what Canada's climate can do.

We might write columns upon columns about the Canadian exhibit and still leave something unsaid. But it is noteworthy that on account of the wonderful impression it has created on the 18,000,000 of visitors who have come to the Panama-Pacific International Exposition, the people of San Diego realising that participation of Canada is one of the best guarantees of success for an international exposition, have made every effort to obtain and have secured her splendid exhibit for the international exposition in 1916.

Canada will exhibit in one of the main palaces exclusively at her disposal, and no doubt her collaboration will contribute to a large extent to the success of the exposition, and will secure for herself the benefit she so well deserves.

EAT FRUIT EVERY DAY.

It is Best Served With the Breakfast.

Since fruits form a needed and agreeable portion of the daily diet, it is of importance to have the most perfect fruit produced to supply the table. Unripe and a poor quality of fruit is not palatable nor wholesome. Thoroughly ripe fruits may be eaten freely, and, if possible, they should always appear on the breakfast table. All fruits are slightly stimulating; they are also cooling and refreshing and act as tonics and aid materially in purifying the blood. The best medicinal results are gotten from fruits when they are eaten early in the morning or eaten at the beginning of the breakfast. If raw fruits cannot be eaten, stewed fruits will prove very acceptable and almost as useful and refreshing.

Of all the varieties of fruit consumed, apples, on account of their variety, cheapness and abundance and of being obtainable nearly all the year, have earned the name of the queen of fruits. As a medicinal fruit they are valuable because of their potash salts. To the housewife they are useful because, baked, fried, stewed (as apple sauce), and raw and in pie, they supply an agreeable variety in the home dietry. We can do without many fruits, if necessary, but few of us will consent to dispense with the apple. It has been said time out of mind: "Eat an apple every day and you will keep the doctor far away." An apple or two eaten after dinner or at bedtime and washed down with a glass or two of cold water will put one in a condition to sleep comfortably throughout the night. Sufferers from indigestion, especially the form which gives the "bad taste in the morning, will be cured by eating apples or some other acid fruit upon rising in the morning. Adults and children need fruit to eat every day. Little children, as a rule, should be given stewed fruit. Oranges, seeded grapes and cantaloupe, however, are excellent for children for an early breakfast dish in their raw state. It should be constantly borne in mind that to eat fruit is necessary to keep one well. Persons who eat fruit regularly are seldom sufferers from headache and dyspepsia.

Trick of the Trade.

"Strong men" who break steel chains by the expansion of the biceps usually see that the chain contains two links made of a peculiar kind of glass which breaks upon very slight pressure.

"I've got to take exercise and quit eating so much," said the young man who calculates closely. "Worried about your health?" "No. I'm getting so stout my room-mate's evening clothes won't fit me."—Washington Star.

TOWN AND COUNTRYSIDE

News From the Neighboring Towns and Villages Written for The Telescope by a Staff of Live Correspondents:

GLAMIS

Mr and Mrs D D McLean of Fort William are visiting relatives and friends in this locality.

Mr Clyde McKeeman and Miss Phyllis Moffat, visited Major Moffat in Walkerton on Saturday.

Miss Kate Urquhart of Tiverton, has been the guest of her friend Miss Flossie McLennan for the past week.

Miss Verna Husk who was so ill with typhoid fever, we are pleased to report is recovering and is able to be up again.

On Friday evening about 35 young people of the Baptist Church met at the home of Mr K McLennan, and presented Mr Dunc. McLennan, organist, with a beautiful mahogany music cabinet and the following address —

Our Dear Brother McLennan:

We, the members and friends of the Glamis Baptist Church, desire to place on record our appreciation of the service you are rendering in our work at Glamis.

It has been said, and is probably true, that we miss much of the best in life because we fail to express our appreciation of each other; but there are some cases where we hesitate because we feel that anything we can say or do must fall far short of what we could wish.

We need not try to tell you how important is the place of music in our worship of God, but we are assured that the appreciation of your work as organist and choir leader, and the appreciation of your singing, is much more general and much more profound than you could possibly imagine.

The services have always been given spirit and dignity, the attitude of worship has been intensified and our hearts drawn nearer to God through the subtle influence of the Divine instrumentality that you have used so well in His service. Whatever progress God's work is making in our midst depends largely on the part music plays in that work, and we are deeply grateful to have one among us who is so eminently fitted to take charge of that part of the Divine service.

We have often envied you your gifts and have often thought that you could well have filled a higher place, but we are glad—perhaps somewhat selfishly glad—that your sense of duty has kept you in our midst, and we assure you, that, while we may not be capable of the appreciation of your powers that you might have elsewhere, we do honor your works and believe that your God, and our God, will richly reward you for the consecration of your gifts to His service.

Accept, dear brother, this slight evidence of our love and esteem and our deep appreciation of the help you are rendering to the good work in this part of God's world, and while you lead us to the throne of grace in the prayer of song know that we are the while thanking Him t[illegible] has given you to us.

On behalf of the Church and Sunday School.

Neil Currie,
George McKinnon,
Christopher Young,
Walter Webb.

Glamis, Jan. 14, 1916.

The address was read by Miss Rela McKinnon and Mr John Currie made the presentation. Duncan then made a few feeling remarks, thanking his friends for the gift. The evening was spent in games, music and recitations followed by lunch, after which they sang "Auld Lang Syne" Everyone present reported a good time, having met together on this occasion.

Mr and Mrs Jack McLean, and Mr Dan McLean of Pincher Creek, Alberta are visiting at L N McLean's 10th Con. Kincardine.

"The Guild" of St Pauls Church have changed their meeting from Tuesday evening to Sunday after evening service.

Mrs W J Carr, and Master Cecil returned from Kalamazoo, Mich on Thursday.

Mr and Mrs J Kitchen of Detroit Mich are visiting her parents, Mr and Mrs J B McCormick.

The Annual Meeting of Glamis Public Library, was held on Friday evening. Good reports were given showing a large increase in membership, also the purchase of about 50 new books. The officers of 1915 were re-elected for 1916. Non-members, favor us with a subscription for 1916!

Mr Wilbert McNally has returned home from Detroit, Mich.

On Friday evening about 30 members of St Pauls "Guild" met at the home of Mr and Mrs W J McKeeman and presented their son Clyde, with a wrist watch, as a token from the Y P Guild, before he leaves to enter training for overseas work.

WESTFORD

Mr A Campbell spent Sunday with his sister, Mrs R Donaldson of Teeswater.

Mr and Mrs W H Blackwell were the guests of Mr and Mrs A E Haldenby on Monday evening.

Mr Charlie and Miss Ethel Wall attended the dance at Mr Jack Ross's on Monday night.

Mr Fred Haldenby had a very successful wood bee on Tuesday afternoon.

Mr and Mrs Wm Roth returned home on Friday after spending a week with friends in Marmora and Toronto.

Mr J B Murray, has returned to Toronto after spending his holidays here.

Miss Purv's of Holyrood, spent Sunday with friends here.

Mrs Fred Haldenby spent the week end with her daughter, Mrs J Lockhart of Kinloss.

A large crowd attended the Patriotic Rally and moving picture show, held in the school on Monday night.

MAPLE HILL

The Maple Hill Girls' Aid, held a very successful Patriotic Dance at the home of Mr. Wes Inglis on Friday evening last. A number from town were present and a good time was enjoyed by every one. The proceeds amounted to $14.25 which will be devoted to Red Cross Work.

EDEN GROVE

Mr Taylor of Toronto, who is visiting at Mr H Pearson's, spent the week-end in Cargill.

Mr John Sieler spent Saturday in the County Town.

Mr Earl Alexander who enlisted last week, left on Monday to go into training with the Bruce Battalion at Walkerton.

Quite a number of our young people took in the dance at Cargill on Friday evening.

Mr Len O'Reilley spent Friday evening at Vesta.

Mr Earl Alexander was presented with a beautiful engraved ring and an address on Friday evening by his friends and acquaintances, prior to his leaving to join the Bruce Battalion.

We are sorry to hear that Mr Solomon Childs is again confined to his room with a severe attack of the cold and asthma.

CARGILL

The Foresters' Ball held on Friday eve was well patronized, and all enjoyed themselves. Hetzler Bros supplied the music.

Mrs John Hall Jr, spent the past week with friends in Wingham.

Mr Roy Sparling of the G T R at Goderich, has enlisted with the Huron Battalion at Clinton. This makes three brothers in khaki.

Mr Wm Mathews was in the County Town on Tuesday.

Owing to the storm of the past few days, the correspondent has not been out much and therefore the readers of the family journal will have to be content with a shorter budget than usual.

EDEN GROVE

Miss Pauline Thompson, trained nurse of Toronto, who has been visiting her old home here, returned to the city last week.

The roadway on the 8th con. is completely flooded and may be impassable the rest of the winter.

OTTER CREEK

Mr George Miller from Mildmay was visiting friends in Carrick on Sunday.

Mr and Mrs John Becker were blessed with a son on Wednesday last. We congratulate John.

Mr and Mrs Charles Dickison, daughter and son from Clifford, and also a number from Walkerton were here attending the funeral of Mr Charles Hogg, which took place here on Monday afternoon from his parents' residence, to the Walkerton cemetery. Considering the stormy weather, there was a goodly attendance of friends and neighbors showing the last respect for the departed brother. On his coffin lay three wreaths, one from parents, one from friends and one from the Carrick Bible Union. We extend our heartfelt sympathy to the bereaved family. He leaves to mourn his early departure, parents, two brothers, two sisters and a large number of relatives and friends.

IN MEMORIAM

Yea! we part but not forever,
Joyful hopes our bosoms swell.
They who love the Lord shall never
Know a long, a last farewell.
Blessful unions, blessful unions
Lie beyond this parting vale.

VESTA

We are very sorry to report that Miss Jean Smart, who was operated upon some time ago for appendicitis is not improving as rapidly as we would like to see her.

Our popular farmer Mr. James Rae purchased a fine team of horses last week. James is certainly doing his share in producing fine steeds.

The Annual dance which took place at Mr. Percy McGarrity's last Friday night was well attended, our local orchestra being present accounts for this. All report having had a grand night. This clearly shows us that in spite of the war, dances are on the go.

We are sorry to report the accident which befell Mr. J. D. Rielly last week. It seems he fell on the ice during the slippery days. We wish him his usual health and activity at an early date.

Rev. T. L. Ferguson of Ayton, visited his aged father, Joseph Ferguson, last week.

Our local bachelors are beginning to learn how to skate. Better late than never, boys.

An enjoyable evening was spent at Mr. Dan. McGill's one night last week. All report having spent a good time.

Vesta is surely doing its share in supplying recruits for the 160th Batt. No recruiting agents required in this burg.

MILDMAY

Mr Frank Schmidt is now a student at the Stratford Business College.

Miss Innes of Glencoe is a visitor this week at the home of her sister, Mrs J A Johnston.

Mr Peter Hunstein has recovered from his late illness and is now at work again.

Several loads of our local hockey fans journeyed to Walkerton on Monday evening to cheer the Mildmay boys on to victory, they having won, the score being 9—4.

A splendid recruiting meeting was held in the Mildmay Town Hall on Tuesday evening, Jan 11. His Honor, Judge Klein, Mr Rowland, Mr H H Miller and several officers of the 160th Battalion delivered splendid, to-the-point speeches patriotism and reasons for enlisting. Rev Mr Marsh and Mr J A Johnston delighted the audience with several patriotic songs, Miss Pearl Morrison, accompanist. Dr Wilson occupied the chair. The hall was crowded to the doors.

The local junior hockey team played a game of hockey in Walkerton against the juniors of that place, on Friday last Our boys were the winners, the score being 10—4.

PINKERTON

Mr. Harvey Garland is now under the doctor's care with a very sore throat.

Senator Donnelly attended the opening of Parliament last week.

We would advise some of the young ladies in this vicinity to be careful into whose cutter they are getting as it might lead to some embarrassment.

Quite a number from here attended the dance at Cargill on Friday evening.

Ptes. Garland and Sullivan of Walkerton were visitors in the burg on Saturday.

Mr. Hugh Campbell of Chesley, has taken a position in the flour-mill.

Good skating was experienced on the river last week.

The Annual meeting of the Presbyterian Church here took place on Thursday last when everything was found to be in fine shape for the New Year.

Local War Orders.

A list which appeared in the Toronto papers last week showed Chesley to to have received $126,000 in war orders and Walkerton $24,000. The only firm handling war orders here is the Knechtel Furniture Co., which has been making shell-boxes. This firm has a tender in for 25 000 more shell-boxes which will, in all probability, be accepted.

SUBSCRIPTIONS TO THE TELESCOPE

All subscriptions to the Telescope, whether in arrears or otherwise, are payable to the present publisher of the Telescope. We make this explanation again for the benefit of a few readers who do not appear to be clear on that point. If paid now (before Jan. 31st, 1916) all subscriptions will be $1 per year. After January 31st., all subscriptions, whether in arrears or advance, will be at the rate of $1.50 per year. Subscribers have only to see to it that their subscriptions to the Telescope for 1916 are paid NOW to avoid paying $1.50 for the coming year.

J. J. SCHUMACHER.
Secretary.

ALEX. McNAB IS WARDEN

Walkerton Reeve Elected to Important Office on First Ballot

Alex McNab of Walkerton was elected Warden on the first ballot of County Council Tuesday afternoon. The vote stood: — McNab 17, Izzard 7, Douglas 6.

Warden Alex. McNab, who will preside over Bruce's Parliament of thirty-one members for the year 1916, is a native son of Bruce, having first seen the light of day on a farm near Chepstow, his parents being among the first pioneer settlers of this section. At the country school, and later at Walkerton High School, he gave evidence of that ability, which later placed him at the head of his classes at Varsity and at Law School. At the University of Toronto, he headed his class all the way through his course, graduating in 1897, with the gold medal in Mathematics and Physics. At Osgoode Hall, he had equal success in the study of law, winning each year the first scholarship and graduating in the year 1900 with the gold medal. Unlike a good many medallists he did not confine his attention entirely to books. Among other activities at College, he took an enthusiastic interest in football being one of the star players on the University College team. He brought his love of the game home with him from College, and promoted the Association team here which later on won the Ontario Championship. His interest in sport has extended into other fields, and he now seeks less strenuous recreation at the rink and on the green. In both bowling and curling he has been a leading enthusiastic, being a past president of the former club, and president of the latter. In the practice of law, he has been associated for the past thirteen years with Mr. David Robertson, in the firm of Robertson & McNab.

Since 1911 Mr. McNab has been closely identified with municipal affairs in Walkerton. That year he was elected Councillor. The following year he became Reeve, and has been re-elected to that office each succeeding year since that time. At Council, as in everything he has undertaken, he has shown himself to be most painstaking, careful, and thorough and has quired an knowledge of municipal and county affairs, possibly not excelled by anyone in the County. His sound judgement and native shrewdness, together with his ability and training, give him an efficiency which is seldom equalled among municipal officers.

Apart from other qualifications, his genial personality wins the new Warden friends wherever he goes. His popularity in his home town is evidenced by the fact that only once in his municipal experience has he had opposition. Everyone will agree that the County Council has made no mistake in its choice for 1916 and the Telescope unites with his many friends in wishing him a good year as head of the Bruce County Council.

Patriotic Card Party

The Patriotic Card Party given by a number of ladies of the town at the Town Hall last Thursday night was a fine success. Over $65 was cleared for Patriot'c purposes. Over a hundred guests were present. The prize winners were: Ladies, 1st Miss Aphra Schumacher and Mrs. A. Bauman; 2nd, Mrs. Martin and Miss Goetz; 3rd, Miss H. Schumacher and Miss Stead; 4th, Miss Edith Weiler and Miss Rowland. Gentlemen, 1st, Ralph Krueger and Herb. Weiler; 2nd, T. Pye and A. Weiler; 3rd, David George and Crawford Skelton; 4th, Norman Fox and Pte. C. James. Music were provided during the evening by Mrs. Hunter, Mrs. Truax, Miss Rowland, Misses Schumacher.

+ + +

Everybody's Got 'Em

Walkerton is suffering from an epidemic of red cards. A score or more homes in various parts of the town are placarded "Measles." The cases are of a mild type and as every precaution is being taken by the authorities to prevent the spread of the infection, it is anticipated that the epidemic will soon be stamped out. On Thursday last a couple of prominent citizens, smarting under the restrictions of the local Health Dep't, secured a visit from Dr. J. J. McNally, District Health Inspector, who had a joint meeting called of the Board of Health, and School boards to consider the best means of meeting the situation. After some deliberation it was decided to engage a nurse, to work under the direction of the Board of Health, and to be paid by the Town Council, her duties being to visit the schools, detect incipient cases and otherwise assist. Miss Freda Dippel, trained nurse, has been engaged and is now in charge. A regulation that is being enforced is that every child who is absent from school a day, has to present a certificate from the Medical Health Officer before being permitted to resume class.

News About Town

Local news on page 6.

Mrs. Netschke spent the week end at Galt.

Rev. D. McLennan was in Paisley, on Monday.

Mrs. Weiler has gone on an extended visit to Hamilton.

The local company of the 160th parading for the first time on Wednesday afternoon, accompanied by the newly organized regimental band.

The 160th Bruce Regiment Band has secured quarters over the Merchants Bank, and is holding daily practises under Bandmaster Wright.

Twenty-six young men who offered their services to the 160th Batt. and were not accepted, have been granted certificates of non-acceptance.

We are sacrificing our big stock of gents furnishings, prices cut in two, complete stock must be sold, get in on our bargains. S. A. Rife & Co.

Major Brown, who has a 200-acre farm at Lurgan, has offered his services to the Militia Department, and is willing to be used in any capacity.—Ripley Express.

Arthur Hueghan, son of Mr. R. E. Hueghan, is expected home from Truax, Sask., about the first of the month. He intends to join the colors.

Robert Merchant, section boss at Dunkeld, threw up his job last week and joined the colors. The G.T.R. company has generously granted him six months' pay.

Some interesting souvenirs of the battlefield, sent by Private James Russell, son of Councillor Robert Russell, are on exhibition in C. Reichenback's jewelry window.

This is the second time in the history of Bruce County that a Walkertonian has sat in the Warden's chair. The late A. W. Robb, then publisher of the Telescope, was Warden in 1906.

Only one County Councillor was absent when the January session opened yesterday. Reeve D. B. McDonald of Tiverton was detained at home owing to the death of his father.

Mr. Rankin of Paisley, who has been engaged by Irwin Bros as assistant at their sales stables, has rented Mr. Frank Schnurr's new house in the east ward and moved here with his wife this week.

Mrs. M. G. Woodman has received word of the death of her father, Mr. Daniel Wilson at Allendale, N. Dakota. Mr. Wilson, who was over eighty years of age, was a former resident of Drayton.

Youty's Jelly Powder is no "stick-on-the-shelf" line. It is a steady seller. It is of excellent quality and the flavors are very tasty. On sale at the leading grocery, Walkerton.—Goode & McKay.

Rev. D. A. Walker received a joint letter from the soldier boys at Galt, belonging to the Walkerton Methodist congregation, expressing their appreciation of the Christmas parcels sent them.

A pleasant social time was spent by a company of 45 young people at the home of Mr. and Mrs. Albert Marshall East Ward, on Thursday evening. Music for dancing was provided by Mr. Amos Dennie.

The proceeds of the lecture given by Rev. John McNeil under the auspices of the High School, amounted to $104.70, netting the sum of $78.28 for the Red Cross Funds after all expenses had been met.

The ladies of Knox Church are giving a supper to soldiers this (Thursday) evening at six o'clock. The County Council will dine with them. The managers and session of the church have also been invited.

No more "Trading Coins" in exchange for produce after this date. We pay the "Cash" for eggs, butter and other lines of produce. Highest prices paid, at the leading grocery, Walkerton.—Goode & McKay.

Principal Willoughby would like parents of the town who may be planning to send beginners to school, not to send them until March 1st, instead of Feb. 1st, this year owing to the prevalence of sickness in town.

The hockey management sent a team mostly composed of juniors to play the return match at Mildmay Friday night. The youngsters did well but were no match for the crack Mildmay septette. The score was 10—1.

If you are a stranger in our town, a visit to our store will prove you the truth of our claim, viz:—"We sell the best—yet the price is small. The best for the smallest price," at the leading grocery, Walkerton.—Goode & McKay.

The Telescope received from Major (Dr.) J. J. Fraser, a copy of a spicy publication, "The Splint Record", published by No. 2 Canadian Ambulance Corps. One or two choice extracts are reproduced elsewhere in this week's Telescope.

Mr. W. M. Bush received a telegram on Monday announcing that his son, Earl, was seriously ill with pneumonia at Radford, Sask., where he is a member of the Bank of Commerce Staff. A second wire on Tuesday brought the encouraging news that he was at least holding his own.

Mr. and Mrs. Harry McCrum left by G. T. R. on Tuesday afternoon via Chicago for California, where they will spend the remainder of the winter. They will spend most of the time at Los Angeles where the former's sister, Mrs. Soper, formerly of Galt, is now living.

Mr. Fred Schmidt and family are removing this week to Bay City, Mich. where the former's brother has secured him a good position as chauffer. Mr. Schmidt has two brothers and a sister living in that city. The best wishes of their many friends here accompany them to their new home.

A familiar figure is again seen on the streets after an absence of nearly seven weeks. During the December sessions of the County Council, Rev. D. McLennan, Children's Aid Agent, slipped and fell down the Court House steps injuring his knees so badly that he was confined to the house until Saturday last. Mr McLennan has scarcely yet recovered from the effects of the mishap which might easily have been more serious.

Big Moving Sale.

Of Millinery on Thursday Friday and Saturday of this week.—Madelle Millinery Parlors.

Mr. Truax Home

Mr. R. E. Truax, M. P. was taken ill at Ottawa the first of the week and came home for a short recuperation. He hopes to return to the Capital in a few days.

+ + +

Over 500 Strong.

Recruits are coming in at a fairly good rate. Over 500 men have enlisted to date in the 160th Bruce Battalion exclusive of officers. Wiarton still leads with 116 recruits. Walkerton is second with 94.

+ + +

Hockey Team Quits

The local Northern League team is down and out for the present season. It was found that material was lacking to fill the gaps in the line-up and a team of league class is out of the question for this year.

+ + +

Fair Board Meets

The Fair Board met on Thursday afternoon and reorganized for the coming year. The date for the Fall Show was fixed for Sept. 12 and 13. Directors were re-elected for the coming year as follows: Pres., S A Rife; 1st Vice Pres., W J McNally; 2nd Vice Pres., N. C. McKay; Directors, John Mielhausen, H. J. Ernst, W. A. Rowand, F. X. Schnurr, Geo. Leitner, Ed. Tolton, Robt. Richardson, A. H. Stevens, Walter Jasper; Auditors, D. McKechnie, A Collins; Secretary-Treas., Jas. Tolton.

+ + +

Died in the West

The death occurred at Calsville, Sask. of Mrs. Jacob Benninger, (nee Angeline Ernewein) formerly of Walkerton, in her thirty-third year. Death resulted from Bright's Disease. She leaves besides her husband, two small children. Her brothers and sisters are:—Felix Ernewein and Mrs. H. Obrecht of Walkerton, Lena and George of Formosa, Mrs. Jos. Volsin of Culross, Henry and Adolph of Sask. Deep sympathy for the bereaved ones is felt by the old friends of the family in Walkerton and vicinity.

+ + +

A Sudden Death

Mrs. Sieveright received the sad intelligence on Thursday night that her mother, Mrs. G. F. Bruce, had passed away suddenly and unexpectedly at her home in Beaverton. Mrs. Bruce had been in her usual good health and had attended a church meeting in the afternoon. She was sitting chatting to a friend, talking and laughing, about eight o'clock in the evening, when without a moment's notice she expired. Mrs. Bruce was a sister of C. Blackett Robinson of Ottawa, and is survived by her husband, a son, W. W. Bruce of Toronto, and one daughter, Mrs. Sieveright of Walkerton.

+ + +

Real Estate Moving

Real estate is on the move in Walkerton and vicinity. Mr. James Whitehead put through three deals the early part of the week. The garage opposite the Queens Hotel and the house adjoining it, at present occupied by Mr. Ray Vogan, he sold to Mr. Fred Ermel, foreman at Knechtel's factory. He sold the old Schnurr butcher shop, owned by Frank Schnurr ton, to Mr. R. E. Hueghan, who will remove his harness business to this stand. For Mr. James Connors, he sold the old Lambertus farm in Greenock, the purchaser being Mr. John Mielhausen.

+ + +

Popular Couple Wedded

A pretty wedding was celebrated at the R. C. Church, Walkerton, on Tuesday morning, January 25th, at 9.30 o'clock, when Miss Regina Batte, daughter of Mr. and Mrs. Joseph Batte sr., was united in marriage to Mr. Harry Dossman of Culross. The ceremony was performed by Rev. Father Cummings. The bride was assisted by her sister, Miss Veronica Batte, similar duty being performed for the groom by his cousin Mr Martin Dossman. The bride was handsomely gowned in a blue suit with hat to match, the bridesmaid being similary attired. After the ceremony a tasty wedding dinner was served at the home of the bride's parents at which only the immediate relatives of the contracting parties were present. The following day, the happy couple left on an extended trip to Toronto, Buffalo and Pittsburg. On their return, they will reside on the groom's farm in Culross. The Telescope unites with their many friends in wishing this young couple every happiness and prosperity.

MORE WALKERTON RECRUITS

SPARLING, H. G., age 21, born Cargill, butcher.

MERCHANT, R. J., age 33, born Purton, Eng., section-man.

MURRAY, P. J., age 19, born Chepstow, Ont., bank clerk.

VAN HORNE, W. G., age 18, born Walkerton, laborer.

WATTS, H. K., age 30, born Mount Forest, locomotive engineer.

HERD, F. T., age 18, born Walkerton, factory hand.

PLOWRIGHT, J. E., age 19, born Nottingham, Eng., farmer.

JAMES COULTER DEAD

Operation Failed to Save the Life of Well-known Citizen

As late as Wednesday last, Mr. James Coulter, treasurer of Brant Township, and a well known figure in Walkerton, was enjoying the best of health. On Tuesday morning at six o'clock he breathed his last at the Bruce County Hospital. Comparatively few people had even heard of his illness, and the news that this stalwart figure had been cut down by the hand of Death, came as a shock to the community. Mr. Coulter was taken ill with stoppage of the bowels and an operation was considered necessary to save his life. He was taken to the hospital on Monday morning, and underwent an operation in the presence of three medical men later in the day. The operation appeared to be successful and it was thought that he would recover providing no complications set in. But the shock appeared to be too great for his system and at six o'clock the following morning he passed away. Mr. Coulter was born on the old bush farm, lot 9 Con. A, Brant, where his father, the late James Coulter, settled on arriving from Ireland in 1851. He lived on the homestead until a few years ago, when he moved to a smaller property south of town, where he lived in a sort of retirement, engaging in the insurance business, as well as performing the duties of treasurer of Brant Tp. Mr. Coulter took an active interest in municipal, as well as political life. He was a Conservative up to 1911 when he changed parties over Reciprocity. At the time of his death he was treasurer of Brant and had previously held office as township assessor. He was a man widely known throughout the district. A somewhat bluff and brusque manner did not altogether conceal a warm heart and kindly disposition. He was a man of principle and determination, respected by all. Besides his wife he leaves to mourn, a family of four sons and three daughters:—John, Ernest and Norman, farmers, of Sandford Dene, Sask.; James with the 68th Regiment at Regina; Bella, of Moose Jaw; Mabel and Edna at home. Two brothers and four sisters reside in the West. The funeral is being held Thursday morning from the family residence, "Pine Grove", just south of the town.

The neighborhood, comprising Polling Subdivision No. 2. Brant, is certainly doing its bit for the King's service. Eight have already enlisted, and there are more to come. The list to date is,—Capt McNally, Sergeant F. H. James, Privates, Gordon McNally, F. T. James, John Plowright, Thos. Lamb, Jas. Scott and Fred Hawk. All but the last mentioned are with the 160th Batt.

+ + +

Card-Indexing Eligibles

The military census of the County, which is being undertaken by the Bruce War Auxiliary, is now almost completed in two-thirds of the County. The Walkerton Committee is practically through and will hold a meeting on Friday night for final reports. The canvassers have been well received by the people and have secured information that will be of great value later on in the recruiting campaign. 5,000 census cards have been distributed and when these are turned in, the eligible men of the County will all be card-indexed. While the primary object of the canvassers has not been to secure recruits, but to secure information, their visits have been in a sense a challenge to those who are elegible for enlistment. Every excuse under the sun has been offered to some of the canvassers, at least every excuse but "cold feet".

+ + +

Old Bruce Boy Writes

Up near Shaunavon, Sask., is a township where about one-third of the people came from Carrick. They had great crops there this year as evidenced by a letter which the Telescope received from an old Bruce boy, Nicholas Ruetz, extracts from which we publish below:—As my folks keep nearing Walkerton and are almost in town, I must call it my home instead of Carlsruhe. I was sure to see Walkerton this winter, to see my new home but owing to the heavy crop I was unable to go. The wheat averaged about 45 bus. in this neighborhood. My neighbor who is about the third best on record for Western Canada had 74 bus. per acre. My oats went over 100. We have very good land, the only drawback is a draught once in a while, although we always had enough to keep us going and enough feed for our stock. The hardships are nothing compared with what our forefathers had in Bruce County. There are ever so many from Bruce County up here. I might say about ½ of the township I live in are from Carrick, about ten of my own school chums from Carlsruhe. This heavy crop and high prices of wheat will put most of us on our feet, so we will be able to see old Bruce oftener in the future.

MISJUDGED

"Oh, I don't know nothing! I leave all knowing to the police—they're paid for it. They are the ones to see through stone walls. I'm only a plain man. I'll tell you what I heard, since you press me so. I came along to her garden to nail up a bramble rose that was flapping in the wind. I went along by the back, over the fields. The grass was long, and I suppose I made no sound. I heard voices, and there was Miss Daintree quarrelling with the man from the White Farm. Oh, very white and bitter he looked! I couldn't hear what he had to say, but I heard her as plain as you please. 'That weapon will be fatal to you,' she said. What do you make of that?"

"Had she any weapon in her hand?" asked Budge.

"Nothing but a bit of a trowel, and that couldn't have done anything."

"What did he say?"

"He turned on his heel and went off quickly."

"I never saw them speaking," said Budge.

"No more did I. But it wasn't more than a day or so ago that I met her out latish, walking very fast along the road. I thought she looked as if she had been having words with some one."

Budge had now come to the end of the visitor's knowledge, and thought he had better assert himself.

"When you have a complaint to make it. When you haven't you keep still. If Miss Daintree wants the help of the police she'll get it, and I shall not let myself be carried away by remembering anything about the society she belongs to."

"And I say the same as Budge," said his wife, who had had time to remember that Miss Daintree paid well.

Slade knew he was being ill-used, but could not exactly lay his finger on the offence. He smoked his pipe out in silence and then went home. Here he revenged himself on all women by giving his wife many hints about an exciting story which he alone could tell, and then refusing to say another word.

It had just crossed Beryl's mind to wonder how much he had heard, not for her own sake, but for Dora's.

Next day she again resolved to get flowers for her disappointed friend in London. This time she did not leave it nearly so late, but started off without waiting for her tea. She went in the direction of her favorite hollow. It was a glorious afternoon, and the country-side was looking its very best and its most joyous. When she came to the fence she took a look round, just because in her mind still lingered the remembrance of the other afternoon.

There was no sign of any waiting figure, and Beryl thought she was utterly absurd to think that such an encounter could take place twice. At least the place was quiet enough to-day, and her heart was light as she started off on her quest.

At her feet the bluebells were very lovely, but it seemed as if the very finest grew out of her reach. The other side of the pool showed still the bluest patch of all the hollow, and she made her way to the grass-covered path between the sister pools.

She had actually passed a great clump of bramble bushes mingled with a tangled undergrowth of wild parsley and the dark spotted leaves of the orchids when in a strange, backward-looking sense in her mind, it flashed across her that there was something out of order about the ground just at that spot. She retraced her steps, and saw that there were marks of footprints—of very deep footprints, indeed—and that the turf and ferns were torn. Also on the ground and on the pure green leaves were deeper spots than those on the leaves of the orchids which caught the light and gleamed with an ugly red.

A sudden terror seized her and made her heart beat fast. What had happened here? She thrust some of the undergrowth aside and looked down the grassy slope to the pool, and then, for the first time in her life, she screamed aloud.

The form of a man lay there at her feet, half in, half out of the water. It lay very still indeed, far too still. It had a curious broken look, as if it had, after all, some kinship with the green things around which had been bruised and battered in its fall. One arm lay yet trailing along the bank, the hand full of the twigs of bramble and leaves at which it must have clutched unconsciously. The head and shoulders were out of the water as he lay face downwards against the turf; but the head was not good to look at. The sullenly lapping waters hid the rest of the figure.

Beryl dashed down to the brink of the pool, not allowing her eyes to rest upon that poor ill-used head, and tried to drag the man by his shoulders out of the water. The weight was too much for her, and she called for help. No voice came, nor any sound of footsteps. She repeated her unavailing efforts, then raced back along the green pathway, up the steep bank, to the fence. She looked up the road towards the Hall and saw no one, then down towards the village, and made out the figure of a man coming in her direction.

She jumped over the fence and ran to meet him. He quickened his steps at her call, and she saw that it was Budge, the village policeman, not yet returned to his duties on account of his hurt wrist.

"Come!" she called. "Come at once! There is a man here, ill, hurt, perhaps dead!"

Budge hastened his pace considerably and came up, looking curiously at her white face and at some ugly stains which showed up on the light holland dress she wore.

He followed her over the fence to the edge of the pool. Then, taking in at one glance the position of the motionless form, he said:

"Don't touch anything! He is dead. I must get help."

"Shall I wait here?" asked Beryl.

"No, best not. You go up to the Hall lodge and ask the lodge-keeper to come. I will get some one from the village."

Both were successful in their quest, and the poor motionless form was lifted out of the water and laid on the dry ground.

"Who is it?" asked the lodge-keeper.

"The man staying at the White Farm."

"Who found him?"

"Miss Daintree," replied Budge. "Now, my men, take care not to make too many footmarks here. We have to carry him back to the village, and then I must let the inspector know."

The news spread through the place—the Blakes' lodger dead, found by Miss Daintree, and undoubtedly murdered.

Before two hours had passed the inspector had been telephoned for and arrived from the nearest townlet, accompanied by a detective. Escorted by Budge, now a person of great importance, they looked at the poor victim.

"Head knocked in," said the inspector.

"Find the weapon!" said the other man.

They visited at once the scene of the tragedy, and the detective took a look round.

"Ah, what's that?" he said.

That was a moderate-sized jagged stone, itself rather smaller than a man's head, stained on one of its ragged edges.

"That did it," he said. "Pick it up, but put a mark on the ground where you found it. This was a quarrel, not a thought-out affair."

The newcomers noted everything they could—the position in which the body had been found, its distance from the path, and the distance at which the stone with which they believed the deed had been done was left. Then the detective looked at the footprints which were rapidly becoming crossed and recrossed.

"It was a lady found him?" asked the inspector.

"Yes."

"Belonging to these parts?"

"No, a stranger, only just settled down."

Then they returned to learn what the doctor had to say. His opinion was that the unfortunate man had not been dead many hours when found, and that the wound in the head had undoubtedly been the cause of death.

"Do you know much about him?" asked the inspector, not strictly official, of Budge.

"No: he was only a lodger here. I never heard any harm of him to speak of, nor much good."

The detective went off to the White Farm to tell the inmates of the tragedy.

He found only Mr. Blake's widowed sister and his young daughter. They were peacefully engaged in their household duties, getting a substantial tea ready for the master of the farm and such of his men as had their meals there.

The detective's eyes roamed round the premises and searched the faces of the two women, but he speedily convinced himself that they were quite ignorant that anything had happened.

"I was just wanting a word with Mr. Blake," he explained when he appeared at the door.

"Well, then, you just step in and wait, sir," said Mrs. Riggs. "My brother will be home punctual for his tea."

"What time do you expect him, ma'am?"

"At half-past six, neither sooner nor later. There's much work to be done just now, and there are no idle hands on the place."

"Is Mr. Blake quite well?" he asked, affably.

"Oh, yes; he doesn't complain! He has his health, and knows how to be thankful."

"But if he is so busy now he may not be back for his tea?"

"Oh, Joshua isn't that sort! When the meal is ready for him he is ready for it. His dinner is at half-past twelve and his tea at half-past six, and he is never missing than."

"You had a lodger, Mrs. Riggs?" said the detective, suddenly.

"We had one, sir. A decent, quiet sort of shiftless, thriftless, useless body. He's from London, so we didn't look for much in him. He is about the place somewhere."

Just then the farmer came in and greeted his unknown visitor.

"I called for a word with you," said the latter. "The fact is I'm a detective officer."

"Nothing wrong, I hope?" said Mr. Blake, slowly.

"You didn't hear of anything wrong, Mr. Blake?"

"Can't say I did. The men is mostly at work, and they have no time for fooling. 'Tisn't time for the hoppers, either. Is there anything afoot, sir?"

"Not enough," said the detective. "There is one who ought to be afoot and isn't. When did you last see your lodger, Mr. Blake?"

"Why, at dinner, to be sure! He doesn't come round the farm with me. He was at his meal, and picking as well as usual—eh, Fanny?"

"Certainly he was. There is nothing wrong with him, is there?"

"He couldn't be called exactly well," said the detective, very slowly. "To tell the truth, he is dead."

"Dead!" said Mrs. Riggs. "It can't be him! He was so hearty and well."

"Dead!" said the farmer. "Why, he never complained of having anything the matter!"

"Dead!" said the pretty daughter. "And he never said 'Good-bye to us!'"

The detective looked at them all, and decided that each had shown the most natural surprise possible; but the remark of the girl lingered a little in his mind.

"What was it, sir?" asked Mrs. Riggs.

"I suppose it was his heart?" said the farmer.

"No: 'twas his head, and that had been hit by something very hard."

The pretty daughter jumped up with a scream.

"Hit! What do you mean? Father, he doesn't mean he was murdered?"

"Yes, miss," said the detective, looking full at her, "he was murdered."

The farmer sat down heavily in an armchair.

"Murdered! A man we had here under our roof! 'Tis enough to make a man's brain turn. Who did it?"

"That's what I'm here to find out," said the other. "You don't know of any quarrel he had?"

"No; he was a soft-spoken chap, not the one to quarrel or to stand up for himself—one of your easy-going ones."

"He didn't quarrel with any one that I know of," said Mrs. Riggs; "he was never friendly enough with any of the folk round here."

"I shall have to ask you to let me see his things," said the detective, "and they'll have to be left undisturbed for the present."

The belongings of the dead man were duly sealed up, to be inspected later; but the detective took away some documents with him.

As he left the place he was convinced that these good people were as unaffectedly shocked and surprised as any people could be. His face set more grimly than usual as he came to this conclusion, for it gave point to one or two remarks which had been made to him by Budge.

Beryl went home filled with horror. She ordered hot water to be taken to her room, and then changed the dress with the terrible stains.

"Take this to Mrs. Budge and ask her to wash it for me, please, Emily," she said to her servant.

The servant took it, and returned with a message that Mrs. Budge would "see to it." But Mrs. Budge had a few words with her husband, and the dress did not at once go into the wash-tub.

When she had once more dressed and felt a little more composed Beryl sat in her drawing-room, with no aching head, wondering if she would ever lose the impression of the terrible sight she had seen. She had almost fallen asleep from sheer mental fatigue when her servant announced—

"Miss Langton!"

Dora came in, waited one moment until the door was closed, and then threw herself on the sofa near to Beryl, saying—

"Oh, Beryl, Beryl, I feel as if a load too heavy for me to bear had been lifted from my shoulders!"

Beryl looked at her in some surprise. She was herself so unselfish that it struck her rather painfully that in the face of death and crime this girl should think only of herself. Then she remembered how long she had lain under the harrow, and thought it might be natural after all.

"It was terrible for him," she said gravely.

"Oh, yes, yes; horrible! But he was a bad man, I don't care what you think of me, I am glad, glad! I am glad he is dead! I am free at last! Beryl, you might be a little glad too for me!"

"I found him," said Beryl.

"Oh, yes, I heard that! I had forgotten. That was horrible for you. Was it an accident, or had he tried to drown himself?"

Beryl shook her head.

"No; he was murdered."

"He can't have been! Who could do it? No one could have had as much cause as I had. It must have been some one who followed him down from London."

"Very likely. But, Dora——"

"Well?"

"Do you remember that there will have to be an inquest, and that involves inquiry into a lot of his life?"

"Beryl, remember you have promised not to say one word of what I told you. I know you are true as steel, but I can't help remembering that had I only held my tongue a few days longer I need never have let any one know my secret. Well, it is over now—the person I feared is dead."

"How about his sister?"

"She is abroad. She made England too hot to hold her, and went off hurriedly. She may come back, but she has now no real hold over me. I should defy her!"

"There you would be right," said Beryl.

"How strange that he should have gone to the hollow again!" said Dora. "That is where I was to have met him that afternoon you would not leave me."

"Yes, I used to love that spot. Now I shall never go near it again, for I should always see the trampled grass and the dark figure lying where the bank and water met."

"Don't!" said Dora, with a shudder. "It is too terrible! I wonder if the police suspect any one?"

CHAPTER V.

The police did indeed suspect some one of the murder of James Richardson, but there was such a tremendous element of uncertainty about the whole affair that they scarcely knew how to give form to their suspicions. Besides, they were not in agreement amongst themselves, for Groves, the detective, entirely disagreed with the theory which had been propounded by Budge and adopted by his superiors.

An inquest was held as a matter of course. The Coroner conducted the inquiry in a room in the largest of the village inns, which was the only place suitable. The dead body was viewed in an outlying harness-room, which had been speedily prepared for the terrible purpose.

The first part of the proceedings dealt entirely with the already well-known facts which had attended the finding of the body and its identification. Joshua Blake was called to witness to the fact that the dead man was his lodger and that this was the second visit he had paid to Dalehurst.

"Did you find him a quiet and inoffensive member of your household?" asked the Coroner.

"Yes, sir; he was quiet enough. A bit fanciful over his talk about calling up spirits, but I never saw him angry nor quarrelsome."

A question was here interposed by one of the jury as to whether the deceased had appeared to possess money or not.

"That was as might be," said the farmer. "Sometimes he'd say, 'Farmer, I'm stone-broke; you'll have to wait a day or two, but it's coming, never fear.' And sure enough in a day or two he'd pay me up all he owed."

"Did he seem to get the money in the form of cheques or notes, or in coin?"

"I never saw aught but gold," was the answer.

"And at the time of his death was he in one of his prosperous seasons or not?"

"He owed me for a week; I was looking to get it before long."

"Do you know if his income came to him in the form of presents from any one, or was it dividend on invested money?"

"He said it was a reward for the smartest thing he had ever done. When I asked if he could put me in the way of making a bit too he only laughed and said it was the sort of thing that could not be done twice."

Further inquiries elicited that the dead man appeared to have had no settled home nor any relations, and that he never received any letters—whilst he was at Dalehurst at least. Search amongst his papers appeared to have revealed nothing.

"You know of no one bearing a grudge against this man," persisted the Coroner—"no one who was supposed to actively dislike him"?

"No one."

"Did you know of any one—any woman, I mean—who was supposed to love him? Love is as likely a motive in cases of this sort as hate. Was he keeping company, as you would say, with any girl."

"I know nothing about it," said Blake, doggedly.

(To be Continued.)

A few strong instincts and a few plain rules.—Wordsworth.

AN AMAZING CURE FOR NEURALGIA
MAGICAL RELIEF FOR HEADACHE

The Most Effective Remedy Known is "Nerviline."

The reason Nerviline is infallibly a remedy for neuralgia resides in two very remarkable properties Nerviline possesses.

The first is its wonderful power of penetrating deeply into the tissue, which enables it to reach the very source of congestion.

Nerviline possesses another and not less important action—it equalizes the circulation in the painful parts, and thus affords a sure barrier to the re-establishment of congestion.

You see the relief you get from Nerviline is permanent.

It doesn't matter whether the cause is spasm or congestion, external or internal; if it is pain—equally with its curative action upon neuralgia—Nerviline will relieve and quickly cure rheumatism, sciatica, lumbago, strains, swellings or enlarged joints, and all other muscular aches.

Nerviline is a guaranteed remedy. Get the large 50 cent family size bottle; it is far more economical than the 25 cent trial size. Sold by dealers everywhere, or direct from the Catarrhozone Co., Kingston, Canada.

ANTIQUES

The favorable reception accorded last week's notes under this heading gives encouragement for further delvings into the mysteries of the arts and crafts, which have aided the pilgrims of commerce in their progress through the world. Mystery has surrounded the origin of all inventions, but time has thrown such a bright light upon many of them that even the most complicated now give little cause for wonder or amazement.

The elasticity of the word antiques provides limitations of age to every line of construction and development. In these "rapid transit" days the first specimen of an original invention may become an antique in a few years. Some inventions have taken centuries to mature. Exhibitions in London, England, in 1905 gave examples of these extremes. "Carriages to run without horses" were exhibited of every degree of finish and usefulness, running back from the most up-to-date to the "antique" in that line of less than fifty years back, gathered from all quarters of the world for demonstrating purposes.

A couple of miles away from this exhibit the British Museum housed a specimen of the glassmaker's art (the Portland vase), twenty-odd centuries old, the construction of which had mystified the world of art and craftsmanship as no other antique had done. The mystery was solved when late nineteenth century artists and craftsmen collaborated in the production of a copy in the same material as the antique itself, and by the same process of manipulation. When the reproducers confess their ingenuity had been taxed to the utmost in the task they had undertaken, it not only speaks volumes in favor of the skill of the ancients, but illustrates in a very practical way the advantages of the preservation of antique objects and their use as the starting motifs of our great industries.

The greatest feat of the great master potter, Josiah Wedgwood, was the reproduction of this same vase in another material, an effort which paved the way for the introduction of the beautiful forms in pottery which have been such an aid in the adornment of our homes.

During the partnership of Wedgwood and Bentley, vase forms were pushed to the extremity of their markets all over the world, where the craft of cabinet-making had furnished a need for them. Possibly many of Wedgwood's forms were designed for cabinets emanating from the studios of Chippendale and his contemporaries, and we have only to look at their modelling to see where the inspiration came from. Some of Chippendale's motifs showed a decided Chinese influence, possibly arising from association with the Oriental pottery forms which held a monopoly till Bow and Chelsea, Worcester and Derby, Plymouth and Bristol, and the Staffordshire pioneers made their supreme efforts to establish a style of British pottery, and perhaps, without knowing it at the time, forcing the hand of Chippendale to push his creations towards the same objective.

Pottery making and cabinet making have always been allied industries, and collectors of antiques in both must look in the same direction for their examples.

Minard's Liniment Cures Garget in Cows.

De Lisle's Tragedy.

An affair of the youth of Rouget de Lisle, author of the "Marseillaise," is told by a French journal. In 1870, when he was about twenty years old, Rouget de Lisle, a pupil of the military school, was deeply smitten with the charms of a young girl of Courbevoie, Mlle. Camille, whose father was a captain on half pay. The betrothal was made the occasion of a family fete, in the course of which some fireworks were to be set off.

The future officer could not leave to others the care of touching off the powder. When the moment came to fire the principal piece, which showed the figure of his well beloved, he approached with a light in his hand, the guests meanwhile taking their places on a terrace opposite him. The piece was lighted, but a rocket badly directed struck the young girl on the forehead, and she died some days after in consequence of her burns.

Cornish and Squab Pie.

There are few, if any, conger eels in American waters, they are to some people a most unpleasant looking fish. Cornwall, England, esteems them highly and makes them into pie and calls the product invariably "squab pie," though all things but squabs are among the materials. "Squab pie" gave rise to the following Cornish story repeated by the writer:

"The devil came one day to the banks of the Tamar, the rippling river that divides Devon and Cornwall, and looked over at the rocky land beyond. His Majesty considered the swift current and shook his head. "No," he said, finally. "No, that's no place for me! Every one who goes there is turned into a saint and everything else into squab pie. I'm fit for neither one nor the other! And he stayed in Devon."

The publisher of the best Farmer's paper in the Maritime Provinces in writing to us states:

"I would say that I do not know of a medicine that has stood the test of time like MINARD'S LINIMENT. It has been an unfailing remedy in our household ever since I can remember, and has outlived dozens of would-be competitors and imitators."

The Man in the Iron Mask.

The Bastille, whose fall July 14, 1789, marked the birth of French liberty, was built in 1369 to defend Paris against the English. It is as a state prison, however, that the grim fortress is remembered, and chiefly on account of the mystery of one romantic prisoner, the "Man in the Iron Mask," who was "interned" there in 1679 and died in 1703. As to who the prisoner actually was scarcely two authorities agree, but among the almost innumerable "claimants" have figured the Duc de Vermandois, son of Louis XIV.; the Duc de Beaufort, a supposed son of Anne of Austria, by the Duke of Buckingham; a twin brother of Louis XIV. and Count Matthioli, secretary of state to Charles III. The last two may be termed the favorites.

GEORGIAN

ROBERT JUNOR

62 KING ST. E., HAMILTON

CORRESPONDENCE INVITED.

Two Points of View.

He had a lot of money, but no discoverable ancestors, and so it came that he affected contempt for pride of birth. And there was another man whose family tree was tall and umbrageous, but who possessed no other assets worth mentioning. A discussion between these two men was of profound interest. Each avoided hurting the other's feelings, but it was easy to detect an undercurrent of antagonism. They concluded:

"Say what you will," asserted the one, "it is a fine thing to come of good stock."

"It's a finer thing," replied the other, with finality, "to own it."

Better Than Spanking

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

The Moulding Years.

He is at rest, but teardrops still
Glisten upon his baby cheek.
I punished him—against my will;
I would not have my man-child weak
In will or purpose, but the strain
Tugs hard upon my mother heart—
The strain of striving so to train
My baby for a worthy part.

Before he slept his little hand
Reached up to pat my tear-stained face;
Then sweetly into slumberland
He wandered —in his baby grace
He lies there now, his cheek still wet
With his rebellious tears, and sighs
Escape him gently, while I yet
Kneel by the bedside where he lies.

'Tis hard and long, the mother road
That leads to vanquished ills, and strength,
Is sorely tried, and this my load
Grows heavy, and the weary length
Stretches before me, but 'tis lit
By love-lights, and oases cool
Appear betimes where I may sit
And drink sweet draughts from out love's pool.
—Flora Shufelt Rivola in Minneapolis Journal.

"Willie, did you see my new shaving brush?" "Yep. Mom is using it to paint the bird cage."—Columbia Jester.

Thick and Thin Shells.

There are several kinds of high explosive shells which have been designed for various purposes. For instance, there are the shells the case of which is very thin, so that their capacity for containing explosive may be increased. These explode instantly at the slightest contact and are used as mines, or, in other words they cause damage not by the impact of their mass but by the fierceness of the explosion. Another kind of explosive shell is made by increasing the thickness of the steel case and reducing the charge of explosive. The explosion of this missile is calculated to take place a little after contact. This type is used for the destruction of solid defences, like walls, earthen works, etc., as the thickness of the case and the slowness of explosion permit them to penetrate the fabric before exploding.—London Standard.

The Cause of Appendicitis Now Definitely Known

The commonest cause of appendicitis is constipation. Every doctor says so. When you require physic, don't use a cheap, drastic pill—get Dr. Hamilton's Pills, which are made from the private formula of one of the greatest physicians. Dr. Hamilton's Pills strengthen the stomach, regulate the bowels and prevent any tendency to appendicitis. In one day you feel the tremendous benefit of Dr. Hamilton's Pills. By purifying the blood and cleansing the system they prevent headaches, lift depression and drive away weariness. No medicine so successful as Dr. Hamilton's Pills. Sold everywhere in 25c boxes, with yellow cover; get the genuine.

How to Treat a Rifle Wound.

In the case of a wound from a rifle bullet don't go probing for the bullet, but remove from the surface of the wound all shreds of clothing and other matter which the bullet may have carried into the flesh. This must be removed very thoroughly, and a sterilized knife or scissors should be used freely to open the wound and get it clean. When this is done treat the wound with your iodine or bichloride solution. Then dress it with gauze and bandage.

In the case of wounds from small shot the wound should be washed with a solution of alum, and then pieces of gauze or clean cloth wrung out of hot water should be applied every couple of hours.—Outing.

A WONDERFUL MEDICINE FOR CHILDREN

Mrs. Geo. Huffman, Willington, Ont., writes: "I have used Baby's Own Tablets and can recommend them as a wonderful medicine for children. I am the mother of five and have used no other medicine for any of them." Thousands of other mothers say the same thing of the Tablets. That is why once a mother has used them for her little ones she would use nothing else. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

A Momento.

A merchant who had been traveling some months was on his return informed of the death of a valued friend. A few days later he called upon the bereaved widow to offer expressions of sympathy. During the visit he remarked:

"I was a good friend of your late husband. Is there not something of his which I could have as a momento of him?"

She raised to his her velvety eyes, which a few moments before were moist with tears, and said: "How would I do?"

No Dum-Dum Bullets.

The United States is the only nation now remaining outside the operation of the declaration barring the use of dum-dum bullets. These bullets are not used, however, in the United States army. Great Britain, having at first refused to sign the convention, and reserving the right to use dum-dum bullets "only against uncivilized peoples," acceded to the declaration at the Second Hague Conference, in 1907. Dum-dum bullets were used in 1895, but not in the Boer War. Great Britain, under whose authority they were first manufactured at the Dum-dum Arsenal in Bengal, India, urged the right to use them in warfare with "uncivilized peoples" because ordinary clean-bot bullets did not secure "sufficient stopping power" in fighting with fanatic tribes.

Minard's Liniment Cures Colds, Etc.

A Disguised Compliment.

Sir Alexander Mackenzie, the eminent musical composer, while traveling in Canada some time ago, had an amusing and remarkable experience. Suddenly his train pulled up at a little way side station, and he and the other passengers were told that something was wrong on the line and that they must wait at least nine hours.

"Nine hours in this hole of a place!" exclaimed Sir Alexander. "Away from all civilization! How I hate its very name. What is that name, by the way?"

Putting his head out of the carriage window he saw on a board in front of him the name of the despised station in large letters. It was "Mackenzie!"

Is Your House a Home—or is it a collection of brick walls, carpets, chairs and tapestries? Make it a home by serving for breakfast Shredded Wheat, the food of health and strength. Being ready-cooked it is so easy to prepare a delicious meal with Shredded Wheat in a few minutes. Contains all the goodness of the whole wheat—better than porridges for children or grown-ups. Ingenious Air Bombs.

Bombs thrown from the air are u ally exploded by contact. With t Martin Hale bomb, designed specia to be dropped from aeroplanes, the is a "safety pin" which renders t bomb harmless until it has been withdrawn and until a fall of about 20 feet through the air has caused the propeller to rotate and release the firing mechanism. All destructive ex plosives cause damage by the actua shock of the explosion—that is, by th disturbance in the air created by t expansion of the contents o by the fragments of the bullets which it contains directions, by the fumes be given off an explosion may have a stupefying or on people in the vicinity falling of bricks and mortar by the bombs.—London Mail.

Beautifies While You Sleep

Before retiring, bathe the face and neck with hot water, then dry and rub "USIT" into the skin with the finger tips. By persistent treatment you will soon restore to your complexion the wonderful freshness and beauty of youth. Make this treatment a nightly habit and "USIT" will beautify you while you sleep.

"USIT" is a skin food and wrinkle chaser. It builds up firm elastic tissues, removes wrinkles, fills out depressions and gives the skin a wonderful smoothness and fineness of texture which alone indicates perfect skin health.

"USIT" is put up in handsome opal bottles, and until the Drug Stores in Canada are completely stocked we are filling mail orders. Accept no substitute.

Send 50 Cents to-day for trial bottle, sufficient for six weeks' use. We pay postage to any address in Canada. Usit Manufacturing Co., Ltd., 476 Roncesvalles avenue, Toronto.

What, Indeed!

"Look here," said the head of the firm, addressing the new stenographer "this letter is all wrong. Your punctuation is very bad and your spelling is worse. I can't afford to send out any such stuff to my clients." "Well," she replied, "I'm sorry if my work doesn't suit you, but was you expecting to get a Mrs. Noah H. Webster for $12 a week?"

WINTER.

Over the meadow the cold winds a blowing,
Over the river the ice-sheet has sprea
And only the rapids are loud in the flowing
While all the gay music of summ has fled.

Over the grave of his children is bendi
The gray forest tree, standing cha less and lone,
And silently down from the heavens descending
The snowflakes, sad ghost of the day that's gone.

Sad by the river the willow is sighing,
White as the snow is the sycamore tr
Over the landscape the old year is d
I hear in the distance the moan of t

And is this the end, then, of loving
And is this the end of earth's beau
Ah no!
Beauty is deathless and heaven fo
Summer is sleeping down under

Summer and happiness sleep there gether.
Winter and sorrow are brief in
Soon will the roses bloom out heather
And earth will rejoice in its b

When cleaning the porcelain bat tub or wash basins throw a handle of coarse salt in the tub or basin be fore pouring in the gasoline or turpen tine, and all the sediment will be easily removed.

ELLA'S RECOMPENSE

"Of course," replied Ella, round whose lips an irrepressible smile was playing; "but if I can be of any use to you, it will be a case of the mouse and the lion; you have everything, and I——"

"Everything!" interrupted Mrs. Vereker, with a little scream and a culatory movement. "Why, I lost everything when I lost the general. I am the most desolate creature in the world! I don't care for my food, or for seeing anything or anyone, or reading; nothing except just to see the price of st-o-ocks!" sobbing. "The Queen never felt more for Prince Albert than I do about my darling! I enjoy nothing; and now the only bit of comfort I have is taken from me!"

"How is that?" asked Ella, her eyes expressing genuine sympathy.

"My maid will not come abroad with me—ungrateful, worthless creature! I have had her ever since the dear general's death, nearly two years; she has such a comfort; she made all these things," touching her wide-hemmed white muslin collar and cuffs, "and she sewed on all my strings and buttons, and walked about the shops and places (I have no courage to go alone)—did everything, in short; besides, she spoke a little French, and could take my tickets, and look after my luggage; she was quite a courier maid."

"And why does she object to the continent, if she is used to it?"

"Oh, she says her mother is ill; but I don't believe a word of it. Why should she be ill just now, when I want Harriet so much? And I have been so good to her! she led quite the life of a lady, travelling with me first class—always a nice room next mine (I don't like her far from me), and heaps of nice clothes—for mine are quite good when I leave them off—never had to buy anything, and thirty pounds a year. Indeed, I offered more, and nothing will tempt her; it's too bad, too bad!"

"It is indeed," rather absently, for Ella was thinking diligently.

"Then, I have seen such a dreadful set of people who answered my advertisement! I want some one who would be kind and thoughtful, and not take advantage of my lonely, friendless state (I was always too much wrapped up in the dear general to care about having friends). Sometimes I feel afraid of people in an odd way. You [illegible]'t happen to know of a suitable [illegible]n, Ella? She should have thirty [illegible] a year, and everything just [illegible]yself, only that she eats at the [illegible]s' table. I should be so thank[illegible] find some one"

"[illegible]ll inquire, Mrs. Vereker; but I [illegible]d it is not easy to find exact[illegible] you want."

"I know it isn't, and so does that horrid, heartless Harriet; yet she leaves me!" a tragic pause. "By the way, don't call me Mrs. Vereker—It sounds as if I were a hundred; say Cousin Fanny."

"Certainly, as you wish it."

"And you'll try, like a dear girl, to find me a nice maid? Perhaps the school mistress you talked about might know of one. They are always hearing of some one who wants employment."

"I will ask her." A pause.

"You see," resumed Mrs. Vereker, "I want to start for Friedrichstadt next week. I know Italy and Paris, but I have never been in Germany. It is much cheaper in Germany than in France. Some very nice people, old Indian acquaintances of mine, Sir John and Lady Browne, are staying at Friedrichstadt, and they are so fond of me."

"Mrs.—I mean Cousin Fanny," said Ella Marston suddenly, and coloring a little, while a gleam of fun sparkled in her eyes. "I think I know some one who might suit you, and would rather like acting as courier maid."

"Do you really? Oh, pray send her to me. Who is it?"

"Myself."

"You! Oh, you are joking! It is too bad of you!"

"No, Cousin Fanny, I am not joking; I am quite in earnest. I want nothing more than you give your maid. Only I should not agree to dine at the servants' table."

"But can you do needlework? and would you mend my things and do my hair? and oh, I am afraid it would never answer, and then your board would be much more expensive than Harriet's, though, to be sure she always wanted a quantity of beer."

"I should want no beer, nor should I require wages. Of course I should be more like a companion, but I would do everything for you a maid could, even to accepting your cast-off clothes, which would be very useful. I want to travel—I want a rest—before I begin to teach again; and I do not want to spend any money. What do you say to trying me for six months?"

"Do you know, I really think I will, especially as it may be a benefit to you. I will try you for your poor dear mother's sake. Of course, being unaccustomed to the duties of a professed maid, you could not expect any wages; and that may make up partly, only partly, remember, for the difference in board. Can you speak German?"

"No, I can read it a little. By the way, I shall ask you to let me have a couple of hours in the day to study it. French and English will take one all over the continent, now, I imagine."

"Well, my dear Ella, I think you might do, and in the course of six months I should surely find a nice real maid."

"I hope so, for at the end of six months I should want to earn some money again."

"Oh, it is time enough to think about that; and Ella, could you start with me this day week?"

"I think I could. Our holidays begin first of August, and this day week will be the thirteenth. I must arrange for Kitty. I think I can. There is a friend of mine who was at the school as pupil-teacher; she married a rich farmer. I think I will ask her to invite Kitty."

"Well, of course you may settle that as you can, but you must come and help me to pack, and we may as well look over all my clothes now, that you may understand how they are kept and managed. That odious Harriet went away the day before yesterday, and I have been so uncomfortable ever since."

"Very well; but pray let me write a note to my friend Mrs. Heath about Kitty, so as to get her answer before I go."

An interesting hour ensued, and then Ella Marston was dismissed. "I really think you may be a comfort to me, Ella. Perhaps, as you will be in a way in my service, you had better call me 'Mrs. Vereker,' and you need not say you are a relation."

"Very well, Mrs. Vereker," with a smile.

"What are you smiling at? Now I must let you go, Ella; you see, as I am 'en pension' here (it is a very select boarding-house), I cannot ask you to luncheon. Can you come out with me to-morrow afternoon?"

"I am afraid not, Mrs. Vereker. I have still some work at the school, and my own things to prepare, but I will be with you on Monday, and pack up."

"It can not be helped, I suppose. Mind you do not bring much luggage; luggage costs so much abroad!"

CHAPTER II.

A sharp sudden thunder-storm had rolled up from the mountain north-east of the picturesque old city of Friedrichstadt, one of those old residency towns which have been the nucleus of light cultivation throughout the darker, harder days of Germany.

The fine river, that sweeps in a wide curve past the gray walls, was lashed by the fierce, wild gusts into foaming waves, tossing the little steamer, which was making for the quay, up and down like a cork.

The gaily-painted boat plied to and fro the town and the villages which nestle between the river and the pine-clad hills, where holiday-making citizens were wont to seek refuge from the summer heat.

Several men in blouses, with the round, flat caps Germans so generally affect, were congregated to assist in disembarking the passengers and their luggage, and a row of carriages, covered and uncovered, were drawn up for shelter close to the wall which towered over the landing-place.

The worst of the storm was over, but the rain still fell heavily as the passengers came forth from the saloon which occupied the after part of the little vessel, hastily wrapped in whatever light coverings they had provided at the outset of a remarkably fine morning.

Two ladies among the voyagers were unmistakably English.

"These dust-cloaks are no protection whatever against such rain," said the shorter of the two. "I do wish we had started yesterday; I wish you and that stupid Captain Reichenberg had not persuaded me to stay for the picnic."

"I persuade you! why, I did not want to go myself," cried her companion.

It is hardly necessary to say that the speakers were Mrs. Vereker and Ella Marston, whom we left two months ago in London.

"Have you a couple of groschen?" asked Ella the next moment, examining her purse.

"I don't think I have, and I cannot very well get at my pocket; you ought to have provided yourself with groschen before we started; a proper courier maid ought to think of everything and not trouble her mistress." A little sting of spite lay in the assumed playfulness. "And do try, Ella, to check that horrid habit you have of perpetually contradicting—my poor darling never could bear to be contradicted, nor can I! Oh dear! what a bump!" as she was thrown against the slight figure of her companion. "These Germans are such clumsy, awkward creatures, they can't do anything properly."

"Take care," said Ella, in a low tone, "most of the people about us understand English."

"Oh, never mind. Do go on and try to secure a cab; see, they are rushing to catch them: there will not be one left if you don't make haste."

Ella made no reply, but with some difficulty disengaged herself from the crowd, and reaching the side of the steamer as it touched the quay, spoke to one of the porters waiting there. He immediately ran to engage a covered droschky, and returned to take Mrs. Vereker's luggage.

"Really that was well done, Ella," said Mrs. Vereker. "I shall make something of you at last," she added, with a giggle. "Oh! that man caught my veil, and nearly dragged my head off."

"You ought not to wear that long veil traveling, Mrs. Vereker."

"But I must, you know. I must. I wouldn't be wanting in respect to my darling for any amount of money. Have you my bag, and the camp-stool?"

In a few minutes they were within the shelter of a close carriage, their luggage secured, and on their way to the pension where Mrs. Vereker had engaged rooms. "What did you give the porter?" she asked.

"Two groschen."

"I thought I caught sight of silver."

"If you did, Mrs. Vereker, that was my affair."

"Well, a fool and his money are soon parted. How dull and miserable this place looks! I am glad I did not take the rooms for longer than a week. I will not stay here longer than a week." Ella made no reply; she felt tired, and damp, and despondent. Mrs. Vereker did not improve on acquaintance. Her service was no sinecure. It was with the utmost difficulty that Ella could steal the two hours she had stipulated for, in which to study German, and this chiefly by rising very early. The governess of an American family in the same hotel gave her friendly help and afforded her some congenial society.

Once Mrs. Vereker was afoot, there was no more rest for her companion. She wanted her dresses looked over, her accounts added up, an estimate of what this journey or that expedition would cost, messages carried and shopping done. As soon as Ella had settled to work or writing, Mrs. Vereker would start up and exclaim, "Oh, we must not be lazy"; or "We must not waste this beautiful day in the house; put your hat on, Ella, and let us go out."

Then she was subject to unaccountable fits of huffiness, when she would hint at Ella's extravagance and "airs" and indifference to her employer's interest and comfort, and make little stupid, stinging speeches, always drawing in her horns with abject cowardice whenever her young cousin asked straightforwardly what she meant.

On reaching Friedrichstadt nearly two months before, Mrs. Vereker found her friends Sir John, Lady, and Miss Browne had gone to travel during the warm weather; and, as the town seemed deserted, Mrs. Vereker followed the multitude, and passed the succeeding weeks in visiting various places of interest in the surrounding country, and in a somewhat prolonged stay at a celebrated hotel, picturesquely situated, about a day's journey up the river, a favorite resort of foreigners and natives, with which she was at first delighted, because she received a good deal of attention, notably from a certain Herr von Reichenberg, an officer of the grand duke's cavalry—a big, fair, overpowering kind of young man who was anxious to learn English.

Latterly he had shown a reprehensible desire to hear Ella's English.

Besides this, a Frau Grafin, of unusual curiosity even for a German, had expressed her admiration of Mrs. Vereker's "Fraulein Tochter" meaning Ella — two circumstances which changed the aspect of Konigsruhe considerably. Moreover, Ella was once so heartless, so unsympathetic, so regardless of proper respect to her, a broken-hearted widow, as to sit down at Baron Reichenberg's request, and play waltzes in the grand salon while the rest of the company danced.

This was the finishing stroke. Mrs. Vereker wished to depart at daybreak next day. The Grafin, however, expressed a desire to present her to her dear friend the princess Katchekowsoff, who was expected to join a picnic organized by the Grafin. Herr von Reichenberg exerted his eloquence, and Mrs. Vereker yielded, as has been seen.

A short drive (for Friedrichstadt is not a big place) through a fine old orchard, which had been a fortified gate, up a steep, evil-smelling street, past a large church, surmounted with a-massive dome, and across a quaint, old market place, surrounded by huge lofty houses, their steep red-brown roofs pierced with small eye-like windows, and so to the English quarter, where more light and air penetrated.

At last the slow, heavy-footed horse stopped at a wide doorway, which showed black in the gathering shades of evening. "Now, are you sure this is Frau Gudscher's?" screamed Mrs. Vereker. "Do you speak to him, Ella! What is the use of you wearing yourself out over those lesson-books if you cannot help me with a word or two?"

"It is right. Don't you see the number, five?"

"Well, make him ring the bell, will you? I am so tired, and just dying for a cup of tea."

"He has rung, Mrs. Vereker, and here is a servant and the Hausmann to help with the luggage."

"Thank goodness! I will just go on upstairs and order tea. Be sure you don't leave anything behind, and don't give the coachman double what he ought to have!"

The neat little Madchen, with her white bib-apron, bid them welcome with kindly, homely politeness, and lamented the bad weather on their account. Having collected all their belongings, Ella followed her up to the apartments prepared for them. There she found Mrs. Vereker in conference with the lady of the house, and restored to equanimity because she addressed her in French, which language Mrs. Vereker piqued herself on speaking with remarkable fluency and correctness. "This is my demoiselle de compagnie," she said, as Ella set down her various parcels. "She acts as my courier, for I cannot pick up German, it is so rough and uncouth compared to French."

"Nevertheless, we would not change it," returned Frau Gudscher, in reply to this polite speech. She was too much accustomed to the vagaries of her numerous and ever-varying inmates to be easily ruffled. "Will you not descend to the salle-a-manger? Supper is not yet begun, and you will eat more comfortably with the rest." This proposition was accepted, and, having demanded hot water, the fair widow proceeded to make an elaborate toilet—of course demanding every article of adornment that had been stowed away in the most inaccessible places.

"I shall be as quick as possible," Ella said, when Mrs. Vereker was finished, "but do pray wait for me; the house is full, and I do not like to go in quite alone."

"Dear me! how modest we have grown all at once! Well, don't be long. I will read my letters while I wait. I see there are several. Oh, by the bye, here is one for you."

"Oh, thank you! It is from Miss Griffin. I dare say there is one inside from Kitty," cried Ella, her eyes sparkling.

"Do not waste your time reading them now. Do be quick."

Ella returned before Mrs. Vereker had quite finished her letters, which seemed to have been agreeable, for she looked up with an unusually bright smile. Mrs. Vereker could smile very pleasantly. Moreover, her front teeth were in wonderful preservation. "I have such a curious piece of news here, but must not stop to tell you now"; and she rose. "The bell has rung."

Patroness and protege descended together to the dining-room, where Mrs. Vereker's good humor was further strengthened by the distinguished reception which awaited her. The Brownes had returned from their wanderings and were established at the Pension Gudscher for the winter. By the ordinary rule of pension law, the new-comers ought to have taken the lowest places, but Sir John rose, napkin in hand, to welcome the fair widow with effusion. "I think, madame, you must allow us to make room for Mrs. Vedeker up here." Frau Gudscher was complaisant, so Mrs. Vereker was promoted to the top of the table, and Ella took her place near the foot, between a severe angular, much-travelled, unprotected female, and a mild, amiable-looking spectacled curate, who was doing Friedrichstadt as thoroughly as a short holiday would permit.

But Ella did not much care where she sat, for a hasty glance at her letters told her all was well; that the erratic Kitty had returned to school in renewed health and spirits, and that the worthy Miss Griffin missed her former governess greatly.

Ella was, therefore, elate, and ready to respond to any attempts at conversation on the part of her neighbors. The curate bestowed much of his lately-acquired information upon her. The experienced traveler, by a few well put queries, elicited the depth of her ignorance concerning continental matters.

(To be Continued.)

SUNDAY SCHOOL LESSON

Lesson V., January 30, 1916.

The Lame Man Leaping.—Acts 3. 1-26. Print 3. 1-12.

Commentary.—I. The lame man healed (vs. 1-8). 1. Now—This word is used rather as introducing the narrative than as expressive of time. We have no means of knowing how long after the day of Pentecost it was. It is likely that it was but a few weeks at most. Peter and John—These were two close friends and fellow workers. Peter was perhaps the oldest of the apostles and John the youngest. The were opposites in disposition, but they worked together harmoniously and successfully. Went up—The temple was built upon the hill Moriah, hence the propriety of saying that the apostles "went up" to the temple. They were going up when the lame man saw them. At the hour of prayer—The Jews observed three hours of prayer during the day. These were the third hour, or nine o'clock, the sixth hour, or noon, and the ninth hour or three o'clock. David had this order in mind when he said, "Evening, and morning, and at noon, will I pray, and cry aloud: and he shall hear my voice" (Psa. 55. 17). The apostles observed these Jewish forms, for they fitted well into the new dispensation of grace. Waiting upon the Lord in prayer, in meditation and in the study of the scriptures is a sure means of growth in grace. The apostles had been trained in the great school of prayer. They knew about the praying of John the Baptist and his disciples. At their request Jesus gave them what we call the Lord's Prayer. They had heard Jesus teaching by parables the duty of prayer and its efficacy. Above all, they had the personal example and object-lesson of Jesus at prayer.

2. A certain man—This man had been a cripple from his birth. He had never walked and hence his case was generally acknowledged to be hopeless. Was carried—Being unable to help himself, his friends carried him daily to his accustomed place at the temple gate. Called Beautiful—The gateways of the temple gave admission to the inner court from the court of the Gentiles and the court of the women; there were three on the north and the same number on the south, but the Beautiful gate, meant in this verse, was probably the gate on the east which led from the court of the women. The other gates, Josephus says, were overlaid with gold and silver, but this one was "made of Corinthian bronze, and much surpassed in worth those enriched with silver and gold."—Cam. Bib. to ask alms—It was a common sight then, as also now, to see beggars stationed at the entrances of places of worship to ask for gifts from those who passed by. The poor were not provided for then as they now are by Christian benevolence and public charitable institutions. Of them that entered into the temple—Those who gave attention to religious matters were naturally supposed to be compassionate and liberal toward the poor. 3. About to go into the temple—The two apostles were on their way to the place that was prominently set apart for prayer and worship. Asked an alms—The beseeching tones of beggars in Jerusalem is characteristic. They ask pleading and persistently. Their entreaties are not wholly in vain, but they eke out only a wretched existence.

4. fastening his eyes upon him—Peter and John both gave attention to the lame man's condition and plan. The Spirit was guiding them in the course they were taking. look on us—Peter's words were intended to gain the attention of the lame man and bring him into such an attitude of mind and heart that he could receive what the Lord was really to bestow. 5. gave heed unto them—Instead of asking one after another of those who were passing by for alms, he gave attention to what Peter said, but he expected to receive money only. 6. silver and gold have I none — The apostles of Jesus were promised no earthly wealth. Peter and John had no money to give to the cripple. such as I have—What Peter had to give was only what God would bestow through him. In the name of Jesus Christ—name is here used for the power and all the other attributes of Jesus. of Nazareth—Nazareth was a term of reproach which had been connected with the name Jesus by his enemies. rise up and walk—"Walk."—R. V. It required faith on the part of Peter to give this order to the man forty years old (Acts 4: 22) who had been lame from birth. With the Lord, however, there are no incurable cases. The exercise of divine power was needed, and Peter, recognizing this fact, showed that he fully believed in the ability and willingness of Jesus to do the work.

7. took him by the right hand—The narrative gives the details of this miracle. Peter had faith that the Lord would heal the lame man. He would encourage the cripple's faith by reaching out his hand to him. immediately—There was no delay and no straining to exercise faith. The cure was wrought instantly. feet and ankle bones—The words in the original are found nowhere else in the New Testament. They are of a technical character, and their use, together with the other features of exact description of the cripple's case, indicate that we have before us the language of the physician (Col. 4:14). received strength—Not only was the cause of the lameness removed, but the feet and ankles, which must have been weak through constant disuse, became strong. 8. stood—He had never leaped up and stood before, yet there was no uncertainty and no hesitation. walked—he at once had the strength and skill to walk. entered with them into the temple—it was the best possible use he could make of his newly acquired power, to go to the place of prayer and worship. As a cripple he had remained outside the beautiful gate, but being healed he went inside. walking and leaping, and praising God—He used his strength to the glory of God. It was his first impulse to praise the Lord and he used his healed limbs and his voice to do it.

II. The people amazed (vs. 9-11). 9. all the people saw him—The act was publicly performed and the proof of the genuineness of the cure was before the people's eyes. The man was giving the praise of his cure to God and not to the apostles. 10. they knew that it was he—The man had been in his accustomed place for a long time and had become a familiar character to those who frequented the temple courts. filled with wonder and amazement—Such a display of supernatural power might well excite the wonder of those who saw what was done for the lame man. 11. held Peter and John—It was natural for the cured and rejoicing man to cling to the apostles, for they had been instrumental in his healing. all people ran together unto them—The report of the cure spread rapidly, and, naturally, the crowds wished to see the man himself, and the apostles. In the porch that is called Solomon's—This was a large porch on the eastern side of the temple, and frequently used as a place of assembly.

III. Peter's discourse (vs. 12-26). 12. when Peter saw it—The people had come together and were all interested in what had been done. The miracle was wrought not alone for the sake of the afflicted man, but also for the sake of the people. Peter now had both a congregation and a subject for discourse. answered—There is no record that the people had asked him a question. There was a question in their minds. ye men of Israel—Peter addressed them in a most respectful manner. why look ye so earnestly on us—The people were regarding Peter and John of supernatural powers. our own power or holiness—Peter and John together with many others had received spiritual power and purity at Pentecost, but it was not what they had that wrought the miracle on the lame man 13-26. In his discourse Peter made it plain that it was the power of Jesus that accomplished the work. He charged them with Christ's death and showed them from the scriptures that he was the Messiah. He called upon them to repent with the assurance that their sins would be bloted out. It required no small degree of boldness on the part of the apostles to stand before such an assembly and tell the truth that needed courage, and men of God have ever had their example to inspire them in their work.

Questions.—Who were Peter and John? Why were they together? What hours were set apart daily by the Jews for prayer? Where was the gate Beautiful? When was the lame man healed? Describe the healing. How were the people affected? Who addressed them? Where? Who did he say had healed the man? How was the healing brought about? Give an outline of Peter's discourse. To whom was the gospel first sent and how was it received?

PRACTICAL SURVEY.

Topic.—The First Apostolic Miracle.

I. Exhibited active Christianity.

II. Called forth emphatic testimony.

I. Exhibited active Christianity. The reverence of Peter and John for sacred places was marked. They were not so transported by special ecstacies as to forget their daily and customary engagements with God. To their devout soul, history and sacred associations meant much. For Peter, Solomon's porch must have had special memories beyond the patriotic ideas that were linked with it. It was therefore in conversation with the Jews that Jesus had claimed an equality with the Father, which led them to make an attempt on his life. "Peter and John went up together into the temple." We can hardly imagine the introduction to any great truth told with greater simplicity than this, and yet these words lead up to the consideration of a truth comprehensive of the whole scope of practical Christianity. History shows nothing grander than the first two appearances of Peter before two such audiences. Peter walked through the streets of Jerusalem, on that memorable day, an unobserved and undistinguished man, yet he possessed a hidden power within, which made him really greater than all the rulers of his nation. The contrast was equally striking between the utterly defenceless condition of Peter and John and the boldness with which they bore emphatic testimony as witnesses for Christ. It was strikingly true of the apostles, considering the place they filled, the work they wrought, the testimony they bore, the blessings they dispensed, that though they were "poor," yet they made many "rich." Their wealth consisted in the possession of a divine energy, spiritual life, social sympathy and hearts to bless those who needed benediction and assistance. They were rich in high ideals and noble sympathies. Their action showed how possible it was to be giving less than others and at the same time be giving more. They lived in the presence of God and in service of truth. Peter had the Christ of History, the Christ of his own rich experience to impart, which was infinitely more precious than all the world's material treasures. Through human means a complete work of restoration was accomplished by bringing Christ into actual touch with human needs, exalting the whole nature of man and setting him on a new course of life. The wail of misery was changed into songs of joy. The bounty of the infinite Giver outreached the hopes of him who received.

II. Calleth forth emphatic testimony. At once the remarkable event of healing attracted attention. The miracle was the occasion of Peter's testimony, both to the people and the rulers. He turned the attention of his hearers wholly away from himself and exalted Christ Jesus alone. With inspired wisdom he magnified the occasion by attaching the miracle to the omnipotence of the God about whose existence the Jews had no doubt. He gave the sublime explanation of all recovery, progress, abiding strength and comfort as the direct appeal of the Spirit of God to the conscience and heart of man. Having gone back to the God of Abraham, and having traced the history of the crucifixion, and having explained the secret by which the lame man had been healed, Peter in one supreme effort, said, "Repent," not for sentimental reasons, but on the historical ground of the ancient dealings of God with His people and because of the culmination of those dealings in the recovery of the man who stood before them. Peter urged the people to repent because they believed the prophets. They had rejected Christ and hence the necessity, according to their own beliefs, of repentance. Without repentance they must be excluded from the people of God. Peter proved to the people that there stood against them an account by which they were bound, and that account could not be canceled except through repentance. A great, saving change, involving confession of sin and entirely new relations with God, Peter set forth as indispensably necessary and which marked the starting-point of spiritual life. Peter's hearers were made to see that salvation through the death of Jesus was not a new doctrine invented by his disciples. T. R. A.

If the deaf mute talks with his hands, does he drown his sorrow in a finger bowl?

British Navy and Its Work

(Archibald Hurd in British Exchange.)

There was an interval of ten years—no less—between Trafalgar and Waterloo, and a French man declared that Nelson won the victory on land as well as that on sea; we gained what may prove to be our Trafalgar on Aug. 3 of last year, and some people are impatient because peace has not already "broken out"—to borrow the apt phrase of a friend, for peace will present problems certainly not less embarrassing and far more complicated than those of war.

I am convinced that sea power is going to be the deciding factor in this struggle, even though the Kaiser enters Constantinople in state and becomes ruler of Turkey. Sea power is a plant of slow growth; it takes at least thirty years for the most virile and maritime country to create a fleet; it is, also, slow in operation, but it is sure. It will prove far more rapid in its working than it did a century ago, if everyone amongst us realizes the peculiar dangers which reside in our practically undisputed control of the sea communications of the world.

Everyone recognizes the character of the constriction from which Germany is suffering increasingly from week to week; there is a less general recognition of the influence which our very success on the seas is having upon our hopes of an early victory.

THE POSITION OF OUR ENEMIES.

The position is unique. We have not only declared a "so-called blockade" of Germany and her partners, but we have shut up all that remains of their mercantile marines. That means that the enemies cannot trade in their own ships or in vessels under other flags. It is a tremendous handicap, to which in the past no group of nations has had to submit to the same extent.

The running charges of the hundreds of vessels which are in German, Austrian, or neutral ports—the effort to keep them efficient—are not less than £2,000,000 a month at the lowest estimate. It is a matter of all outgoings and no incomings. It is as impossible to reach any computation of the profits which nominally these two nations draw from their mercantile marines, as it is to reach any conclusion at present as to the ultimate effect of the stoppage of the overseas commerce of these peoples which in 1913 must have amounted in the aggregate to over £1,400,000,000.

Germany, Austria-Hungary, and Bulgaria constitute an economic unit beleaguered by the British fleet, in association with the naval forces of all Allies. Whatever the character of the trading, which may be taking place between one country and another within the maritime ring, for the time being they are isolated from the world and from the world's raw materials and manufactures.

ECONOMIC PRESSURE.

It is impossible to tell when the result of this economic pressure will become so overwhelming as to make further resistance impossible. But in the meantime let us recognize that while our sea power is serving our purposes, it is at the same time serving those of the enemy Governments, because it is making economy on the part of civilians in the consumption of all kinds of goods—necessaries as well as luxuries—not a matter of choice, but of necessity. To that extent, for the moment, but only for the moment, the several Administrations on the other side of the North Sea are gaining some advantage from our "so-called blockade"; but it is outweighed even to-day by the disadvantages—the shortage of all descriptions of raw materials both for sustaining life in comfort, for industry, and for the purpose of war.

Let us face the solid fact that until the economic crisis comes the Government of Germany and those of the peoples she has duped are benefiting economically while the civil population, which is "under the harrow," is heartened by cheering "films" of the war, and is reminded that their sufferings will be amply rewarded in the days to come. We know better, but let us not fail to recognize that the present construction is not all loss to the enemies; it prevents the dissipation of wealth in imports during the period when in any circumstances, owing to the withdrawal of so much labor, there would not be much to export by way of payment.

That is one picture. How are we faring? We are reaping all the advantages which command of the sea confers. Large sections of the community—particularly those who are drawing war wages—are living "like fighting xales," as the saying goes. Tens of thousands of them, either directly or indirectly, are engaged on work which in one sense is the most productive they could do and in another the most unproductive. They are making things which will be destroyed in the struggle on which our whole future depends. But they are not producing wealth; they are not producing their own wages, for these are being found out of the nation's accumulated wealth, which cannot readily be realized.

THE DANGER AHEAD.

Consequently our exports are falling off to a serious extent and our imports are rising also to a serious extent. In the past ten months the value of the goods we bought exceeded that of the goods we sold by £313,000,000. That statement illustrates the extent to which we are abusing the freedom which sea power has given us. How does the man or woman who is living as though there was no war imagine that huge sum is to be paid at a moment when we are probably producing less wealth than at any period in the lifetime of the present generation? A great loan has been placed in the United States; a credit of £10,000,000 has also been opened. There is talk of the Government getting control of securities of insurance corporations and private individuals for use in adjusting the balance; and the amount of gold in the Bank of England has decreased from over £72,000,000 to £52,000,000. These are palliatives. How does the working man who is earning high wages, and spending them, imagine payment is to be made for all the things which are coming into this country? Where is the gold to come from?

We cannot go on abusing the privileges which the fleet has conferred on us unless we are to face national bankruptcy. It would have been all right—or much nearer right—if we had not become a great military power. Every nation has only so much energy, and the more it employs on the sea and at the front, the less it has for industry. Our industrial army is shrinking and our fighting armies are increasing. Day by day we are producing less for export and we are adding to our imports.

Such is the danger which confronts us owing to the very success which the navy has achieved. We won the last great war by our finance and industry, and in the ultimate issue of the present struggle those two factors will exercise an even more decisive influence. Victory will go to the group of powers which best preserve their economic health, and if we and our allies exercise restraint in the use we make of the sea, we can beat the best organized and best co-ordinated nation which ever existed. The hope of our triumph lies in the wisdom with which, on the sure foundation provided by the fleet, we build up our victory day by day in our homes. The individual must practise restraint, and all reasonable economy if, owing to our sea command, the nation is not to be weakened and the hour of victory postponed. We owe this in gratitude to the work of the British navy.

HONESTLY BEL[illegible]ED

HE WAS GOING INTO

CONSUMPTION.

DR. WOOD'S

Norway Pine Syrup

CURED HIM.

Mr. Frank E. Anthony, 60 Ellen Street, Winnipeg, Man., writes: "Having taken several bottles of Dr. Wood's Norway Pine Syrup, during the past few weeks, to relieve a chronic cough and general throat trouble, allow me to express my unbounded satisfaction and thanks as to its sterling qualities. A short time ago I became suddenly subject to violent coughing fits at night, and directly after rising in the morning, for about an hour, and found I was gradually losing weight. All my friends cheerfully informed me that I looked as though I were going into consumption, and I honestly believed such was the case. However, after having taken several bottles of 'Dr. Wood's' I am pleased to relate that the cough has entirely disappeared, along with all the nasty symptoms, and I have since regained the lost weight. I have no hesitation in recommending Dr. Wood's Norway Pine Syrup as a sure cure for all those troubled in a like manner."

When you ask for "Dr. Wood's" see that you get what you ask for. It is put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

CHILE'S HANGING GARDEN.

Wondrous Beauty of Santa Lucia Park, in Santiago.

Santiago, with its 400,000 of population, fifty miles inland from Valparaiso, is the capital of Chile. It lies in a great amphitheatre forty miles long and eighteen miles wide, and is inclosed by walls of lofty mountains covered white with snow. Outside of Rio de Janeiro, no capital in the world has a finer situation. Standing in the central plain, it looks out on one side over fertile fields, sloping toward the coast range, and on the other it looks up to the gigantic Cordillera 19,000 feet above it, furrowed with deep glens and covered with snowy wastes.

There are beautiful drives and parks and pleasure resorts on every hand. The Alameda Avenida Delicias, 600 feet in width, runs the entire length of the city. The finest private houses front on this wide boulevard. They are built in Spanish style with courtyards full of flowers and shrubs. The city has sixty-seven miles of electric car lines. Most of the streets are paved with asphalt. The policemen carry swords. The city has an air of law and order. A beautiful park was given to the city by Senora Isadora Cousina. It is called the Quinta Normal.

But the park of parks in Santiago is Santa Lucia. For striking and picturesque beauty it is scarcely equalled anywhere else in the world. It is a steep and rocky hill rising 500 feet right from the centre of the city. The original scanty soil has been added to by skillful gardeners until it has become an exquisite park, lifting its verdurous masses like a hanging garden right above the city. Flowers and creeping vines trail over rocks in wild profusion. Fountains glimmer in the sunshine, marbles gleam against the green. Grottoes invite you to their shade, and winding paths allure the traveller to the very summit.

Here, at the top of this green rock, a splendid vista of the city lies at your very feet. You hear the hum of traffic and the buzzing wheels of commerce, and out beyond you see a fertile plain, while on the far horizon the mighty summits of the snow-capped Andes cut their silhouettes against a sky of blue. Beautiful for situation is Santiago, unique and fortunate is its Santa Lucia Park.—Peter McQueen in National Magazine.

Junior—So you didn't propose to her, after all? Weed—No. And I'm not going to. When I got to her house I found her chasing a mouse with a broom.—Puck.

Suffered Awfully

FROM

BILIOUS HEADACHES.

When the liver becomes sluggish and inactive the bowels become constipated, the tongue becomes coated, the stomach foul and bilious headaches are the upshot.

Milburn's Laxa-Liver Pills will stimulate the sluggish liver, clean the foul-coated tongue, do away with the stomach gases and banish the disagreeable bilious headaches.

Mrs. J. C. Kidd, Sperling, B.C., writes: "I have used Milburn's Laxa-Liver Pills for bilious headaches. I suffered awfully until I started to take them. They were the only thing that ever did me any good. I never have any bilious headache any more."

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

EDITORIAL COMMENT

The boys are not coming forward as fast as the recruiting officers would like to see them. Lieut. Cronin is doing splendid work with the men who have already enlisted. They are beginning to get down to their work in good shape. However, if the 160th Bruce Battalion is to become a certainty there must be a heartier response.—Kincardine Reporter.

The Provincial Board of Health will hereafter supply free to the public through the local Board of Health, vaccines and anti-toxins of various kinds. This is done in the hope of lowering the death-rate and reducing the morbidity of communicable diseases.

+ + +

Mr. Wm. Malloy, for 26 years editor of the Stouffville Tribune, has sold the paper to Mr. F. C. Madill, B. A. We are glad to be able to say, for Mr. Madill's encouragement, that arts graduates have been known to succeed as newspaper editors. A recent instance may be noted in the case of our young friend Eedy, late of the St. Marys Journal, who is making an excellent paper of the Walkerton Telescope.—Orillia Packet.

+ + +

The committee appointed at Walkerton are not more responsible for the enlisting of men than are citizens generally. It is a mistake for anyone to imagine that those men are "buttonholing" young men to go to war. They were appointed to organize the district, and to take a census of the available men and they have done this. They are also arranging for an occasional mass meeting. The responsibility of enlisting rests with every individual. All must bear this responsibility.—Port Elgin Times.

+ + +

Do you ever stop to think what a town, any town, owes its newspapers? Do you realize how much of your town's past growth and present prosperity is due to the unceasing advocacy and advertising of its local papers? A good way to bring home to yourself what you and your business owe to your local paper, or papers, is to figure to yourself what your your town would be without them. This is one thing which some men, apparently intelligent and thoughtful in other matters, evidently never do.

+ + +

A new prophecy arising out of the war is for a paper shirt era. Apart from the question of cheapness, it is argued that paper shirts combine the qualities of warmth and hygiene. When they are soiled, they can be burned, and laundry charges avoided. Paper collars are already somewhat in vogue, and paper handkerchiefs also are procurable. People suffering from colds use the latter, further contagion being avoided by the handkerchief being destroyed after use. Cheap and effective chest-protectors also have been made out of paper. It is going much further to turn it into shirts; but, in many cases, especially in war camps, and where troops are congregated, it will make for cleanliness if shirts can be destroyed after their first use.—Orillia Packet.

+ + +

In at least three of its most important recommendations, the Government Commission on Unemployment in its report published this week, confirms policies of Mr. Rowell and the Liberals and goes against the stand taken by the Government in the House. These three points are:—the need for tax reform, the advisability of a department of Labor and the unfortunately close inter-relation between the liquor traffic and social reform. The Government in the last few sessions has repeatedly rejected proposals of the Opposition for tax reform and also for a Department of Labour. Now their own Commission recommends these reforms. Mr. Rowell for years has been emphasizing what a serious hindrance to all projects of social reform the drink traffic constituted; now this Government Commission says the same thing.

Otto Wells, of Norfolk, says the reason that all classes like motion-picture plays is that each person puts into the mouths of the silent actors the exclamations, words, and lines that he himself would use under like circumstances. Incidents and situations are flashed on the screen, but the spectator tells the unspoken story himself, and there is no possibility of artificial, strained, or incomprehensible dialogue. What the spectator imagines is the thing that is natural to him. To one who watches Hamlet with Yorick's skull, the words of the play may come—"Imperious Cæsar, dead and turn'd to clay, Might stop a hole to keep the wind away." To another's imagination, Hamlet says, "Well, we all gotta come to it." Could explanation be simpler, yet more profoundly true?

THEN AND NOW

Years ago, when the price of weekly newspapers was reduced to a dollar, there was no postage for the publisher to pay on his paper.

Wages were less than half what he has to pay now.

Paper costs more; so does ink; so does everything that goes in the make-up of the paper.

In those days he could get a dozen eggs for 10c; now he pays 35c.

He could get butter for 10c a pound: now he pays 26c.

He could buy meats of all kinds for half what he pays now.

If he wanted a "horn" he could get it for 5 cents—six for a quarter. Now he can't get it for love or money in some places and in others he pays three prices.

Everything has gone up—necessity or luxury—except the newspaper. Now it has to go up in price or go down and out.

WHO'S WHO IN THE BATTALION?

What the Ranks Are and What the Different Badges Stand For — Duties of the Officers and Non-Coms.

With recruiting in the air everywhere, and soldiers for overseas service being trained almost anywhere you go, the civilian is often at a loss to know who's who—what the ranks are and what the different badges stand for. For the benefit of those who don't know and want to, we give the information.

When the recruit enlists he signs on as Private, and his uniform is of khaki serge, the tunic fitting close at the neck and fastened by seven buttons. His greatcoat is the same, single-breasted. After he has been in for a while, if he shows ability and energy, he is promoted to the rank of Lance-Corporal, which entitles him to wear on his right sleeve a chevron or "stripe"—a V-shaped piece of braid, worn above the elbow on the tunic or on the cuff of the greatcoat, with the point turned down. His next step is to Corporal, when he can wear a double chevron, or two "stripes," worn in the same way; and promotion to the rank of Sergeant entitles him to "three stripes."

If he is especially smart and keen he will rise to be Company or Battalion Sergeant-Major—the highest rank a man can hold without a commission. His uniform remains the same, but in addition to the "stripes" he wears a crown placed above the chevrons.

Staff-Sergeants—those on Battalion Staff—are distinguished by different badges worn above the chevrons—Quartermaster-Sergeant a seven-pointed star, Pioneer-Sergeant crossed axes, Farrier-Sergeant crossed hammer and pinchers and so on. Staff-Sergeants also may wear, instead of the three bar chevron, one of four bars, worn on the cuff with the point turned up.

Between non-commissioned and commissioned rank comes "warrant rank" so called because the bearer gets his rank by warrant from the Minister of Militia—commissions coming direct from the King. The holder of warrant rank wears no chevrons—that is, a Sergeant-Major holding warrant rank will wear the crown alone on his right cuff.

Commissioned Officers

The lowest commissioned rank is that of Lieutenant: and the holder is distinguished by two stars, worn on the shoulderstraps in the Canadian militia, on the cuffs in the Imperial Army and overseas forces. The cuff is also trimmed with one band of braid around sleeve.

Promotion to the rank of Captain entitles the officer to another star on the shoulder or cuff and another band around the sleeve. If he becomes a Major he adds another band around the sleeve and discards the stars, substituting a crown. A Lieutenant-Colonel carries a star above the crown and on attaining the rank of Colonel another star is added.

Now we got up among the Generals. The Brigadier-General's badge is the crossed sword and baton; that of Major-General crossed sword and baton with star above; of Lieutenant-General crossed sword and baton with crown above; of General crossed sword and baton with star and crown above. A Field Marshall wears crossed batons mounted on wreath with crown above.

The uniform of an officer differs from that of a private or non-commissioned officer in that, besides being made of finer material—the officer has to buy it himself—the tunic has a low collar with lapels and is fastened with four buttons, and the greatcoat is double-breasted and fastened with five buttons. There are other minor differences; but these will suffice to enable them to be distinguished at a glance.

What Are Their Duties?

Now, what do all these officers and non-commissioned officers do? Take a battalion, as the unit with which we are likely to become most acquainted. It is divided, roughly, into four companies—not mentioning in the meantime the special sections, machine gun, signalling and transport. At the head of the battalion is a Lieutenant-Colonel, who is generally responsible for all matters of training and administration. He is assisted by two Majors, each of whom has charge of certain departments of the work; the senior is more directly in charge of matters of training, the junior of administration. There are other staff officers, the Adjutant, Paymaster, Medical Officer, Chaplain, Machine Gun and Signalling Officers.

The Adjutant is one of the hardest worked men in the battalion. He is the Commanding Officer's mouthpiece, looking after the transmission of all orders and keeping a watchful eye on the training of officers. He is assisted by a non-commissioned officer called the Orderly Room Sergeant or Clerk, and usually requires a staff of 3 or 4 clerks—privates—to look after the clerical work of this department. The Adjutant is supposed to be in close touch with the Commander both on and off parade. In the overseas battalions he usually has an assistant Adjutant with whom he divides his duties. The Quartermaster is another important officer, for he has charge of the equipment and feeding of the troops, their camps, billets or bivouacs; and to assist him he has a Quartermaster-Sergeant. He is what is called a non-combatant officer—that is, he does not, or least is not supposed to do any actual fighting. The Paymaster, Medical Officer and Chaplain have duties which their titles explain. The Paymaster has a Sergeant to assist him, the Medical Officer a Sergeant or Corporal. The Medical Officer does not, strictly speaking, belong to the battalion; he is a member of the Army Medical Corps, and is attached to the Battalion staff for duty. The Signalling and Machine Gun officers are in command of special sections, whose duties are clear from their names. The Paymaster, Quartermaster and Chaplain being non-combatants need not hold what is called substantive rank—that is, they do not need the special training or qualification required for the other positions.

Each company is under command of a Captain or Major, with a Captain as second in command. They are directly responsible for all matters that concern the company, its organization, equipment and training. The company is divided into four platoons, each under command of a Lieutenant, who is answerable to the company commander for the efficiency of his platoon; and over each platoon there is a Sergeant, who acts as second in command under the platoon commander. And each platoon is again divided into four sections, each under a Sergeant or Corporal, or sometimes a Lance-Corporal.

The chief non-commissioned officer in the battalion is the Battalion Sergeant-Major, who is probably, next to the Adjutant, the hardest worker in the battalion. His duties are many and varied; but generally, he has supervision over all non-commissioned officers, looks after the forming of all parades, and see that duties are being properly performed. Each company has a Company Sergeant-Major, who has similar duties within the company, and a Company Quartermaster-Sergeant, who has charge of the equipment of the men of the company.

This rough and ready outline will, we hope, enable our readers to form a somewhat better idea of the make-up and inner workings of a battalion. Somewhat similar lines are followed in the organization and handling of larger bodies, brigades, divisions and army corps.

AT THE MORNING SICK PARADE

Extract from "The Splint Record," published by No. 2 Canadian Ambulance Corps, forwarded by Major J. J. Fraser.

The M.O. saunters into the dressing station with a bored look and a cigarette. While many on the parade are sick and ailing, they are still soldiers, and an effort is made to come to attention. The stiff joints begin to creak, the lame backs to straighten up, and by the time the M. O. has reached his entrenchment they are more or less at the "stand to."

They are waiting for a command of some kind, and the "carry on" being given, they sink into attitudes that betoken hope, indifference, despair, etc.

The sergeant picks up one from the bundle of sick reports that are of every kind and description, from the official A.F.B. 256, to the back of a much used envelope. He calls out the first name—Private Smith.

M.O.: "What's the matter with you?"

Private Smith: "Sir, I've got a rash all over me."

M.O.: "Take off your shirt." Scratches B.D. on his back which is at first invisible but in a few seconds comes out in brilliant scarlet wheals. "The Rash, you've been eating too much bully beef."

Private Smith: "I haven't been eating much bully beef, lately, sir."

M.O.: "Well, you should have been. Two No. 9's. Cut out bully beef, Machonochie's, cheese, jam and tea."

Exit Tommy wondering how long he can keep up existence on a diet of biscuits.

Sergeant calls out the next name.

M.O.: "Well, what's your trouble?"

Private: "I haven't slept any for four nights."

M.O.: "You are just the man we want for night orderly. Report to the Sergt.-Major."

Third victim—.

M.O.: "What's the matter with you?"

Private: "Trench feet, sir."

M.O.: "Take off your boots. When did you wash your feet last, not since (deleted by censor). Take a bath and ask your Q.M. for a box of Walker's Foot-ease."

Enter orderly—load of wounded from the advanced. Instantly the atmosphere changes. Orderlies get boiling water, sterile instruments and dressings, an air of quiet efficiency is felt, and the dressings are done with as much care and skill as in the theatre of the best hospitals. When the wounded are made comfortable with hot bovril and cigarettes they are sent to the C.C.S. rejoicing, happy that they are at last safely wounded, with prospects of getting to Blighty. Things settle down again.

M.O.: "Next man?"

Private: "I have a sinking feeling, doctor, every time a shell comes over."

M.O.: "Sergeant, give him castor oil, an ounce, followed by lead and opium."

M.O.: "Next?"

Private: "I have a running in my ear and a sore heel."—"Anything else?" "I can't get my breath at night."—"Yes, anything else?" "Pain in my back."—"Yes, go on." "My varicose vein troubles me." The M.O. marks him down as gastritis and wonders why a medical officer at the Base who has everything from a test-tube to an X-ray apparatus, and plenty of time can pass an N. Y. D., while one at the front cannot let a man go through without a diagnosis.

The next man may say— "I'm not feeling badly, but am not up to the mark."—"You are sick and will have to go to the hospital. Get your kit." He comes back with about seven hundred and fifty pounds distributed over his anatomy and trailing his rifle.

Next man comes up: "I c-c-can't lift anything h-h-heavy with this hand, sir."—"Can you lift fifteen francs?" "Oh, y-y-yes sir."—"Well, that's all you have to do today, go and see the Paymaster."

And so it goes on. To a civilian doctor it seems a crude way. But one gets so accustomed to sizing up the situation that it becomes second nature. The only sore point with the patients is that they couldn't put one over on the M.O.

CULROSS COUNCIL

Town Hall, Teeswater, Jan. 10th 1916.

The minutes of the December meeting of 1915 were read and adopted.

Donaldson—McPherson—That Wm. Case be Chairman of the finance.—Carried.

McPherson—Donaldson—That E. G. Kuntz, Wm. Case, Jas. Donaldson, T. McPherson and John Armstrong be and are hereby appointed Road Commissioners for the year 1916, and that a By-law be introduced and passed at this session confirming their appointment.—Carried.

Donaldson—McPherson —That McKenzie and McDonald be appointed auditors for the year. They are to have their report ready for next sitting of Council and that a bye-law be introduced and passed at their meeting of Council confirming the appointment.—Carried.

Armstrong — Donaldson — That a grant of $10.00 be made to the Bruce County Hospital and $5.00 to the Sick Children's Hospital, Toronto.—Carried.

Armstrong—Donaldson —That we appoint Robt. Grant to be a member of the Board of Health and Dr. Gillies as Medical Health Officer for the Township for the year.—Carried.

McPherson—Armstrong—that Donaldson be appointed to keep the gravel road open through the winter north of Teeswater in case of snow storms.—Carried.

Donaldson— Armstrong — That at the next sitting of Council Pathmasters will be appointed, and that all parties govern themselves accordingly.—Carried.

Donaldson — Casey — That George Forsythe be paid $2 as caretaker for 1915.—Carried.

Armstrong—McPherson— That the Clerk order one copy of the Municipal World to be laid on the table at all meetings of Council.—Carried.

Case—Donaldson —That we pay to Mrs. Alfred Caslick the sum of $5 as Mr. Caslick had done some work in connection with the collection of taxes at the Council have deducted that amount from the salary of the Collector.—Carried.

Case—Donaldson—That we appoint Walter Howe as Truant Officer and that a salary of $2 a day be allowed for his services, and that a by-law be prepared and passed for that purpose at the next meeting of Council.—Carried.

McPherson—Donaldson— That we pay Teeswater Council $10 for rent for hall providing that the Clerk get the room on the south side of the hall for his office.—Carried.

FINANCE REPORT

Martin Dosman, bal. on gravelling contract	$12 95
Alph. Zettle, contract gravelling con. A	63 00
Jno. Waechter, 135 yds. gravel	13 50
Jos. Trautman, 190 yds. gravel, half share	9 40
Geo. Forsythe caretaker	2 00
Jno. Ireland, put post at embankment	3 00
Geo. Seele, services as fence viewer	2 00

McPherson—Armstrong — That the Finance report as just read be adopted and order issued on the Treasurer for payments on the accounts and that we do now adjourn to meet again on Feb. 7th at the call of the Reeve. —Carried.

CHAS. BUTTON, Clerk.

BRANT TP. COUNCIL

Jan. 10th, 1916.

The municipal council of the Township of Brant met at the Township Hall on Monday, the 10th of January, 1916. Members elect: Reeve, R. S. Nesbitt; Dep.-Reeve, A. Weir; Councillors, Messrs. Rowand, Johnston, Gregg, all present. Minutes of last meeting read and declared correct.

Johnston—Rowand—That the members of this council supervise in the various districts of this Township as hereby specified: Wm. Johnston that part of the Township west of the Saugeen river and south of and including the 6th concession; D. W. Gregg, Jr., all that part of the Township north of of the 6th concession and west of the Saugeen river; W. A. Rowand, concessions 1, 2 and 3 north and south of the Durham road, east of the Saugeen river to the townline of Bentinck; A. Weir, that portion of the Township north of including the 4th concession to the townline of Elderslie, east of the Saugeen river to and including the 20th sideroad; R. S. Nesbitt, that portion north of and including the 4th concession to the townline Elderslie, east of the 20th sideroad.—Carried.

Rowand—Weir—That the salaries of the various Township officers for the year 1916, be as follows: Clerk, $230; Treasurer, $150; Assessor, $100, to include postage; Collector, $100, to include postage; Auditors, $6 each; Medical Officer of Health, $30; Sanitary Inspector, $2.50 per day, with 10c. per mile one way for disinfecting, and $2.00 per day with 10c. per mile one way for other work inspecting included; Deputy Returning Officers, $2.50 per day while taking the poll and $1.00 for returning the ballot box to the Clerk, with 10c. per mile one way; Poll Clerks, $2 each per day; and $3 for polling booths; The Reeve, Dep.-Reeve and Councillors, $2.50 each per session with 10c per mile one way, and for Committee and other work $2 per day with 10c. per mile one way, and that the Clerk prepare a by-law confirming this resolution.—Carried.

Weir—Gregg—That Alex. Robertson and Chas. Kyle be appointed Auditors of the Treasurer's accounts with the Township for the year 1916 and that the Clerk prepare a by-law confirming this appointment.—Carried.

Gregg—Weir—That by-laws No. 78 and 79, A.D. 1916, confirming the fixing of salaries and appointment of auditors be now read the usual number of times and finally passed, and the corporate seal attached thereto.—Carried.

Weir—Johnston—That this council grant $10.00 toward the aid of Richardson family re destitution, check to be issued to C. W. Keeling of Cargill.—Carried.

Johnston—Rowand—That the Treasurer be authorized to pay Mrs. Powers $2,105, being principal and interest on note given by the corporation of Brant Township.—Carried.

Rowand—Johnston—That the clerk subscribe for 7 copies of the Municipal World, for the members of the Council, the Treasurer and Clerk.—Carried.

Weir—Johnston—That Wm. Rowand be appointed a member of the Board of Health for the year 1916.—Carried.

Rowand—Weir—That this Council hereby appoint Dr. Bricker of Cargill to the position of Medical Officer of Health for the Township of Brant, he agreeing to furnish Henry Richardson, indigent, with all necessary medical attendance.—Carried.

Johnston—Gregg—That the Clerk be instructed to advertise for an Assessor, also for tenders for all ordinary printing for the Township, applications and tenders to be placed with the Clerk before noon of the 1st day of February, 1916. The printing contract to include the sending of a printed copy of the minutes of the Brant Council to each of the following local papers in time to have them appear in each of them the same week that they appear in the paper securing the contract, viz., The Bruce Herald and Times, Walkerton Telescope, Hanover Post, Chesley Enterprise and Paisley Advocate.

Gregg—Johnston—That the Reeve and Clerk issue orders on the Treasurer for all accounts passed at this meeting of council.—Carried. Viz., as follows:

POETS' CORNER

SMILE

Like a bread without the spreadin',
  Like a puddin' without sauce,
Like a mattress without beddin',
  Like a cart without a hoss,
Like a door without a latch-string,
  Like a fence without a stile,
Like a dry and barren creek bed
  Is the face without a smile.

Like a house without a dooryard,
  Like a yard without a flower,
Like a clock without a main spring,
  That will never tell the hour;
A thing that sort o' makes yo' feel
  A hunger all the while—
Oh, the saddest thing that ever was
  Is a face without a smile!

The face of man was built for smiles,
  An thereby he is blest
Above the critters of the field,
  The birds an' all the rest;
He's just a little lower
  Than the angels in the skies,
An' the reason is that he can smile;
  Therein his glory lies!

So smile, and don't forget to smile,
  An' smile, an' smile ag'in;
'Twill help loosen up the cords o' care
  An' ease the weight o' sin;
Tw'll help you all along the way,
  And cheer you mile by mile;
And so, whatever is your lot,
  Jes' smile, an' smile, an' smile.

—National Magazine.

News About Town

Miss Addie Brant of Toronto is visiting at Mr. E. Glave's.

The Baptist Annual Meeting is being held Wednesday evening.

Miss Brown of Chesley, was a guest at the home of Mr. Patterson, on Sunday.

Will some reader kindly favor us with a copy of the Telescope of Dec. 30th.

Mr. J. B. Huether left on Monday to conduct a mercantile clearing sale at Elmira.

Mrs. Albert Batte has been visiting her daughter, Mrs Hugh Dickison, at Stratford.

Mr. John Hanmore jr. went to Rochester N. Y. to attend the funeral of a relative.

Mr. David Bell of Goderich is staying at the home of Mr. and Mrs. Henry Williams.

Capt. E. R. Clarke, accompanied by his sister, Miss Rubina, spent the week-end in Toronto.

Misses Flora and Edith Weller left on Monday for Hamilton, where they have secured positions.

Caretaker wanted for Bruce County Hospital. Applications addressed to L. C. Benton, Chairman House Committee.

John Sweeney is recovering from an attack of pleurisy which has kept him confined to his bed the past three weeks.

Messrs S. L. Clarke and R. J. Sparling of Galt, attended the funeral of the late Mrs. Henry Clark here last week.

Among the Soldier boys home over Sunday were:—Sgts. Mel Wilson and Wm. Wolfe, Ptes. Ted Wilhelm and Al. Wilton.

The Women's Institute will meet at the home of Miss S. Roether. The programme for the meeting is entitled "A Day with Burns."

The Ladies' Aid of the Luthern Church had an enjoyable social time at the home of Mr. Con. Hossfeld, Carrick, last Thursday.

The Box Social that was held at S S No 10, was a grand success, the proceeds amounted to $84 to be given in aid of the Red Cross Fund.

This may be the best day of the whole year to buy some particular thing. Consult the Walkerton merchant's ads in this week's Telescope.

+ + +

Appreciated the Parcels.

Rev. D A Walker received the following letters from Walkerton boys on service in addition to those appearing in another column:—

Somewhere in France,
Jan. 3, 1916.

Dear Pastor:—

Just a line to express to you and to the ladies of the Church my heartfelt appreciation of the Christmas present I received from you. It was unexpected and as such more thought of.

We have been in France and Belgium ever since the 1st of November. The water and mud in the trenches has been terrible but they are getting us hip-boots now so it will not be so bad.

How I wish I could drop into the Sunday School just for one Sunday. Thanking you again and with best wishes.

Victor M. Bell.

France, Dec. 26, 1915.

Dear Mr. Walker:—

Just a line to let you know that I received the present sent by you and the members of the Church, in good condition. I thank you all for it very much. It was especially appreciated as it got here on Xmas Day. Xmas with us was as happy as we could make it under the circumstances and we had a pretty good time. The weather is pretty fine for this time of the year but there is enough mud to keep us in good humor.

Give my thanks to the members of the church and tell them if they only knew how it cheers a fellow to get those little gifts from the home town, they would know their trouble was not for nothing.

Yours very truly,
Walter M. Pitt.

Lieut. R. R. Dixon came up from Woodstock and spent Sunday with his parents, Mr. and Mrs. Thos. Dixon.

Mrs. Jewel received a letter from her son, Private Fred Jewell in England, last week, stating that he was well and happy, and had received his Christmas parcel alright.

We are sorry to state that the condition of Mr. J. Leggat, public school teacher, is not at all what could be desired. In the meantime there is no school in his room.—Hepworth Progress.

The engagement is announced of Miss Irene Michael, only daughter of Mr. and Mrs. Frank Michael, to Mr. Isadore Freiburger of Carrick, the marriage to take place about February 2nd.

Mr. William Lamberton has removed onto the Neilly farm and Mr. and Mrs. Neilly moved into town on Saturday, and will live in the Morrison residence which Mr. Neilly purchased recently.

+ + +

Accepted Call

Rev. M. Neilson, of Winchester, has accepted the unanimous call of the Baptist Churches of Paisley and Willscroft and will preach Feb. 6th.

+ + +

Killed In Action

The name of Wellington S. Garbutt, of Vancouver, appeared recently in the list of casualties. The deceased was a son of J. A. Garbutt, formerly of the 16th Con., Brant.

+ + +

Sudden Death

Miss Wilhemina Dickman, the eighteen year old daughter of Malcolm, was found dead in bed on Sunday morning, January 16th. Heart failure is given as the cause of her death.

+ + +

Chairman Ramsay Re elected.

The Public School Board reorganized for 1916 at a meeting held last Wednesday night. Chairman Ramsay was re-elected for the ensuing year, and the same Property and Visiting Committees were named.

+ + +

Thrown From Cutter

Mr. Thomas Coats of Brant was thrown from his cutter recently, striking his head on some bare gravel and stones. The side of his head was severely bruised and he suffered considerably from the shock. His granddaughter who was with him in the cutter fortunately escaped injury.

+ + +

Drastic Measures

Robt. Wightman, of Clifford, owner of the Wightman rural telephone line, which covers a section of Carrick, has given public notice to his subscribers not to allow a certain party the use of the phone (giving the offender's name) he has made a nuisance of himself and has been caught listening on the line. This ought to prove a cure for people who abuse their telephone service.—Mildmay Gazette.

+ + +

Another Farm Sold

Several farms have changed hands in this section at good prices the past few weeks. Another deal was put through on Saturday by which a Walkerton man netted a snug sum. On April 8th last, Mr. James O'Connor bought the old Allen farm in Greenock from Mr. Wm. Lamberton for $5,350. He had not yet taken possession when he sold it on Saturday to Mr. Frank Miellhausen, son of Mr. John Miellhausen, for $5,050

+ + +

The Sudden Thaw

The sudden thaw on Friday last caused the river to rise almost to flood height. Silver Creek overflowed its banks, badly flooding sections of the West Ward. In one case a horse was found standing in three feet of water in its stable, on Saturday morning. The thaw came with remarkable suddenness. On Thursday night snow was a foot deep on the level in this district. On Saturday morning the ground was bare, save for the remnants of a few scattered drifts.

+ + +

Carrick Agricultural Society

The annual meeting of the Carrick Agricultural Society was held at Mildmay on the 15th inst. There was not a large attendance owing to the rough weather, but the business was all transacted in good order. The following officers were elected: President—Andrew Schmidt; Vice-President—M. Hilger; 2nd Vice-Pres.—W. H. Huck; Secretary-Treasurer—P. D. Liesemer; Directors—M. Filsinger, Jacob Miller, M. Weller, A. Rahn, Hy. Schnarr, J. G. Thomson, B. Goetz, Thos. Jasper, A. Schmaltz, J. M. Fischer, Chas. Buhlman, John Lints and J. W. South; Lady Directresses—Mrs. W. E. O'Brien, Mrs. W. H. Huck and Mrs. Andrew Schmidt. Mr. Moses Filsinger was appointed delegate to the Provincial Association of Fairs.

+ + +

Big Change In Ash Business,

Mr. John Joynt of Lucknow, who has been handling about 75 per cent of the ashes collected in Canada, will hereafter ship all his ashes to St. Catherines to a new potash plant which is to help make up the deficiency caused by the war with Germany. Heretofore Mr. Joynt has been shipping 10,000 tons of ashes yearly to the Eastern States for fertilizing. He is now breaking off his business with United States completely, and will help try to solve the munitions problem by helping along the supply of potash to be used in explosives.

+ + +

Some Newsy Notes About 1916.

February has a day added.

May Day comes on a Monday.

Christmas will be on Monday.

Dominion Day comes on a Saturday.

Good Friday falls on April 21st and Easter Sunday on April 23rd.

King George's Birthday, June 3rd. He commences the 7th year of his reign on May 6th.

There will be three eclipses of the sun and two of the moon. Most of the quintette will be invisible in Canada.

Marriageable maidens will have special privileges. Young fellows and desirable old bachelors should get ready to say "I will."

A Memorial Tablet.

An interesting ceremony is to take place on Feb. 14th in the Primitive Methodist Church, Epworth, England, which is of interest to Walkerton people. On that day a tablet will be unveiled in memory of Rev. John Chaplain Garner, grandfather of Mr. E. W. Garner of Walkerton. The reverend gentleman was one of the stalwart pillars of early methodism, having been six times president of Conference and the first general mission secretary of the Primitive Methodist Church. He worked and died in the old town which was the birth place of the founder of Methodism, his remains being interred in the old chapel where now stands the Sunday School. Funds to provide for the erection of the tablet were left by his son the late Rev. John Garner Jr., father of Mr. E. W. Garner, whose death occurred in Walkerton on March 21st last in his ninety-second year. After a fruitful ministery extending over a period of seventy-odd years. Two other sons of the patriarch for whom the tablet is raised, were also prominent in the work, being authors of well-known theological works.

+ + +

Knox Church Annual Meeting

Knox Church annual meeting was held in the school room on Wednesday evening 19th inst. The attendance was very good. W. A. Rowand was chosen Chairman and D. McKechnie Secty. The reports from the different offices and organizations were heard with deep interest. The income for ordinary running expenses was $3171.11 and the expenditures $3001.49, the liabilities $150.

The membership is 491. The vote for Church Union resulted in a majority of 83 in its favour. About fifty whose church life has been in connection with this congregation are either on the fighting line or training to take their places there, and have the earnest prayers of the congregation for their welfare. Inspiring reports were presented from the Sunday School, Cradle Roll, Bible Class, Mission Band, Woman's Missionary Society and the choir. A vote of thanks was tendered to Mr. Leeson, the choir leader, and the members of his choir for their splendid service of praise each Sunday and on special occasions. Mr. N. Robertson, clerk of the session, was also given a hearty vote of thanks for his untiring services on the Session Board. A special feature was the dainty luncheon served at the close of the meeting by the ladies.

Officers elected were—Geo. D. McKay, Treasurer; H. M. Lay and H. G. Hunter, Auditors; Managers for three years, H. M. Lay, R. H. McKay, W. J. McNally, R. E. Hueghan and F. Reunle: for one year, Mr. Jas. White.

RECRUITING IN BRUCE

Burns: "Let us do or dee."

+ + +

We must fight the foe or be his slave.

+ + +

The war's duration depends on the Allies' man-power.

+ + +

Six Grey county doctors have gone on active service.

+ + +

Life and fortune are but uncertain things; the only thing that endures is true manhood and true womanhood.

+ + +

At no time in the history of our nation has it been faced with a crisis of such gravity as that which now exists.

+ + +

And now for business. Mr. Gideon Kastner, offers $5 to any man who secures five recruits.—Wiarton Echo.

+ + +

Lives there a man with soul so small,
Who never heeds his country's call,
Who'd serve his nation not at all;
Stand idly by and watch her fall?

+ + +

Rev. R. C. Kerr, Baptist minister of Flesherton, has enlisted in the Grey County Regiment and will attend the non-coms. school.

+ + +

Messrs. Rodney and "Rusty" Moorehead, of Palmerston, have joined the colors. This makes three sons of the well-known engineer "Bro." Moorehead now training for active service.

+ + +

Mr. Daniel McDonald, a well-known farmer in Kinloss Township, has four sons fighting for the King. Daniel, Jr., enlisted with the 18th Batt., and has been in active service for some time.—Kincardine Reporter.

+ + +

Capt. Clark, Walkerton, who will have charge of the recruiting from Hepworth to Tobermory, was in town Monday and inspected the Wiarton troops and pronounced them as fine a lot of men as he has seen.—Wiarton Echo.

+ + +

Kincardine has one recruit the Militia Department or the clothing manufacturers never figured on getting. That man is Pte. Holsworth, who has to train in civilian clothes until a special suit is made for him.—Kincardine Review.

+ + +

Capt. A. P. Todd, of Walkerton, quarter-master, of the 160th Bruce Batt., was at Armoury here last Wednesday handing out stores to the recruits under Lieut. Cronin. On Thursday the Tiverton, Ripley and Lucknow contingents received their supplies.—Kincardine Review.

+ + +

Among the men who have offered to fight for King and Country is Mr. Angus Norman, 10th, Kincardine. Mr. Norman is a fine sample of patriotic man. He has a farm and a family, but he feels that men are needed and he is willing to go if accepted. The spirit shown by Angus is what has made Britain's Armies famous.—Kincardine Reporter.

+ + +

In a letter from Sergt.-Major Britton, now stationed at Walkerton, he says: "When the 160th C. B. Bruce Batt. was started I enlisted and was appointed as drill instructor, and since that I have been appointed Sergt.-Major of a company which is in Walkerton. I have 31 N.C.O's. and men under my care and am drilling them daily. Recruiting is going on fine and I look to see Bruce have a Battalion second to none."—Kincardine Review.

OUR BOYS' LETTERS

Soldiers Appreciated the Christmas Parcels Sent Them by Friends and Various Organizations

FROM SIGNALLER VICTOR BELL

The following letter was received by Henry Williams, from Signaller Victor Bell.

Jan. 11, 1916

Just a line to let you know I am well and hope you are the same. There must be something wrong with the boats as I have received no mail since the week before Christmas, but perhaps they will all come at once some of these days. I am still with the Signallers, passed as a First Class Signaller, and we expect to be back to the trenches again soon.

One thing about it over here, they have not got much winter, only one day of snow so far and it melted away in the night. I ate my Christmas dinner for the first time in a barn. It was good though. Mashed potatoes and steak, and a dandy pudding apiece from Princess Mary. The pudding alone was enough for a dinner. We expect to have some time to-day. We have an hotel in the village, from 2 to 8 p. m. going to have a fowl dinner and afterwards a musical programme. Some class to us on Active Service eh!

We went into —— for a bath yesterday, 100 of us bathed at a time, got a complete change of clothes, that is one thing about it you don't need to wear dirty clothes. I myself had three changes in two weeks and I still have another change in my pack besides giving a suit away. We get a bath twice a month regular. Well I guess I will close, wishing you all a Happy New Year.

From VICTOR BELL.
Signaller R. C. R.

P. S.—Saw 21 airoplanes in the air the other day floating around in the air right over our heads. Also saw an air fight. It was certainly interesting to stand and watch them darting at one another, but our fellow chased the German away.

+ + +

Christmas Boxes Appreciated

Rev. D. A. Walker has received letters from Ptes. Victor Bell and Walter Pitt who are "Somewhere in France" and from Ptes. Louis Honey and Walter Bryce who are training at Bramshott Camp, England, thanking the Ladies of the Methodist Church for the boxes sent them at the Christmas-time. They all speak of how much they appreciated these remembrances from their home town and home church.

Below are extracts from the letters:—

Bramshott Camp,
Dec. 26th 1915.

Dear Mr. Walker—

Your Christmas box came to hand in first class condition and in good time. It is difficult for me to tell you just how much I appreciate it not so much on account of the material contents of the box, and I assure you they were by no means unacceptable, but on account of the spirit that prompted the gift. Please convey my sincere thanks to the ladies who so kindly remembered me. We fared splendidly yesterday in every respect except in that of weather. It rained nearly all day. But inside the huts there was good cheer. Boxes from home furnished welcome additions to the turkey and plum pudding that mysteriously disappeared at dinner. It was a big day in camp.

We are comfortably quartered when one considers what the boys had to put up with last winter, but we have plenty of mud as it is. After dark it's impossible to get very far without getting into anywhere from two inches to a foot of it. We have started our training in musketry which will last about six weeks. I expect that soon after we finish that, we will be moved out of England, probably "Somewhere in Belgium," possibly to some other front. There are many things about England which I like, but there is no place like Canada. It will be a happy day for the boys that are spared when they get back. Even the old country men who joined our ranks for the purpose of getting "home" are anxious to get back across the water. They now realize what a wonderful country they have left behind.

But I must close. Although my time is somewhat limited I shall try to let you know from time to time how things are going. Again thanking you for your kindness, I remain,

Yours sincerely,
Louis Honey.

+ + +

Bramshott, near Liphook,
Hants, England

Dear Mr. Walker:—

I received your lovely Christmas box this morning and was very glad to get it and I give you all many thanks for sending it.

There are nearly 20,000 Canadians in this camp and some soldiers from Australia.

We had a Christmas sermon in our dining-room this morning and it was good. We are having a big Xmas dinner here. I'd sooner be home for Xmas but I'm going to try and do my share first and I hope I may get a chance to return home again. They say we will be moved to France about March. Write again as we are always glad to get Canadian mail. Yours sincerely,

Walter Bryce.

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so life-like, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

Byron Pink Tomato

FREE

A post card addressed to us as below, with your name and address on the other side, will cost but one cent. Drop it in the nearest mail box, and it will bring promptly a copy of our illustrated 80-page catalogue for 1916. With it will come also—free—a 15c. packet of

Byron Pink Tomato

A perfectly formed tomato, the Byron Pink is uniform, large, and attractive. The flesh is firm, and the flavor delicious and full-bodied. It is a robust grower and a heavy cropper. It is an ideal tomato for forcing. You are going to buy seeds anyway; then you might just as well send for our catalogue and get this free premium for yourself.

The Catalogue tells about the other valuable premiums which we give with every order.

DARCH & HUNTER SEED CO. LIMITED, LONDON, ONTARIO, CANADA

WINTER GOODS

Our stock in all lines is complete and if in need of any of the following, give us a call and we will endeavor to satisfy you both in quality and in price.

Axes from 90c to $1.25, Meat Grinders and Fillers, Sleigh Bells, Coal Oil Heaters, Snow Shovels, Grain Scoops and Bags; the celebrated "Racer" Cross Cut Saw and others; Coal Scuttles, Coal Oil Cans, and Coal Oil, Gasoline and Gas Engine Oils, Oil Cake, the celebrated "Bibby's" Calf Meal and ground Flax.

Our stock of heavy mitts is large, well assorted and prices right.

We are sole agents for the celebrated D. L. & W. Scranton Coal, the standard anthracite, prices right and quality the best. Try a ton or two.

S. W. VOGAN

German Plans Failed; Now Fight for Life

In Sunday's issue of the New York Tribune there appears an elaborate review of the great war to date by Frank H. Simonds, who is regarded as perhaps the leading writer upon war topics in the United States press. Mr. Simonds' conclusions in brief are that Germany, in spite of her military successes, is conscious that she cannot achieve the objects for which she entered upon war, and would welcome peace on the basis of some approximation to the post-war status; and that the allies are resolute to continue the war until Germany is defeated. He predicts another twelve months of war, which will either bring the defeat of Germany definitely in sight or result in a continuation of the present deadlock, which will compel peace on the basis substantially of "as you were." "Germany's enemies," says Mr. Simonds, "believe they can crush her; she does not believe she can crush them, but she is satisfied they cannot crush her. She, not the entente, is now fighting for existence." In the course of his article, Mr. Simonds says:

"In the matter of the conditions, the great war wholly resembles the other condition struggles of Europe, the wars in which other nations, with relatively weak allies, have undertaken to enforce their will, in a military sense—there is no intention of discussing here the political aspects—upon a group of nations collectively larger, richer and more powerful. Viewed from this angle there is nothing inherently different in this war from the Napoleonic struggle, and Germany is playing the part of France.

"Now, in such a struggle, it has always been true, and German military writers, notably Bernhardi, have always insisted upon it, that the single chance for victory lay in the crushing of the several foes forming the coalition against Germany, before all were able to put their maximum strength in the field. At the very least, they have argued that it was essential to crush one or two of the allied enemies to such an extent that they would be permanently crippled—that is, for the period of the war.

"German purpose, then, is patent. We know absolutely the reasons that moved the German general staff to direct against the French in August, 1914, that human avalanche that swept through Belgium and came down to the Marne. It was a deliberate, calculated, supreme effort to dispose of France before Russia was ready and before Great Britain had begun to collect volunteers. It was precisely the same sort of military and strategic conception that Napoleon employed in the Austerlitz campaign.

"But there was no Austerlitz. On the contrary, the German army was checked, flung back half the distance it had covered in France and pinned down to trenches from the sea to the Jura Mountains. France was not eliminated, crushed, seriously injured. Anglo-French losses were not greater than German. The strategic purpose of the Germans had been wholly thwarted. There was no Treaty of Pressburg, and Germany was not able to turn, unhampered, to deal with Russia, as Napoleon had been able to turn against Prussia.

"The campaign of 1914, which, roughly speaking, stretches from Aug. 1 to Jan. 1, which includes the German successes in Belgium, Alsace-Lorraine and Northern France, and the allied victories at the Marne and in Flanders, with the check and counter-check at the Aisne, was from a military standpoint an unqualified failure. The German general staff had missed the goal as utterly as Napoleon had achieved his in the Austerlitz campaign.

"All this German successes on the Dunajec, the Vistula and the Niemen changed. At the close of the campaign the Germans had thrown the Russians not merely out of East Prussia and all but a very tiny sliver of Galicia, but they had occupied all of Poland and most of Courland. They had destroyed the great Russian armies that had faced them at the outset and they were now confronted by inferior troops, poorly equipped and deprived, by German capture, of most of their artillery. By her successes Germany had possessed herself of all the great Russian barrier fortresses, and her own eastern frontier and that of Austria was assured.

TWO IDEAS.

"Two ideas were in conflict at the opening of 1915. The German idea was to crush Russia, compel a separate peace and thus be free to turn against the Anglo-French armies in the west, as Napoleon turned from Austerlitz to Jena. The allied idea was to exert such pressure upon Germany from the west and the east that under the combined attack she would collapse inward. Both ideas failed utterly.

"Yet it is essential to perceive that the failure of the German idea may prove the more fatal in the end, because the German situation is more gravely affected by the question of time than the allied is. Thus, as I pointed out at the start, given the advantage of numbers, wealth and latent military force, the allies were bound to win in the end, so far as historic parallels have any weight, so far as German military teachings of the period before the war were accurate, unless Germany could get a decision in advance of the arrival of a time when the war became one of exhaustion.

"Germany's best chance was to win in 1914, when she attacked France. She came close to success, but she failed. Her next best chance was in 1915, when she turned against Russia. For many weeks it seemed possible that she might succeed in the east, but she failed again. She did not get a decision, which it was far more necessary to have in 1915 than it was in 1914, for the element of time was going against her steadily. Not only the element of time, for had Germany succeeded in France or in Russia, she might have won the war in the larger sense; that is, she might have imposed her will absolutely upon her opponents as Napoleon did after Austerlitz and again after Friedland.

"If France had been defeated at the Marne, if Russia had lost her main army at Vilna, or if it had been enveloped about Warsaw, the consequences cannot be mistaken. It is by thinking of them that it is possible to get a full measure of what military writers mean when they say that Germany has failed.

"As to the allied failure, it is not worth much time discussing that because there never was a moment during the year when there was any chance that the allied purpose could be realized. If the allies hoped for a few months for a decision in their favor in the year, they soon appreciated the fact that the maximum of success was to avoid disaster—to keep their coalition unbroken.

NAVALISM VANQUISHES MILITARISM.

"There was, however, one field in which the Allies won a tremendous victory, in my judgment, far overbalancing the local victories of Germany in her French and Russian campaigns. The British fleet finally demonstrated its supremacy by meeting and abolishing the submarine peril; it assured to Great Britain and her allies the mastery of the ocean and it drew about Germany a blockade the effects of which are revealed in all German newspapers.

"It is not accurate to say that Germany is starving, it may not be possible for the blockade to bring about German starvation; but had Germany been able to isolate Great Britain, British starvation would have come immediately. More and more Germany will feel the hardships and discomforts that flow from the blockade—more and more there will be privation; in addition, there is and must remain a complete stagnation of the commerce of Germany. She cannot buy or sell in the world. Her fleets and her factories, her fields and her mines, are unable to contribute through export trade to the costs of war.

"British sea power was the decisive element in the Napoleonic wars. The British fleet protected Great Britain and thus gave one nation immunity from invasion. Other nations were defeated in the field and compelled to make peace on Napoleon's terms, but Britain kept on fighting and again and again made coalitions which in the end weakened Napoleon and brought his downfall.

"Reading the battle news, looking at the map, we are all impressed with the greatness of German success and the vastness of her conquests. Yet all her conquests are hardly of a greater value than the power to use the sea. If she holds Belgium and Northern France these are not of greater value to Germany now than would be the ability to use the sea, and they are not a disproportionate price to pay for British consent to use her merchant fleet again. If Germany cannot compel Britain to abandon the blockade, she will have ultimately to persuade her, and she can only hope to persuade her by evacuating Belgium and France.

"The effects of sea power are not to be seen on the map or in any careless estimate of war situations, but no student of history can mistake the lessons of the past. The triumph of German militarism, meaning by that the success of the Germans, has fallen far short of the completeness of the success of British navalism."

WITH HONORS OF WAR.

Rights Those Conditions Confer Upon a Defeated Foe.

Ordinarily in all siege operations a surrender of a fortress is unconditional, and the vanquished tacitly agree to accept what terms the victor, in its wisdom, may impose, relying upon the latter's magnanimity for good and lenient treatment. The usual course is this: The garrison is disarmed. They are made to fall in, all so many prisoners, and escorted to wherever their conquerors decide they shall be maintained.

The conquerors, of course, see that the escort is a strong guard, properly armed, able to put down at once any attempt on the prisoners' part to escape or disobey orders. Worst of all and certainly the most galling to any real soldier, the almost sacred trophies of the different regiments become the spoils of the victors.

Guns, ammunitions, colors and such like things all have to be given up, though men have given their lives to defend them. For the future they grace the homes of the enemy or are turned against their old owners in the field.

It is in these things that the humiliation of surrender becomes complete. Yet all of it is saved when the beaten garrison is granted the "honors of war." That means the defenders were simply "defeated, but not disgraced."

By its use the successful besiegers admit to the world that the garrison was able to make something better than an unconditional surrender. Their heroic defence had not left them at their last gasp. They could maintain hostilities for some time yet, and, although they would undoubtedly be beaten at the finish, the fortress could only be taken after more loss had been suffered.

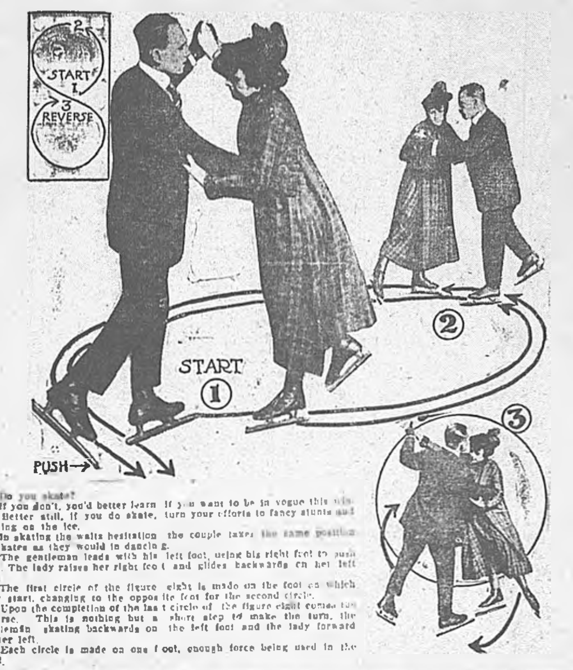
In such a case all that is demanded of the beaten men is that they should evacuate all their positions. These the enemy takes possession of as what he has been striving for. All the colors and other trophies are retained by the garrison. The defenders are not prisoners of war, compelled to surrender. They are simply beaten men, voluntarily giving up the unequal contest.

They are not disarmed and escorted by guards. Mustering under their own leaders, they have no enemy over them giving orders. Headed by their own bands, with their own colors flying above them and no foreign flag near, they "march out" of the positions they have so nobly held, saluted by their successors and acclaimed by the world as heroes for whom circumstances have been too strong.

It has been previously settled where they should go, and thither they march by themselves, their officers wearing their swords by their sides, just as if they were victors instead of conquered men. They merely evacuate their positions and to all purposes are free men, not prisoners.

This is marching out with the "honors of war."—Pearson's.

THE LATEST WINTER CRAZE IS TO WALTZ ON SKATES



Do you skate?

If you don't, you'd better learn if you want to be in vogue this winter. Better still, if you do skate, turn your efforts to fancy stunts and dancing on the ice.

In skating the waltz hesitation the couple takes the same position on skates as they would in dancing.

The gentleman leads with his left foot, using his right foot to push with. The lady raises her right foot and glides backwards on her left foot.

The first circle of the figure eight is made on the foot on which they start, changing to the opposite foot for the second circle.

Upon the completion of the last circle of the figure eight comes the reverse. This is nothing but a short step to make the turn, the gentleman skating backwards on the left foot and the lady forward on her left.

Each circle is made on one foot, enough force being used in the start.

PERILOUS CARGOES

"Deliver us from a cargo of sugar or coffee or cotton," is the prayer that many sailors send up when they are in doubt as to what fate will bring them next in the cargo line. They welcome, almost gladly, a cargo of dynamite or other explosive, but they dislike the positive discomfort and danger that come to them with the cargo of sugar, coffee or cotton.

At first sight it seems that dynamite would be a cargo to be carefully sidestepped, but from a sailor's point of view more things than the mere danger involved are to be considered. A cargo of sugar is bad. Put hundreds of tons of cane sugar in casks in the hold of a vessel and let the ship steam through a belt of hot weather. The odor is sickening. The sailors cannot get the sweet taste out of their mouths. They crave vinegar or lemon juice—anything sour. They lose their appetites and are always glad when a voyage on which the cargo was sugar is over.

Coffee is as disagreeable as sugar, in addition to being really dangerous. A cargo of green coffee is not at all unpleasant at first, but the odor rapidly palls on the olfactory nerves. In damp weather it becomes dreadful. It seems to impregnate everything in the ship, and eventually the crew lose all appetite and sometimes become seriously ill.

Cotton is a really dangerous cargo. If a little oil happens to touch raw cotton the result is what is called spontaneous combustion. A single bale of cotton saturated with such an oil as boiled linseed, and lying at the bottom of a hold, can be compared only to a slow match attached to a bomb. In fact, it is even more dangerous, because there might be ninety-nine chances out of a hundred that something might happen to prevent the explosion of the bomb. There are about 999 chances in 1,000 that the cotton will burn.

Onions also cause sailors much discomfort. The French steamer Yarra, with a cargo of onions from Alexandria to England, lost one man and had three others rendered insensible by fumes rising from the tons of onions in her hold.

Acids and other chemicals form dangerous cargoes. Carbide of calcium, for instance, is more dangerous than dynamite. Acetylene gas is made from this chemical, and the gas is constantly given off if the product is exposed to air. Some time ago the Hamburg barque Hebe was towed into Plymouth Sound, England, in a disabled condition. Her cargo was 200 tons of calcium carbide. When the commander-in-chief at Devonport learned of the nature of the disabled barque's cargo he ordered all the war vessels in the sound to take refuge at Hamoaze and forbade the Hebe to stand in for repairs until all her perilous cargo had been removed by a barge of the War Department.

The Volturno, which burned at sea, had a cargo which included rags, peat moss, barrels of spirits, tar and oils, together with drums of various chemicals. Water could have little effect on the flames from such a combination when it had caught fire.

Nitric and sulphuric acids are dangerous cargoes and add to the dangers of the sea when carried aboard ships. Some years ago the Phoenix liner Michigan was caught in a gale while coming to this country. She had a deckload of sulphuric and muriatic acid in metal drums. A huge sea washed over the forward deck and broke a number of the acid drums from their lashings, sending them crashing around the deck. Volunteers were called for to heave the drums starboard. The crashing of the sea and the rolling on the deck had split some of the containers, and the acid burned the flesh of the sailors who responded to the call for volunteers. The battle with the deadly acid drums waged for an hour. Man after man was forced to fall out from the line of battle and go below to have his wounds dressed. When the situation was becoming critical the danger was eliminated the way it had come—by another wave washing over the vessel and carrying away the unfastened drums and part of the lee rail.

Shipmasters dislike carrying drums of acid where they cannot be reached readily. A Chilean ship put in at the Falkland Islands leaking badly. Her cargo was made up of drums of acid and chalk. The acid had leaked from the drums and mixed with the chalk, forming carbonic acid gas in the hold. This gas is deadly and the crew could not make repairs. Meantime the acid had gathered at the bottom of the hold and eaten away the iron frames of the ship.

USES FOR OLD LINEN.

How Frenchwomen Use the Tops of Old Evening Gloves.

Never throw away old linen in any shape or form. Cotton sheets and pillowcases when old and worn are soft and splendid for bandages and other sickroom needs. No new bandage ever equals old bed or table linen for such purposes, as they will tell you at any hospital, but it is understood it must be sterilized before being used.

Housekeepers are apt to overlook this use for old linen unless there is really sickness present in the house, but a store of such pieces laid away will never come amiss even if they are only used for ironing boards and for wrapping up bundles in the storeroom, for in a contagious disease old sheets must be hung over the doorways to the sickroom and kept wet with disinfectant. When the weather is hot wet sheets about the room will cool the air.

The linen should have been washed clean without starch, and the hands that roll it should be very clean. For an open wound sterilized gauze will be a necessity, but clean linen may be used to protect the bandages underneath. At the hospitals the old linen so utilized is baked in the regular oven to sterilize it before using.

When the bandages are rolled they should be placed in a clean covered receptacle until needed. A glass jar or a covered box will do for the purpose. The width of the bandages depends upon their use. About one inch is wide enough for a finger, and from that the widths vary. For an abdominal bandage six or eight inches may not be too wide.

The tops of old evening gloves have their use, too. An appeal recently came from Paris for them, to be sewed together as interlinings in vests for soldiers in winter trenches. Hundreds of poor women are kept employed making these winter comforts.

This French tailored gown is of wine colored velvet bordered with band of otter. The skirt is short and wide. A feature of the coat is the cutaway effect across the front at the waistline, and from this point there is started the umbrella flare of the peplum.

In conversation there seems to be a difference between making a funny crack and a bad break.

HOW BLIND MEN READ

It was a magnificent tribute which King George paid to the memory of the man who "made the blind to see," on the occasion of the recent opening of the new building added to the National Institute for the Blind in Great Portland street, London. "A great service," said His Majesty, "was rendered to humanity when Louis Braille devised the system of reading and writing which partially restores to the blind the lost means of intercourse with their fellows."

The tribute was well deserved, for of all the reading and writing systems which have been invented for the help of the blind, it is generally recognized that that of Louis Braille is by far the best. Much of the £130,000 which is being appealed for to support the National Institute is required to supply the increasing demand for books of the Braille type. That the money will be subscribed by the generous-hearted public there is little doubt, for, as King George truly remarked:

"It is a commonplace that men do not realize the value of that which they have never lost, but I am confident that your appeal for funds to extend and develop your undertaking will stir the imagination of many who unreflectingly enjoy the blessing of sight."

Braille, who was born in 1809 about twenty-three miles from Paris, became blind through an accident at the age of three. When he was ten years of age he entered as a pupil the Institution Nationale des Jeunes Aveugles, which was founded by Valentin Hauy in 1784, and such was his intelligence that when he was seventeen years of age he was elected a professor of the institution.

Both as a pupil and professor, however, he labored to invent a system which the blind could not only read but write in relief, and after years of patient labor devised the wonderful system which bears his name.

Briefly the signs of the Braille system consist of varying combinations of six points or dots placed in an oblong, of which the vertical side contains three and the horizontal two points. There are sixty-two possible combinations of these six points, so that after providing characters for the twenty-six letters of the English alphabet, there remain a sufficient number of signs for punctuation, contractions, etc.

The first ten letters, from "A" to "J," are formed by combinations of dots in the upper and middle rows; the next ten letters, from "K" to "T," are formed by adding the left-hand dot on the low row, and the remainder by adding two dots in the lower row to the combinations representing the first ten letters.

By other various combinations it is easy to represent punctuation, numbers, and musical notes. Indeed, by means of this dotted system a blind man is able to keep memoranda or accounts, write his own music, emboss his own books from dictation, and carry on correspondence.

For writing, a frame is used consisting of a grooved metal bed, containing ten grooves to the inch. Over this is fitted a brass perforated guide, fixed into a light wooden frame like the frame of a slate, and which is attached to the grooved metal bed by hinges. The paper is introduced between the frame and the groved bed, the instrument for writing being a blunt awl which carries a little cap of paper before it into the grooves of the bed, thereby producing a series of little pits on the side next the writer. When taken out and turned over, little prominences are felt, corresponding to the pits on the other side.

The reading is performed from left to right, consequently the writing is from right to left. But this reversal presents no practical difficulty as soon as the pupil has caught the idea that in reading and writing alike he has to go forwards.

That the making of Braille books is a costly and laborious process may be gathered from the fact that John Andrew Ford, whom the King and Queen saw at work when they visited the Nationale Institute, and who has the distinction of having hammered out the first Bible in Braille, took three and a half years to accomplish the task.

The task involved no fewer than 20,000,000 blows, the punch having to be struck three times with the hammer for each dot. This Braille edition of the Bible runs into thirty-nine bulky foolscap volumes.

His Face Was Covered With Pimples.

Pimples are not a serious trouble, but they are very unsightly.

Pimples are caused wholly by bad blood, and to get rid of them it is necessary to purify the blood of all its impurities.

Burdock Blood Bitters has made many remarkable cures; the pimples have all disappeared, and a bright, clean, complexion left behind.

Mr. Lennox D. Cooke, Indian Path, N.S., writes: "I am writing you a few lines to tell you what Burdock Blood Bitters has done for me. Last winter my face was covered with pimples. I tried different kinds of medicine, and all seemed to fail. I was one day to a friend's house, and there they advised me to use B.B.B., so I purchased two bottles, and before I had them taken I found I was getting better. I got two more, and when they were finished I was completely cured. I find it is a great blood purifier, and I recommend it to all."

Burdock Blood Bitters has been on the market for the past forty years, and is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

BRITAIN'S BIG FOUR.

(New York Sun.

It is a striking coincidence that the success of British operations in the field now depends upon the efficiency and staying power of an Englishman, Sir William Robert Robertson, who was appointed Chief of the Imperial General Staff on December 21; a Scotsman, Sir Douglas Haig, who succeeded Sir John French in command of the army in France; an Irishman, Lord Kitchener, who is Secretary of State for War; and a Welshman, David Lloyd George, who is minister of Munitions.

Although the new Chief of Staff bears a Scotch name he was born in Lincolnshire, and he may therefore be rated as an Englishman, just as Lord Kitchener, a son of Colonel H. H. Kitchener, of Leicestershire, is called an Irishman because he was born in County Kerry. Sir Douglas Haig is of Scotch blood and Scotch nativity, a son of Fife. The claim might be put in that the Right Hon. David Lloyd George is an Englishman because he was born in Manchester; but it would not be allowed by the Welsh, who are as tenacious of blood ties as the Irish, perhaps more so. As Mr. Lloyd George was educated at Llanystymdwy, and lives at Brynawelon, Criccieth, Carnarvon, it might not be wise to press the point that he is an Englishman by birth.

Doubtless all these four men on whom the empire is now leaning have English, Irish and Scotch blood in them, and perhaps more interesting than race or nativity is the fact that not one of them owes his eminence to aristocratic connections or to social influence. The Minister of Munitions is the son of a schoolmaster; Lord Kitchener's father was a regimental officer of limited means; Sir Douglas Haig is the youngest son of John Haig, gentleman and Justice of the Peace of Cameron bridge; and Sir William Robertson sprang from the "common people"—none more obscure than he.

Every one of these four men has risen by sheer ability and a robust personality to high position. Three of them, the Minister of Munitions, the Secretary for War and the Chief of the General Staff, have never been noted for the graces of life and have made many enemies. The fourth, Sir Douglas Haig, has enjoyed a good deal of popularity among his associates, but the fact that at the front he is nicknamed Von Haig is not without significance.

These leaders may be called the Big Four, and possibly the most useful of them will turn out to be Sir William Robertson, pantry boy, footman, common soldier, subaltern, intelligence officer and lieutenant-General, of whom it is said: "He has apparently an iron constitution, and certainly a remarkably strong will. He has no nerves and nothing disturbs him." The aristocracy will expect no favors from this rugged dragoon with guardroom manners. His rise in the army has been magical, and yet he is one of the most unromantic of persons. There has never been anything like it in England.

Misnomers of Chemistry.

One of the strangest features of chemistry is the fact that many of the chemical names are misleading and do not describe the articles. Here are a few examples: Oil of vitriol is no oil, neither are oils of turpentine and kerosene. Copperas is an iron compound and contains no copper.

Salts of lemon is the exceedingly poisonous oxalic acid. Carbolic acid is not an acid, but an alcohol. Cobalt contains none of that metal, but arsenic. Soda water has no trace of soda, nor has sulphuric acid of sulphur. Sugar of lead has no sugar, cream of tartar has nothing of cream, nor milk of lime any milk. German silver has no silver and black lead no lead. Mosaic gold is only a sulphide of tin.—Philadelphia Inquirer.

Was Not Much of a Believer in Patent Medicines

But Milburn's Heart and Nerve Pills Are All Right.

Mrs. Wm. McIlmain, Temperance Vale, N.B., writes: "I am not much of a believer in medicines, but I must say Milburn's Heart and Nerve Pills are all right. Some years ago I was troubled with smothering spells. In the night I would wake up with my breath all gone and think I never would get it back. I was telling a friend of my trouble, and he advised me to try Milburn's Heart and Nerve Pills. He gave me a box, and I had only taken a few of them when I could sleep all night without any trouble. I did not finish the box until some years after when I felt my trouble coming back, so I took the rest of them and they cured me."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years. The testimony of the users should be enough to convince you that what we claim for them is true. H. and N. Pills are 50c per box, 3 boxes for $1.25; at all druggists or dealers, mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Treatment of Windows

The treatment of the windows either makes or mars a room. And the secret of making the room consist not only in selecting the right materials but in arranging the draperies properly. At one time fashion demanded that all draperies, heavy or light, be drawn away from the sash in such a manner as to fall in a deep festoon. Then the reaction came and only straight hanging draperies were considered good taste.

At present window draperies may either be draped, festooned or hung straight; it all depends on the type of the room to be treated. This freedom of hanging together with the profuse amount of color forms the chief contrast between window draperies of this season and the past.

In all the new fabrics intended for window draperies, excepting the hair some lace curtains, there is at least a touch of color. Many of these fabrics, expensive and inexpensive have elaborate allover patterns in several colors. When using such materials care should be taken to select that which matches or harmonizes with the walls of the room. It is also well to remember the use of the room, whether it is a library, bedroom or dining room; also the location of the room. North and east rooms require warm colors to keep them cheerful, while those with a southern or a western exposure need cooling tones.

For rooms of ordinary size simplicity is the safe rule to be observed. Where a room is not only wide but long, with high ceiling, the festoon manner of fastening back the overdraperies can be made very effective. In smaller apartments the effect given the impression of "fussiness", which is the opposite of the rule of restfulness that should be aimed for.

At present cretonnes to match the wall papers are very much used in bedrooms. The same cretonne being used for bedspreads, chair cushions and even for covers and mats for the dressing table and reading stand. Such curtains should hang to the sill or not more than four inches below. Other bright colored materials suited to bedroom windows are of cotton linen with colored borders and a contrasting colored centre or a white centre. These materials can all be bought by the yard and many of them at a cost of a few cents a yard.

Similar curtains, more individual and expensive, are woven the required length with the border extending across the bottom as well as down the side. Black and white effects in checkerboard style and in stripes are among the newest curtain fabrics. These have the advantage of harmonizing with almost any bright wall covering.

The Dutch valance is a popular treatment for bedroom windows. This may consist of a valance of the same material in thin or thick. Where the privacy the same rod or it may extend across the window and be hung on a separate rod. These valances may be shirred or box plaited, according to whether the material is thin or thick. Where the privacy of an inner lace or net sash curtain is necessary there should be two sets of brackets and at least two, sometimes three, sets of rods. Where the outer draperies and the valance are of a figured material a charming effect may be obtained by having the sash curtains of net or thin muslin with a border in corresponding colors. Another combination that is popular shows sash curtains of net or thin muslin with a border in corresponding colors. Another combination that is popular shows sash curtains of thin muslin with small colored figures harmonizing with the border of the outer draperies.

For the living room, library and dining room a more formal treatment is desirable. Though the outer draperies in all these rooms may extend to the floor, sill length or four inches below is more popular. This not only allows of the drapery being gracefully looped aside, but is much more hygienic.

In selecting [illegible] for these rooms there is a wreath [illegible] fabrics, all equally suitable [illegible] comes a question of color and [illegible] But whether the inexpensive mercerized or linenized fabrics are selected or some of the many beautiful Delmally brocades, Saracenic madras on the colored gauzes, laces and armures, care should be taken to have them sun fast. It is possible to protect a curtain against rain so that a color that is not water might not be forbidden, but since and unusually the sun is [illegible] by way of a window it is essential that draperies shall [illegible] When this is not the case [illegible] difference how much money has been spent in the [illegible] ment, a few weeks will [illegible] Nothing so much detracts from the appearance of a room as spotted, ragged looking window draperies.

The scholar wo old fashioned clothes, one article which was a tall hat with a wi brim. He was much bent from a and in walking supported himse with a heavy cane.

When the two men were about depart the hat and cane of the o man were missing. Presently the o ang outang was seen tottering throu the room, his back bent almost do ble, wearing the hat upon his h and walking stiffly by the aid of cane.—Chicago Herald.

WARRING ON RUST.

Problems With Which Iron and Steel Experts Are Wrestling.

This age of steel has roused a world wide battle with rust, and more chemists and other experts are study possible weapons for this battle than are busy on almost any other industrial problem. Concrete owes much of its present growth to the difficulty of protecting steel and iron against rust.

Absolutely pure iron will not rust, and fairly pure iron will rust only slowly. One way, therefore, is to improve the grade of iron, and manufacturers now sell iron that is guaranteed to withstand rust for considerable periods. It is possible, though expensive, to purify iron completeyl by electricity, and electrolytic iron, as it is called, may before long be common commercially.

Surface coats of protection are, however, the favorite methods of to-day, and many such coatings have appeared lately. The latest one is a metal coat that can be applied on an iron or steel structure after it has been erected in much the same way that paint is applied. Finely powdered metals—such as tin, lead or zinc, or all three in proper proportion—are mixed in oil and painted on the bridge or column or other structure that needs protection. Then the painted surface is heated by a hand torch or in whatever way is most convenient.

The oil burns away, and the powdered metal melts, but does not run. As the metal cools it takes a tight grip on the iron surface and forms a tin or alloy coat, which stops rust.—Saturday Evening Post.

THE POULTRY WORLD

PICKING LAYERS.

An old poultryman tells us that his profits are not influenced so much by the good hens he has as by the loafers in his flock. The loafers are a con- tant source of expense, are most like- y to develop disease or to start bad abits in the flock, and seem to have discouraging effect upon hens that re disposed to lay. Next to culling e cockerels from a young flock omes the weeding out of worthless llets.

A lot has been written about the edge shape and various other physi l signs of good layers, but the use of ese "systems" of selecting layers in olves considerable experience. If the oultryman has been studying his lock as closely as he should, watching the good layers, he will have certain characteristics of a good layer pretty well fixed in his mind without following any particular system. He knows that vigor is the first essential. The early bird is the one that counts; the pullet that is early off the roost, quick and attentive at a feed trough, always busy and watching for the feeder, is a "busybody" of the right sort.

She must look like a hen, and while with the Leghorns she may have a large comb and strong feathers she must not lack any of what the stockmen call "feminine characteristics." She must be a good feeder, since an enormous amount of feed must be handled in relation to her weight if she is to turn out a nice egg yield. Summarizing the characteristics of a good laying pullet from the experiences and observations of a number of breeders we find they are about as follows:

1. Vigor and activity.
2. Depth of body.
3. A healthy head with feminine appearance.
4. An upright tail.
5. A V-shaped body when viewed from side or top.
6. Firm feathers and stout beak.
7. Stout legs, rather wide apart.
8. Good size, indicating well developed vital organs.

These characteristics will vary somewhat with differences in breeds, but the utility type is pretty uniform.

Such a score card will cull out the lazy droopy pullets and all those that show indications of slow maturity or poor physical development. The birds that moult early are also to be avoided, because this indicates that they are not perfectly developed or they would carry the first coat of feathers until late in the season. Of course, conditions are sometimes responsible if the entire flock moults early, but if there are only a few in a large flock they had better be culled out.

If you have among the culls a number of birds that you hesitate to sell, it is a good plan to put them into a separate pen for a period of observation. With the present high price of pullets of the laying breed one should not sacrifice those that give promise of improvement; but the general flock will be benefited if these re segregated.—Prairie Farm and

NOTES.

er that a large per cent. of water, and the hens must ply of clean, fresh water to all times.

ked turkeys and dry-picked chicks, if the work is pro- always make a better market and frequently er price.

perfect ill be found that the begin to lay in November will make good layers t the winter if properly fed for.

ke the fowls off free range hem in tight houses all the keep them in a part of each first so that they will get to confinement gradually.

ducks that have not long, les will not make the greatest Therefore, when selecting and drakes to keep over for pring's breeding, select those of ght type.

a lot of dry leaves are collected d stored away they will make excel- t scratching litter for the floors of e hen houses during the winter, provided there is not plenty of cheap raw or hay on hand.

There is no question about the value f milk, whole, skimmed, sweet sour r buttermilk, for feeding laying or fattening fowls, and where enough can be had it will take the place of animal rotein (meat or fish scraps) to a large tent.

Do not sell the old turkeys because e young ones look so big and strong, ut keep the old ones to breed from another year, because the best results cannot be obtained when breeding from young specimens.

Although corn and wheat are both ood poultry feeds, it does not pay to ed either one exclusively, for the nly way that the hen can be given e food elements that she needs to ake eggs is to furnish a variety of rain, with meat food or milk, green ood, grit, charcoal and shells.

When one considers that the male bird in the flock influences the quality of all the chicks, it will easily be seen that it does not pay to economize when buying a male bird. The first thing to do is to select the best possible "rooster" and let the price be a secondary matter.

Drinking water should be given during the winter in a fountain or dish from which the ice can easily be removed if it forms, as it frequently will in most places. If the dish has straight sides, or sides that flare out a little, it will be necessary simply to turn a little hot water over it and the ice will immediately slide out.

Select the best of the early layers and take the best care of them during the winter so that they will be in good breeding condition in the spring. Then by keeping their eggs for hatching you will be able to increase the laying power of your flock. No progress can be made by setting eggs from any except the best layers.

Pennyroyal Keeps Furs.

All insects dread pennyroyal. The smell of it destroys some, and drives others away. At the time that pennyroyal can be gathered or bought, get some oil of pennyroyal, pour some into a saucer, steep in it pieces of new cotton wadding, and place where required. When putting furs away for the summer, fold carefully with a little pennyroyal, then wrap in a newspaper, and gum down the edges. When wanted they will be found the same as when put away.

She Gives Them All the Credit

SAYS DODD'S KIDNEY PILLS MADE HER WELL.

Miss Gertie Newman, After Two Years' Suffering, Tells How She Found a Complete Cure.

Boyd's Cove, Notre Dame Bay, Nfld., Jan. 24.—(Special.)—"After two years of weakness and suffering I am again in perfect health, and I give all the credit to Dodd's Kidney Pills."

That is the statement made by Miss Gertie M. Newman, an estimable young lady living here. She is so overjoyed at her recovery that she wants all suffering women to know how she found her cure.

"I had a cold to start with," Miss Newman continues, "and then things just seemed to go from bad to worse. My back ached, I had cramps in my muscles, and I suffered from headaches. My sleep was broken and unrefreshing, my eyes were puffed and swollen, and I perspired freely with the least exertion. I was always irritable, and in the mornings I had a bitter taste in my mouth.

"Reading of cures by Dodd's Kidney Pills I decided to give them a trial. I took a dozen boxes in all and you can see how they helped me. I recommend Dodd's Kidney Pills to all suffering women."

Dodd's Kidney Pills are suffering woman's best friend.

NOVELTY SKATING ACCESSORIES

This striking skating outfit is of black panno velvet with inserts of white glazed kid, this scheme being followed in the hat, muff and collar. It is worn with a gabardine suit.

A TABLE OF LOGARITHMS.

Its Use in Working Out Complex Mathematical Problems.

A logarithm is an exponent, and an exponent is a number showing how many times another number has been used in any multiplication. Ten times 10 equals 100. It was used twice, and its exponent is 2. Ten cubed equals 1,000, and its exponent is 3; while 10 to exponent 4 equals 10,000, and so on out toward infinity. But suppose that we wish to use 10, say 1¼ times or 1⅓ times instead of twice. Then the exponent must be computed, and exponents thus computed are always printed in tables.

Thus, as I am now writing, the paper, as always, by day and by night, is very near a precious book, a table of logarithms for all numbers from 1 to 108,000, computed out to seven decimal places. To give examples of their use, suppose that you wish to multiply 8 by 11. Look in the table and you will find the logarithm of 8 to be .9030900, and the logarithm of 11 to be 1.0413927. Add these and the sum will be 1.9444827. Look along the column and it will be seen that this is the logarithm of 88.

Easy. But suppose you wish to multiply two strings of figures of from 5 to a dozen. In the great standard mathematical sciences, such as astronomy, physics and chemistry, the multiplication and division of immense numbers are required. Thus, let us square the number 31558149—that is, multiply itself by itself, a tedious job. But this toil can be saved by the use of logarithms. Thus, the logarithm of 31558149 is 7.4991289, taken directly from the table. Then, to square any number multiply its logarithm by 8, and this logarithm multiplied by 2 equals 14.9982578. Now, by looking in the table, the number of which this is the logarithm is 995916962096851. Hours of work are performed in a few minutes. Edgar Lucien Larkin.

MELODY DEAFNESS.

To Those Who Are Afflicted With It Music is Simply Noise.

Every one has heard of color blindness, but few people are aware that there is such a malady as tune deafness. It prevents those affected from appreciating music, which to the melody deaf is nothing but noise.

The most intelligent people often suffer in this way. Empress Catherine of Russia used to declare that for her music was a nerve trying din, and Napoleon I. hated any form of melody. Victor Hugo had to be coaxed by the composer to put his famous lines to music. "Are not my verses," he used to say, "sufficiently harmonious to stand without the assistance of disagreeable noises?"

Doctors say that the power to appreciate music depends upon a perfect combination of the nerves and brain. Some people's nerves readily carry musical sounds to the mind, while in others nerves impede the passage to the brain cells.

Good musicians are more often born than made. Nature has provided them with nerves which instinctively carry musical chords to the brain. That is why a good musician can memorize a tune after hearing it played over once. Every note has been clearly recorded in his brain.

Those with less sensitive musical nerves receive a dull impression of any music they may hear, and thus they are unable to remember it unless it is drummed into their brain by repeated playing.—Pearson's Weekly.

It is said that the Coffee River Railroad, in Alaska, runs over a glacier for seven miles. Talk about your coffee coolers!—Manchester Union.

FARM GARDEN

STALLION OUT OF BREEDING SEASON.

Many stallions are at least partly ruined between seasons. This is due to improper feeding and care. Some men starve their stallions after the breeding season on the theory that they cannot afford to feed liberally when there is no income. This is certainly a mistake. It does not even result in a saving of feed as it will cost more to put the horse back into the proper condition when the breeding season opens. It is cheaper to keep a horse in good flesh all the time than to allow him to run down during a part of the year and then by heavy feeding for a few months bring him back to the required condition.

Crushed oats and bran with good hay is hard to beat. Ground corn or kafir, together with plenty of bran and oil meal, also makes a splendid ration. Horses that are overfed on corn or kafir are never sure foal-getters. Bran is always a valuable supplement to any grain ration. It relaxes the system generally, corrects or prevents digestive disorders of bone and tissue building materials. Soft, warm bran mashes one or twice a week will serve to keep the bowels in good condition, and a little Epsom salts may be added. Roots should be used in some form during the fall and winter seasons. They certainly help to keep the stallion in good condition and to keep his digestive tract in a good, healthy condition. In the spring a few pounds of grass or other green feed may take their place.

Conditioning a stallion is not laying on flesh, but it is getting him in good health, improving his muscles and putting plenty of vigor and vitality into him.

The amount of grain that should be fed horses will vary so much in their requirements that it is difficult to name any definite quantity which a horse should have as a daily ration. It should be regulated by the man feeding the horse, and should be governed by the capacity and needs of the horse. A stallion should not be given more than he will clean up within a half hour after feeding. Always have him a little hungry. Do not overfeed on hay, as it is not necessary to crowd the horse full of hay all the time. Do not stuff his manger full of hay once or twice a day, and allow him to eat till he cleans it up. That is a poor way to feed hay. Chopped hay, mixed with the grain, increases the efficiency of the ration. The horse should be supplied with plenty of good, fresh, clean water. During the hot weather the horse should be watered quite frequently. Overfeeding and little or no exercise tends to cause swollen legs, scratches, grease; a wet stall causes thrush and canker.

When you have done your part so far as feeding is concerned, remember that the horse needs exercise. If you have a paddock in which he can run, so much the better. If there is no other way to furnish exercise, the horse should be walked. He must have exercise if you expect results from him. A horse that is confined is not a very sure foal-getter. The very best exercise for a stallion is to work him daily at some light work. If every stallion received a moderate amount of exercise, the number of foals would increase from 15 to 20 per cent. Keep him in a well lighted stable, and don't leave him alone away from the other horses.

Another thing some people forget is grooming. Frequent and thorough grooming is very essential to keep the stallion comfortable and the skin in good, healthy condition.—W. L. Blizzard, Department of Animal Husbandry, Oklahoma A. and M. College, Stillwater.

NOTES.

Brome grass is one of the best pasture plants. Its good points are that it has a good root system; therefore stands tramping well, starts early and grows late, is leafy and makes a fine pasture. It does well on poor as well as on good soil, but responds splendidly to good soil and manuring.

If every crop and all the livestock pay as good profit on the original investment and for the labor given as the hens, the farms of this country would be far more profitable. Yet little thought is too often given to the hens and very little provision made to make them more profitable. The time has come when the hen should have a "square deal."

A Pennsylvania farmer says he believes the use of more lime, stable and green manures and deeper plowing will maintain the crop yield with less potash than farmers have been buying.

An experienced gardener says he would not use lime on potatoes, as a sour soil is desired for potatoes as a protection against scab. He would not apply lime where peas are to be sown. It has a tendency to make them hard when cooked. He does not want lime where he sets strawberries, blackberries or pear trees. He would use lime lime on cherries, plums, raspberries, gooseberries, currants, beets, turnips, spinach and cantaloupes. as these trees and plants will be helped by a generous application of lime broadcast and worked into the soil.

For quick results use acid phosphate; for a permanent farming system extending through a period of years, use ground phosphate rock. This is the advice of a practical Pennsylvania farmer.

To do a particularly good job of oiling the harness, one that will last for three months under the most trying conditions, lay out each strap on a board as soon as the surface has become dry after washing and apply a liberal coating of neatsfoot oil. Next apply a coat of beef tallow, thin enough to go on with a stiff brush, then lay all the straps out on a board and allow them to dry thoroughly, 24 hours not being too long.

Muslin windows, rightly placed, provide plenty of fresh air in the cow stables without creating a draught. And fresh air is essential to the health of the herd.

Trees set in holes blasted with dynamite are said to bear fruit earlier than when set in spade dug holes.

Every farmer ought to appoint himself an efficiency expert to see that every acre on his farm is yielding him a profit.

The use of blinders will eventually render a horse almost totally blind. Human vision is binocular—that is, we see the same with both eyes—and so adjust the axis of the vision that the object appears single though seen with both eyes. But the eyes of the horse are placed on both sides of his head and the axis of each eye is nearly at right angles with the longitudinal line of the body, so that it is impossible for the horse to see the same object distinctly with both eyes. By blinding the eye in the direction in which it was intended by nature that the horse should see, the horse is forced to use an oblique vision, as it we should cover the front of our eyes and be compelled to see only by the corners of our eyes. A horse is more readily frightened when he cannot see the object of his dread than he would be if he had a clear view of it. This truth, apparent to any observer of horses, defeats the original theory of blinders, which was the opposite.

CURES CATARRH, BRONCHITIS BY SWIFT CERTAIN METHOD

Thousands of drug fiends have been started on their downward course though catarrh snuffs containing some habit-forming drug. If you suffer from cold, sneezing or catarrh, don't use a snuff; use a sensible treatment like Catarrhozone. It heals and soothes, brings relief at once, cures thoroughly. In bronchitis and throat trouble, no doctor can do better than prescribe Catarrhozone. Try it; see what wonders it works—what power it possesses. Different from the old way—you inhale Catarrhozone. Get a dollar outfit, which includes the inhaler, and is guaranteed. Smaller sizes, 50c; sample size, 25c, at all dealers.

The Elderly Safety Pin.

The safety pin and the hook and eye are generally supposed to be modern inventions. The former, in fact, has been credited to Queen Victoria. She may have improved upon it, but certainly she is not entitled to the distinction of having invented it. Numerous specimens of the useful contrivance have been found in the ruins of Crete. Some of them are in the museum of the University of Pennsylvania, and the museum has also a hook and eye from the same place.

Both the safety pins and the hook and eye now in the museum were made at least 500 hundred years before Christ. Some are made of bronze, but amber or some other material was often used on the more elaborate pins. Some were even made of finely wrought gold.—Youth's Companion.

Clean soiled wallpaper with bread dough or a cloth dipped in oatmeal.

The Housekeeper

For cleaning a copper kettle the following is excellent: First rub the surface with lemon skin and salt; when this is finished wipe the surface quickly and rub with a dry chamois skin.

When baking biscuits, roll the dough out thin, double and then cut out as usual and when baked the biscuits will fall apart without cutting or breaking and so be more appetizing.

If a little vinegar and a handful of salt are added to the water in which colored clothes are washed, it will be found that the color will not run, and the different shades will be made brighter.

A small pinch of carbonate of soda in the water in which cabbages are boiled preserves the color of the vegetable and lessens the unpleasant odor while boiling.

Mica in stoves, when smoked, is readily cleaned by taking it out and thoroughly washing with vinegar, a little diluted. If the black does not come off at once, let it soak a little.

When making cotton flannel broom bags, make them four or five inches longer than is really necessary. Then as the bottom wears out, run a new seam across the bottom, making practically a new bag with a single seam.

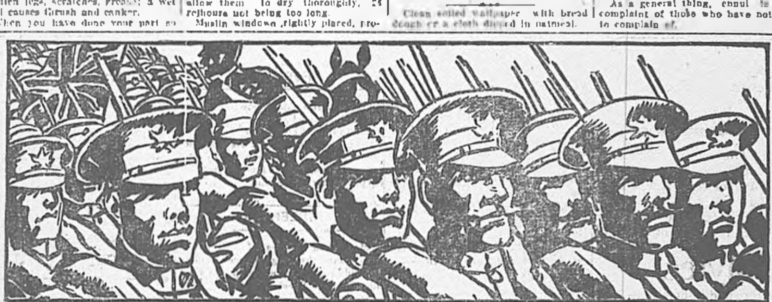
Buy a coarse gray blanket if you do not have one and keep it to place on the floor when the baby is playing there. Put the toys on it, and if it is necessary to quickly clean the room of toys pick up the blanket.

To remove ink from books, valuable papers and the like a solution of water and oxalic acid, citric, tartaric or any sour acid can be applied to the blemish, and, while often the process must be repeated, it will finally remove the blemish.

Fish Swarm in the Bosporus.

Of all its many descriptive epithets, ancient and modern, none has clung with more persistent tenacity than the simple, early adjective of "fishy" Bosporus. Seventy edible varieties of fish, familiar to connoisseurs, sport in its waters. Some have their permanent haunts within the stream. The most are migratory. The instinct of the seasons moves them northward or southward with the birds. The strait is their only possible highway between the Black Sea and the Mediterranean, their summer and winter homes. From March until June and from August to December men, poised in the quaint perches high on piles above the water and constantly on the outlook, watch for the flash of their gliding scales.—From "Constantinople," by Dr. Edwin A. Grosvenor.

As a general thing, ennui is the complaint of those who have nothing to complain of.



What Dr. Chase is Doing for Our Soldier Boys

At Home and Abroad---To Every Soldier a Full Sixty-cent Box of Dr. Chase's Ointment Free---Greatly Appreciated by the Boys.

Realizing that ointment is one of the prime necessities to the soldier, both in training and at the front, it was early decided to supply all Canadian recruits free of charge.

That this offer was appreciated by the military authorities is best evidenced by some of the replies received from Headquarters, as well as from individual camps.

Brigadier-Gen. Sir Sam Hughes wrote:—"This is indeed a most useful and acceptable donation, and for which please accept my most sincere thanks."

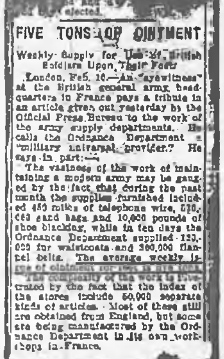
Lieut.-Col. Murphy, in charge of Valcartier Camp, wrote:—"I would be very glad to receive donation of Dr. Chase's Ointment, and feel sure it would be acceptable."

One Major reports:—"The Ointment arrived on the day the Battery completed 24 miles route march on foot, and I can assure you the Ointment was very beneficial, and much appreciated by those with sore feet."

For the 31st Regiment, Owen Sound, Q.M. Sergt. Miller writes:—"I have been directed by Col. Chisholm to tender to you our hearty thanks for your splendid gift of Dr. Chase's Ointment to the members of the Overseas Contingent. I can assure you it was appreciated by the men, and if the quantity had been doubled we would have had a hard time to save a box. The men swear by it."

From Niagara Camp Q.M. Sergt. O. M. Stevenson writes for the 37th Battalion:—"The Ointment has been distributed among the boys of our company, and is highly appreciated by them. I assure you that they will find it very useful both here and at the front."

Further distributions of Dr. Chase's Ointment will be made to the recruits assembling for training at the various towns and cities throughout the country. Officers in charge are requested to advise us how many boxes they can use, allowing one for each man. In a score of ways this Ointment is useful to the soldier, and it is our desire that every man shall be supplied free of charge. Address Edmanson, Bates & Co., Ltd., Toronto.



FIVE TONS OF OINTMENT

Weekly Supply for Use of British Soldiers Upon Their Feet.

London, Feb. 10.—An "eyewitness" at the British general army headquarters in France pays a tribute in an article given out yesterday by the Official Press Bureau to the work of the army supply departments. He calls the Ordnance Department "military universal provider." He says in part:—

"The vastness of the work of maintaining a modern army may be gauged by the fact that during the past month the supplies furnished included 450 miles of telephone wire, 500,000 sand bags and 10,000 pounds of shoe blacking, while in ten days the Ordnance Department supplied 125,000 for waistcoats and 300,000 flannel belts. The average weekly issue of ointment for the feet is five tons. The complexity of the work is illustrated by the fact that index of its stores include 50,000 separate kinds of articles. Most of these still are obtained from England, but some are being manufactured by the Ordnance Department in its own workshops in France.

Dr. Chase's Ointment

THE AGONIES OF NEURALGIA

A Nerve Trouble, Always Due to Weak, Watery Blood.

Only those who have been attacked with neuralgia can form the faintest idea of what its victims suffer. A tingling of the tender skin, a sharp sudden stab from some angry nerve; then piercing paroxysms of pain that is neuralgia. The cause of the trouble is disordered nerves, due to weak, watery blood. The cure is Dr. Williams' Pink Pills, which make new, rich, red blood, and thus soothe and strengthen the disordered nerves and cure neuralgia. Mr. Louis Martin, Mildmay, Ont., says: "I am writing to let you know the great benefit Dr. Williams' Pink Pills have been to me. Two years ago I was a physical wreck. My nerves were all unstrung and I suffered tortures from neuralgia, in the head and throughout the nervous system generally. I was almost unfit for work, and only managed to get along with the greatest difficulty. I doctored for about five months and in this time took over forty dollars' worth of medicine without any benefit. More, I was actually growing worse, and finally had to take to my bed. My nerves got so bad that I could not turn over in bed without help and the pain was something awful. As I am a farmer you can easily see that necessary work was being neglected, so I sent for a brother who was in Alberta, to come and take charge of the work. When my brother arrived he at once urged me to try Dr. Williams' Pink Pills, telling me of some cures that had come under his observation. I got half a dozen boxes, and before they were all gone there was no doubt they were helping me. Altogether I used nine boxes of the Pills and by that time I was a well man, and it is impossible to say how thankful I was for my release from pain."

You can get Dr. Williams' Pink Pills from any dealer in medicine or by mail, post paid, at 50 cents a box or six boxes for $2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

KINDLY TALKS CHECK DRINK

Dutch Authorities Have Novel Method to Fight Liquor Habit.

And It Seems to be Doing an Excellent Work.

"If you are a victim of alcohol, come and talk it over with us at the Consultation Bureau at The Hague." In this helpful spirit a strong effort is being made by the Dutch authorities to combat the evil of over-indulgence in intoxicants. The bureau has been installed in spacious premises in the centre of the Netherlands residence city and every Wednesday an eminent medical man and other helpers are in attendance to give friendly advice and to find work for men and women addicted to intemperance who find themselves virtually outcasts owing to their unfortunate habits.

It has been found that "talking at" those who have fallen victims to the drink habit has proved in most cases ineffective and now the more sensible method of appealing to reason and human feelings is being tried with apparently good results. Many men and women attend these weekly consultations, coming from all parts of the country—generally, at the instance of well-wishing employers, relatives and friends—to confer with the expert specialist in charge of the bureau.

No sermon is read to the victims of the weakness. The applicant is asked in a kindly way about his or her occupation and mode of life in general and as to the cause of his or her lack of occupation. Usually the reply indicates the person's lack of will-power when invited to drink. The doctor inquires why the victim does not refuse the liquor and the answer generally comes, "I cannot for then I am asked the reason and I don't know what to say." "Why," said the doctor, "now you can tell them that the doctor orders you not to take intoxicants. Try that for a week and then come back and see me."

In most instances work is provided for the drink victim, and the employer is requested and consents to exercise a kind or friendly supervision over his new employee, and to report results. Reports of the bureau show that the system is working well in hundreds of cases, especially when the man or woman is comparatively young. Others, apparently, are too far gone to be amenable to moral suasion, but even some of these listen to the kindly advice, and try again and again to overcome their own weakness, but many of them inevitably drift once more, and eventually find their way into the prisons and municipal and State institutions for the mentally deficient.

Meanwhile a campaign also is being carried on by the numerous abstinence societies throughout the country to combat the drink evil. Congresses were held in the third week of September at Deventer by the General Netherlands Total Abstainers' Union, and at Utrecht by the National Commission to Counteract Alcoholism, while at Utrecht an exposition was held to show the bad effects of indulgence in strong drink.

Speakers at these congresses pointed out to their audiences the steps taken by the various belligerent countries to prevent alcoholism in the armies and the beneficial effects the measures taken had had on the health of the troops undergoing so many privations and hardships in the trenches. At the same time it was argued that these regulations, having proved their value in increasing the efficiency of the soldiers, should not be confined to the armies, but should be extended to the peoples in general, as had been done in Russia with success.

Some of the military commanders in Holland have issued strict orders in the garrison cities under martial law to prevent excessive drinking both among the soldiers and the people. In Oliange, for instance, all clubs, cafes and liquor stores must be closed from an hour before sunset until an hour after sunrise, and heavy fines are inflicted for contraventions of the regulations. Other places, too, have similar restrictions, but in general in the Netherlands the rules governing the sale of intoxicating drink are very elastic.

Teamsters' Sheep-Skin Lined Jackets

Double breasted with high storm collar. Outside cover of extra strong khaki drill. Pockets reinforced with leather. Lined through body and collar with clipped sheep pelts. Extra good values and guaranteed to give best wear. Sizes 38 to 48. Prices **$3.50, $4.50** and **$5.00.**

Men's Fur Collar Coat, Imitation Fur Lined at $12.50.

The best value ever offered in a man's fur collared coat is a line we are selling this season at this remarkable price. High fur storm collar of brown Marmot, lined throughout with heavy plush, imitation fur. Outside shell of good heavy beaver. 50 to 52 inches long. Sizes 38 to 46. Very special at $12.50.

MEN'S HEAVY "TIGER BRAND" UNDERWEAR

The best heavy ribbed underwear we have shown in years, made in four weights, of splendid domestic yarn. Unshrinkable, full size body in shirts and double breasted. Sizes 34 to 46. Prices 75c, $1, $1.25 and $1.50.

Men's Fur Collar Coat and Lined With Clipped Black Dog Pelts

Extra good quality brown Marmot collar. Shell of best quality black beaver. Lined throughout with black dog pelts. 52 inches long. Sizes 38 to 44. Knitted wind shields in cuffs of sleeve. Extra value **$25.00.**

TOWN AND COUNTRYSIDE

News From the Neighboring Towns and Villages Written for The Telescope by a Staff of Live Correspondents.

MILDMAY

Mr Joseph Becker held his auction sale at Deemerton last Thursday. A large crowd was present although the roads were in a bad condition.

The Mildmay hockey boys played a stirring game with the boys of Walkerton last Friday night. The weather being mild, the ice was soft and slushy. A goodly number of hockey enthusiasts accompanied the visiting team. The final score was 11—1 in Mildmay's favour. Jack Shea of Palmerston acted as referee.

On Thursday night the home of Mr Joseph Heisher was partly destroyed by fire which originated in the woodshed. The local fire brigade were soon on the job and had the fire under control before it did very serious damage to the main part of the house.

Mr E R Schwalm of Pinkham, Sask. after spending a month with friends here, left on Monday for Toronto, where he has secured a position in a munition factory.

A very pretty church wedding took place in the 10th con Lutheran Church on the 19th, when Miss Katie Ann, second daughter of Mr and Mrs Conrad Hammer of Carrick, became the wife of Mr Jacob G Russworm of Hanover. Rev Mr Brackebush of Normanby performing the ceremony. The happy young couple left on the afternoon train from Neustadt to spend their honeymoon at Detroit and Windsor. Upon their return they will take up residence in Hanover where Mr Russworm is in the jewelry business. Their numerous friends here extend their very best wishes.

The Red Cross Social which was held on Monday evening at the home of Mr. Thomas Birrell was well attended and a pleasant time spent by all present.

Pte. G Garland of Walkerton spent Sunday at his home here.

Pinkerton is becoming famous! If you don't believe it ask any of those young people who were in Paisley on Thursday evening and they will tell you how renowned our burg is.

An exciting chase after a lost glove took place down the big hill on Sunday evening, but the owner managed to make connections before he reached the bottom.

Mrs Jas Thompson of Glamis, is visiting at Mr. Cecil Garland's.

Mrs Wm Carey of Brant, is visiting her sister Mrs N Garland.

NARVA

Messrs Adam Foreman and Jack Bell are having phones installed in their homes this week.

Miss Irene Colhan returned this week after spending her holidays.

Owing to the few pupils who were at school on Monday and Tuesday of last week, half-holidays were given to those present.

A number from here drove to Paisley on Wednesday for oil, which they purchased some time ago.

SOLWAY

Owing to the bad storms the first of last week, there was no school here.

We are all pleased to see Vera Edgar out with us again, after her severe illness.

Several cases of measles have been heard of in this locality. We hope the epidemic will soon be stopped.

Our teacher, Mr Thompson, attended the "At home" in Stratford Normal School, last Friday evening.

It is time to try some skates this winter. Make the best of the good ice, while it lasts.

Mr. Will Howe is busy taking orders for fertilizer and grass seed. Patronize the home man.

A number of our soldier boys Sundayed at their homes here.

The latest tongue-twister is, Bill had a bill board and bill had a board bill and Bill's beard bill bored Bill till Bill sold Bill's bill board to pay Bill's board bill, and then Bill's board no longer bored Bill.

BRANT

A surprise party was given at Mr. Geo. Alexander's in Brant on Friday, Jan. 14, when over thirty friends and neighbors gathered to express their good will and fellow feeling towards Mr. Earl Alexander who recently joined the soldiers of the King. An address was read by Mr. Stanley Belbeck and the presentation of a signet ring made by Mr. Gordon Alexander. A very appropriate reply was made by Mr. Earl. The remainder of the evening was spent in cards and dancing. Refreshments were also served. The address was as follows:—

Eden Grove, Ont.,
Jan 14, 1916

Mr Earl Alexander,
Dear Friend,—

We, your friends and neighbors, have gathered here tonight to spend a quiet evening, before your departure to don the khaki.

You will be greatly missed in our social circle and we ask you to accept this ring as a token of our esteem and a remembrance of the past. Our best wishes go with you in this honourable decision you have made for your country.

Signed on behalf of your friends and neighbors.

MAPLE HILL

A successful oyster and fowl supper was given by C. O. F. Court Woodlea, No. 504, in Brockelbank's Hall on Monday evening. After a sumptuous supper had been enjoyed, an excellent program was given consisting of selections by the Starlight orchestra, recitations by Messrs. Tullock and Threndyle, quartette by Revs R. S. Nesbitt, M. Craig, Chas. Ormiston, Ed. Threndyle; song by Mrs Little. Mr. W. McNaughton, presided acceptably as chairman. After the program a number of the young folks enjoyed tripping the "light fantastic."

The young ladies of this vicinity are holding a series of patriotic dances, the proceeds going to the Red Cross Funds. Fourteen dollars was realized at the dance last Friday night.

Winter Tours to Florida, Lousiana, Mississippi, California, etc.

The Canadian Pacific Railway offers particularly good service to Detroit where direct connection is made for Florida, via Cincinnati and Atlanta, Ga. Jacksonville, Florida is reached second morning after leaving Detroit. Excellent connection for Florida is also made via Buffalo.

The Canadian Pacific-Michigan Central route will be found the ideal line to Chicago, where direct connection is made for the Southern States. New Orleans is reached second morning after leaving Toronto. Excellent connection is also made at Chicago for points in California, Utah, Nevadah, Texas, Arizona, etc.

The Dining, Parlor and Sleeping Car service between Toronto, Detroit and Chicago is up-to-date in every particular. Connecting lines also operate through sleeping and dining cars.

Those contemplating a trip of any nature will receive full information from any C.P.R. agent; or write M. G. Murphy, District Passenger Agent, Toronto.

SILVER MEDAL CONTEST

Exceptional Ability Shown By Young Lady Contestants Friday Night

The Silver Medal Contest given under the auspices of the Walkerton Branch of the W. C. T. U. on Friday night was a great success. The program was good, and the recitations given by the four contestants were well chosen and excellently rendered. A large audience was present and everybody enjoyed the entertainment with the possible exception of the judges, who had no easy nut to crack in naming the winner. The judges felt that all four candidates were to be highly commended. They gave the decision in favor of Miss Florence Cunningham. The other contestants were Miss Ruth Garner, Miss Gertrude Eckel and Miss Irene Everatt. Two other contestants were unable to appear, Miss Mabel Coulter owing to bereavement in the family, and Miss Gladys Rife, owing to illness. In pinning the silver medal, and the silver pins on the young ladies, Mrs. Stauffer, president of the local Branch, W. C. T. U., complimented the young ladies highly.

The chairman, Rev. Thos. Wilson, explained the object of the Silver Medal Contest, and throughout the program his spicy humor gave a relish to the intellectual feast. The program included:—Quartette, "The Fight Is On," Misses Whitehead and Warren, Messrs C. Tovell and O. Schwindt; Solo, Mr. Gus Royce; Duet, Misses C. Rife and Dippel; Solo, Miss Dippel; Solo, Mrs. Brewer; Instrumental, Napoleon's Last Charge; Recitation, John Frame, "The 160th Bruce Battalion" a stirring poem, composed by Mrs. Stauffer, president of Walkerton W. C. T. U. God Save the King.

MILDMAY

Revival meetings are being held in the Evangelical church here.

The Sacred play, "The dawn of Redemption," given by the young people of the Sacred Heart church last Wednesday and Thursday night, was a decided success. The Hall was packed to the doors on both nights.

Miss Helwig of Neustadt is visiting her sister Mrs Gral Schuler this week

Miss Melinda Pletsch is spending a week with Miss Maud McIntosh of near Clifford.

Miss Lillie Sieling is visiting in Cargill and Walkerton this week.

The reading room of the Public Library will be open hereafter for the use of the soldiers on Sunday.

A meeting of the Brant Farmer's Club will be held at Mr. Abram Rowand's on Tuesday evening, Feb. 8. Ladies welcome.

Dr. W. B. Halladay has been appointed representative of the Public School Board on the High School Board.

Mr. Jas. L. Archer of Elm Creek, Man., writes:—"The Telescope is just as welcome to my wife as a letter from home."

"Jack" Wallace, an old Walkerton bandsman of the 32nd, has signed up with the 160th. He has been living in Paris.

Harris Rife, Sam Vogan and Roy Wesley will take in the lieutenant's training class at London, which begins March 6th.

Mr. Henry Spitzig, millwright, had his fingers rather badly squeezed while working at the Power Co's. dam Monday night.

Yesterday was Candlemas day. As the bear did not see his shadow, we may expect an early spring according to the old tradition.

The Telescope is interested in the annual church meetings and would be glad to get the reports from the secretaries of the annual business.

Walkerton is evidently going to seed in the sporting lines, but they are making up in the matter of recruiting. —Mildmay Gazette.

Mr. George Procknow, formerly of Brant, is taking possession of the farm which he recently purchased two miles west of Ambleside.

Miss Mabel Garner, who is training at Bruce County Hospital, is spending a few holidays with her sister, Mrs. Ball, at Hanover and other relatives.

Every housewife should consult carefully the Walkerton merchants ads in the Telescope. There are always many things worth while.

Brock Attwood, a young man from San Antonio, Texas, is visiting his uncle, Mr. T. E. Attwood. He is the son of Mr. Joe Attwood, an old Walkerton boy.

Each of the Walkerton Banks has two members of its staff in the 160th Batt. Jim Murray and Mike McNab of the Merchants Bank, signed up this last week.

Mr. Jacob Dippel took a trip through the country around Brantford last week, looking for holstein cattle. He bought a couple of choice registered holstein cattle at Brantford Fair.

Conductor R. H. Carson of the C. P. R., who has been transferred to Toronto, was given a little farewell supper at Erdman's on Tuesday evening by the local C. P. R. employees.

The marriage of Miss Winnifred Victoria, daughter of Mrs. John McConkey of Springhill Farm, Brant, to Mr. Thomas A. O'Neil of Greenock takes place at six o'clock p. m. Wednesday.

Miss Martha Fortune, sister of Dr. Fortune, sails this week for Egypt to take a post in connection with the military hospital work. Miss Fortune is a graduate of Johns Hopkins Hospital, Baltimore.

A rink of local curlers, composed of Walter Smith, Jos. M. White, L. H. McNamara and H. M. Lay, took in the Harriston bonspeil on Tuesday. They were beaten by a crack rink of commercial travellers.

A patriotic meeting will be held in the Town Hall on Monday night, with the new Regimental Band in attendance. Owing to the limited seating capacity of the hall, admission will be by invitation card.

Mr. James Whitehead has sold the Blue Springs Farm in Brant, belonging to the Judge Barrett estate to Mr. John Tanner. He has also sold the Albert Miller house in the East Ward to Mr. Albert Bell.

The sacrament of the Lord's Supper will be observed in Knox Church next Sunday morning. Preparatory services will be held on Friday evening, Feb. 4, at 8 o'clock, conducted by Rev. George Mason of Harriston.

Mr. Wm Heater took possession on Tuesday of the barber shop at Cargill, which he purchased recently from Mr Bert Hoover, son of Mr. Amos Hoover, of Walkerton. Mr. Hoover is not certain yet where he will locate.

Jack Frost of Chesley who was rejected by the 160th on account of his lack of stature, is bound to get to the firing line. He went to Toronto this week to join a bantam battalion but found they were not organizing yet.

Mr. Barney All, an old Walkerton boy, writes the Telescope from Plum Coulee, Man:—Crops have been very good in this district. Last fall business was very good. We are having more snow than we've had for years and the weather is very cold.

Mr. and Mrs. John Ramsbottom attended the wedding at Erin, last Wednesday of the former's sister, Miss Jessie Ramsbottom to Mr. P. J. McTaggart of Belle Fountain. Mr. and Mrs. McTaggart spent a few days here while on their honeymoon.

The last half of January has been establishing new records in the weather line. The continuation of soft drizzly weather has made the roads pretty bad throughout the country. The river has been at nearly flood height here the past week.

Two of Chief Ferguson's sons Jack and Archie, enlisted in the 160th on Saturday. The Chief was also seized with the desire to join the King's colors and presented himself at the recruiting office, but the age limit stood in the way of his acceptance.

Grey County Council made a grant of $7,445 to the Grey County Battalion for purchasing equipment necessary for overseas service and also a grant of $3,000 to the Citizens' Recruiting League, for the purpose of meeting the expenses in connection with the work of recruiting.

W. L. Bland was here last week. He took out a captain's commission for the 160th Bruce regiment. He is a son of the late L. T. Bland, formerly M. P., and is giving up his big farm and interests over near Kincardine to go and fight for King and Country. How can Britain lose when men of Bland's type come forward?

At Cape Croker over forty Indians have joined the colors. Here Rev. Father Cadat is doing great work in the recruiting line and is looking well after the boys who have enlisted. The genial Father has had the partitions removed in his house and a reading room and tables for games put in to provide a good place for the boys in khaki to spend their leisure hours.

A member of the 160th Batt. has got into trouble by doing what amounts to deserting. If the regimental authorities had not hunted him up and taken him in charge before the statutary 21 days had elapsed, he would have been technically guilty of desertion. He was brought back from his home in Clifford on Sunday and lodged in the jail here. As the young fellow appeared not to realize the seriousness of his offence, it is possible he may get off lightly.

+ + +

Red Cross Box Social

A Red Cross Box Social will be held in the Forester's Hall, formerly Brocklebank's Church, on Friday, Feb. 11th. The program will be given by the Elmwood Glee Club, assisted by leading entertainers of Walkerton and Hanover, and by local talent. It will be the treat of the season.

It was by a close shave that the Finance Committee of the County Council missed voting $700 instead of $500 for fitting up the old school here for a Non-Coms. school. Chairman Kastner gave the casting vote against the $700 while Reeve Nesbitt had been called out of the room. "Spence" brought in an amendment for the $700 in council later but could not get sufficient support.

+ + +

Certificates of non-acceptance have been granted the following men who offered their services to the 160th Batt.:—Albert Miller, Walkerton; Walter McGregor, Hepworth; Ivan McGill, Walkerton; Harry Leech, Walkerton; Vincent Dawns, Hepworth; George Hackett, Chesley; John Haas, Walkerton; Garnet Porter, Wiarton; Howard Richmond, Chesley; Arthur Frost, Chesley; James Walks, Chesley; Gordon Smith, Paisley; Herbert Knight, Port Elgin; Herbert Rawlings, Allenford; Arthur Barnes, Ripley; A. E. Fisher, Wiarton; James E. Gilbert, Wiarton; Harry McDuff, Port Elgin; Oswald H. Baker, Allenford; Wm. Selling, Walkerton; Fred Piper, Kincardine; Malcolm Cook, Southampton; John A. McLean, Southampton; Andrew E. Robinson, Kincardine; Fred Brisian, Walkerton; Lefevre Rene, Port Elgin.

+ + +

Over Six Hundred

Up to Wednesday afternoon, the enlistment of the Bruce Battalion, all ranks, totalled 606.

A Big Drop in Wood

First class beech and maple wood, 18 and 20 inches at $2.50 per cord, cash.—E. J. Skelton, phone 111.

+ + +

Caretaker Wanted.

Caretaker wanted for Bruce County Hospital. Applications to L. O. Benton, Chairman of House Committee.

+ + +

Heed This Knock

Don't delay, get measured today at Rourke's sale; and save a five-spot on your spring suit and o'coat. Read ad. on page one.

+ + +

Box Social

A box social will be held at S. S. No. 4 (South Line) on Friday evening, Feb. 18th. A good programme is being arranged. Proceeds to go to the Red Cross Society.

+ + +

The Prohibition Petition.

Walkerton furnished a comparatively low proportion of signers to the petition circulated last week to make Ontario dry. Out of about a thousand adults in the town, six hundred persons signed.

+ + +

On the Job Again

The Telescope had a service postcard on Monday from an old Walkerton boy, Private Harry Wade, stating that he was well again. Wade was in the hospital for quite a while recovering from shrapnel wounds.

+ + +

Meeting at Formosa

On Friday night a recruiting meeting at Formosa is to be addressed by Judge Klein, Rev. Father Cummings, Mr. John Rowland and other prominent speakers. Moving picture war scenes will be shown. The 160th band will accompany the speakers to Formosa.

+ + +

Honored by King George

In the last list of honors conferred by his Majesty the King, appeared the name of Mr. Arthur Hyde Lay, cousin and school chum of Mr. H. M. Lay of Walkerton, who was honored with the title of C. M. G. Mr. Lay, although a comparatively young man, has had a distinguished career in the British Consular service. He has filled appointments in Japan and China, and is at the present time Consul-General for Corea.

THE MILK QUESTION

Dear Mr. Editor:—

I write to give public expression to a matter of private opinion and daily talk, namely, the milk market of the town. Is there any good reason why the milk market should be kept secret any more than the meat or bread markets, are they not equally important to the community? If defect is noticed in the meat or bread market we soon hear about it; why not if the milk is not what it should be? Of the three, the milk is the most important where infants and young children are fed largely on milk. Why should milk taste like water? Why is there no appearance of cream on milk? Where does the cream that is sold for four times the price of milk come from? Or has the public any right to ask such questions?

Observer.

DIED

CALHOUN—In Elderslie, on January 24th, Mr. Chas. John Calhoun, aged 83 years.

HERRON—In Elderslie, on January 23, Mrs. William Herron, aged 58 years.

MAHER—At the residence of her daughter, Mrs. Patrick McCurdy, lot 9, Con. 1, Elderslie, on January 23rd, Mrs. William Maher, in her 83 year.

MEUSER—In Regina General Hospital, on January 18th, Mrs. Harry Meuser (Nee Miss Florence Leggett,) aged 37 years.

RUTHVEN—In Elderslie, on January 25th, Mr. George Ruthven, aged 76 years, 5 months.

WRIGHT—At Chesley, on January 22nd, Rev. T. A. Wright, in his 62nd year.

BLAIR—At Walkerton, on Thursday, January 27th, Frances Janette Gillett, wife of the late James Blair, aged 91 years, 6 months.

MANERLY—In Greenock, on Wednesday, Jan. 26th, Joseph Manerly, aged 85 years, 6 months.

BRUCE—At Toronto, on Jan. 22nd, at her late residence, 452 Spadina Ave, Elizabeth G., widow of the late Wm. C. Bruce, formerly of Paisley, in her 76th year.

MORRISON—In Toronto, on February 1st, Mrs. James Morrison, of Walkerton.

TYNDAL—In Brant, on Tuesday, January 25th, Robt. Tyndal, aged 61 yrs.

REED—In Walkerton, on Tuesday, Feb. 1st, Dr. J. S. Reed, aged 30 years.

+ + +

BORN

BECKER—In Hanover on Jan. 14th to Mr. and Mrs. John W. Becker, a daughter.

SCHNURR—In Carrick, on Jan. 16th, to Mr. and Mrs. Amand Schnurr, a son.

KIEFFER—In Carrick on Jan. 17th, to Mr. and Mrs. George Keiffer, a son.

LIESEMER—In Mildmay, on Jan. 22, to Mr. and Mrs. P. D. Liesemer, a daughter.

WEILER—In Mildmay, on Janu. 23, to Mr. and Mrs. Alfred Weiler, a daughter.

WEILER—In Carrick, on January 23, to Mr. and Mrs. Alphonse Weiler, a daughter.

REDDON—In Carrick, on January 20, to Mr. and Mrs. George Reddon, a daughter.

SCHEFLER—At Formosa, on Jan. 11, to Mr. and Mrs. J. H. Schefler, Formosa, a son.

SCHUL—In Hanover, on January 27, Ernest Schul, aged 87 years.

INCH—At Swift Current, Sask., on January 17th, to Mr. and Mrs. Sidney Inch, (nee Stella Lewis,) a son (Sidney Lewis.)

MARRIED

ANDERSON—WARD—In Owen Sound, on January 26th, by Rev. Mr. Ardill Mr. John Anderson, of Calgary, to Miss Mary A Ward, youngest daughter of Mr. John Ward, of 2nd Con. Elderslie.

McLENNAN—McLAREN—At the home of the bride's sister, Mrs. D. M. Hay, Greenock, on Wednesday, Jan. 19th, by Rev. G. O. Little, Miss Janet McLaren, daughter of Mr. and Mrs. John McLaren, Paisley to Mr. Kenneth McLennan, of Elgely, North Dakota.

FREIBURGER—MICHAEL—At the R. C. Church, Walkerton, on Feb. 1st, by Rev. Father Cummings, Miss Irene Michael, only daughter of Mr. and Mrs. Frank Michael, to Mr. Isadore F[illegible] of Carrick.

O'SHEA—[illegible]LER—At the R. C. [illegible]alkerton, on Tuesday, Feb. [illegible] Father Heller, Miss Anna [illegible], daughter of Mr. [illegible] Giesler Jr., to Mr. [illegible] O'Shea of Toronto.

606 MEN RECRUITED

For the New 160th Bruce Battalion—Campaign Now Enters Second Stage

The first stage of the campaign to recruit 1,100 men for the 160th Bruce Overseas Battalion may be said to have closed. 600 men have come forward voluntarily, without even a personal invitation to join the colors. Very little if any effort has been made up to this point to reach the eligible men individually. The biggest half of the battalion has been recruited and all within the space of little over a month. Considering all things it is a magnificent showing, and one of which the good old County of Bruce may well be proud.

The Campaign is now entering its second phase. Throughout the County there are still hundreds of eligible young men who have not yet come to a decision. A great many of them want to go, and still hesitate for reasons of more or less importance. From this class 500 more men have to be raised to fill the ranks of the 160th and to accomplish this end, some well oiled machinery will be put in motion. In preparation for the big effort, a military census of eligible men was taken and was completed on Friday night. Complete information is now available regarding the number, names, etc., of all eligibles and personal appeals will be made to these men to secure their decision on the question which every loyal Canadian, eligible for military service, must face. It is a big job but if the men of Bruce will do their duty, and there is no doubt they will, the task will be accomplished without delay.

One of the big factors after all in the recruiting of the regiment has been the personality of the commanding officer. Col. Weir is recognized everywhere as a real soldier and a gentleman, and the public have the utmost confidence in him. In Major Moffat, the Col. has a "live wire", The Major is the nerve centre of the organization which networks the county for the purpose of organizing a regiment of soldiers out of 1,100 civilians.

Not only have the recruiting thus far been satisfactory in numbers, but the physique and quality of the men enrolling has been worthy of note. Lt. Col. Weir was prophesying truly when he predicted at New Years that he would take out of this County as fine a body of men as had ever crossed the Atlantic.

WELL-KNOWN CITIZEN

Dr. J. S. Reed of Walkerton Succumbs to an Attack of Pleura-Pneumonia

Dr. John Stanley Reed, the well-known dentist of this town, passed away early Tuesday morning at the Bruce County Hospital from pleuro-pneumonia. His death came as an unexpected blow to his family, his illness having been comparatively short, and his recovery being looked for until a few hours before the end. Dr. Reed was taken suddenly ill on Wednesday, Jan 19, while treating a patient in the dental chair. The following Monday he was taken to the Hospital. His condition was very serious for some time, but when the crisis was passed successfully on Sunday last, his recovery was looked for. His brother, Mr. Bert Reed, who was here from Toronto went home on Monday believing he was out of danger. About mid-night however he took a turn for the worse, and the end came at 7 a. m. Complications had arisen which the Doctor's constitution in its run-down condition was unable to combat successfully. The late Dr. Reed was born at Oakville, 30 years ago but spent the greater part of his life in Toronto, where his mother, brother and sister still reside. After graduating from the Ontario Dental College in 1900 he practiced his profession for four years in the city before coming to Walkerton. Though of a quiet disposition he was a genial and pleasant companion. He was an active worker in the Methodist Church, being a member of the Quarterly Official Board. His love of outdoor sports and the companionship of his fellows made him a devotee of the bowling green and the rink. He was also an ardent hunter, and angler. He was a member of the I. O. O. F. and I. O. F. Besides his wife who was formerly Miss Vogan, he leaves a little daughter, Edith, age five. Deep sympathy is felt throughout the town for the sorrowing ones in their bereavement.

Annual Meeting

The Annual Meeting of the Farmers Central Mutual Fire Insurance Co., will be held at the Head Office of the Company at Walkerton on Saturday the 5th day of February, 1916, at 2 p. m. for the purpose of receiving the annual report, election of directors and auditors, etc.

J. J. SCHUMACHER,
Secretary

MISJUDGED

To most of his hearers there was nothing in his manner that was not quite natural, but Groves looked up suddenly as he spoke and eyed him with a little more attention than he had hitherto bestowed on him.

Mr. Blake's examination was concluded, and the Coroner heard the medical evidence.

This was on the whole very simple. The medical men used professional terms, as they usually do, but the conclusion to which they had come was straightforward enough. James Richardson had died from the effect of the wound on his head.

"Not by drowning?" asked a juror.

"No, certainly not! The man was not drowned. It is not probable that he was ever under water."

"Can you give us any idea of the sort of weapon which would have inflicted these injuries?"

'Almost anything large, heavy and blunt; a blunt tool—a spade, for instance—or a large stone."

"Such as this?" —and the stone picked up was shown him.

"That would do it."

"In your opinion, allowing that this were the weapon, was it thrown at the man, or held in the hand and used as a hammer?"

"Probably the latter; but if it were thrown at all it would have been from a very short distance. The appearances point to its having been dashed against the man's temple."

"Would one blow have sufficed, or do you think there were more than one?"

"One would have been all that was necessary."

"And what degree of force would have been used?"

"It is difficult to say. If the assailant had it all the advantage of position, if he were standing on higher ground and could come upon the man with something of a rush, a comparatively moderate amount of strength would suffice. If they were standing level, and if they were about the same height, it would require more. But I do not think we need assume that there was any very unusual muscular effort."

"For a man?" said the coroner.

"Exactly, for a man."

"If you were looking at the subject in connection with a woman, what would you say?"

"A woman? That would be a very different matter. The average woman would not throw anything with nearly the same amount of strength, nor if she used it as a hammer would she be able to put the same force into the blow. Girls may compete very successfully with their brothers in running and swimming and climbing, but I never yet met one with a good idea of throwing."

"Yet it would not be an impossibility for a muscular, well-developed woman?"

"No, not an impossibility."

The doctor retired, and the coroner busied himself for a moment with his notes.

Then Thomas Slade was called, and he stepped forward and was duly sworn.

He gave his name, and stated his business to be that of a job gardener and general laborer.

"You knew the dead man by sight?" he was asked.

"Yes, sir."

"Have you spoken to him?"

"No, sir."

"When did you see him last alive?"

"On Tuesday afternoon."

"Where?"

"Am I bound to say, sir? I don't want to go against the law, but I'm a poor man, with a wife, and I have to think. You gentlemen, will go away, but if I've offended any one here I shall be left."

"No one will be allowed to injure you in any way," said the coroner. "You are certainly bound to answer. Where did you see James Richardson on that afternoon?"

"In the garden at Box Cottage," said Slade.

"Box Cottage? That is in the occupation of—"

"Miss Daintree, sir."

"And what was the deceased doing there? Was he alone?"

"Alone, except for her—Miss Daintree, I mean."

"Was the deceased a friend of the lady?"

"Not that I should have thought. I never saw him there before."

"What happened on this occasion?"

"I came in from the fields at the back. They were standing on the lawn, and I thought they must have been friends unbeknown to me; but it wasn't as friends they were there, for they were having a bitter quarrel, and both were too angry to see me until I were close on them."

"How do you know they were quarrelling?"

"I heard their voices raised, and as I come up I heard her say—and she threw the words at him as if they had been stones—'That is the weapon that will be fatal to you.' Then he saw me and he went away."

"Do you mean that you took this to be a threat of personal violence from Miss Daintree?"

"Well, I don't rightly know what to think. I told our policeman about it, as I knew he was always keeping his eye on her because of what her lot was doing up in London."

This cryptic statement had to be unraveled for the benefit of the coroner.

"Am I to gather that the officer was afraid of this lady?"

"I wouldn't say afraid, sir, but on his guard, so to speak."

Miss Daintree was next called and sworn. If the coroner had expected to see a "wild-haired fury" he was disappointed, for she looked very quiet, very pale, and very sad.

"How long have you known the deceased?" she was asked.

"I have only spoken to him twice in my life. Once was on the afternoon to which Slade refers, and once was about five or six days before then, when I met him, entirely by accident in the hollow by the two pools."

"Tell us what happened then!"

"I had gone to pick flowers, and I found him already there. He was afraid—he was driving me away, and offered to help me get the flowers, but this I declined, and I left at once. He came with me as far as the fence, and handed me over my basket and bade me good evening."

"Did any one else see you there?"

"As I left I saw the Rector and Sir John Weston."

She was told to stand down for a few minutes and whilst Sir John was asked if he remembered the incident. He said that he did.

"Why was the fact impressed upon your mind?"

"Simply because I was astonished at the idea that Miss Daintree could possibly know a man in such a very different station in life from her own."

"Did you hear her answer him when he wished her good evening?"

"No; she did not take any notice of him at all."

"Did she look pleased or the reverse?"

"Decidedly the reverse."

The Rector, looking very worried, confirmed Sir John's statement, and Miss Daintree was once more called.

"You were surprised at seeing this man in the hollow by the pools?"

"Yes."

"You had no further conversation with him there?"

"None."

"And the next meeting you had with him was in your own house?"

"In my own garden."

"Why did he come? Was it by invitation?"

"Certainly not."

"You must have some explanation to offer, as to why this man, a complete stranger, called on you? Do you think he was influenced by any desire, however impertinent, to express admiration for you?"

Beryl shook her head.

"I must press this question, Miss Daintree. What had this man to say to you?"

"I cannot tell you," she said.

"Surely you realize this is very extraordinary? This man forces himself in to your presence, and you cannot tell us why?"

Beryl did not answer.

Every one in the room was staring hard at her. For the first time it dawned upon her that she was in a position of great difficulty, possibly great peril.

"You have heard Thomas Slade's account of what he heard and saw. Do you agree with his statement that there was a difference of opinion, amounting to a quarrel, between you?"

"Yes, there was a difference of opinion."

"Was the subject on which you disagreed mentioned between you on the occasion when you met the man in the hollow?"

"No."

"Neither directly nor indirectly?"

"No."

"Yet you were aware of it at the time?"

"I was not aware of it."

"But in less than a week you are on terms of grave disagreement with him on some point, although you had not met in the interval. Are we to understand that you received any written communication from him?"

"No, I have never done so."

"You ask us to accept these seemingly contradictory statements?"

"Yes."

"I should like to read over to you this extract from Slade's evidence—I heard Miss Daintree say, 'This is the weapon that will be fatal to you.' Is that statement true?"

"I should think so—most likely. I cannot recall my exact words, but I have no doubt they were very like that."

"And to what weapon did you refer?"

"To the telling of the truth."

"The truth was to prove fatal to the deceased?"

"Yes, fatal to some of his hopes and plans."

"Will you tell us what those hopes and plans were?"

"I cannot."

"What took you to the pools on the day of the murder?"

"I went there to pick flowers."

"And on the day before then, the day on which you were speaking to him there?"

"I went then also for flowers."

"Can you account for the stains on your dress, Miss Daintree?"

"When I saw the poor man lying there, half in and half out of the water, I naturally ran down the bank to his side and tried to lift him out of the water. He was too heavy for me, but I could scarcely avoid getting some marks."

Beryl had turned rather pale as she recalled the horror of that moment.

"I should have thought it would have been more natural for a lady to have gone for help at once," said the Coroner. "When you came to the spot you heard no voices, no sounds of any kind?"

"None."

"And saw no one leaving the place?"

"No; it was all quite still."

Miss Daintree was again asked to state the cause of the quarrel between the dead man and herself, and it was hinted to her that she might find herself in an unpleasant position if she did not do so; but she resolutely declined to tell.

At length the Coroner began to address the jury, and pointed out that the dead man appeared to have been of a very inoffensive disposition and to have no enemies in the place. The only record of any disagreement he had ever had was connected with the lady whose evidence they had heard, but who so firmly declined to answer any question which would throw light on its cause. Not only did she appear to be his one adversary, but she was also the only woman with whom he would seem to have had any conversation at all that was of a marked or secret kind.

"Please, sir," said a voice from the back of the room, "may I speak? I do know better than that."

The Coroner was just working up the full tide of his eloquence, and did not welcome the interruption. He was under the impression that all the evidence had been taken; but he could not refuse to hear a witness, who turned out to be a certain man called Wright, a laborer on the Hall estate.

Having been sworn, he said—

"That last bit you said wasn't true, sir. I have seen the poor chap that's dead meeting some one on t[illegible]iet, not once nor twice, and al[illegible]where round the pools."

"When have you seen [illegible]

"Time and again. On[illegible] morning, but more of[illegible] noon— late, just wh[illegible] saw it within the las[illegible]

"And whom did the dead man meet in the hollow?"

"A woman," said the witness; "and if I were to say a lady I shouldn't be far out."

"Do you know who it was?"

"No. When it was the evening she had a thickish veil down, and in the morning I was not near enough."

"Was it Miss Daintree?"

The whole room waited anxiously for the answer. The man looked round doubtfully.

"Will you please stand up, Miss Daintree, and will you come forward here?"

Beryl rose and came forward and confronted the man.

To the surprise of many he shook his head.

"No, no, it weren't her. Not a bit like. She's a head taller than the one I saw, who was a little slip of a thing, and I'll lay she had yellow hair."

"What class of person did she appear? You describe her as a lady."

"That's what come into my head as I saw her. She was all wrapped round like in a cloak, so I can't say about her dress, but I held her to be a lady."

"Did she appear to be on friendly, let us say on affectionate terms with the man she met?"

"No; there was no kissing or anything of that sort. I thought at first it would be a bit of sweethearting, and I wondered what the lass up at the White Farm would say about it."

There was a general sensation; Wright had managed to hint at a certain possibility.

The Coroner however took him back to his previous point.

"But there was no sweethearting, as you say?"

"No, not even a hand-shake. I didn't watch them much after that, but I don't think they met as friends."

"Mr. Blake," said the Coroner, "is your daughter here?"

"She is waiting for me outside, sir."

"Have her called. Tell me, is there any ground whatever for this suggestion that your daughter took any special interest in the deceased?"

"No, sir."

Florence Blake was called, and the coroner looked at her kindly and spoke gently to her. She was a girl of about seventeen, very pretty in a sort of gypsy way. Rumor said that her mother had been a pure-bred Romany who had taken by storm the heart of Joshua Blake by means of her wild, exotic beauty. He had certainly loved her with a more demonstrative affection than is common amongst men of his class, and his heart was all but broken when, within a year, she died and left behind a baby daughter, who inherited her mother's dark eyes and sable locks.

The little girl became as the core of his heart and the light of his eyes.

Now, as she stood there, shrinking and trembling, her father put his hand on her shoulder.

"There is naught to be afraid of, my lass. Speak out!"

"I ask you, Miss Blake, whether there was anything in the nature of an engagement between you and the late lodger at your father's farm?"

"No, sir," she replied.

"Well—there would have been no harm in it, you know—was there any love-making?"

"No; he was not in love with me."

"You are sure of that?"

"Yes, sir."

"You were not under the impression that he thought of marrying you?"

"No. He was going away. I was never to see him again."

"Was this a grief to you?"

"No; I wanted him to go."

"Then you would not have minded if you had seen him meeting some other woman? By the way, you never met him in the place where he was found dead?"

"Never, sir."

"And you would have felt no jealousy with regard to another woman?"

"What right had I? It was for his wife to mind."

Another bombshell appeared to have fallen in the room.

"His wife? How did you know he was a married man?"

"He told me so, sir."

"Did he tell you who and where his wife was?"

"No; he said she was a lady, and that she hated him."

The girl was allowed to withdraw, and Beryl was once more called.

"Did you know of this marriage? Miss Daintree?"

"I did."

"Were you this man's wife?"

"No."

"Do you know who his wife was?"

Beryl did not answer.

In the end the jury returned a verdict of "Wilful murder against some person unknown," but added a rider to say that Miss Daintree's evidence had not been of a satisfactory nature. The coroner sternly rebuked her, and implied that matters could not be left where they were.

When she went home she felt that she was under a cloud; a touch of gloomy doubt was in the faces of all she met. Even her little servant requested permission to go home for the rest of the day, and seemed to shrink from her.

How was she to clear herself? It was impossible as long as Dora held her to her promise—and Dora was only likely to do that.

(To be Continued.)

Thackeray's Appetite.

Thackeray, telling of a dinner he enjoyed at Antwerp, said it consisted "of green pea soup, boiled salmon, mussels, crimpled skate, roast meat patties, melon, carp stewed with mushrooms and onions, roast turkey, cauliflower, fillets of venison, stewed calf's ear, roast veal, roast lamb, stewed cherries, Gruyere cheese and about twenty-four cakes of different kinds. Except five, thirteen and fourteen I ate all, with three rolls of bread and a score of potatoes."

Those twenty potatoes remind the reader of the dreadful disillusion of Charlotte Bronte when she came to London and sat opposite her literary lion at dinner. "Oh, Mr. Thackeray!" she cried in shocked surprise as she watched him eat. She had never imagined a hero who ate potatoes by the score.

Numbered Teaspoons.

In the early days of tea drinking, when the brew was rare and costly, numbered spoons were used. It was not etiquette for a guest to ask for a second cup until all the company had finished the first. The numbered spoons therefore insured each getting his own cup back again. As a sign to the hostess that no more tea was wanted the spoon was placed in the cup. Even when etiquette was a fetish teapot spouts sometimes got choked up, so the long handle of the spoon with a pierced bowl that succeeded the silver strainer was thrust down the spout to disperse the leaves. "Etiquette," remarks Arthur Hawden in "Chats on Old Silver," "forbade the hostess to blow down the spout."

RHEUMATISM, A SNEAKING DISEASE HAS AT LAST MET ITS CONQUEROR

Throbbing Muscles and Swollen Joints Made Well.

RUB ON NERVILINE

Old age knows no foe more subtle, more unrelenting than rheumatism.

At first only a grumbling pain is felt. But, alas, it settles in the joints and muscles, and finally tortures its victims.

To-day the disease may be in the muscles of the back, thigh, shoulder or neck—to-morrow in the joints of the hand, toes, arms or legs it may work with redoubled fury.

Whether the pain is constant or occasional, makes no difference to "Nerviline."

Because other remedies have failed, don't be discouraged. Nerviline has cured the worst of cases. It has brought health to those in the deepest despair, has ended years of awful suffering for those who never hoped to be well again.

There is a marvellous healing power in Nerviline, which it derives from the extracts and juices of certain rare herbs and roots. It allays almost magically the awful pain that only rheumatics can describe.

Congestion is drawn out of the muscles, stiffened joints are eased and limbered up, the old time feeling of depression is cast off, and once again Nerviline brings the sufferer to buoyant, vigorous lasting good health.

Every home needs good old Nerviline, needs it for earache, toothache, headache, neuralgia, lumbago, sciatica, stiff neck, chest colds and sore throat. Wherever there is pain, congestion or inflammation, Nerviline will cure it.

Large family size bottle 50c; trial size 25c, all dealers, or the Catarrhozone Co., Kingston, Canada.

Used for Motor Cars.

The American motor car industry last year made use of the following raw material: Steel, 670,000 tons; aluminum and alloys, 4,020 tons; brass, 2,141 tons; hair for upholstery, 1,068 tons; moss, 2,050 tons; hides, 67,232, on the basis of one-third hide per car, where real leather was used; artificial leather, 3,280,000 square yards; upholstery fittings, $917,642 worth; burlap, 6,560,000 yards; top material, 11,403,250 yards, valued at $2,447,780; manufactured cotton, in tires on new cars only, 7,950 tons; celluloid, 200,000 pounds; rubber and compounds, 8,338 tons; hinges, 2,446,-780 pairs; door catch fittings, 2,446,-780; carpet, 463,356 square yards; linoleum, 642,908 square yards; boards for floors, wheels and bodies, 9,540,000 running feet.

UNION BANK REPORT SHOWS 1915 A VERY SUCCESSFUL YEAR

In Spite of Taxes and Contingent Appropriation, Dividends and Bonus Were Maintained Without Drawing Upon Past Profits—Bank in Very Strong Position for Renewal of Trade Activity.

The fifty-first annual statement of the Union Bank of Canada, which was presented at the annual meeting in Winnipeg on Wednesday, January 12, reveals a year which has been highly satisfactory from the shareholders' standpoint and at the same time has witnessed a great expansion in the deposit business of the Bank and a remarkable increase in its liquid assets, while its loans to Canadian trade and industry have been maintained to the full extent of the present reduced requirements, of the country. The Bank reports net profits for the year amounting to $659,688, which compares with $712,440 in 1914 (a very moderate reduction, having regard to the prevailing conditions, which have been universally unfavorable to profitable bank operations)—they represent 13.2 per cent. on the capital stock, and sufficed for the payment of the full regular dividends of 8 per cent. and the bonus of 1 per cent., together with the appropriation of $150,000 to contingent account, the payment of War Tax of $45,730.77, and the usual contribution of $10,000 to Officers' Pension Fund, while the balance carried forward is increased by some $3,956, and now amounts to $104,-976.75. It is worthy of note that this Bank has passed through the entire three years, 1913, 1914 and 1915, maintaining its dividends and bonuses, its pension contribution, its provision for depreciation and contingencies, its special taxes and sundry patriotic donations, and all without having to draw upon accumulated profits or Rest Account, and with an annual increase in the profit balance carried forward.

The balance sheet shows an expansion of over nine millions in the total volume of assets and liabilities. The public liabilities total $81,654,026.35, as against $70,902,919.04 a year ago—the chief items being note circulation $7,873,659.00 (increase about $1,500,-000), deposits not bearing interest $25,999,832.00 (increase four and a half millions), deposits bearing interest $50,665,364.63 (increase a little under five millions), and balances due to banks abroad, $984,405.99

The changes in the asset column are important, and serve to exhibit the immense reservoirs of strength which have been accumulated since the war began, and which are now ready and available for the support of Canadian business in the period of expansion which is already coming in sight. Total assets amount to $90,663,063.70. The liquid reserve amounts to $39,-138,382.31, which is an increase of close upon thirteen million dollars, or almost fifty per cent., over the figures of a year ago. It consists of $9,357,-091.56 of coin and Dominion notes in hand, $2,800,000 of gold and notes in the Central Gold Reserve, $3,536,491.15 of cheques on other banks and $705,-742.00 of notes of the same, $6,021,-345.88 due by banks abroad, $3,424,-139.73 of railway and other bonds and stocks, $7,716,570.41 or call loans in Canada and $4,183,657.69 of call loans abroad, with smaller sums in other gilt-edged items.

Notwithstanding these large sums put into liquid assets, the Bank has in no degree neglected its duty to the commercial community. Current loans and discounts in Canada (other than call loans) are $48,941,316.32, which is scarcely two millions less than in 1914 in spite of the marked contraction in the trade of the country, and is actually two millions more than in 1913. If we add together the current and call loans in Canada we find an increase of $2,700,000 during the past year. Discounts outside of Canada are $805,602.92, a moderate increase. There is a marked reduction in overdue debts, and all the less realizable items are very small, which appears to indicate a healthy condition of affairs among the Bank's clients.

Very few banks, and only the very strongest, have come through the past three years with such satisfactory results as the Union Bank, and the figures seem to show that President John Galt and General Manager G. H. Balfour have brought to the business, since it was removed to Winnipeg, the same conservative and thoroughly sound principles which actuated it when its headquarters were in the cautious east, in the city of Quebec.

DAVID AND GOLIATH

(By Sarah Baxter)

Did you never hear of the Gila monster? No? Well, the Gila looks something like a young alligator. When attacked it feigns to be dead. Its bite is frightfully poisonous. The victim lingers a long while in great agony, then dies.

There is—or rather there was—out on the plains west of the Missouri river a human monster as much to be dreaded as the Gila. This was the desperado who finds his prowling grounds in new countries. When America was being occupied by a civilized people the human Gila was the renegade white. He lived with the Indians and fought with them against their enemies, including those of his own color. When the savages wished to draw the whites into an ambush they would use the renegade for the purpose, and he was not ashamed to serve them.

This human monster in another form was the terror of the plains when they were passing from lawlessness to civilization. He delighted in cruelty. There was no law in the country on which he had obtruded himself to prevent his murders or punish him therefor except the revolver, and since that was his especial weapon he was so skillful with it that he had every advantage.

Mark Rogers, an Indiana farmer, having a sickly wife, sold his farm and took her with their children to a region in the southwest then being taken up by white settlers. There he "squatted" and raised what crops he could while his wife was regaining her strength. A hamlet grew up in the vicinity, consisting of four dwellings, a store, a blacksmith shop and a saloon. One day Rogers was passing through the hamlet when a man known as Texas Bill came out of the saloon firing his revolver about him as a boy celebrating the Fourth of July. Seeing Rogers, he put a bullet into his left breast, in the region of the heart. He had nothing whatever against Rogers. He fired at him as he would at a tree or any other mark.

His victim fell and lay in the road till some persons took him up and carried him home. There was little or no hope that he would survive, and at his death his invalid widow and her children would be in a destitute condition. He lingered along, however, and one day his wife heard him muttering to himself that when he recovered the man who had shot him would have a chance to shoot him again or die.

This boded no good for the Rogers family. Texas Bill would have every advantage in a fight, and since it was to be expected that if Rogers recovered one of the two would die every one knew that Bill would be on the watch for his enemy in case he got out again. There were no courts to punish the crime or prevent a subsequent murder. If the husband and father did not die of his wound be would subsequently be killed.

It remained for a weak woman to solve the problem. As soon as she could be spared from attendance on her husband Mrs. Rogers took a bag and went out on the plain. When she returned it was evident that she had something in the bag, but what it was no one knew and no one cared. She took it into the cellar and left it there, locking the door. Every day after that she would go into the cellar, take the bag and go down into the hamlet, where she would spend some time answering questions as to her husband's condition, but it was noticed that she was always looking about her and had an eye especially on the saloon.

One morning while she was thus engaged Texas Bill came out of the saloon, smoking a long black cigar. His trousers were tucked in his boots, his flannel shirt was open, exposing his hairy breast, and his face was flushed with liquor. A revolver was slung to each hip, and a long knife was in his belt. Mrs. Rogers left her friends and advanced toward him.

There was something about her movement to tell the others that she had some intent concerning her husband's enemy—a certain resolute look in her eye, a quickness in her walk. She seemed like a David advancing to attack a Goliath. Was the bag she carried a sling containing a stone?

Texas Bill stood for a moment on the porch of the saloon looking down on the desolate scene, then staggered down the steps and walked away from the group of which Mrs. Rogers had formed a part. She followed him. While doing so she raised the skirt of her dress and from about her waist uncoiled a rope. When she came to within a few yards of Bill she threw a noose in the rope over his shoulders and as it fell to his elbows gave it a sudden jerk, pinioning his arms.

From this moment she moved with lightning-like rapidity, holding the lasso in her left hand, while with her right she turned the bag over on Bill's shoulders. A loathsome thing fastened itself onto his back. Giving a mighty yell, he freed his arms and grasped what clung to him, but was too late to save himself from its bite. Wrenching it off, he saw the deadly Gila.

Fortunately for the woman he was too intently engaged with the monster to pay any heed to her or he might have served her as he had served her husband. He went howling down the road, and his cries of pain were heard till death relieved him of his agony.

Rogers recovered, and his wife was ever afterward known as the woman who had beaten Texas Bill.

In Single File.

When the Indians travelled together they seldom walked or rode two or more abreast, but followed one another in single file. It has been thought by some that this practice resulted from the lack of roads, which compelled them to make their way through woods by paths.

If this were the real reason for the practice, then we should expect to find that the tribes who lived in open countries travelled in company, as do whites.

The true reason for journeying, as the Indians did, in single file, seems to be a feeling of caste. This feeling was at the bottom of other customs of the Indians.

This peculiarity is Asiatic. How it has warped and disfigured Hindoo life is well known. Home is scarcely possible where it prevails. To the women and children domestic life is bondage. The women of a Chinese household are seldom seen on the street. The children, when accompanying their father, follow him at a respectful distance, in single file, and in the order of their ages.

Facts for Health Seekers To Ponder Over

Nearly every disease can be traced to clogged or inactive stomachs, livers or intestines. Indigestion, biliousness, headaches and insomnia all emanate from this cause. Keep these organs in working order and you'll have continuous good health. No case was ever treated with Dr. Hamilton's Pills and not cured; their record is one of marvelous success. Dr. Hamilton's Pills are very mild, yet they cleanse the bowels promptly and establish healthy regularity. You'll eat plenty, digest well, sleep soundly, feel like new after using Dr. Hamilton's Pills—one a dose—25c a box everywhere. Be sure you get the genuine Dr. Hamilton Pills, in a yellow box always.

Saluting the Quarter Decks.

In response to an inquiry as to why officers and men of the navy "salute the deck" and civilians remove their hats when going aboard a naval vessel it may be said that, though commonly called a "salute to the deck," the salute in question is really a salute to the flag. For instance, at night on reaching the quarter deck or upon leaving it no salute is required, as the flag is, of course, not flying. The fact that this salute is rendered upon reaching the quarter deck, as when leaving the ship, is probably responsible for its having been known as a salute to the deck; but, as has been stated, it is really a salute to the flag. Men should when rendering it stop, stand erect and face the flag.

Marion Bridge, C. B., May 30, '02.

I have handled MINARD'S LINIMENT during the past year. It is always the first Liniment asked for here, and unquestionably the best seller of all the different kinds of Liniment I handle.

NEIL FERGUSON.

Out of the Mouths of Babes.

Teacher—Now, Johnny, can you tell me the difference between one yard and two yards?

Small Johnny—Yes, ma'am. A fence.

"Mamma," said 4-year-old Margie, who had been assigned the task of rocking the cradle containing her baby brother, "if the angels have any more kids to give away, don't you take 'em."

"Oh, dear!" sighed little Elmer, as he gazed at the flaming circus posters on the side of a barn. "I wish I were an angel for a few weeks."

"Why do you wish that, Elmer?" asked his astonished mother.

"Because," explained the little fellow, "then I could fly around and look at all the circuses for nothing."—Chicago News.

Minard's Liniment Relieves Neuralgia

Ancient History of Kilts.

The Scottish kilt, as an article of dress, dates back to historic times, and was originally, as far as can be figured out, merely a plaid blanket, worn about the shoulders, with one end gathered about the loins in cold weather. The mountaineers of the Balkans wear the kilt, and students say that the soldiers of the Assyrian kings wore a costume very closely akin to the kilt of Scotland.

Minard's Liniment Cures Burns, Etc.

An Egg Trick.

Hold a raw egg on end and spin it on a plate or other smooth surface. Quickly place the hand upon it for an instant, stopping the motion momentarily. When the hand is removed the egg will resume its spinning. This is because the liquid contents of the shell continued to whirl rapidly when your hand stopped the shell, and if it is quickly released the whirling contents will again set the shell to spinning.

Many a man can't understand why the rest of us don't get stiff necks looking up to him.

Here's Palate Joy for You—also stomach comfort beyond belief. Heat a Shredded Wheat Biscuit in the oven to restore crispness, then cover with sliced bananas and pour over it milk or cream. Sweeten it to suit the taste. A complete, perfect meal supplying more strength-giving nutriment than meat or eggs and at a cost of three or four cents. A warm, nourishing breakfast—a delicious lunch.

Made in Canada.

HELP WANTED.

NO MEDICINE TO EQUAL BABY'S OWN TABLETS

Mrs. E. Cutler, St. Lazare, Man. writes: "I have used Baby's Own Tablets for the past ten years for my five children, and can truthfully say there is no medicine to equal them." The Tablets regulate the bowels and stomach, cure constipation and indigestion, expel worms and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Telegraph Wires as Barometers.

A phenomenon with which most people are familiar is the curious noise made by telegraph wires is accepted as ordinary, and yet there has been hitherto no final explanation. Professor Field, of the University of Ottawa, states that the song of the telegraph wires is the song of the barometer, and that the variations are in direct relation to variations of the weather. It is, according to Professor Field, a scientific indicator of the weather. If the sound is low the weather will change in two days. If it is sharp a momentary change is probable. According to the new theory the vibrations of the wire are transmitted by the posts, which receive them in turn from the ear

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, ti feelings, headache, backache, bea down sensations, bladder weakness, tipation, catarrhal conditions, pain in sides regularly or irregularly, or unnatural enlargements, sense of ing or misplacement of internal org nervousness, desire to cry, palpitati hot flashes, dark rings under the e or a loss of interest in life, I invite to write and ask for my simple metho home treatment with ten days' tri tirely free and postpaid, also to Canadian ladies who g they have regained heal happiness by this method Address: Mrs. M. EFFICIENCY.

And How Fatigue Milita Against it in Labors.

Whatever of antagonism—and ther a little—there may be in labor circle the new "efficiency," its methods standards, is based, at least avowedly the contention that it increases pro tion without regard to the effect faster and harder work on those it. Of course, efficiency as secur more scientific than it is human, would not in the end be profitabl the employers.

One boss who evidently knows th the superintendent of a Connecticut works, who contributes an interes little story to the Iron Age. At works there was recently constru a long incline up which heavy were to be wheeled in barrows, premiums were offered to the man did or exceeded a certain amount of labor. They attempted it vigorou none succeeded in earning any extra money. Instead they all fel siderably below the fixed task.

Prompt investigation by an exp closed that the trouble lay in the that the men were working without ficiently frequent periods of rest. Ther upon a foreman was stationed by a and every 12 minutes he blew a wh At the sound every barrowman sto where he was, sat down on his ba and rested for three minutes. The hour after that was done showed markable change for the better. complishment; the second day the all made a premium allowance by more than what had been too much on the third day the premium ration had risen, on the per cent., with no complai driving from any of th York Times.

ELLA'S RECOMPENSE

Notwithstanding a pressing invita- u on the part of Lady Browne to a the party in the salon or general ing-room, Mrs. Vereker declared "all too tired for any thing save ement in her own apartment; and r Ella, as in duty bound, follow-

ng for the lamp," were her first "I want to read my letter; from my brother. He is so ob- unsympathetic, he seems to have forgotten that he wound- so deeply, offended all that was. Oh, thank you! danke sehr— apting herself as the servant t in the lamp. "Do you know, o will try to learn German; I rather a talent for languages, eh? was saying, James seems quite to orgotten everything. He had ite to me about a little money me (he was my trustee), he never s unless he is obliged." After ing through the letter she re-

to dates from Teoplitz, and says, trying everything that fool —(there's the way he speaks of reat medical man of the day! You w he has had miserable health, is quite proud that nobody can out what is the matter with him.) here is it? Oh, yes. 'That fool has sent me here. Why, I can't gine, except to get rid of what he t cure. It's a wretched place. Peter, I'll give it a trial. I have t an old acquaintance here, rather a nice fellow, who used to know you in India—a Colonel Cecil. He came with old General Carew, who is failing fast. I hope to leave next week, and will take Friedrichstadt on my way to England. Cecil says he will come with me, so we'll look you up. I am glad you have taken poor Mary Marston's girl to live with you; it is the most sensible thing you have done for some time.'"

"He is a great judge, I am sure," observed Mrs. Vereker, sharply. "It was a long time before he gathered any sense himself. How he ever succeeded is a mystery to me."

"But I think he is kind. I hardly remember him. I know he sent me five pounds once, and never were five pounds of greater use. I cannot forget that."

"Oh, five pounds are nothing to him. He is very well off indeed. Tea, or indigo, or something commercial—that's his business. I hate commercial people. So did the dear general. But, Ella, do you observe, he mentions a Colonel Cecil—rather a nice fellow—rather, indeed! Ah, Ella, he was, and very likely is, a charming person. He was a good deal younger than my dear lost darling. I remember as if it were yes- ay his coming into our bungalow e first time, a good while after arrived at Banglepore (the gen- d just got the command of his nt). It was the first time I aw Cecil. He had come to join the Banglepore Irregulars, and from that hour he was devoted to me—poor, poor fellow! I believe he suffered deeply; but it was not my fault, you know."

"No, I suppose not," returned Ella, her attention riveted by such an unexpected revelation. Was it possible that Cousin Fanny, with her faded blue eyes and somewhat withered though undeniable vestiges of babyish prettiness, her funny, impatient tricks of manner, her intense, undisguised selfishness, had been the object of a great, hopeless passion? She seemed suddenly elevated, as on a pedestal, the heads of ordinary women in Ella's eyes—Ella, who was nearly twenty-two, and had never heard even the echo of a compliment or seen a look of tenderness directed to herself in the eyes of mortal man!

"But what did the general say?" was her not unnatural question, as she applied herself to transfer the contents of her cousin's box to the wardrobe.

"Oh, the general (he was only colonel then)—he did not know anything about it, and he wouldn't have minded it if he did. He knew my utter devotion to himself. Ah, I was devoted! and then of course there was nothing wrong—oh, dear, no! I had far too strong a sense of what was proper to —to—flirt; indeed, Gilbert Cecil always spoke to me—ah!—as if I were something quite above himself. But he would have ridden to the far end of India to get me the merest trifle I wanted. The general liked him too; and every one knew he was desperately in love with me. Then all the women in the station wanted him, especially the mothers for their daughters; but he didn't care—he would only dance with me or stand looking at me while I danced. Ah, those were happy days! It will upset me dreadfully meeting Cecil again. I wonder if he is much changed. I wonder—oh, Ella, I wonder if he is married!"

"Mr. Lyall says nothing of a wife."

"There is no knowing. Men are so foolish; and he is rather a catch. He has held excellent appointments. Yet I do not think he can be married. Do you, Ella?"

"Oh, no; certainly not," replied Ella, from "out of the depths," her head bent low into the trunk she was unpacking. "I should think not," she repeated, recovering the perpendicular; and then, sitting down on the floor, her lap full of neatly-folded under-linen she felt as if Colonel Cecil would be ruined forever in her estimation as a hero if, after all his romantic devotion, he had "gone and married."

"Well, I do not fancy he is, somehow. Ah, he will see me sadly changed—a wreck of my former self," and she put her handkerchief to her eyes.

"You look very nice still, Mrs. Vereker," thoughtfully, for "Cousin Fanny" had an added fresh interest in her eyes. "Your features are small and delicate, and though your hair is nearly white, it is becoming and distingue," looking at her with an air of honest criticism. "Yes, I really think you are very pretty."

It was the tone of sincerity in Ella's rare praises that reconciled Mrs. Vereker to her cousin's companionship, which in other directions irritated her extremely. This, and the fact that no other lady's maid had ever cost her so little, disposed her to keep her young relative as long as she could.

"Come now, Ella," Mrs. Vereker was saying mournfully, "that is nonsense! I am a poor, sorrow-stricken, lonely widow, and Cecil will only see the ghost of the woman he once—well, admired. Ah, it is all very sad. I wonder how he will meet me! I don't suppose a trace of his old feelings still exists; but even if they did, I would permit no expression of them. No, my heart will ever be faithful to"—here she ceased to speak, and sat in a reverie for a few minutes, then rousing herself exclaimed: "Ah, well, there is no use in looking back. Ella, as you have the boxes open, let me see those caps, the last I got in London. It struck me that they were too large; they make me look top-heavy. Do you think you could alter them a little?"

"I believe I could," extracting the snowy headgear from their envelope of blue tissue paper. "A very little would do," gazing upon them. "Will you try some of them on, or are you too tired?"

"Oh, no, dear. I will try on all."

A profound consultation followed, mixed with reminiscences.

"If you undo the wire just here and pinch it up a little, it will make all the difference in the world. Ah, talking of being undone, I remember one day out riding with Mr. Cecil and Captain Hilton, of 'Ours', my darling had gone on in front with Mrs. McFarlane, of the Horse Artillery—she was an odious woman, though some people thought her pretty; my husband could not bear her, she was so loud, so different from me—but we had not gone far when Cecil, who had stepped a minute to see if his horse had picked up a stone, came back to me and exclaimed 'Good God! Mrs. Vereker, one of your girths is undone!' Yes, those were his very words! He thought everything connected with me of such importance. Then there was a great business to make it all right, but I was not frightened." And so she babbled on till Ella got her things in order and the boxes were ready to be put away.

By that time the young "courier maid" was desperately tired, but Mrs. Vereker was still fresh, still poured out recollections of "her darling," and her many admirers in India, mixed with plans of altering Ella's dress and that trimming.

At last she felt exhausted and said that she would have a little weak brandy-and-water before she went to bed. "Get some for me, Ella, and then you can go too; but I think I will write to my brother before I sleep. He has behaved very badly to me in many ways—with want of feeling and want of principle; but it is wrong and unchristian to be unforgiving. He has a good deal of money to leave behind him, and I am, or ought to be, his natural heir."

Many were the blessings bestowed by Ella on the coming Colonel Cecil during the ensuing week. The first three or four days were wet, and to be shut up alone with Mrs. Vereker for hours was not lively. She was incapable of settling herself to any occupation, and she could not bear to see application in others. Whatever Ella undertook she always wanted her to do something different. When compelled to stay indoors or otherwise driven in upon herself, this restlessness was generally tinged with sluggish, unreasonable, captious ill-humor. But the prospect of an admirer, whom she fully expected to become a lover, was too intoxicating not to exorcise the demon of impatience and fault-finding. Never had Ella found so little difficulty in steering clear of offence as during the days which succeeded the receipt of James Lyall's letter, and Mrs. Vereker was a good deal on her hands, for Lady Browne was laid up with a bad cold, and Miss Browne—a strong minded young woman, suspected of smoking cigarettes in the studio, where she worked for many hours a day—did not show much sympathy for Mrs. Vereker, who was by no means attracted by her friend's daughter.

On the fourth day after their arrival Mrs. Vereker agreed to share a carriage with Lady Browne, in order to pay a visit a short way out of town to a certain baroness, who was considered something of a leader in the indefinite society of Friedrichstadt. They accordingly started soon after the mid-day meal, Mrs. Vereker leaving her cousin a long list of commissions to perform during her absence.

It was always an immense relief to Ella to go out alone, to be able to walk along and look in such shop-windows as attracted her, undisturbed by the ceaseless flow of her employer's talk, her perpetual reiteration of an interrogative 'Eh?'—compelling a reply—her little shrill, jerky screams of horror, or admiration, or surprise. So Ella walked along, more cheerful than she had been for a long time. On the whole, she had been improving herself, she had been adding pebbles—very diminutive pebbles—to the cairn of her future fortune, for her wildest dream of success was to keep a young ladies' school with Kitty for chief officer; and that was a remote prospect. Still, she was not losing her time, but an hour longer than the stipulated six months she would not stay with Mrs. Vereker. She was, however, just at present, more interested in Mrs Vereker than she ever expected to be. She felt quite anxious to see the man in whom her cousin had excited so romantic a passion. How would they meet? Would they be touched by the sight of Time's work in each, or repelled by the changes wrought by his ruthless hand?

Would Colonel Cecil retain any of the good looks Mrs. Vereker described, or prove an old pantaloon with spectacles, false teeth, a stick, and gouty shoes? Oh, certainly not! Mrs. Vereker herself was quite brisk and active; why should her contemporary be infirm? Well, it must be very, very charming to be loved, heartily loved! It was pleasant even to hear pretty things said to one! Ella laughed at herself, and blushed too, when she remembered the nonsense Von Reichenberg had talked to her, on more occasions than one, and the pleasure it gave her. "I suppose he would say the same sort of thing to every one," and a vision of the young baron rose before her. How handsome he looked in his picturesque sporting costume! how polite and amusingly conceited he was! Then, per contra, what an enormous quantity he ate, and what a noise he made about it! nor was it pleasant to see his gravy-stained knife and fork laid upon the tablecloth, while he helped himself to "Nudelarte" or "Apfelstrudel." Then he was inclined to say saucy things against the English, and laugh too loudly when Ella showed her indignation and repelled his accusations. Nevertheless, the latter part of her stay at Konigsruhe had been exceedingly amusing and exhilarating. She wondered if Herr Von Reichenberg would return to Friedrichstadt as soon as he whispered to her that he would, that evening after the picnic?

"He did say before that he was going on a hunting expedition into Silesia—So—" turning sharply from the market-place into Dom Strasse, she nearly ran into the arms of the object of her thoughts, tightly buttoned up in his smart guardsman's uniform of green and gold.

"Ah, my Fraulein, this is good-fortune!" he exclaimed joyously in German, saluting in military fashion. "I was on my way to see the honoured lady your friend, and yourself. You see I have renounced my hunting and returned to my duty—a great self-sacrifice, is it not?" with a bold laughing look into her eyes.

"Duty is its own reward," said Ella, smiling, while she felt with annoyance how quickly and vividly the color came into her cheek.

"That I will believe—or brings its reward," significantly. "And where is the charming miss going?"

"I want to return to the Pension. I have been shopping, and have got confused with various turns, so I hardly know my way back."

"Then I will be your guide," cried Von Reichenberg.

"If you will put me in the Berliner Strasse," said Ella, "I can get on quite well. And please speak English, Herr Hauptmann; I am forgetting what I learned at Konigsruhe. I never hear any German; we are all English at the Pension."

"Ha, then, my esteemed friend, I will come and give you lessons, two, three times by the week. The good Frau Gudscher is my cousin. She likes to see me at her table. I will give her pleasure, and myself too. Let me bring you, lead you I mean, by a shorter road, all along the terrace and the old walls, a way greatly more pleasant."

"Oh, thank you! I have been out a long time and should like to get back before Mrs. Vereker comes in."

"Oh, confide yourself to me, my Fraulein, I know this old town like my glove."

So Ella walked on very contentedly beside the big baron, who made himself very agreeable in his broken English. The imperfect pronunciation took off a good deal of the audacity which really pervaded his speeches. He occasionally broke into German, persuading Ella now and then to try her 'prentice tongue at the same language. The walk was very pleasant, but Ella at length observed: "This way seems much longer, Herr Baron."

"Not to me. It is shorter, viel shorter than any road I have ever travelled."

"That may be, but I shall be late, and get a scolding which will not make my memory of the short way too agreeable."

"What! will the—the gracious lady, your"— He paused, not understanding exactly the relationship between his companion and Mrs. Vereker.

"My mistress," put in Ella, with an arch smile.

"Gott bewahre!" cried von Reichenberg; "you are some relation of Mrs. Vereker's, are you not? Is it niece or or cousin or—"

"At present I am her companion and courier maid," persisted Ella, laughing; "that is all you need know."

"Gott in Himmel, nein!" cried Von Reichenberg, "I want to know much, very much, about you, my beautiful young lady. The nice little widow—she love you like a daughter. She is rich—she will give you all her fortune."

Ella laughed more merrily than before. "That she will not. If I had a fortune she might leave me all hers, but I have none."

"Hum, she tries me, the pretty maiden," thought Von Reichenberg. "They are all rich, these English. It is so pleasant to win fortune in this game that I will venture it—even if ——. I shall come in with you, dear fraulein," he said aloud in German, "and soften the hard heart of your lady protectress, she smiled over on me at Konigsruhe. I will intercede for you."

"You must do no such thing, Herr Hauptmann. It would make matters infinitely worse. Promise me," with earnest entreaty.

"Could I ever say 'No' to you?"

"I dare say you could. That is of no consequence, only don't see it at present."

"Of no consequence!" he repeated. "I do not know the exact meaning of that word—pray explain it. It is no compliment; I see that by your eyes. Their language none can mistake. I like to read what they say."

"Are you sure you are leading me straight to the pension, Herr Baron?"

"Yes, that is truth; I might have made it much longer."

Another ten minutes of chaff and compliments, and Ella found herself entering the street in which she dwelt at a different end from that by which she left it. "Ah, it is striking five! I am late for coffee, and all your fault."

"You must forgive me—or I shall—I shall cut my throat—I shall, indeed!" Ella shook her head, and having reached Frau Van Gudscher's, ran quickly upstairs, Von Reichenberg following after her.

The servant who admitted them exclaimed that the fraulein was late, that every one had had coffee and gone out again except Mrs. Vereker and her visitor. The girl seemed to recognize Reichenberg, telling him Frau Gudscher was in her own room, she threw open the door of the salon as she spoke, and ushered Ella, closely followed by Reichenberg, into that "splendid apartment," as Frau Gudscher termed it, where she found herself confronted by a long, distressingly thin gentleman, with spare dark hair, a lantern-jawed face, and a complexion which looked as if it had been once a deep brown, but was now faded by some color-extracting process to a dull sandstone tint. He was seated in an easy chair, and was leaning on a thick stick as if too weary to sit up; opposite him on an ottoman, beaming with animation, sat Mrs. Vereker, smiling with all her might on the stern-looking iron-gray gentleman who had come to Ella's rescue when menaced by the drunken workman two months before.

(To be Continued.)

First Egg—The trouble with you is, you are satisfied with the yoke of oppression. Second Egg—Well, I may have my faults, but I can truthfully say I am not too fresh.

SUNDAY SCHOOL LESSON

Lesson VI., February 6, 1916.

The boldness of Peter and John.—Acts 4, 1-31. (Print 4, 8-31.)

Commentary.—I. The apostles before the Sanhedrin (vs. 1-7). While Peter was declaring the fact of Christ's resurrection in Solomon's porch, the priests, the official who had charge of the temple guard and the Sadducees came to him, for they were greatly agitated and troubled at his preaching that Jesus arose from the dead. The Sadducees were an influential Jewish sect at this time. They rejected the doctrine of the resurrection and did not believe in the existence of angels. Peter must have continued his discourse for two hours, since he and John went up to the temple at about three o'clock in the afternoon and he began to speak shortly after that, and it was "eventide" when they were arrested and placed in prison. It was then too late for them to be brought before the Sanhedrin, for that body could sit as a deliberative body only by daylight, therefore the apostles were placed "in hold unto the next day." The preaching was by no means in vain, for the people believed the message. The number of the men was five thousand, and it is likely that as many women also believed, so the Christian community was already assuming large proportions. The next morning the Sanhedrin assembled and care was taken to have the prominent members present, for the case to come before it was an important one. Annas was an ex-high priest and Caiaphas the acting high priest, the same officials who had participated in the trial of Jesus.

II. Peter's defense (vs. 8-12). 8. Filled with the Holy Ghost—As he and the rest of the one hundred twenty were on the day of Pentecost. An occasion had arisen of special importance and he was prepared by the Spirit for it. The promise of Jesus to His disciples (Mark 13, 11) was about to have a fulfilment. Rulers—The heads of the twenty-four courses of priests. Elders—Twenty-four leading citizens, heads of families, elected to places in the Sanhedrin, in addition to these twenty-two scribes or professional teachers of the law were added. These rulers, elders and scribes together with the high priest constituted the Sanhedrin. Peter addressed this body with becoming respect. 9. The good deed—The apostle was not slow to declare that it was for a good deed that he and John were arrested. Both the healing of the cripple and the preaching of the gospel were good deeds. Impotent—Helpless. 10. Be it known unto you all—Peter was ready to answer the question that was asked him and bold in making the declaration. By the name of Jesus Christ of Nazareth—Through the authority and power of Him who was of Nazareth, a despised city, the miracle was wrought. Whom ye crucified—Peter was standing before the very body that had a few weeks before condemned Jesus on false testimony and caused Him to be put to death. He had the opportunity to preach Jesus to this company of high officials, and he told them with Spirit-inspired courage the truths they needed to hear. He charged home upon them in no uncertain language the responsibility in putting Jesus to death. Whom God raised from the dead—The fact that leading Sadducees were before him did not keep him from preaching the truth of Christ's resurrection.

11. The stone which was set at nought—Reference is made to Psa. 118, 22. The figure is that of a stone being judged by the builders as unfit for a place in the structure, but later found to be the very one needed for the most important and prominent place in it. 12. Neither is there salvation in any other—In one sentence Peter declared the inefficacy of the forms and ceremonies of the Jewish system to save any one. Jesus had come as the fulfilment of all that was real in the Mosaic economy. None other name—It must have pierced his hearers' hearts deeply when Peter told them that Jesus whom they had crucified was the only one who could save them or any one else. Whereby we must be saved—If we are ever saved, it must be through the power of Jesus.

III. The apostles released (vs. 13-22). 13. Unlearned and ignorant men—Peter and John had not studied under the great Jewish teachers of the day, and they were ordinary laymen, as the original of the word "ignorant" implies. They marvelled—Peter and John, filled with the Holy Spirit, spoke with a power that astonished even the learned members of the ruling body of the Jews. Took knowledge of them—They recognized the fact that they had seen with Jesus and had been influenced and empowered by him. They had received his spirit and spoke as he had spoken. 14. Could say nothing against it—They and all the people of Jerusalem had known the cripple who was lain at the temple gate for years, an object of pity and charity, and they saw him before them completely healed, therefore they were forced to admit that a great work had been wrought.

15. Conferred among themselves—Peter had fully answered their question and had done it with a boldness born of conviction and certainty. The testimony was all given, and, in order that the members of the Sanhedrin might freely discuss the weighty question as to what was to be done with the apostles, Peter and John were taken out outside. 16. What shall we do to these men—The question was a serious one. Thousands of persons had believed in Jesus and this miracle would greatly increase the influence of the apostles. 17. That it spread no further—They had a more difficult task than they imagined to keep the gospel and the report of the miracle from spreading further. Let us straitly threaten them—The Sanhedrin had no real cause against Peter and John and they stood in fear of the people, therefore they could timidly try to intimidate them. 18. Called them—Brought them before the Sanhedrin again to warn them against the further preaching of Jesus. 19. Judge ye—Peter and John were not to be intimidated. They had received the Holy Ghost and they had a commission from Jesus to preach the gospel. Even the members of the Sanhedrin must admit that one should obey God rather than men. 20. The things which we have seen and heard—The apostles were sure of their ground. They had definite knowledge of the truths they were proclaiming. They had convictions as to duty, and they could not keep their consciences clear and not continue to testify to the fact of Christ's resurrection. 21. Finding nothing—The apostles were triumphant. No true cause was found against them, and for fear of the people they could not bring false charges. The multitudes in Jerusalem believed that the healing of the lame man was the work of God. 22. The healed man had long been known and the miracle was a notable one.

IV. The apostles at prayer (vs. 23-31). The apostles went at once, when they were released, to their fellow Christians. They took the matter of their threatenings to the Lord in prayer. While they prayed there was a stirring physical manifestation of the Lord's presence, and they were all filled with the Holy Ghost. They had no thought of turning back from the work assigned them. They prayed for help to preach the word of God with boldness, and their prayer was answered.

Questions.—Who preached to the people after the lame man was healed? Why were the rulers troubled? What did they do with the apostles? How many converts did they have that day? What great council was called together? Why did they wait till morning? What question was asked the apostles? Give the main points in Peter's reply. Why did the people marvel? What did the Sanhedrin decide to do. Why did they not punish the apostles? Who glorified God? Why?

PRACTICAL SURVEY.

Topic—A test of religious.
I. The trial of Peter and John.
II. The trial of Jewish rulers.

I. The trial of Peter and John. Two men, disclaiming all original power, excited Jewish society by the performance of a miraculous deed. Peter was challenged by the Sanhedrin to give an account of the miracle. It was an offence of doctrine, rather than of deed, which excited the opposition of the Sadducean rulers. The apostolic teachings reflected deep discredit upon the tribunals of the nation. A great crisis was pending. Jerusalem was in a moral upheaval. Seventy of the nation's magnates were confounded by two peasants. The fact of healing was recognized with the logical conclusion that it was a sign of the presence and working of some supernatural power, yet the power of the authority of the apostles were questioned. They were sturdy, truthful, uncompromising witnesses to Jesus and the resurrection. They testified to the thing which had been done and of greater things which he could do. Peter's words had a remarkable effect upon his distinguished hearers. Though they contended that the apostles were not personally qualified and had no right to teach, there was the strange coincidence, that in the moment of their amazement the rulers should give true and sufficient explanation of their work in that they had been with Jesus and learned of him. The impress of the great Teacher was too evident to be denied. Tone, look and manner, declared the apostles' training beyond a doubt. The Jewish rulers had admitted the originality of Jesus as a teacher and had opposed him on that account. That originality had reappeared in his disciples. The old controversy had suddenly revived. For the apostles to vindicate Christ's character meant the condemnation of the rulers. The resurrection of Jesus was a complete vindication of his character. Reference to the crucifixion stirred the priests. Reference to the resurrection stirred the Sadducees. The name of Jesus was set forth as the source of power. "Neither is there salvation in any other," was the substance of every apostolic announcement. Christ's way of delivering the nation was by becoming the corner-stone of its hope. What Israel needed was new life and its only Savior was he who had healed the cripple. The apostles were branded as heretics and forbidden to preach by the supreme authority of the nation. Religion, politics and skepticism conspired to crush the young church. The apostles were endowed with divine fortitude. Their endurance of persecution was a guarantee of their sincerity and an exhibition of the power of the gospel in themselves. Theirs was the heroism of hearts inspired by love and living for the benefit of others. They knew their mission and message to be divinely given. They possessed the secret of true courage, because they believed and did the right, from right motive, under the immediate inspiration of the Spirit, who made them effective.

II. The trial of Jewish rulers. Peter gave the men of the court their appropriate titles, recognized their office and authority and addressed them with deference and respect. He made the most of his opportunity. The prisoner's bar was transformed into a pulpit. He stood in view of them all, a splendid illustration of the truth that "the righteous are as bold as a lion," exhibiting granite-like firmness and unflinching loyalty to truth in his declaration that the risen Christ is the only Saviour of mankind. In the boldness of Peter the Jewish rulers saw the answer to their own words, "His blood be upon us, and on our children." Their antagonism was strong in spirit, but futile in effect. In vain had the men of scholarship looked down contemptuously upon the men of true learning. Their prohibition aimed at an impossibility. The places of the prisoners and the judges were in reality reversed. The apostles were empowered anew to speak by the combination of evidences against them. Working under the authority and power of the Holy Spirit made the apostles invincible. Being under the arrest of an accusing conscience and destitute of divine approval made the rulers the actual criminals.

T. R. A.

CHEAP CHURCH ATTENDANTS

(Rochester Times.)

The man who benefits by the church either as a member, a regular or occasional attendant, the father of children who attend its Sunday or day school or merely as a neighbor the value of whose property is enhanced by its presence in the community, and who does not pay his fair share of its or some other church's cost of maintenance, is not unlike the man who dodges his social and political obligations.

There are men who get out of paying their religious dues who would be ashamed to crawl under the fence to see a baseball game or circus or to have it said in public that they had flunked their dues in a bowling club.

He (angrily)—See here, Betty, what do you mean by keeping me waiting here on the corner, looking like a fool? She—Now, Tom, I know I kept you waiting, but the rest you did yourself. —Boston Transcript.

Cabinet Wrecking

(From the London, England, Spectator.)

A great deal of the criticism levelled against the ministry for their past actions is thoroughly justified. Yet in spite of that we deprecate the attempts now being made to overthrow the Cabinet. We believe that men who are sane as well as patriotic, who will take the trouble to think without passion on the ministerial situation, and will consider the question from all its sides and with all its possibilities for good and evil, will come to the conclusion that on the whole greater harm would be done by pulling down the ministry than by leaving them to continue the conduct and management of the war. We will set forth shortly the reasons which have induced us to come to this conclusion. It is obvious that no wise man could wish for the overthrow of the present ministry merely on vindictive or punitive grounds or in order to give another set of men an innings. The only ground which will justify swapping horses in war time is that there exists an alternative body of men capable of conducting the war better than those now in office. We see no such body of men available. This disposes of the notion of a new Cabinet in the true sense. If there is to be a change, it must be through a reorganization and a remaking of the administration piecemeal. If it can be shown that there are certain members of the Cabinet who have done badly during the war, and that one has no right to assume that they will henceforth do better, who have, in fact, shown themselves incapable, they clearly should be got rid of. Again, if there are men in the Cabinet suffering from physical disabilities which prevent them giving their best work to the country, they also should retire. The same considerations would apply to men who have become stale through the long strain of office and have lost alertness and elasticity of mind. In the cases suggested, it would be right to risk putting in new men, even though there should be no absolute assurance that they were likely to prove ideal ministers. The only ground which would be at the present time justify acquiescence in the retention in the Cabinet of men not thoroughly efficient would be the ability of such men, if their removal were attempted, to wreck the scheme of reconstruction. It would obviously be absurd for the reconstructionists to defeat their own ends by attempting more than they could accomplish.

These considerations lead at once to the endeavor which is being made to get rid of the present Prime Minister. We fully recognize that the great majority of those who have come to believe that the Prime Minister is not equal to the task in which he is engaged, and that he should make room for some other man, unnamed, are inspired by no personal animus, or by any but the best and most patriotic of motives. They honestly think that the war has not been conducted as efficiently as it ought to have been, and as a result of this conviction they place the responsibility upon the Prime Minister, and ask their pound of flesh in accordance with the implied contract between the Prime Minister and the country that he is responsible for the doings of the ministry, and must answer for their failures just as he may claim approval for their successes. But even though we admit the theoretic right of those who are dissatisfied with the way in which the war has been managed to demand their pound of flesh, we would ask them to consider most carefully whether in existing circumstances it would be wise to do so. We are not playing a game of forfeits, or even engaged in teaching prime ministers their duties. What we have to think of is how to win the war, and all questions must be judged solely by that—i. e., whether any given chance will improve or diminish our prospects of rapid victory. There is no other touchstone. Here the first thing to remember is that Mr. Asquith, rightly or wrongly, has told the country quite plainly that he means to stick to his post, and will not vacate it merely because of criticism. This means, of course, that he would fight, and fight hard, if any attempt were made to dislodge him. But in the present state of public opinion can it be said that it would be good for the country to deflect its energies to an internecine struggle of this kind? If there were a universal feeling in the country that he had mismanaged the war, or if it were felt that he retained men whom it was his duty, however painful, to remove from office, or again, if some great disaster were to overtake the country, no doubt he would become the subject of public odium, and there would be no difficulty as to his removal. But it cannot be said that such a state of things at present exists, and no one can wish it to exist, for that would be to wish for disaster. Possibly certain people might declare that if that state of odium does not exist, it may be necessary to create it by holding the prime ministry up to obloquy. Into the abstract merits of such a proposition we do not intend to enter. It is sufficient for our purpose to say that we do not believe the attempt would be successful. The effort to secure a verdict from the country against the Prime Minister would fail, even though the position might be shaken by the attempt.

The only other way in which the Prime Minister might be forced to resign would be through the existence or emergence of some great popular figure—some man who would convince the country that the nation must be saved, and that he alone was capable of saving it. Suppose, for example, we had at this moment two great opposing figures such as we had at the height of their fame in Mr. Gladstone and Mr. Disraeli, and that one of them was in office and had failed to manage a great war successfully. In that event, no doubt, public opinion would call his great rival to the helm. But there is no such figure at present on the political horizon. If this is a sound view, and if again, as we believe, the reconstruction of the Ministry is necessary in the public interest, that reconstruction has got to be carried out with the assent and through the instrumentality of the present Prime Minister. But even though the persistent pressure of public opinion were to convince the Prime Minister that he must reconstruct his Cabinet in order to obtain the highest efficiency of administration, the task would even then be by no means accomplished. All ministers are carefully constructed puzzles, and if two or three, or even one, of the pieces is withdrawn, the whole thing is apt to fall down. A vacancy created by what in effect would be the force of public opinion, or even by purely voluntary resignation, might lead to internal difficulties of the most serious kind. When a great office becomes vacant it is by no means certain that the man best fitted to fill it can be given the post, unless we are assuming a Prime Minister of such admitted weight, influence and authority that his nomination will go unchallenged. It is far more likely that he will receive an ultimatum, not from the best man, but the man of most political power, to the effect that, though he is prepared to go on with the status quo, he is not prepared to see this or that man put over his head. Unless, then, there is some man designated by the weight of public opinion to fill a particular vacancy, reconstruction may become a very poignant disappointment, and another square man may be put into a round hole. There are considerations which in the present state of feeling fret the ordinary man to fury. And no wonder; but unfortunately such fretting will not surmount them. In a word, in order to avoid one series of evils we may fall into a greater.

"But do you really mean," we can hear our critics say, "to put us off with talk of this kind, and blandly to inform us that it is useless to attempt to bring about any better management of the war than we have at present?" Our answer to such criticism would be that which we suggested at the beginning of this article. Unless we have a list of men of first-rate ability and of fresh and vigorous mind to recommend to the country for the administration of its affairs, we believe that on the whole it will be safer and better to go on with the present Cabinet, subject, however, if a vacancy or vacancies should occur, to a strict and serious effort to fill those vacancies with the best possible men. Beyond that, we would try to have outside criticism focussed so as to be co-operative rather than destructive. You will never get the best work out of any body of men who are perpetually told that they are dolts and fools or self-seeking charlatans. You are far more likely to do good to the nation's cause by insisting that no man should despair of the republic than by constantly threatening the servants of the state. Good work is seldom done by those who are perpetually reminded that they have ropes tied round their necks, and that the hangman is always in attendance in the basement.

COUGHED SO HARD

Would Turn Black In The Face.

SHE WAS CURED BY USING DR. WOOD'S Norway Pine Syrup.

Mrs. Ernest Adams, Sault Ste. Marie, Ont., writes: "My little girl, six years old, had a dreadful hard cough. At night she would cough so hard she would get black in the face, and would cough for several hours before she could stop. We tried different kinds of medicines and had several doctors, but failed to do her any good. She could not sleep nor eat her cough was so bad, and she was simply wasting away. A friend advised me to try Dr. Wood's Norway Pine Syrup. I got a bottle and saw an improvement, and got another. Now I am only too glad to recommend it to all mothers."

Too much stress cannot be laid on the fact that a cough or cold should be cured immediately.

Dr. Wood's Norway Pine Syrup will cure the cough or cold and prove a preventative from all throat and lung troubles such as bronchitis, pneumonia and consumption.

"Dr. Wood's" is put up in a yellow wrapper; three pine trees the trade mark; price 25c and 50c, per bottle.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

A Queer Fish.

One of the queerest of odd creatures is the mud skipper, or jumping fish, which inhabits the large river of India and the neighboring seacoasts. At ebb tide these little fishes leave the water to hunt for tiny crabs, flies, etc., and their strong pectoral and ventral fins, aided by their tail, enable them to move about easily and to climb upon trees, grass and leaves.

With their huge eyes, seeming to project far out of their sockets, they can see as well on land as in the water. They progress in short, quick leaps, effected by sharply bending the rear third of the body to the left and suddenly straightening it. In color they are usually light brown, with dark bands, though they sometimes appear light green. They are easily caught and are much used in Burma.

One of the latest fads is for a young woman to wear the name of her fiance embroidered on the ankle of her stocking. And I suppose if they ever fall out she simply turns the hose on him. —Youngstown Telegram.

Heart Was So Weak Could Not Go Up Stairs Without Help.

When the heart becomes weak and does not do its work properly the nerves become unstrung and the whole system seems to go "all to pieces."

When this happens you need a tonic to build up both the heart and nerves, and Milburn's Heart and Nerve Pills will accomplish this for you, providing you do not let your case run too long and allow it to become chronic.

Mrs. Evangiliste Lavertture, Port Coulonge, Que., writes: "Last summer my heart and nerves were so bad I could not sleep at night, and my heart was so weak I could not go up stairs without help. My doctor said he could do no more for me as my heart was completely done. A cousin of mine came in one day and told me that Milburn's Heart and Nerve Pills cured her completely. I immediately gave her 50 cents to bring me a box, and since that day there is a box always on my sideboard. I am now well, and my heart and nerves are stronger than when I was a little school girl. I advise anyone with heart trouble to try them. No doctor can beat them."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25; for sale at all dealers; mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

EDITORIAL COMMENT

Every young Canadian who puts on the King's uniform brings the end of the war some fraction of time nearer.

+ + +

"This is as much our war," said a speaker at a recruiting meeting in Wiarton, "as if it were being fought in the peninsula."

+ + +

Good old Bruce continues to lead the van in patriotic giving $90,000 per year for patriotic purposes is a good example for other counties.

Ontario will raise a dollar and a half a head for the Patriotic Fund. Good old Bruce is going one better, and making it two dollars a head.

+ + +

A hired man enlisted and according to the Kincardine Review was asked why. "Well" he said, "I'd be a long time on the farm before I'd be ordered to stand at ease."

+ + +

The Civilian Recruiting League of St. Marys has raised a fund by subscription and now offers a bonus of two dollars to each enlisted man who secures another recruit.

+ + +

A Toronto business firm is advertising for "experienced circular girls." Circular girls, we thought, went out with Mother Hubbards and hoop skirts. They don't make 'em that way any more. They're flat; they're re-cornered; they're many-sided maybe; but never circular.

+ + +

Reeve James Cass of Elderslie, who has been very active in the recruiting canvass in his township, takes an optimistic view of the recruiting situation. He says a good many more of the young men on the farms want to go, but have held back because they have been busy at home. But many of them will go yet.

+ + +

What is the matter with our home boys (that they do not [illegible])? asks a local exchange. All sorts of excuses are given; their families and relatives object to either doings it does not when the same parents and relatives object to others doings it does not make the slightest difference; the sons, so obedient when it comes to joining the colors, then do exactly as they please. Why this great show of obedience? Another way of putting it would be; for these young fellows, when they want to go to the devil, father, mother and friends may plead in vain, but when it comes to going to war, father's and mother's word is law.

+ + +

Those who are apprehensive regarding the drain of the war upon the man power of this country, should consider the condition of Austria. In that country the age limit for military service has been advanced to 55 years. Seeing that men between the ages of 50 and 55 are being called out, we may conclude that the supply of men below 50 has been exhausted—that is, no additions can be made to the army from the men below that age. If the voluntary enlistment of our men between the ages of 18 and 45 is being, or is likely to be felt in the carrying on of business, what must be the condition of business in Austria, where every available man below the age of 50, willing or unwilling to go, has been drafted into the army.

+ + +

From Leamington comes a proposition that town councils be composed of a mayor, reeve and three councillors, all of whom shall receive remuneration for their services. No doubt the proposal is made with the idea that a revolution in municipal government would result and that the unsatisfactory conditions which exist in connection with most municipal councils would disappear. We believe that such hopes are illusory. What is needed is not so much a change of system as a change in the spirit of the people and a deeper realization by citizens of their public duties. When good and able men are willing to serve on municipal bodies, and electors are ready to vote for such men, rather than for glad-handers and good promisers, then we shall have good municipal government.—Goderich Signal.

+ + +

Manitoba women have been given the vote by the Legislature of that province,—the first one in the Dominion to adopt this progressive measure. The historical importance of the event affords a timely opportunity to examine, not as a matter of partisanship, but of actual record, whether Liberal or Conservative provincial governments are the more progressive. From 1905 to 1915 there was Conservative Government in Manitoba. Prohibition, women's suffrage, direct legislation and other advanced measures were blocked. Last year Manitoba went Liberal. Already it has women's suffrage; direct legislation will be passed this Session and a referendum on prohibition will be taken on March 15th. More reforms have come under Liberal Government in a few months than came under Roblin in ten years. Both Saskatchewan and Alberta also have Liberal Governments and have had since 1905. It is common knowledge that up to the time Manitoba joined the same procession these two provinces had the most advanced legislation in the country. Alberta has direct legislation and prohibition. Saskatchewan has wiped out the bars and in both provinces women's suffrage is on the eve of adoption. From a survey of such facts it is evident that Ontario too, if it wants to be listed among the progressive communities, must do as the three prairie provinces have already done,—elect a Liberal Government.

Bruce Will Do Her Bit County Votes $90,000

$7,500 per Month will be Paid Over for Patriotic Purposes — Council May Adopt the Good Roads System — Committee will Report at June Session.

Bruce County will contribute $7,500 per month for patriotic purposes, or a total of $90,000 a year. That decision was reached at the January session here last week, on the recommendation of the Bruce Patriotic Association. There was not a dissenting voice heard when the motion of Reeve Kastner was put in Council for the adoption of the Finance Report. It went through without fireworks or flag-waving or discussion, the whole Council being thoroughly unanimous and requiring no spurring up to induce them to come up.

The grant is figured on a basis of $2 per head for a population of 45,000 people. $83,500 goes to the patriotic fund; $2,500 to Red Cross; $1,500 for recruiting expenses; $1,500 for Belgian Relief; $500 towards the remodelling old public school for a non-c'ms' school; and $500 towards the regimental band.

The Council will start paying in the money as soon as the debentures can be sold.

+ + +

The Council Meeting

The opening session of the County Council for 1916, was held in Walkerton, commencing on the 25th as per Statute.

All members were present except W. D. H. McDonald of Tiverton, absent through bereavement in his family. Time and the Electors had dealt gently with the members since last year, with the result that there were but four changes among the members instead of the usual ten or twelve changes.

The election of a Warden was at once proceeded with, the following being nominated: Dr. Wilkinson, D. Phelan, David Scott, G. Kastner, A. E. McNab, E. Kuntz, D. J. Izzard, M. Filsinger, J. E. Grant, W. H. Brown and Jas. Douglas. All of whom withdrew except Messrs. McNab, Izzard and Douglas, and Mr. McNab was elected Warden.

Mr. McNab thanked the members for the honor done him and the town he represented, and outlined a number of important matters likely to engage the attention of the Council this year, mentioning particularly Patriotic matters, good roads and Hydro Electric.

The Standing Committees were appointed as follows:

FINANCE—Messrs. Kastner, Brown, Grant, Anderson, Nesbitt, Doering and Forbes.

ROAD AND BRIDGE—Messrs. Cass, Weir, Johnston, Izzard, Sinclair, Filsinger, Kuntz, Whicher and Wilkinson.

EQUALIZATION AND SALARIES—Messrs. Douglas, McDonald D. A., Whicher, Hunter, Craig, Dobson and Ferguson.

HOUSE OF REFUGE—Messrs. Kuntz, Filsinger and the Warden.

PETITIONS AND BY-LAWS—Messrs. Scott, Munn, Ballachey, Phelan and D. B. McDonald.

EDUCATION AND PRINTING—Messrs. Ballachey, Burns, Christie, Douglas Doering, Munn and Rutledge.

PROPERTY—Messrs. Nesbitt, Izzard Phelan, Dobson and Burns.

WARDEN'S—Messrs. Brown, Forbes and Ferguson.

The usual grants were made, of $75 to each Agricultural Society; $150 to the Children's Aid Society; $500 to the four Northern Townships; $25 to the Sick Children's Hospital; $25 to each Farmers' and Women's Institutes. All newspapers were ordered for House of Refuge, and usual Library grants made.

Hugh McLaren and W. J. Taylor were appointed county auditors: A. E. McNab and Norman Robertson to the Board of Criminal Audit; H. McLaren, Port Elgin, M. E. Bose, Chesley, F. Sellery, Kincardine, H. M. Lay, Walkerton and Wm Beckie, Wiarton, High School Trustees; F. M. Hicks, Southampton, A. Gilmore, Tara, and H. A. Dauppe, Lucknow, were appointed on Board of Examiners.

The only changes made in salaries of officials was an increase of $50 in the salaries of the Keeper and Matron of the House of Refuge.

A long communication was read from the Ontario Dept. of Public Works urging the County to adopt the Good Road System, and pointing out the benefits. Mr Anderson of Lucknow, took up the question urging that some action be taken. He pointed out that this question had been before the Council for some years but nothing had been done. Had the scheme been adopted the County would have received from the Government $100,000 on account of the bridges alone that we have had to build, which the County had to pay for anyway. The Government has now increased the portion it pays to 40% of the cost of maintenance. Many other Counties have entered into the scheme and all are well satisfied. The Engineer of the Department, in his letter, points out that with the material Bruce has for roads the cost in this County would not be half what it is in some Counties not so favored with good material. Messrs. Kastner and Hunter also urged action to be taken at once.

A Committee of Messrs. Cass, Anderson and Hunter was appointed to look fully into the matter and report at June Session.

Patriotic matters again loomed large and the opinion seemed pretty general that while the County had done fairly well it had not done what it could or should. It was also pointed out that as it was Subscriptions were continually being asked for and those easily got at were called upon to bear a good deal more than their fair share, whereas others, though they may be as willing to give, were not asked on account of being more difficult to get at. It was felt that if the County made the grant everyone would then be asked to contribute his or her fair share and no more. It was decided to increase the County grant from $1,000 a month to $7,500 a month while the war lasts. This amount will be divided, $2,500 to the 160th Overseas Battalion of Bruce, $2,500 to the Red Cross, $1,000 to the Belgian Relief Fund and the balance to the Canadian Patriotic Fund. The money therefor will be raised by debentures as required, payment being spread over ten years, the Council thinking the future might well bear a part of it.

Messrs. Nesbitt and Weir asked the County to assume the bridge on the 6th con., of Brant, claiming it is a county bridge. A committee was appointed to investigate and report.

The usual number of accounts were presented for payment, and repairs to bridge authorized.

It was decided to recommend that I. H. Armstrong be dismissed as a county constable.

The Council was entertained, by Mr. J. Rowland to lunch at the Soldiers' Tea Rooms and by the Ladies of the Presbyterian church at a banquet in the basement of the church where they met the 160th Batt., and enjoyed a very pleasant hour. The council thoroughly believe that if the men of Walkerton and vicinity "deliver the goods" on their part as efficiently, freely and smilingly as the ladies do their part that section of the county at any rate, will do their share. The council was much pleased with having the opportunity of meeting the regiment and are quite satisfied that the men in the regiment will fully uphold the honor of the County they represent. They are indebted to the Knox church congregation for the opportunity of meeting with the regiment.

+ + +

Patriotic Association Meeting

The Bruce County Patriotic Association met at the county council chamber on Wednesday afternoon, Jan. 26th There was a good attendance present. The chair was occupied by Mr. W. H. MacFarlane, president. Mr. H. M. Lay, the secretary-treasurer presented the financial statement, which we have summarized as follows,—

SEC. REPORT

Subscriptions during the year amounted to,—

Cargill .... $	50 30
Chesley	300 00
Lucknow (John Joynt $500)	683 93
Walkerton Subs. $760 15 Town Grant $400 00	1,160 15
County Oat Fund	192 20
County Grant	11,000 00
	$14,891 14

Grants paid to beneficiaries from:—

Aug. 19, 1914 to Dec. 31, 1915	$6,385 40
For month of January, 1916	767 00

In January there were on the list 60 families of beneficiaries comprising 67 wives or widowed mothers and 93 children, or 150 beneficiaries altogether, distributed in the County.

Arkwright, 1 family, $12 00; Cargill, 3 families, $58 00; Chesley, 11 families, $148 00; Hepworth, 1 family, $12 00; Kincardine, 3 families, $50 00; Lucknow, 5 families, $72 00; Paisley, 1 family, $20 00; Southampton, 1 family, $22 00; Tara, 4 families, $70 00; Teeswater, 1 family, $10 00; Tobermory, 1 family, $10 00; Walkerton 22 families, $304 00, Wiarton 5 families, $100 00.

The schedule of assistance for the County is $10 per month for the wife or widowed mother and $2 for each child. There are no officers' families from this County receiving assistance. If any officers' families require assistance, special application must be made to Ottawa.

The financial statement was adopted.

The matter of raising further funds for the Patriotic Association was taken up. Mr. L. C. Benton spoke briefly as to the best methods of raising money throughout the county. He felt that committees should be appointed in every sub-division throughout Bruce County and a systematic canvas made.

Mr. D. Robertson thought concerted action should be taken. There were a number of ways such as Mr. Benton suggested, or there was the method of the county raising the money similar to what had been done before.

Mr. J. A. Rowland said that the farmers had not been doing their share and he thought they should do more. Never had crops been better and prices better. They needed money for the Empire at this time.

Mr. J. J. Hunter of Kincardine said he could not agree with Mr. Rowland and his attitude. In canvassing he had found people in the towns who refused to give a dollar unless it came in the way of taxes. It was no time to condemn any section of the community. It was the duty of the meeting to try and devise ways and means to raise the necessary funds. Bruce County had approximately 46,000 of a population. Placing the per capita at $2.00 per head this would mean $92,000. He suggested that a recommendation be made to the county council and that they pass a by-law for this amount and assess the municipalities pro rata. The municipalities in turn could issue debentures to meet their payments if necessary. This would be fair and equitable to all. Taking the men who were not on the roll as taxpayers a canvass could be made of them for a personal subscription.

Mr. G. Kastner, Wiarton, agreed with the other speakers. He felt, however, that the fair way was to put it in the taxes and then all would bear their share of the burden. A personal appeal could be made as Mr. Hunter suggested to those who were not ratepayers, such as bankers, clerks, doctors, etc. He was in favor of all these funds being assessed for.

Mr. J. Douglas, Hepworth, was also in favor of the assessment plan.

Judge Klein spoke along the same lines, pointing out that all should pay. He knew cases where some with large incomes would not give a cent. The only way to get at them was in putting it on the taxes.

The election of officers resulted as follows:—Honorary President, W. H. MacFarlane; President, Warden A. McNab; Vice President, L. C. Benton Sec.-treas., H. M. Lay. These officers together with the Reeves of Brant, Carrick, Culross and Greenock and the executive officers of the Walkerton branch form the executive committee of the Bruce County branch of the Bruce County branch of the Canadian Patriotic Fund. Four members form a quorum.

The conclusions of the meeting were crystalized in the following resolution:—Moved by Reeve Johnston of Bruce Tp., second Reeve Kastner of Wiarton that this association would recommend the County Council to increase their Annual grant to $90,000 payable at the rate of $7,500 a month. Carried.

+ + +

County Council Skits

Bruce is some county. $90,000 for the Patriotic Fund and more to follow if it is needed.

J. E. Cass, Elderslie, was on the job again this year and in him Elderslie has a good live man.

James Douglas, Hepworth, is one of the solid boys of the county fathers and does love a good cigar.

Spence Nesbitt is getting to be one of the young old-timers at the county council and he makes a good man.

Warden A. McNab is the way it reads now. Walkerton has been honored and so has the great Scotch clan McNab.

W. H. Rutledge was here for the first time from Kincardine Township. He is a fine, clean-cut type of man and shows ability.

The happy Dr. Doering spent the week with us at the county council. The doctor is a general favorite with the council.

Archie Weir, a brother of Lieut.-Col. Weir, is from Brant and he resembles the gallant Colonel. It was his first session at the county board.

Mr. Dennis Izzard, reeve of Port Elgin, should he again return to the County Council, will land the Wardenship. At least that is the whisper.

Dr. Wilkinson, Huron, says this is his last year. The doctor has always made a good councillor and will be missed by his colleagues who return.

"Black" Dan McDonald, Kinloss, was back again. He is unbeatable over there. In fact they are going to crown him king if he will only accept the honor.

James Johnston, Bruce's big reeve, says this is his last year. His natural successor should be Peter Dobson, the deputy, but elections are like horse races.

Mr. Gilbert Christie, Saugeen's representative at the County Council is a new man. However, he is bright and keen and more will be heard of him later.

George Anderson, Lucknow's reeve, is the white headed boy at the council board, but that don't say he is old by any means. It was early piety that made George's hair white.

Have you ever noticed the peculiarity of P. A. Malcomson, the county clerk, how fond he is of caressing his chin with his thumb and index finger. He seems to be the whole push with the councillors who fondly call him Percy.

"Ged" Kastner, Wiarton, is one of the greatest patriots at the county council. "Ged" likes a good horse race but just now he is backing a bigger game and he declares that the Allies will sure win. He gives every man that gets five recruits for the 160th Bruce Battalion a five dollar bill.

Fred Frook dropped into town on Wednesday and he and Mose Filsinger and Jack Hunter got talking of the old days. There must have been something doing in the days gone by before we landed in this neck of the woods. Mr. Frook has dropped out of public life, but Mose Filsinger looks good for many years to come.

"Billy" Hunter, Kincardine's reeve, is one of the best men that has ever sat in the County Council. He don't have much to say, but he has a fund of knowledge in county matters. He has been here about ten years. He is unbeatable in his own home town. Everybody in Walkerton is glad to meet him and he is a prime favorite with all the councillors.

Smiling "Denny" Phalen of Greenock, was back this year to the County Council. He and Jack Hunter of the Kincardine Reporter were hobnobbing. Funny how those Irish like to get together. It was the Orange and the Green upholding Ireland's great part in the war. Denny invited Jack to the summer session in June and also to walk with him on the 17th of March. Jack promises to do it if Denny will walk with him on the 12th of July.

BANQUET TO SOLDIERS

Local Company of 160th. Battalion Spend Enjoyable Evening the Guests of the Ladies of Knox Church.

The banquet given by the ladies of Knox Church on Thursday evening to the local company of the 160th Bruce Battalion was a most enjoyable affair, and those present, and particularly the men in khaki, are longing for a repetition of the pleasant social evening.

The basement of the church was tastefully and daintily decorated with bunting, etc., and six long tables were laden with the choicest and most edible good things which the good cooks of Knox church could bring together and despite the almost unlimited capacity of the khaki clad boys, there was abundance for all.

The soldiers and the 160th band marched to the church at six o'clock and here the members of the County Council, the members of the session and managers of the church, who had been invited by the ladies, also gathered.

After the guests had partaken of the many good things, the evening's program commenced with Rev. Thos. Wilson as toast-master. In this role the reverend gentleman proved most efficient, with his ready wit and humor, and to him is due a great deal of the credit for the evening having been such an enjoyable one.

The first toast was "To the 160th. Bruce Battalion," which was moved by Judge A. B Klein, who is President of the Bruce County War Auxiliary. The Judge complimented the officers of the 160th, on the work already accomplished, and praised the men for their good conduct and bearing in the past, stating that he had witnessed no spirit of rowdyism which in general is so prevalent where bodies of men are congregated. In concluding Mr. Klein said that men from Bruce had made good in all parts of the world upholding the right, and he felt sure that the boys of the 160th, needed no words of encouragement to goad them to do their duty in their fight for King and Country and uphold the honor of Bruce.

Major Moffatt, in the absence of Col. Weir who was obliged to leave earlier in the evening, answered the toast to his battalion. On rising the Major received a great ovation from his men and there is no doubt but that he has won his way to their hearts. In his reply Major Moffat captivated his audience by his modest and matter-of-fact manner of observing things and from his speech, which was probably the most enjoyed by both soldiers and civilians, his listeners gathered a great deal of information with regards to the work at the headquarters of the 160th, and learned that for the honor of being major or having any other position on the staff one was obliged to work from nine a. m. until twelve p. m. daily. He opened his address by thanking the county council for their liberality towards the 160th stating that every request for financial assistance had been granted, without which the recruiting for the "Bruce" could not have proceeded, and for which he and his fellow-Bruces were more than grateful. He complimented the men on their excellent conduct and also expressed himself as greatly pleased with the assistance which had been and was being given him by his juniors in the orderly room. He made special reference to Lieut. Henderson, whom he said, had been an invaluable servant to him. Lieut. Whitehead, and his other lieutenants too, he said, were sure to win their spurs, while a better paymaster than Capt. Shaw could not have been secured. Major Moffat is well satisfied with the progress made with the formation of the battalion and is confident that the "Bruce" will be brought to full strength before the middle of April. "When the required number of men are secured," the Major said, "they will be mobilized and trained at a central point in the county and will, previous to leaving for service, visit all the towns in the county in order to allow the people of Bruce to see what a full battalion of trained men looks like and also give the boys an opportunity to visit their respective home towns." He also intimated that the band, even while recruiting is in progress, will visit for short periods, the several larger centres.

The second toast was "To the County Council" which was ably moved by Mr. H. M. Lay and seconded by Warden A. E. McNab.

The last toast was "To the Ladies" which was moved by J. G. Anderson ex-M. P. P. of Lucknow in his usual affable manner, and before he seated himself everyone in the banquet hall was aware of the wherefore of J. G.'s popularity with the ladies. Mr. John Rowland seconded this toast and was listened to with great appreciation by those present.

Prior to calling on Mr. Rowland, the chairman who was for the evening dubbed "The Reverend Doctor Mr. Wilson," on behalf of the ladies expressed his gratitude to the Power Co. for the special illuminations which they had supplied gratis for the evening.

At the conclusion of the program Mayor Lippert moved a vote of thanks to the chairman which was seconded by Capt. McNally.

During the evening Mrs. Hunter and Miss Truax gave an instrumental duet, Lieut. R. Whitehead a solo, and Miss M. Havill a recitation, all of which were well received.

The singing of the National Anthem brought to a close a very enjoyable evening and the ladies of Knox church as entertainers more than upheld their reputation and might well feel elated at the success of their banquet which was the first to be tendered in Walkerton to the boys of the 160th Bruce Battalion C. E. F.

This Book helped me improve my Farm.

It is the most valuable book I own and it cost me nothing.

It has saved me time, labor and money and I've got better looking, more durable and more serviceable buildings than I ever had before.

The first cost of concrete farm improvements is also the last cost. There's no after expense for paint or repairs—no danger from fire, rot or rust—no trouble of any kind. Besides they lower the insurance rate.

If you haven't a copy of "What the Farmer can do with Concrete", send for one today. There's more than 100 pages of valuable building information, 52 practical plans, illustrated by diagrams and photographs, and dozens of other interesting farm facts.

A copy will be sent to you free of charge, immediately upon receipt of coupon below.

HE STRUCK IT RIGHT AT LAST

After Suffering Almost Two Years, "Fruit-a-tives" Brought Relief.

MR. WHITMAN

882 St. Valier St., Montreal.

"In 1912, I was taken suddenly ill with Acute *Stomach Trouble* and dropped in the street. I was treated by several physicians for nearly two years. I was in constant misery from my stomach and my weight dropped down from 225 pounds to 160 pounds. Several of my friends advised me to try 'Fruit-a-tives' and I did so. That was eight months ago. *I began to improve almost with the first dose.* No other medicine I ever used acted so pleasantly and quickly as 'Fruit-a-tives', and by using it I recovered from the *distressing Stomach Trouble, and all pain and Constipation and misery were cured.* I completely recovered by the use of "Fruit-a-tives" and now I weigh 208 pounds. I cannot praise 'Fruit-a-tives' enough". H. WHITMAN.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

DENTAL

W. S. HALLADAY, D.L., D. S.

POETS' CORNER

YOU!

Don't they look smart in the khaki,
The Empire's most glorious hue?
Just glance at yourself in a mirror
And think of that color on—YOU!

Picture a cap, 'stead of "Chri-tie,"
And maple-leaf, badge of the true;
Vision a tunic and puttees—
How well they would look upon YOU!

Khaki's a wonderful wizard!
There are very few things it can't do:
It can make a MAN of a slacker,
"A slacker" —reflect—is that YOU?

Come, laddie, have you no conscience?
Just think of the boys that you knew
Who gave up all for their country,
Say, don't their example move—YOU?

Give up your skating and hockey,
Far manlier work there's to do:
Enlist now!—get into the khaki!
Your Country and Empire need—YOU!

T. Manfred Denvil.

Sec. Chesley Branch (Div. 2)
Bruce Co. War Auxiliary.

News About Town

A recruiting campaign was started two weeks ago covering the districts, including the townships of St. Edmunds, Lindsay, Eastnor, Albemarle, and Amabel. Meetings have been addressed at different points, with splendid success. The response at Tobermorey, Lion's Head, Stokes Bay and Hepworth was beyond the expectations of the commission in charge.—Tara Leader.

+ + +

Drill Sergt. Carrick (known about Whitechurch as Capt. Carrick) came over from Walkerton yesterday to take charge of the Lucknow squad, and drill commences this morning. Oral instructions will be given in the recruiting room, and drill exercises will be given in the Presbyterian Church shed, where there is fine open space and concrete floor. Besides there will be regular street and road marches—Lucknow Sentinel.

+ + +

The friends of Peter Dobson, deputy of Bruce, on Thursday night presented him with a fine wrist watch. During the session, Peter lost his watch and the boys took this way of showing their appreciation. When Peter examined the watch he found that it was his own which had been taken to the harness maker and a fine wristband made. Peter blames his roommate, Reeve Jas. Johnston, for purloining the time-piece. The boys for a couple of days made things lively for Peter asking him, "What time is it, Mr. Dobson?" However, Peter now has his watch secure on his wrist.

+ + +

HOFFMAN—AHRENS

The marriage took place on Jan. 26th at the home of Mr. and Mrs. Christian Ahrens, Elmwood, of their daughter Marie, to Mr. Ben. Hoffman Brant Tp. Rev. Mr. Henkel officiated. The bride's sister, Miss Sophia, assisted her, while Mr. Henry Hoffman was best man. The bride was handsomely gowned in white silk, while the bridesmaid was attired in blue. The ceremony was witnessed by the immediate friends only. Mr. and Mrs. Hoffman are spending their honeymoon at Elmira and other places, and upon their return will take up residence on the groom's farm on the 6th concession of Bentinck.

+ + +

Picked His Steps

The gale on Friday night blew out the electric lights in nearly all sections of the town. Nightwatchman was on his beat, and near the Willow Creek bridge on Queen St., when a feeling in his feet warned him that there were strong electric currents playing about the ground. The night officer stepped about somewhat gingerly for a few moments until he sized up the situation. The result of his reconnaissance was the location of fallen wires, very much alive with electricity.—Paisley Advocate.

+ + +

An Expensive Banquet

Thomas H. Wilson of the Royal Hotel, was taxed $40 and costs for allowing liquor to be consumed on his premises, but in justice to Landlord Wilson, the fine was paid by Mr. Samuel Brown, who took the responsibility for the wet goods being served in the house. The story of the great drama was enacted on the evening of December 15th, when Mr. Samuel Brown, who was retiring from the Township Council, invited the members of the Board and a number of friends to a banquet at the Royal Hotel. A few minutes before the menu was presented to the guests, Mr. Brown had liquid refreshments served. The bottle containing the "wet goods" belonged to Mr. Brown and was passed around among the guests, but someone "talked." —Ripley Express

5,000 FACTS ABOUT CANADA

The public will welcome the new issue for 1916 of "5,000 Facts about Canada," the popular and valuable cyclopedia of Canadian dates, compiled by Frank Yeigh of Toronto, the well-known writer and lecturer on the Dominion. No up-to-date and intelligent Canadian can afford to be without this "hardy annual" which is a revelation in concrete form of the wonderful growth of our country in a single year, despite war conditions; indeed it circulates all over the world, and as such is a splendid advertisement. The chapter of "War Facts" is, by the way both timely and illuminating. Fifty other chapters are devoted alphabetically to every phase of our national life, from Agriculture to the Yukon, while several sketch maps are of high value. Copies may be had from newsdealers or by sending 25c. to the Canadian Facts Pub. Co., 588 Huron St. Toronto, Canada.

LETTERS FROM OUR BOYS

Walkerton Soldiers Write Home Interesting Letters From England and the Front.

LETTER FROM FRED JEWELL

Mr. Fred Benninger had a letter from Private Fred E. Jewell, one of the Walkerton boys with the 34th:—

Jan. 11th, 1916,
East Sandling Camp,
Shorncliffe, Eng.

Hello, Fred,

I am sitting down to write you a few lines to let you know I am still alive and all of the boys are well too. Norm Dennie, 4th Batt., has gone to the trenches and we are going to the trenches in a day or two. Simon Small is going to the 3rd Batt. and Dick Addley and I are going to the 18th Batt. I have been in London, Fred, and had some time. I have seen some of the 71st Batt. boys too:—John Russell, Harry Wettlaufer and Harold Young who is an officer in the 39th. Well, Fred, I must close for this time. Hope to hear from you soon.

Your old Friend,
Fred E. Jewell.

+ + +

LETTER FROM REG. McCARTER

Mrs. Alex. McCarter had a letter from her son, from Bramshott Camp, England, on Monday. Reg. writes:—

Bramshott Camp, Jan. 9, 1916

Dear Mother —

Just a line to let you know that I am well. Hope you are all the same. I would have answered your letter but I was away on leave to London and did not get back till Jan. 7, and your letter was awaiting my return. I think if we leave this camp we will go to Egypt. I have had a cold ever since we have been here. When I was in London I saw the London tower. It sure is some place. The walls are 60 feet below the ground and thirty-seven feet through. Built in the year 1429. I saw the Crown Jewels. They would make your eyes water. The biggest diamond in the world is in the Tower. When you are looking at them they keep you about ten feet from them with two guards, one on each side of you.

They keep us busy here. If it is not route marching or digging trenches, it is lectures. They give us lectures every night until nine o'clock. We must be going to leave this camp as they are rushing us along with our work. I hope they do move us. I hear from many from all over Ontario and throughout the West. I got a nice iced cake from Aunt Susie from Saskatoon.

Your affectionate son,
Reg.

BILL BENINGER COMING HOME

Mr. Fred Beninger received a few lines from his brother, "Bill", who is now in the Red Cross Hospital, Cliveden, England, and expects to be discharged shortly. Although he has written home regularly, he never mentioned his casualty and it was through a friend home from the front that the family learned that his injuries consisted of shrapnel wounds and a gassing.

Red Cross Hospital,
Cliveden, Taplow, Eng.
Jan. 14, 1916.

Dear Brother:

Just a few lines to let you know that I am still in the Hospital and am improving daily in health but it will be some time before I am discharged. As news is very scarce, I am just letting you know that I received your parcel today which you sent some time ago, and am very thankful for the same, also your picture which is very good of you. The other two I do not know but trust I will soon see you all. I trust you and your wife are in the best of health and that your family are all well. Say Fred, how are all the boys and girls? How is Mrs. La France and Rose La France? In fact how is everybody in Walkerton? Give my best regards to all and tell John Appel I am still living and expect to be for some time. Goodbye and love to all. Your Brother,

Bill.

FROM THE FIRING LINE

Private William Hanley, of Chepstow, has written home a number of interesting letters lately from the firing line, from which we have been permitted to take some extracts:—

Dear Father:—

Received your letter dated November 28th, and was sorry to learn that you are not receiving all my letters in due time. I have written quite frequently and sent you several souvenir postal cards. Hope you received them. I am now feeling in the very best of health. For the past two weeks I was suffering from a severe cold, but now it is almost perfectly broken up. The weather in Belgium still keeps wet and very misty, causing the big guns to be less active on both sides. Although on some parts of the line can be heard heavy bombardment. You hope to live to see the Germans and her Allies completely trodden. I think myself next year will bring us forth a complete victory over Germany and her Allies, but am afraid we will have to make an awful sacrifice of lives. Last Christmas we attended midnight mass in St. Patrick's Church in Quebec City, but this Christmas Eve is likely to be spent in the firing line. I hope the shell fire and rifle fire will be moderated on both sides during the great festival and remembrance to the world of Christmas Day. I wrote my Godfather, Father Ferguson some time ago but have received no answer as yet. I will write him while in the trenches. I will also write Rev. Father Goodrow, your beloved priest of Chepstow, and hope he will be able to continue his good work for a long time to come.

I received the clippings from the newspapers, and think Sergt. Vickers explained the life in the trenches very good. I don't think we will have to worry any over Greece being an ally of Germany. I think everything is well settled with her by now. Although Christmas and New Year will be over when you receive this letter, still I wish you all and all my relatives and friends a Merry Christmas and a Happy New Year. While writing this letter I was interrupted by a parcel sent by you. All the contents were good, and very much appreciated by myself and comrades. The parcel was in perfect condition, when it reached me. It goes to show, although so far away I am still remembered by relatives and friends.

* * *

Dear Mary:—

I received your last letter with the pretty Christmas cards enclosed for myself and comrades. A year ago Christmas was spent in our dear maple land in Quebec, but this Xmas was spent in the firing line in Flanders. It passed by very quiet—not a shot was fired by either rifle or artillery and so we could walk along the trench in comfort, or on the top of the parapet, if so disposed. The battalion next to us is much closer to the German trenches than we are. I took a stroll over there and found the boys all standing on top of the parapet and exchanging waves with handkerchiefs and sand-bags with each other. Some of our boys went over to the German barb wire and shook hands with the Germans and got in exchange a drink of German beer. So Christmas Day was spent quietly, but the next day fighting started as usual with the artillery shelling and the bullets a-flying. We very much missed our goose dinner as is customary in Canada. What took the place of goose was bully-beef and bread. We relish it very much when hungry. I witnessed a very good sight the other day when a large number of our aeroplanes manoeuvred past our lines into German territory. They manoeuvred similar to battleships getting ready for battle with the enemy. The Germans fired thousands of shells from their artillery at the aeroplanes. They failed to hit any of them. I don't know what was the object of so many aeroplanes being in the air at once. Likely they bombarded some important buildings belonging to the Germans. I hope that God will bless the New Year for us all and that it will bring about an early peace to the world.

+ + +

November 22nd., 1915

Dear May:—

Received your letter the other day while in the firing line and appreciated reading line by line of the news from Canada, while the bullets were flying and our big guns were playing havoc with the German positions. The artillery is very active just now and seems much superior to that of the enemy. Very few of the Germans' shells seem to hit the mark or do very much damage. I believe they are running short. Another aeroplane was brought down behind our lines lately. The weather has changed from the drizzly rain to sunshine and very frosty nights. We are all getting our winter clothing and mitts and feel quite comfortable. I was glad to learn that all are well at home and the neighborhood. I wrote Mrs. Parker some time ago. I hope she and baby and Mrs. O'Hagan are keeping in good spirits. My time is limited now so I must close for this time. With best regards to all and hope the Xmas. weather will be good, although many a home will be in mourning.

"GABE" HAAS WRITES

Mr. P. J. Moloney heard this week from Pte. Gabe Haas, who is apparently enjoying life well at Shorncliffe, although anxious to get to the front.

Jan. 11, 1916,
Bramshott Camp,
England.

Dear Friend Pat:—

Well Pat, I received the box from the Church that you took so much trouble to make up, and it sure was a treat to get because the stuff that we get over here tastes so much different than the grub at home and please thank Mrs O. E. Klein for the box of home-made candy. We had a General here this morning inspecting us in order to pick a battalion to go to the front and I don't know whether we succeeded or not but I hope we have. I had a letter from Harry Wettlaufer the other day and he is in the hospital pretty sick. Ernie Cartwright and I intend to go up to Shorncliffe in a week or so and try to see some of the Walkerton boys.

What kind of a hockey team have you got there this winter? I guess mostly all the old boys are away and they will have to work in some of the younger fellows. Well Pat, we have night duty tonight consisting of extended order and passing messages so must close to get ready. We had a route march of about eight miles with packs this afternoon and one yesterday and trench digging tomorrow. Give my best to all the bunch. I remain, Your Sincere Friend,

Gabriel Haas.

CHRISTMAS IN REST CAMP.

Writing of his Christmas Day experiences "Somewhere in Belgium," Miles J. Parsons of Toronto, son of Mr. Charles Parsons, the well-known leather merchant, and brother-in-law of Mrs. J. H. Appel, Walkerton says:—On the 23rd of December, at dusk, we moved off from the trenches, pleased more than words can tell to leave behind us the long rainy, cold nights that we have come now to dread, the wet, muddy, leaky dug-outs and the continual hard fatigues all day. We marched off over the overland route with the stray bullet buzzing and singeing the air above and around us, but we were soon behind shelter and out of range, and it is always here that we begin to feel our packs for the first time. They were packs—loaded up about a foot above our heads with Christmas parcels tied on top and heavy. Did you ever try carrying a piano on your shoulders? Well, its not quite as heavy as that, but it just pulls your shoulders back until you think the bones are going to come out of their sockets. We landed at our rest camp about midnight, drenched to the skin. It's great to be in a rest hut, for you can always figure on a dry floor and a red-hot stove, and nearly always a bunch of mail. I was on guard from 8 o'clock till 1 o'clock on Christmas morning and could hear the revelry in the huts. Some of the boys had bought some cheap Belgian champagne, and the sounds of dreadful harmony and flat singing, mingled with toasts and laughter, and the popping of corks, greeted my ears as I stood there in the rain with my bayonet fixed."

"There was a rumor in camp that an armistice had been declared for Christmas Day from midnight to midnight, but at 12 o'clock on Christmas Eve the whole British lines flashed and boomed away with their big guns into the enemy trenches to repay the Huns for the debt of Christmas Eve of 1914. Until the dawn broke the huts shook from the recoil of the big guns.

"And Christmas morning broke, with rain and hail falling like cats and dogs. Each man paraded out for his breakfast at seven o'clock. We had the whole day and were as happy as clams. Steak and plum pudding made a good Christmas dinner. We are filled up with nuts, raisins, and cake, and we appreciate the kindness of everybody in Toronto.

"Our job may be a long one, but I think it will finish just as suddenly as it began.

"We are all dying to get into some kind of a mix-up again, but there is no doubt that things will soon be active on the western front.

"All the fighting here is of the candle variety.

"Thanks for all the nice presents. Everything was lovely, and arrived in good shape."

PUBLIC SCHOOL REPORT

Honor Roll of Walkerton Students for the Month of January

GRADE VII.

Honours—J Norrish, S Bremner.

Pass—G McCarter, J Kenny, N Shaw, G Van Horne, C Attwood, A Kerry, T Crawford, S Heichenbach I Moore, L Bryce, L Wallace, C McKay, I Inglis, N McCarter, W Inglis.

H Willoughby,
Principal.

SR III TO JR IV

G Miller, E Cryderman, V Bush, V Seiling, F Wilton, M Royce, A McCartney, A Belden, L Stephens, J Flewelling, A Everett, A Lindley.

J Steed,
Teacher.

GRADE V TO GRADE VI

Honors—Muriel Lumley, Irene Harrison, Helen Wilson, Elmer Kolpin, Margaret Johnston.

Pass— Frances Crawford, Allan Schaus, Dora White, Tom Etherton, Eddie Fennell, Edwin Faust, Ross Van Horne, Albert Hunt, Ida Glintz.

M Ross,
Teacher.

GRADE IV TO GRADE V

Honours— Millard White, Marie Schwindt, Annie Lindley, Guy Ramsey, Kathleen Pye.

Pass— Vinnie Dean'e, Morris McCarter, Charlie Wallace, Edith Etherton, Charlie Gordon, Florence Mortimer, Clarence Mawhinney.

M Sinclair,
Teacher.

GRADE III TO GRADE IV

I Moore, J Van Horne, W Goode, E Pletsch, J Cotterman, N McCartney, H Buslow, E Yates, W Jerrome, D Pulley, W Ballantyne, A Royce, K Perdue, N Loos.

SENIOR FIRST TO JUNIOR SECOND

R Hampson, E Singer, G Dietsche, G George, J Sieling, W Hehn, R Froin, D McNeill, C Fields, E Webber, G Mawhinney, F Johnston, A Reichenbach, V Belden, D George.

AGNES WARREN, teacher.

GRADE II TO GRADE III

Honors— Norine Everett, Norma Forsythe, Lillian Mortimer, Jack Nutting, Irvine Schmidt.

Pass—Walter Hartman, Eldridge Truax, Arthur Buchlow, Cora Paull, Sanford Hehn, Gertie Gordon, Edna Abel, Balzer Orner.

Primer to First Book—Herbie Moore, Nelson Whitehead, Howard Bush, Nora Hanna, Kathleen Fortune, Price McConnell, Harvey Ernest, Nellie Schaus, James Tacox.

W Thompson,
Teacher.

GRADE I TO GRADE II

Ruth Hunter, Mildred Appel, Thelma McEwen, Lomax Player, Sheldon Anderson, Margaret Shaw, Emil Dietsche, Lloyd Searle, (Joe Godwin, Fred Miller), Eleanor Watts, Melville Pletsch, Francis Lindley, Emma Leake.

A. D. THOMPSON, teacher.

THE LOCAL NEWSPAPER

No business man, professional man or manufacturer in any town should allow a newspaper published in his town to go without his name and business being mentioned somewhere in its columns, says an exchange. This applies to all kinds of business—general stores, dry goods, groceries, furniture dealers, manufacturing establishments, automobile dealers, mechanics, professional men and in fact all kinds of business. This does not mean that you should have a whole or half or even a quarter of a page ad. in every issue of the paper, but your name and business should be mentioned, if you do not use more than a two line space. A stranger picking up a newspaper should be able to tell just what business is represented in a town by looking at the business mentioned in the paper. This is the best possible advertiser. The man who does not advertise his business does an injustice to himself and his town. He is the man who expects the most free boosting for his town. The man who insists on sharing the business that comes to town but refuses to advertise his business is not a valuable addition to any town. The life of any town depends upon the live, wide-awake and liberal advertising business men.

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so lifelike, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

WINTER GOODS

Our stock in all lines is complete and if in need of any of the following, give us a call and we will endeavor to satisfy you both in quality and in price.

Axes from 90c to $1.25, Meat Grinders and Fillers, Sleigh Bells, Coal Oil Heaters, Snow Shovels, Grain Scoops and Bags; the celebrated "Racer" Cross Cut Saw and others; Coal Scuttles, Coal Oil Cans, and Coal Oil, Gasoline and Gas Engine Oils, Oil Cake, the celebrated "Bibby's" Calf Meal and ground Flax.

Our stock of heavy mitts is large, well assorted and prices right.

We are sole agents for the celebrated D. L. & W. Scranton Coal, the standard anthracite, prices right and quality the best. Try a ton or two

S. W. VOGAN

A Preliminary Test of Skill

"I vill pig stick you!"

The words were addressed to me by a lieutenant in the German army. He was very young, his beard just sprouting, and since there had been no war between Germany and any other power since long before he was born he had had no way of letting off his surplus vim. We were in a beer garden, and he had been sitting at a table near one at which I sat with a party of American friends.

Getting up from his table, he walked past us, and, my foot being in his way, he took pains to stumble against it. Then, glaring down at me, he said in English:

"I vill pig stick you!"

"What does the fellow mean?"

"You've been challenged to fight a duel," said Washburn, an attache at the American legation. He had lived in Berlin a number of years and knew the ways of the inhabitants.

"He can send all the challenges he pleases," I said. "I'll pay no attention to them."

"In that case," Washburn replied, "you must give up the social stand you have prepared to take in Berlin. I shouldn't like to put you forward as I have promised unless you either fight young Donhoff, whom everybody knows and who is on intimate terms with the imperial family, or find some way out of the matter."

"What way out of the matter is there?"

"I'll think it over. I've helped several Americans out of such scrapes. By the bye, I think I'll try the plan by which I saved Albertson from getting a [illegible] thrust between his ribs."

"What plan?"

"I didn't explain it till the affair was settled, nor will I tell you. Put yourself in my hands, ask no questions, and I think I can bring you out of this with honor, probably with eclat."

I assented, and he took a message from me to Donhoff. I was an American, and Americans did not fight duels. However, I was willing to fight under certain conditions, or, rather, I would prove myself more skillful than he. We would fire at a hen's egg at 20 paces. If he hit the egg oftener than I, I would stand up and permit him to shoot at me as long as he liked. If I hit the egg more times than he, he was to submit himself as a target for me.

The hot headed youngster accepted the conditions. Indeed, he was rather pleased at the novelty of the plan. Washburn arranged for a test of skill in a fencing academy and brought a basket of eggs to the place, which were to serve as targets. The affair being an unusual one, none of the safeguards common in duel preliminaries were taken. Washburn fixed the target, suspending the egg by a thread. Donhoff and I tossed for order of trial, and I won. Each principal was to deliver five shots, and the one who shattered more eggs than the other won.

The day before the test I could scarcely hit a barn door, but I practiced sufficiently to hit an egg at least once in five shots. On the trial I spattered the contents twice. Donhoff, who like all German army officers, was a good marksman, looked upon my work with evident contempt. I missed the first and second shots, and as soon as I had done so he seemed to lose all interest in the contest. He had doubtless made a previous trial and discovered he could hit the egg every time.

I was instructed by Washburn that when I beat Donhoff—and Washburn had assured me that if his plan worked I would—I was immediately to renounce my right to make a target of him. Washburn hung an egg for him. He fired somewhat carelessly and missed. He was surprised especially at seeing the egg vibrating from the wind of the ball. He fired a second shot, this time aiming carefully. Again he missed, and again the egg danced. If now he hit the egg at every remaining shot he could still beat me. Though he took a long time to aim before the third shot, he missed it.

He could now only tie me. But he had become so irritated with himself that he was not capable of doing as good work as before. He missed the fourth and fifth shots, the egg at each successive shot vibrating less, indicating that his aim had grown less accurate. On missing the fifth shot he threw his pistol down with an oath.

Washburn shot me a glance, and I cried, "I renounce the right I have won!" and, hastening to Donhoff, put out my hand. He took it, muttering imprecations on himself for having been so clumsy. Then he and his party thanked me for my magnanimity and left the academy.

"By Jove!" exclaimed Washburn, sinking into a chair, "if those fellows had exercised one-tenth the care they would have taken in an ordinary duel I would have had to leave Berlin."

"What do you mean?" I asked.

"You fired at a solid egg. Donhoff at a shell from which I had drawn the contents. No ball will hit an empty eggshell. The wind will drive it aside every time."

We had won by a Yankee trick, but since it was merely to avoid blood spilling our consciences did not trouble us. I entered Berlin society under Washburn's wing with great eclat. I feared that I would be called upon to maintain my championship, but was let severely alone.

FOR THE CHILD.

The grind of modern life is against demanding anything of young children at all—of even obedience very often, and more's the pity. But it is a question whether something in character training is not lost by the saving of all trouble and care to children, and whether the "helping" in various small ways, which was a recognized part in nurseries (even of the richest small people), in past decades, did not play a part in the general scheme of things.

Of course the idea of putting responsibility on young children, of expecting perpetual service from them and "driving" them in any way is odious, and possibly our present slackness in this way is due merely to the swing of the pendulum—we will hope, for the peace and prosperity of future generations that this same law of the pendulum will not follow on in natural sequence, and custom swing tremendously to the opposite extreme from impetus received. But there is a medium in all things, and during nursery years habits of usefulness, with the perseverance, unselfishness and reliability they entail, prove valuable lessons.

It is a mistake to think that a nurse "saves herself" by deputing certain tasks and responsibilities to her small charges; indeed the reverse is the case, as any one can prove for herself if she tries. Rather it is the instinct of training inherent in so many women—and often just the women whose natural inclinations lead them to undertake nursery work—which finds expression in this way.

What is important in the matter is that the child should be encouraged the regular performance of certain tasks and the proper fulfillment of them be insisted upon from quite early years. The ordinary child loves "helping" and will really be happier when allowed a share in what is going on than if told to "run away and play," because nurse is busy.

The toy cupboard is a case in point. Quite little children may well be encouraged to tidy and dust its contents, say, once a week, and will quickly take a pride in its neatness; moreover, they will probably appreciate their possessions in this way for more than if all of them is removed from their small shoulders.

Speaking, generally, children do not need to be "made" to perform such tasks as these; if they do, it is another matter, for directly the necessity for compulsion comes in, the case is altered, and the individual child needs individual treatment. Generally, however, the mere suggestion that such a thing is done at such a time suffices and a certain orderliness of mind is inculcated. For it must be remembered (a fact too much lost sight of in these days of concentration on the child) that the little mind is more or less blank, ready to take up the suggestions which present themselves to it without, in the majority of cases, and consciousness that it is doing so.

In the same way quite little things from 4 years or so, may be encouraged to take out their outdoor clothes, to put their little shoes neatly away, and so on. At the same time they should be able to do much toward dressing themselves, their small fingers soon gaining dexterity with buttons and tapes; of course it is far more trouble and much slower to let them take their share in such practical matters, but it will generally be found a good thing. But it should be insisted that any such small tasks be properly done and finished if begun at all; the habit into which many children grow of always jumping from one thing to another rarely makes for happiness in the present or good habits in the future. For surely it is a commonplace of life that sooner or later the force of the concentration must be met, and the sooner habits which give it are developed the easier is the process.

But there is one word of warning, and that is against constantly interfering with a child's occupation, making it do this, that or the other, for what must appear to the little thing purely arbitrary reasons. The regular performance of certain duties, if you can call them by such a name, and the encouragement to do things properly, is quite another matter to constantly setting tasks or forcing routine unduly; indeed, as a rule, in the nursery it is the child of whom certain small services are expected which is left free to follow his or her own devices when such services are performed, and will do so all the more happily for the short time which has not been at his own disposal. It is far more from the child of whom nothing is expected than that of the helpful one that one hears the whining. "Read to me." "What shall I play?" "Can I go out?" and most telltale of all, from the character point of view, the perpetual "What shall I do next?" And these facts give those who really care for children "furiously to think."

There is little or no trimming on a gown of this type. Pale blue faille is used, the figure being a rich velvet brocaded ornament. Silk net forms the sleeve, cap, and a rich velvet rose lends a charming color note.

QUEER LEGAL FICTION.

It Makes Stepney, in London, the Parish of Every British Seaman.

Every sailor, from the admiral to the newest joined seaman, on board British warships is regarded as belonging to the parish of Stepney, in London. It doesn't matter in the slightest where the ship is, the sailors who man it all come from the same parish—Stepney.

This queer legal fiction dates back to the time of Charles II. In those days every workingman had to live in the parish where he was born, and he could not leave it without finding two responsible sureties to vouch for his honesty.

This, of course, became rather puzzling in the case of people born at sea, for they had no parish. To get over the difficulty the authorities stated that all born at sea would be regarded as being born in the parish of Stepney, though why they should choose that parish and no other is lost in the dust of official records.

To this day the bishop of Stepney is godfather of all children born at sea, while all marriages solemnized on the ocean are recorded as though they had taken place in Stepney.—London Answers.

"Mrs. Nurich, I understand your husband is one of the stewards of the racing association." "Look here, young man, my husband gave up cookin' years ago, and I'd rather you wouldn't refer to it."—Buffalo Express.

In spite of [illegible] of average, it is twice as [illegible] a good matter better as [illegible] bad matter worse.

BRITAIN AT THE YEAR END.

(New York Tribune.)

For every British subject the coming of the end of 1915 must be a genuine relief. In more than a century there has been no such period in British history, on such span of defeat, disappointment, of great sacrifice and tremendous effort which have outwardly brought so little of reward.

What has happened to the British is not to be mistaken by Americans who remember or know their civil war history. After the first few moments of surprise and bewilderment the North settled down to its great work of making armies, of providing all that was lacking for the conduct of a great war. Men, money, the best of brains and of hearts in our country were dedicated to the task. By the time the civil war was a year old the North had splendid armies, made up of the bravest and best in the population. Yet who can forget the bitter defeats that followed? Who can fail to recall—thinking of British misfortune—the disasters of the Peninsula, and Second Bull Run, the lost chance at Antietam, the shambles of Fredericksburg, the disappointment of Chancellorsville, all of which came after the North had an army and the men of the loyal states had gone out to the field by the hundred thousand?

The price that we in this country paid for long years of neglect of national defence and of selfishness the British are paying. Not all the devotion, the sacrifice, the bravery that responds in every nation to the call of duty can make good in a month or a year the sloth, the neglect, the forgetting of decades. But there is nothing comparable to the bitterness that comes when a nation has done its best, when it has made the supreme sacrifice, and for this there are only the sterile response of defeat and ever growing casualty lists.

Thus from February to December the tell of British loss and the record of British defeat and failure have grown steadily; incompetent commanders, incompetent preparations, follies of selfish politicians and mistakes of eager but ignorant patriots have continued. From Neuve Chapelle to the Dardanelles fiasco the British have known the deepest humiliation and suffered from that depression which must have come when the steady martyrdom of the bravest and truest sons of the nation seems all in vain.

Yet, if there be any word of encouragement which Americans, to whom British fortunes and British success have a real meaning, can give to the nation which shares their speech and tradition, it must be to repeat the history of the great experiences of the United States—to point to the fact that all the disappointments, defeats and temporary failures in our own terrible war grew out of precisely the same causes that underlie present British failure and in the end were not fatal to the cause for which the North fought.

For three years of our great conflict the generalship and the fortune of war were with the South. For three years no sacrifice, no courage, no devotion of the men of the North counted of real avail. Yet at last, when discipline, training and leaders had come, there was an end to defeat and a reward for all the striving, for our country was saved, and our work for democracy continued.

There is every outward sign that the time is at hand when the same reward will be for the British. Many thousands of Americans have never despaired of allied success in the great war, because they believe that a victory for Germany would be a negation of all that was noble and worth while in human existence. Now, for these Americans, who look forward to allied victory with hope and with faith, there is unmistakable evidence that victory is no longer doubtful, that German defeat is not merely assured, but no longer far off.

It may be of small comfort to the British people to know, also, that for Americans who preserve an affection for Great Britain there is a very firm belief that the great test of war will prove for England the greatest good that was conceivable and that there is visible to us even now evidence that the future for the British Empire has been immeasurably increased by the things that British subjects have done in the last seventeen months. We Americans, like the French, have fought national wars; we have fought struggles upon our own soil, and it is only half a century since the artillery of the enemy reached the environs of our own capital, since our fields and our cities were in ruins, and fire and sword had swept through thousands of square miles of our states.

Out of that terrible furnace of our national war, of a war that called for the last man and the final effort, our own country came forth a nobler and a better nation and there were enduring gains for us and for humanity. Something of the lesson has been lost in fifty years of suffering and sacrifice, yet there still remains an America which serves and will serve the cause of democracy and of humanity, and it endures because there abide with it the memory and the example of those who lived and died for it half a century ago.

Out of the greatness of our own failures in the opening years of the Civil war, out of the magnitude of our weaknesses disclosed in the early days of our conflict by that pitiless test which is war, there is for Americans now a standard to measure British discouragement. But the Civil war was fought by a nation still Anglo-Saxon in all its millions. The burden of the battle was borne and the work of the generals and the statesmen was done by those who belonged to the America of Revolutionary and Colonial days. And because this is true Americans have no doubt that the same spirit, the same will, the same determination, will inspire the British to "carry on" until the victory is attained.

The years since the Civil war have changed the character of our population and contributed to obscure the older American horizons and dim the earlier American traditions. We are not, as we were, a homogeneous people, and in consequence there must be much in our political life which confuses and bewilders the British. Yet in their own year of struggle and disappointment they will do well to remember that there are hundreds of thousands of Americans who through all the present year have looked out upon British effort and British suffering with very real and very deep sympathy and admiration. There are hundreds of thousands of Americans who are never for a moment forgetful of the great service that the British, like the French, are rendering to mankind and to America.

These Americans can no more control their nation than could those other British who sympathized with the North in its days of similar disappointment and struggle. They are powerless to stay the hands of politicians, as the British friends of the north were powerless to prevent British subjects from taking their the Alabamas of the Civil war. There is selfishness and there is blindness in America as there was in England and as there always is in every nation, when a neighbor is suffering.

Yet there is other things in America, there are other men and there are other ideas and ideals. And those who hold to them have looked upon the present war with a very great and an unfailing appreciation of what the United States, to liberty and democracy the world over, the British and the French efforts mean. That which they could do they have done and will continue to do, not merely because of admiration or affection for Britain or France, not chiefly because of these, but primarily because they see the British and the French to-day fighting for the things they hold dearest and best in life.

SPORT SUIT OF STOCKINETTE.

A new outing costume is made of white jersey cloth, trimmed with blue corduroy. The same color scheme is carried out in the small hat.

A TRANSITION PERIOD.

(Chicago Tribune.)

Because we have begun to realize that a good many of the offenses of youth are not criminal but perverted outbursts of normal youth, some of us have gone to the extreme of disbelieving in criminal impulse. Our reliance has been environment. Give a boy the right environment and he will not go wrong. That fitted into our easy optimism. It does not fit into the facts. Some of the worst criminals of history have sprung from favorable worldly circumstances. They were not poor, underfed, oppressed, unfriended, or uneducated.

Doubtless the psychopath would prove them insane.

None of these considerations offers much consolation to victims, nor does it relieve society of the need of defending its members from criminal acts.

We are now in a transition period between the old punitive system and some new system which will distinguish in treatment between congenital criminals, criminals produced by vicious social conditions, and offenders that are really not criminals at all. Our machinery is patched up, unbalanced, half finished. We condone brutal degenerates on the environment theory. We thrust normal boys who are victims of bad environment or normal adolescence into jail on petty offences. We create courts and probation systems without the necessary means of carrying out the objects for which we create them. In short, we undo with one hand what we do with the other.

LITTLE LOST PUP.

He was lost—not a shade of doubt of that;
For he never barked at a slinking cat,
But stood in the square where the wind blew raw,
With drooping ears and a trembling paw,
And a mournful look in his pleading eye
And a plaintive sniff at the passerby,
That begged as plain as tongue could sue:
"Oh, mister, please may I follow you?"
A lorn wee waif of tawny brown
Adrift in the roar of a heedless town.
Oh, the saddest of sights in a world of sin
Is a little lost pup with his tail tucked in.

Well, he won my heart (for I set great store
On my own red Rab—who is here no more)
So I whistled clear, and he trotted up,
And who so glad as that small lost pup?
Now he shares my board, and he owns my bed,
And he fairly shouts when he hears my tread.
Then if things go wrong as they sometimes do,
And the world is cold and I'm feeling blue,
He asserts his rights to assuage my woes
With a warm red tongue and a nice cold nose,
And a silky head on my arm or knee,
And a paw as soft as a paw can be.
When we rove the woods for a tramp about
He's as full of pranks as a school let out;
For he romps and frisks like a three-months colt,
And he runs me down like a thunderbolt.
Oh, the blithest of sights in the world so fair
Is a gray little pup with his tail in the air.

The Dignified Course.

An army examiner once had a candidate before him who apparently was unable to answer the simplest question. At last the examiner lost his temper and, with sarcastic emphasis, lost on the youth before him, said:

"Suppose, sir, that you were a captain in command of a company of infantry; that in your rear was an impassable abyss; that on either side of you towered perpendicular rocks of untraversable height; that before you stood the enemy, a hundred men to each one of yours. What, sir, would you do in this emergency?"

"Sir," said the aspirant to military honors, "I would resign."—Pearson's Weekly.

WASTAGE OF GERMAN ARMY

The following despatch has been received from Mr. H. Warner Allen, the representative of the British Press with the French armies, dealing with the numerical strength of the German army.

Much has been written, often of a contradictory nature, concerning the numerical strength of the German army after the wastage of over a year's war, and the reserves on which it can still draw to fill up gaps and form new units. Information derived from a variety of sources confirms the following calculations.

During the first fifteen months of the present war—from August, 1914, to the end of October, 1915—the total German losses amounted approximately to four and a half million men on the combined fronts. Of this total three millions may be taken as definitely hors de combat (dead, prisoners, or permanently disabled), while the remaining 1,500,000 may be considered as having returned to the fighting line.

The German casualty lists are incomplete. We have it on the authority of prisoners that men who are only slightly wounded are not included in casualty lists, and we have a considerable amount of other evidence, which shows that the German losses are very much greater than they admit. Even when there is not what is now called "hard fighting," the drain on the resources of the army is very considerable. Between May 1 and June 20 four divisions under General von Fleck suffered the following losses:

	Killed.	W'nded.	Miss'g.
11th Reserve ..	42	431	—
16th Reserve ..	[illegible]	1020	1
15th	208	562	1
55th	109	531	2

These figures show a total of 539 killed, including nine officers, and 2,551 wounded, including twenty-five officers, and four missing. This gives an average of 147 killed and 640 wounded during fifty days, and of eighty-eight killed and 384 wounded per division per month. This does not include sickness statistics.

WASTEFUL METHODS.

Taken as a whole, the statistical result is more or less uniform, varying in accordance with the effectives of the opposing armies and their respective methods of battle. The tradition of the German army is not one of economizing men, but, on the contrary, of obtaining a result at no matter what cost of human life.

Mr. Belloc estimates that German losses amount to an average of 400,000 men a month. Colonel Feyler, taking what he admits to be a minimum estimate, reckons them at 150,000 a month. The information at my disposal leads me to believe that the truth lies between these two extremes, and that during the last nine months of the war the German casualties have reached 300,000 a month, exactly as they did during the first six months. Not more than one-third of this total is able to return to the front, so that the German net losses amount to 200,000 a month.

At the beginning of the war, Germany, apart form the elements of her active army, had two distinct sources on which she could draw to obtain the men she needed to fill up gaps and to form new units.

First, the Reserve, the Ersatz Reserve, the Landwehr, and the trained Landstrum (Second Ban), all of which had received a more or less thorough military training. All these men were called on during the first part of the campaign, as well as the 1914 contingent (men born in 1894), and the volunteers of the 1915 and 1916 contingents. These served to bring the units of the active army up to war strength.

Second, the untrained Landstrum, composed of men without military training, who had never been incorporated in the active army, either on account of the numerical limitation of each year's contingent, or in view of physical incapacity.

Theoretically, the Landsturm, whether trained or untrained, was only to be utilized for home defence, except in the case of the gravest national necessity. Already, however, the trained men of the second ban of the Landsturm—men of from 39 to 45—have been called up, and in February the German authorities considered that the situation was sufficiently serious to justify them in calling up for training throughout the Empire the first ban of the Landstrum untrained men under 39 years of age. At the same time, the 1915 contingent was called up and incorporated.

The heavy losses suffered by the Germans in the French offensive in Champagne in February and March, 1915, produced a perceptible effect on their organization. Not only did the enemy begin to draw on his untrained reserves, but from this moment he began to form new units, not from fresh troops, but from the elements of existing units.

Th French offensive in Weovre (March and April, and Artois (May and June, 1915) increased the wastage. They coincided with the opening of the active operations against Russia, and the Germans began to utilize their 1915 contingent.

The losses in officers were very serious. The official lists up to June 1 gave 43,972 officers as killed, wounded and missing. On July 15 this figure had increased to 52,041; that is to say, an increase of 8,000 in six weeks.

HEAVY LOSSES IN RUSSIA.

On the Eastern front the casualties were particularly heavy. German documents show that the 42nd Infantry Regiment lost on the Naref 36 officers and over 1,000 men; the 224th Infantry Regiment lost in Galicia 49 officers and 2,716 men; the 1st Reserve Regiment lost 14 officers and 758 men; the 21st Reserve Regiment lost 21 officers and 465 men; the 61st Regiment 10 officers and 1,156 men.

By the beginning of June orders had been given for the enumeration and registration of the 1916 contingent. Similar orders were given in regard to the 1917 contingent, and even for that of the 1918, so far as recruits of over 17 were concerned. At the same time the second ban of the untrained Landsturm—men between 29 and 45—were registered and incorporated. Finally, the whole of the 1916 contingent, which had already been reduced by the number of youths who had volunteered for active service before their time, was called up progressively, so that by the end of June every man between the ages of 17 and 45 had been medically examined and registered.

By the end of August the whole of the 1916 contingent had been called up, and every man between 19 and 46 capable of bearing arms had been mobilized. The only remaining reserves were the 1917 contingent, and about half the 1918 contingent, apart from men over 46.

The French successes in Champagne and Artois, in September, made the situation still more difficult for the Germans. How heavily they lost in those engagements may be gathered from the following details:

In Artois the 11th Regiment of the 6th Army Corps had 2,041 men hors de combat, the 10th Grenadiers of the same corps lost 1,519; the 157th Regiment of the 117th Army Corps lost 2,523 men.

In Champagne, the 103rd Reserve Regiment of the 12th Army Corps lost 2,382 men, the 133rd Reserve Regiment of the 12th Reserve Corps 1,968 men, the 53rd Regiment of the 50th Division 2,056 men.

These figures, being official, are doubtless below the mark.

To meet further losses Germany will be compelled to raise the age limit of military service above 45, and already a secret circular has been issued instructing the authorities to proceed to the preparatory registration of men between 46 and 50.

For some time past the numerical strength of the German army has been stationary on the various fronts, with an increasing tendency to shrink. The number of men called up for active service since February last certainly does not exceed the number of casualties, and at the present moment the number of men in the depots does not exceed the number at that date. To keep pace with the wastage Germany has been forced to exhaust almost all the reserves of men, and the work has been carried out with ruthless severity. Acting under instructions, the army doctors have passed as fit for service men with one eye, lame men, hunchbacks, and even men suffering from tuberculosis, heart affections, and other diseases.

Her last reserves are being rapidly used up, and if the numerical strength of her army can still be kept up for a limited time, its quality has deteriorated, and must deteriorate more and more.

IRISH TO RESCUE.

How the Connaught Rangers Saved the Gordons.

In an interview on the subject of Irish gallantry at the front, Mr. J. O'D. Derrick, the United Irish League organizer for Scotland, gave some particulars of an action in which the Gordon Highlanders were saved by the Irish:

"Right I recall that on Dec. 26, 1914, the Germans made an attack on the British trenches occupied by the Gordon Highlanders, who in numbers were overwhelmed. Of the battalion only 170 were alive. Just then the Gordons heard the strains of "God Save Ireland." It was the Connaught Rangers. Private McGregor, of the Gordons, telling the story, wrote:

"Well, I have seen some reckless Irishmen in my time, but nothing to match the recklessness and daring of these gallant Rangers.

"The Germans now would probably number out 2,000, against 800 Connaught, and, at this period, 70 of us, but, had they been 50,000 Germans, I don't believe in my soul they could have stood before the Irish. They were simply irresistible, and all the time kept singing 'God Save Ireland.' One large, red-haired son of Erin, having broken his rifle, got possession of a German officer's sword, and everything that came in the way of this giant went down. I thought of Wallace. Four hundred and seventy Huns were killed and wounded, and we took seventy prisoners. Had it not been for the Irish I wouldn't be writing this, and when it comes to a hand-to-hand job there is nothing in the whole British army to approach them. God save Ireland and Irishmen!" This is a tribute from a member of the Gordons.

The hat featured is of navy blue velvet, in close fitting toque effect with a very odd and smart arrangement of wired grosgrain ribbon.

ROYAL RELATIVES AT WAR.

(Halifax Recorder.)

Owing to the intermarriage of the members of the various courts of Europe, this war has placed many royal families in painful positions.

Referring for a moment to England, the Duchess of Albany is by birth a German princess. Although she has made her home in England for thirty-three years, and is deeply attached to her son-in-law, Prince Alexander of Teck, the brother of Queen Mary, her only son is fighting against us in France, and has shown such bitterness with regard to everything British that King George was compelled, in deference to popular sentiment, to expel him from the Order of Garter.

Again, the son of Princess Christian, who married Prince Christian, of Schleswig-Holstein, who has lived in England for half a century at Cumberland Lodge, in Windsor Park, is serving in one of the Kaiser's regiments of cavalry.

In the reigning houses of Italy, Belgium Holland, Spain, Denmark, Sweden, Greece, Roumania and Bulgaria one finds German-born princesses. At no court has a Teuton bride proved a source of greater disturbance than at Athens. Queen Sophia of Greece has always been the most strong-minded and masterful of the four sisters of the Kaiser, and according to a report she has already announced that in the event of Greece joining the Allies she will leave Greece and return to Germany, and there does not seem to be much doubt that her opinion has swayed Greece in the present crisis.

The heroic Queen of Belgium is a princess of the reigning house of Bavaria, but she has publicly announced that the door between her German relatives and herself has been closed "for all time" by the treatment to which Belgium has been subjected by Germany.

In Russia, the Czarina is the youngest sister of the reigning Grand Duke of Hesse, one of the commanders of the German army against France, while Hessian troops are fighting in the eastern portion of Germany against Russia. One of her sisters, Princess Irene, is the wife of Prince Henry of Prussia, a ranking admiral of the German navy. The mother of the Crown Princess of Germany is the Grand Duchess Anastasia of Russia, widow of the late Grand Duke of Mecklenberg-Schwerin. Her son, the present grand duke, is one of the generals in the field against Russia.

"Woman's place is the home. As I was telling my wife—" "By the way, Bill, what's your wife doin' now?" "Workin' in the cannery."—Buffalo Courier.

CONSTIPATION

Is Productive Of More Ill Health Than Anything Else.

If the truth was only known you wou find that over one half of the ills of li are caused by allowing the bowels to g into a constipated condition, and t sole cause of constipation is an inacti liver, and unless the liver is kept acti you may rest assured that headache jaundice, heartburn, piles, floating spec before the eyes, a feeling as if you w going to faint, or catarrh of the stom will follow the wrong action of this, of the most important organs of t body.

Keep the liver active and worki properly by the use of Milburn's Laxa Liver Pills.

Miss Rose Robinson, Amherst, N.S., writes: "Having been troubled for years with constipation, and trying various so-called remedies, which did me no good whatever, I was persuaded to try Milburn's Laxa-Liver Pills. I have found them most beneficial, for they are indeed a splendid pill. I can heartily recommend them to all who suffer from constipation."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Things You Ought To Know

An inventor in Holland has brought out a gas motor with only five parts.

With the driving wheel in the centre, a five wheeled velocipede has been invented.

The first extensive deposit of slate in Australia has been discovered in New South Wales.

Seventy per cent. of the residents of the United States used electricity in some form every day.

An effective system for treating gout with electricity has been developed by a German physician.

A combined number plate holder and lock for the starting cranks of automobiles has been invented.

Europe's largest turbine is a 15,00 horsepower affair, installed by a Swis hydro-electric plant.

The Bahama Islands may become ex tensive producers of rubber by cultiv ing the Mexican rubber vine.

Before coined money was used Greece skewers or spikes of iron or c per were employed as currency.

Muslin was first made at Mosul Mesopotamia, and was introduced England in the middle of the seventee century.

The blood of a man weighs a twenty pounds.

The territory of seven nations j that of the German Empire.

At the end of last June Great Bri owned 388 merchant steamships of m than 7,000 tons each. Germany 124 and America 63.

German experiments have found explosions can be caused in gas w by sparks from telephones, althou nothing of the kind has been known occur.

At least four-fifths of the damag wrought by earthquakes is due to th neglect of the ordinary requirements o sound construction.

Australia has modified its absolute pr hibition of the importation of opiu to permit the entry of the drug for medi cal purposes.

The cactus and other desert plants ha thick stems instead of leaves, in order t reduce the loss of water by evaporation to a minimum.

Tacks have been scattered in the streets of jitney bus infested Savannah, Ga. They were pushed through sheets of cardboard and arranged business end rampant.

A bridge over the River Dee, in England, that was built in 1280 st ll is in use.

On a farm conducted by the municipality of Berlin, cows are being milked in the fields by electrical machines deriving their power through cables.

In the quadrangle of the Grand Canyon, known as Powell Plateau, the visible rocks represent in turn nearly every geologic age and the sequence or order of deposit of each series of beds is apparent at a glance.

Experiments are said to have that the human chin, in its presen development, is a result of the n mobility of the mouth muscle tongue and the structures of t and throat, the chin acting as a orage for those muscles in the ties.

Albert Parsons, of Belfast, raised a gigantic turnip. Wh taken up it was found to weigh one-half pounds and measured in circumference.

The United States is the only n that hasn't a budget system. France, ermany, Russia, Japan, Britain, Spain, Roumania, Serbia, Portugal, garia, Venezuela and many more budgets. In each country certain re sibility officers prepare a definite pla doing things, estimate the cost of ex ting is and suggest means for raising money.

Many of the oldest walnut trees in land were originally planted, not for sake of the fruit, but because the w makes the best gun stocks. The lar walnut grove is at Kempton, near B ford. It contained at first 365 trees, for each day of the year, which w planted about a century ago by the the owner of the farm, who observed that as wars would never cease, the timbe would always be wanted for gun stocks.

Exactly 50 per cent. of Ireland's imports in 1913 were classified as manufa tured goods; 35 per cent. were farm p duce and food drink stuffs, and 15 cent, raw materials. As to exports, per cent. were farm produce and foo and drink stuffs, 39 per cent manufac tured goods, and 6 per cent. raw material. It is an anomalous fact that Ireland im ports heavy quantities of the identical farm products which it exports, its total imports in these lines being $103,4 while its exports to the same art were $152,633,750. The fact seems to that Ireland exports high-grade bac butter and meats, and imports a cheap quality of the same articles for domes use.

DOAN'S KIDNEY

Relieve The Kidneys and Bl Like Ordinary Medici Do The Bowel

FARM GARDEN

RAIN FEEDING NEEDED.

importance of including grain in the rotation for the farm this is well worth considering. For nical feeding grain is a necessity where animals are kept for work their products. While it is at grain can be purchased, it ily true that feeding is seldom able where a considerable portion of the grain must be bought.

ke the case of feeding hogs. Successful growers have learned that for results some grain is needed the life of the animals. Pigs will t soaked corn, corn chops, kaffir, lo or ground oats when 3 or 4 weeks . With plenty of pasture little grain y be needed in the daily bill of fare finishing time, but some will be ential for rapid growth and development. Grain is indispensable for ishing hogs, to harden the flesh, nd thus give the carcasses that finish desirable for prime hogs.

With some farmers the idea seems to prevail that grain is not a necessity with milch cows. The error of that belief has been proved by the experience of some of the best feeders. Cottonseed meal is a rich concentrate, and where it is judiciously fed, little grain will be needed: but for maintainence in body fat nothing seems to quite take the place of grain—such as corn, oats, rye, barley, milo, kaffir and their various products. Grain serves as a most important factor in securing a normal milk flow and enabling the cow to maintain her bodily flesh nd be healthy and vigorous.

Nothing can take the place of grain for work animals as it gives the needed strength to the body. True again, cottonseed meal may reduce the quantity of grain required, and it is an economical protein supplement; and certain legume hays may reduce the protein and the carbohydrates needed in grain; but, nevertheless, some grain must be fed for best results.

Fattening sheep must have grain. While lambs are being grazed they will secure most of their living, if the pasture is good, but when it comes to finishing, some grain must be given.

So it can readily be seen that every ersified or livestock farm must e grain in some form. The farmer annot afford to neglect grain for livestock, and for bread for his y.

here crops are marketed grain is r than some others. While grain ains considerable plant food, and sold has a tendency to impoverish soil, yet it is staple, and usually difficult to market. Besides, it s well, and may be held when ned advisable. Hay is bulky, and expensive to hold or deliver, and er is it as easily sold as grain. e best use of grain is to feed it animals. In this way the high part of marketing is saved; at least a ge part of the fertility in the grain y be returned to the soil, and the imals or animal products sold with obably a profit on both the crop d animals.

The best grain for the farm is the rop that produces the most profit under the conditions. The largest crop ay not be the best. The crop that roduces the most profit in grain, animal products, work, etc., is the crop to grow.

Often it is best to grow two or three ain crops in the rotation rather than confine the grain crop to one, as corn or maize.

Where wheat has been sown in the fall, corn, spring oats and some of the grain sorghums make a good rotation. Legumes may then be planted as a companion or follow the grain crops.

FARM NEWS AND VIEWS.

Nothing will go so far toward improving farm life conditions and build up the rural districts as good roads.

Wagon roads, good every day in the year, between principal centres of population, have become a necessity.

Treat the stock right. The man who kicks dumb brutes kicks brutality into own heart. Animals have ability realize pain and pleasure, and love s and offspring.

ccess will come in the largest ure to those farmers who adopt otations system of farming, the ified system, and who supplement this with the best of tillage ods.

has been quite generally believed small potato seed will yield just large a crop as large tubers. Extensive tests made at the South Dakota experiment station, however, ve quite conclusively that this ry is not true in practice. In these eriments the use of sizable seed duced a greater proportion of potatoes of desirable size than the use culls. The type of potatoes produced from culls used as seed is measurably smaller in the first generation as those produced from selected seed . The results of this experiment furnish quantitative evidence t the use of culls for seed causes atoes to run out. Not only is the of tubers produced from selected larger than from culls, says the erimenters, but also the average ight of tubers produced is greater.

The chronic "grouch" has no business around the dairy barn. The cows l show their dislike for him by reing the milk yield.

On the farm where two teams are required it is undoubtedly a good plan have at least one team of geldings at are always ready for any kind of work, but the other team should be composed of mares. It is expensive to keep a horse a year for what he can do during the working season, and the of farmers have found breeding mares entirely satisfactory and aper.

best way to "swat the fly" is is born. Allowing piles of accumulate in the stables fly files to breed in, and some kind of "dope" to from the animals, is the least.

ows were fed ensilage and oats in a fairly well ration the feed cost of producing butter fat was 11 cents per d. When no ensilage nor alfalfa fed the cost went to 20 cents. results were secured by the in the Dairy Testing Association, Barnes county, under the direction of the North Dakota experiment ed again.

can be made to produce two year. When this is desired bred at the first period pigs are weaned bred twice a year will not produce as many pigs in each litter as bred only once a year, but more can be raised in a year from

follow the idea that when trees you should put fertil the bottom of the hole. Plant your tree, and when within about two inches of the top place your fertilizer and cover over with soil. The rain will wash the essence down to the roots. The same practice can be followed with established trees. Care should be taken that the fertilizer does not touch the bark or roots. Remember, trees take up food with their fibrous roots, and fibrous roots usually are near the ends of big supporting roots, and tree roots usually go as far outward as the branches extend.

There is no reason for broadcasting manures in the vegetable garden. It is wasted energy. Apply manure to each hill or row, with dirt between it and the seed. This gives the greatest results for the least expenditure of time and money. No need to feed weeds.

Loamy, or so-called rich, soils hold their nutrient part in readiness because there is sufficient vegetable matter to make it light. This gives a chance for the air to aid the germs of fertilization to increase and multiply, to prepare the substances to be taken up by the plants.

Heavy clay soil produces slowly until the vegetable matter increases. Sandy soils, unless well supplied with vegetable matter, permit the fertilizer to filter away beyond reach of plant roots before the plants get all out of it.

HAVE YOU ECZEMA?

Would you like to end that terrible itching, that burning pain; to heal those horrid sores?

You have tried all sorts of fatty ointments, lotions and powders. Put them aside now and give Nature a chance as represented by Zam-Buk.

Zam-Buk is made from herbal essences; is a natural healer. Is not something you have to send to the end of the world for, and pay a heavy price! Every druggist will sell you Zam-Buk and for 50c. only. Just give it a fair trial and incidently give yourself ease by the quickest route. See name on box:—

ZAM-BUK

TEN MINUTE COLD CURE RELIEVES ALMOST INSTANTLY

Nothing cures so quickly as the healing pine essences in Catarrhozone. It fills the breathing organs with a healing, soothing vapor that relieves irritation at once. Ordinary colds are cured in ten minutes. Absolutely cure for catarrh, and in throat trouble it works like a charm. Catarrhozone is a permanent cure for bronchitis and throat trouble. Not an experiment—not a temporary relief—but a cure that's guaranteed. Get "Catarrhozone" to-day, and beware of substitutes. The dollar outfit is guaranteed, and small size, 50c.; trial size, 25c. At all dealers.

PRECOCIOUS PAINTERS.

Some Famous Pictures That Were Produced by Mere Boys.

Sir David Wilkie was probably the most popular painter of his time and one of the most deservedly so, and his pictures to-day are almost all in the great national collections or in the possession of the king. He was extremely precocious and might be said to have been born with a palette in his hand.

Wilkie painted his famous and very characteristic picture, "Pitlessie Fair," when he was a mere lad. It was a local scene which he knew well, and the 140 figures which it contains were all sketched from his father's parishioners, for Wilkie was a "son of the manse." As his father would have been very angry to think his boy was doing such a wrong thing as to ridicule his dear flock, David had to use his models quite "unbeknown" to them—in fact, during service. The young artist got them all "under the hookboard" and transferred them to canvas at his leisure.

Everybody knows that Millais was an "infant prodigy." Did he not win the gold medal of the Royal academy when he was nine?

At South Kensington hangs a glowing and masterly canvas entitled "Pizarro Seizing the Inca of Peru." How many boys of fifteen know anything of Pizarro or the Incas even if they happen to know the whereabouts of Peru? Yet Millais was only that age when he not only knew these things, but could realize them in splendid power in paint and get his picture on the line at the academy, and he was only nineteen when he painted one of his supreme masterpieces, judged by some to be the greatest thing he ever did, "Lorenzo and Isabella," which is one of the treasures of the Walker Art Gallery of Liverpool.

Holman Hunt was only twenty when he painted his famous "Eve of St. Agnes" and still little more than a boy when he painted his remarkable picture which he called "Behold I Stand at the Door and Knock," but which is known to the world to-day as "The Light of the World," a replica of which can be seen in St. Paul's cathedral.

Rossetti painted his lovely picture, "Girlhood of Mary Virgin," when he was twenty and his famous "Ecce Ancilla Domini" the year following.

Landseer was amazingly precocious. He exhibited his first academy picture when he was fifteen.—Exchange.

Colored Evidence.

A well-known lawyer was trying to make clear to a legal student the significance of the term "colored evidence," meaning that evidence which has been tampered with.

"The best illustration I can think of came within my observation not long ago," said the lawyer. "A physician had said to a fair patient:

"'Madam, you are a little run down. You need frequent baths and plenty of fresh air, and I advise you to dress in the coolest, most comfortable clothes; nothing stiff or formal.'

"When the lady got home this is how she rendered to her husband the advice given to her by the doctor:

"'He says I must go to the seashore, do plenty of motoring, and get some new summer gowns.'"

THE UP-TO-DATE METHOD.

(Pittsburg Gazette-Times)

Times change. They used to bleed a man for asphyxiation, now they pump more blood into him. Then bleed him later.

The self-made man is apt to regard the mark of esteem and the dollar-mark as being synonymous.

THE POULTRY WORLD

FALL CONDITION TELLS TALE.

The success of the flock during the winter depends greatly upon how the birds pass through the fall season, which usually finds the flock composed of birds of all ages and all conditions and stages of moult. The roosting quarters are found scattered all over the place, some hens roosting on fences, some in the poultry house, some in trees, and some in hovers or jammed into the corner of a house till they are two or three deep during cool nights. The ones roosting in houses and on the floor in the corner of some houses are the ones which need attention.

Among the most common troubles noticed in the fall and early winter are colds and roup. A cold is usually the first stage or stepping stone to roup, so that, if colds are prevented, roup will be avoided. The two common causes for colds are an unequal heating of the body and the rapid reduction of the temperature.

If a man's temperature gets too high from exercise or extra clothing nature sends out a perspiration or sweat and by evaporation the heat units are taken up and the body is cooled. A hen's temperature is not reduced in this way, for she has no sweat glands in the skin. The moisture with the hen is carried out through the breath, so for this reason, if a hen is warm she will have her mouth open bellowsing the air in and out to take out the moisture and not to get an extra supply of oxygen into her lungs. If the chickens are crowded at night and then come out into a cold frosty morning the breathing organs are so chilled that a cold is the result, which paves the way for roup.

Many cases of roup attributed to the winter season have their real origin in the fall season. A hen's temperature is 106 degrees. She is covered with a coat of feathers for protection. Therefore, hens should not be expected to live under conditions which are comfortable for man. More birds are injured by housing too closely and crowding than by the opposite. While we do not believe in a balm for all ills, yet we find the following a good preventive and treatment for roup, canker, chickenpox, etc.: Magnesium sulphate, 15 ounces; magnesium oxide, 1 ounce; sulphate of iron, 2 ounces; ground ginger, 2 ounces; sulphur, 2 ounces.

Give one tablespoonful in moist mash to twelve birds each morning for three mornings and discontinue till needed. The magnesium sulphate acts on the intestines, the magnesium acts on the blood, the ground ginger stimulates all organs, and the sulphur is a general antiseptic. This is, therefore, a good system treatment or tonic for the fowls. For severe cases the dose mentioned above should be increased. No one, however, should try to control a disease without first removing the cause. If birds have a cold, first remove the cause, then administer treatment.

During the fall season all grains, weed seeds, etc., ripen, so that if the birds have free range they have an abundant supply of food, but the ration often is unbalanced, for the ration usually contains too much fat producing elements with not enough tissue forming elements. If the birds have range on clover, alfalfa, cowpeas, etc., the ration is more apt to be balanced, but if they range in a corn field the hens should be fed protein in some other form, for without it, the hens will get fat but produce no eggs.

Get all pullets to lay before cold weather. If this is not done it will be hard to get them to lay during the winter. Pullets which lay in the fall make better breeders in the spring than those which wait till spring to begin laying.

NOTES.

Damp air in the poultry-house is fatal to egg production. It is much better to have a cold, dry house than a warm, damp one. Hoar-frost on the walls of a house is the result of warm, moist air coming in contact with the cold walls. If the foul air is gradually mixed with fresh air, no rime will occur.

An earth floor is frequently satisfactory where the soil is light in texture and well drained. Otherwise a board or cement floor is better, and preferably the latter, as it is more durable and sanitary.

The nearer square a house is—other things being equal—the less lumber it will require. A long narrow house is colder than a short, deep one, because it has a larger area of exposed surface and it is more inclined to be drafty.

The shape of the roof influences the cost of construction. The steeper the pitch the greater the cost of building, particularly with a shed-roof house as compared with a gable or combination-roof. On the other hand, the steeper the pitch the longer it will last. Most roofs are one-fourth pitch, while shingle roofs should be one-third pitch.

A poultry-house should be of simple construction, and the fewer permanent fixtures there are the better. The feeding hoppers, dusting boxes and nests should be movable in order to make the house easy to clean.

The roosts should be made low down, particularly for the heavier breeds. Leghorns require about eight inches of perch room, Plymouth Rock nine, and Brahmas ten. The roosts may be made of two by four inch scantling or of two by two inch pieces, with the corners slightly rounded.

When a dropping-board is used it should be made low down to admit of easy cleaning. For one roost, the dropping-board should be twenty inches wide, and for two roosts the board should be three feet wide. It should be made of matched lumber and should be well constructed, especially where nests are located under the dropping-board.

Nests are made about twelve by fifteen inches, and they should be dark, as this tends to prevent egg eating.

MADE IN CANADA

THE CONCENTRATED ESSENCE OF WAR.

Two soldiers of the King talked of war. Each had seen the present war as a member of a command which had brought honor to Canada, for one wore the tiny red badge of the original Princess Patricia's regiment, and the other had been one of the "Little Black Devils," whose exploits at Ypres had been a confirmation of their christening to the title.

Both had seen something of war before participating in the present unpleasantness. The man from the Princess Pat's had done his bit in South Africa; so had his friend from Winnipeg. In addition he had served elsewhere with the British army for twelve years, had spent four years in the United States Navy, and (as he expressed it "had some fun during a revolution in San Domingo.

ESSENCE OF WAR.

Singly and together, they attempted to state in simple terms the points waged to-day and the other wars in which they had borne a part.

"I am what is known as a soldier of fortune" said Private Cary to a representative of the Winnipeg Telegram. "Whenever there was trouble and I could get into it, the attraction was as certain for me as if I had been steel to a magnet.

"I thought I knew all about fighting when I beat it over from the States to get into this with what I had been told was a regiment of real fighters. But I learned more in a month in fighting the Germans than I had known in a pretty busy lifetime up to the day I had landed in France.

"I heard an officer say something once about this being the concentrated essence of all war. I did not get him properly at the moment, but the more I have thought this over the more I have come to the conclusion that he was exactly right.

"It is concentrated essence of fighting with all the agencies of modern science employed; on the other hand, it is the triple extract of a brutality which we had begun to think had been almost eradicated by science itself. I belonged to an outfit which does not have to be praised by me.

"In spite of those awful days of Ypres and after, there were only forty members of the 8th Battalion, wounded or not, prisoners of war. If the boys had to die, they died; but even of the forty few were taken who were able to raise an arm.

"I merely speak of what they did, because as one of them it is the horror of a gigantic shambles as I look back at it. Little things impress the big things on a fellow and before me pass a queer nightmare succession of unrelated pictures, and half remembrances of jumbled impressions I received at the time.

"Of the hundreds of Germans directly in front of me, I see one big fat fellow aiming. I get him, and he jumps like a big jack rabbit performing in a pantomime. I laugh as I see him come down on his shoulder, with his heels sticking up and wiggling funnily. But, nevertheless, I fire again and the wiggling stops.

THE GERMAN OFFICER.

"During the very worst of the Ypres mess, someone strikes a match beside me. That also makes me want to laugh, and I turn to say so to the chum who has been fighting beside me. He'll never see the joke. That was no matchbox being struck; it was Bill. The bullet had entered behind one ear and come out close above the other.

"Among these pictures I see myself doing listening point duty. I see myself as I know I looked—caked in mud, with eyes, all whites, staring at who had been a man three weeks before, but for two weeks past had been an offence.

"Then I see the head of what was me turn very, very slowly. I hear again the whisper that is not a whisper of the listening detail from the shop across the way. I still see another picture which might be called 'The Falling Tree.'

"A German officer—a Staff officer, evidently by his uniform, is directing some operations—tunnelling, maybe, about fifty feet behind their lines. I've had glimpses of him half a dozen times, and now I get a good line on him. In this picture I see myself waiting for what seems a long time.

"Apparently he is also waiting. Then, suddenly, his head and shoulders sway and he falls straight forward like a chopped tree.

BACKWARD AND FORWARD.

"Consider a reel of such pictures passing before me and continuously between Quebec and Victoria, to which place I am ordered for another three months in a convalescent home, and you will have some idea of what I think of this warfare of to-day."

Private A. Warren, of the Princess Patricia's Canadian Light Infantry, spoke:

"To put the whole thing in a nutshell," he said, "picture St. Eloi, where I got mine. This was not one of the really big battles of the war, although many went out there, including Colonel Farquhar, out in front of his men setting them an example.

"But figure for yourself, and you will see what it must have been like. The trenches were not more than to seventy-five yards apart when the charging and counter-charging began. We took a trench, lost it, took it, lost it. For two days the battle swayed backward and forward, over a battlefield of at most not more than 250 yards. Two days in this space, locked together in hell, bayonets out, shrapnel flying, shells bursting, machine-guns raking, bombs exploding. You just cannot imagine that picture any more than I can properly describe it."

For the GIRL WHO is THIN

It is all very well for fleshy people to admire a slim figure, but no girl likes to be referred to as "thin as a match" or "flat as an ironing-board."

Thinness means that the tissues are not properly fed and nourished. It indicates a tendency towards anaemia, which must be overcome in its early stages. You may eat plenty of food, but you are losing weight, and with it reserve force. The blood has got thin and watery.

It is usually the nervously energetic girl or woman who wears herself down by worry and anxiety, until the nerves become irritable and the form emaciated.

This condition never rights itself, and for this reason you must seek external assistance, such as is found in Dr. Chase's Nerve Food. This treatment should not be confused with fat-forming, oil-composed preparations. It is rather a true tonic, which sharpens the appetite, improves digestion and restores richness to the blood. Through the medium of the blood it feeds and nourishes the starved cells and tissues back to health.

Under this restorative, upbuilding treatment the angles disappear, and the form is rounded out to healthful proportions. The new tissues formed are strong and firm, and give to the body the buoyancy and vigor which makes you look well and feel well. Nervous headaches and indigestion disappear, and you feel again the joy of living. You can prove the benefit obtained by noting each week your increase in weight.

Heard of Them From Her Brother

WHY MRS. MARCHBANK USED DODD'S KIDNEY PILLS.

She Found Quick Relief and Now Recommends All Women Who Suffered As She Did to Use Dodd's Kidney Pills.

St. Martin's, St. John Co., N. B., Jan. 31. — (Special). — Mrs. Violet Marchbank, wife of a well-known farmer living near here, is telling her neighbors of the splendid results she has got through using Dodd's Kidney Pills.

"My trouble started from a cold," Mrs. Marchbank states. "I had backache, my joints were stiff and my muscles cramped. I was irritable and always thirsty. My appetite was fitful and I felt heavy and sleepy after meals. Rheumatism was added to my troubles as well as headaches, and heart flutterings made me very anxious at times.

"I suffered for about two years and was far from being a well woman when my brother told me what great things Dodd's Kidney Pills had done for him and I made up my mind to try them.

"I sent and got three boxes and they helped me right from the start. I can recommend Dodd's Kidney Pills to all women who suffer as I did."

Every one of Mrs. Marchbank's symptoms was a symptom of kidney trouble. That is why she found such quick relief in Dodd's Kidney Pills.

AIR BOMB V. C.

Two British Fliers Rescue One Another in Turn.

The King has been graciously pleased to approve of the grant of the Victoria Cross to Squadron-Commander Richard Bell Davies, D.S.O., R.N., and the Distinguished Service Cross to Flight Sub-Lieutenant Gilbert Formby Smylie, R. N., in recognition of their behaviour in the following circumstances:

On November 19 these two officers carried out an air attack on Ferrijik Junction. Flight Sub-Lieutenant Smylie's machine was brought down by heavy fire. The pilot planed down over the station, releasing all his bombs except one, which failed to drop. Thence he continued his descent into the marsh.

On alighting he saw the one unexploded bomb, and set fire to his machine, knowing that the bomb would destroy it. He then went towards Turkish territory.

At this moment he saw Squadron-Commander Davies descending, and fearing that he would come down near the burning machine and thus risk destruction from the bomb, he ran back and from a short distance exploded the bomb by means of a pistol bullet.

Squadron-Commander Davies descended at a safe distance from the burning machine, took up Sub-Lieutenant Smylie, in spite of the near approach of a party of the enemy, and returned to the aerodrome—a feat of airmanship that can seldom have been equalled for skill and gallantry.

Squadron-Commander Richard Bell Davies, D.S.O., is twenty-nine years of age and a bachelor. For the past five years he has lived at Rotherfield, Sussex. He entered the navy about eleven years ago.

He was taught to fly by Mr. Grahame-White about three years ago. He was sent to Somaliland at the beginning of the war, and when he returned was sent to Belgium. It was Squadron-Commander Davies who made the attempt to destroy the German aerodrome in Brussels early in the war. Later on he took part in an aerial attack on Zeebrugge, in which he was wounded, and for which he received the D.S.O. About March last, having recovered from his wound, he went to the Dardanelles.

A WISE PREMIER.

How He Changed the Views of the Dutch King Long Ago.

History records many an instance in which trivial incidents have shaped the destinies of nations. It appears that a small silver inkstand and the quick wit of a prime minister once played an important part in the history of the Netherlands.

William III., King of the Netherlands, was a man of violent and ungovernable temper. Although in general a clever statesman, he was inclined, for some reason or other, to involve Holland in the trouble that was brewing between France and Germany in 1869. He was deaf to the appeals of his ministers, who foresaw the ruin to the country that war would bring.

Thorbecke, the prime minister, resolved to make one last attempt to change his sovereign's resolution. On entering the royal presence Thorbecke was greeted with a rough "Good morning. What's the news?"

"Nothing particularly, your majesty; only the people of The Hague are talking a great deal of nonsense about your majesty."

"About me!" exclaimed the monarch in wrath. "What do they say about me?"

"Well, sir," answered the old statesman, "The Haguers declare that your majesty has become stark mad!"

Before he could utter another word, King William, his face purple with rage, jumped up and seized a heavy silver inkstand, with the intention of hurling it at the head of the premier. Fortunately, a projecting angle of the inkstand caught in the tablecloth, and dragged it off the table with everything upon it. In the confusion, the discharge of the missile was delayed for a moment.

"Sire," said Thorbecke, quietly, "if your majesty hurls that beautiful inkstand at my head The Haguers will have much reason for their assertion."

For a minute the angry king gazed in silence at his minister. Then he gradually lowered his arm and replaced the inkstand on the table. He walked to one of the windows and stood looking out into the street for a few minutes. Returning to the table, he resumed his seat and said, as if nothing had happened:

"And now tell me what you have got to say."

An hour later when the statesman left, he carried with him the monarch's promise to issue a proclamation that would declare the neutrality of the Netherlands.—Washington Star.

The Widow.

I know a widow who can charm
  All men it is her chance to meet:
She has such frankness to disarm,
  Such graciousness alluring sweet,
Such sympathy when we are sad,
  So fine an understanding sense—
Can it be just because she's had
  Experience?

So many come to pay her court
  And revel in her gladding smile,
So many think her just the sort
  With whom a life away to while,
I wonder why some likely lad
  Wins not her troth for recompense—
Can it be just because she's had
  Experience?

—Lee Shippey in Judge.

Teacher—What lessons do we learn from the attack on the Dardanelles? Prize Scholar—That a strait beats three kings, dad says.

The HouseKeeper

Delicate colored blouses may be dried out of doors, but should not be exposed to the sun or light. Put them in a pillow slip.

A little baking soda and kerosene oil is the very best thing with which to clean bathtubs. It never injures the enamel.

Furniture is an excellent barometer, displaying all the varying moods of a fickle season. Damp furniture accumulates dust, it turns blue, has a sticky feeling and is unattractive. The condition is apparent in damp weather. To polish wood that takes on this sticky hue use a mixture of equal parts of gasoline, linseed oil and strong vinegar. The vinegar cuts all grease from the woodwork, leavin git as clean as it washed. Use old pieces of cotton to polish.

To keep lettuce fresh after washing put it in a brown paper bag and twist the top of the bag tightly to exclude the air.

Coal dust is wasted unless the mistress sees that it is burned, and yet it makes beautiful fires. Have a galvanized iron scuttle for the purpose. Add sufficient water to the coal to make it moist. When a fire is burning brightly bank it up with this wet dust and you will have a clear fire which will last for hours.

The best and easiest method I have ever found for destroying ants, whether they are in the house or on the lawn, is to take a large sponge, wet it, and sift fine sugar all over it and lay it in the place that is infested. The ants will soon fill the sponge. Take it and sink it in a pail of water; they will then leave the sponge and rise to the top of the water and can easily be destroyed. Sprinkle more sugar on the sponge and put it in place again. This repeated a few times will soon enable the housewife to destroy all the ants.

HEALTH WRECKED THROUGH LA GRIPPE

It Generally Leaves the Patient Debilitated and An Easy Victim to Other Diseases.

One of the foremost medical writers says: "It is astonishing the number of people who have been crippled in health for years after an attack of la grippe or influenza." The real danger from this disease, which sweeps over Canada every winter, is during convalescence, when the characteristic symptoms, the fever, the catarrh, the headache and the depression of spirits pass away. Grip leaves behind it weakened vital powers, thin blood, impaired digestion and over sensitive nerves—a condition that makes the system an easy prey to pneumonia, bronchitis, rheumatism, nervous prostration and even consumption. It is a condition that calls most emphatically for a tonic for the blood. Dr. Williams' Pink Pills are a tonic especially adapted to meet this need as they purify and enrich the blood. They tone up the nerves and give vigor, strength and health to the debilitated system. Mrs. Howard D. Chaffey, Indian Island, N. B., says: "For several winters in succession I was attacked by la grippe which left me weak and badly run down. In each case I used Dr. Williams' Pink Pills with the most beneficial results. Last winter when the trouble was again prevalent I took the precaution of fortifying my system with Dr. Williams' Pink Pills and escaped the trouble, while many of my neighbors were down with it. In fact I enjoyed the best of health all spring and feel sure this medicine will so fortify the system as to prevent the trouble."

These Pills are sold by all medicine dealers or may be had by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

PERILS OF BAD AIR.

Reduced Vitality, Loss of Appetite and General Bad Health.

Air is bad when it is overheated, when it contains an excess of moisture, and when it is chemically contaminated. This is the conclusion of the New York State Commission on on Ventilation, as summarized by Professor C. E. A. Winslow, chairman.

The first indictment against bad air shows that an increase in temperature beyond the normal 70 degrees produces serious derangement of the vaso-motor mechanism of the body, resulting in a rise of temperature, increased pulse and a lowered blood pressure, with a corresponding decrease in efficiency, both physical and mental. In addition to this, overheating conduces to an undesirable congestion of the mucous membranes of the nose, thus possibly paving the way for colds, sore throats and attacks of various germ diseases.

The work of the commission also proves that chemical accumulations in the air as a result of air stagnation bring about a decreased appetite for food, which, in turn, must have an unfavorable effect on the entire body. In the commission's experiments the people living in fresh air ate 4½ to 13 per cent more than those living in stagnant air.

"These experiments," says Professor Winslow, "indicate that fresh air is needed at all times and in all places. While we have changed our ideas as to what causes bad air, ventilation is just as essential to remove heat produced by human bodies as it was once thought to be to remove the carbon dioxide produced by human lungs, and it is now proved also to be essential for carrying away chemical products which exert a measurable effect upon the appetite for food. People who live and work in overheated and unventilated rooms are reducing their vitality, and rendering themselves an easy prey to all sorts of diseases."

A Foxy Reply.

One of the most caustic replies ever made during an election campaign was that of Fox when he called at a shop during one of his candidatures. The shopman happened to be a rabid opponent. Taking hold of a piece of rope, he said savagely: "Vote for you! I'd sooner hang you with this rope!"

"Very interesting," remarked Fox, blandly, examining the cord. "A family relic, I presume."—London Mail.

Each year one vicious habit rooted out, in time ought to make the worst man good.—Franklin.

New Window Hangings
For The Spring Season

Select Patterns in New Scrims, Marquisettes and Curtain Nets

SCRIMS

Evenly woven scrims of particular good quality in two splendid shades of Ivory and Paris. 36 inches wide. Per yard..................25c.

New Marquisettes

This material has been in big demand lately for curtain material. Makes a very serviceable and pretty curtain. 36 inches wide. Price per yard..................40c.

NEW IMPORT CURTAIN NETS

A choice lot of patterns, new and dainty, in this spring shipment of curtain nets. Colors, cream, white, deep cream and Paris. The patterns are neat and the designs all this seasons.' 40 to 44 inches wide. Per yard 20, 25 and 40c.

Some Real Values In Boys' Clothing

Boys' Fancy Norfolk Suits

In single breasted style with knife pleats to wrist and sewn on belt. Made from natty brown and grey small pin check tweeds and pencil stripe blue worsteds with peaked lapels and well formed shoulders. Extra good body lining and full fashioned bloomers. Sizes 26 to 34. Special price .... $4.50, $5.00 and $5.50.

BOYS' BLOOMER PANTS

In medium and dark shades. Made of strong Canadian Tweeds. They're well made and strongly lined. Sizes 24 to 34. Special at ....50c, 60c, 75c, 85c and 90c.

TOWN AND COUNTRYSIDE

News From the Neighboring Towns and Villages Written for The Telescope by a Staff of Live Correspondents.

MAPLE HILL

The Girls' Club of Maple Hill gave another of the series of dances at the home of Mr. William Ellis on Friday night. The young people had an enjoyable time and raised the sum of $10 for the Red Cross.

VESTA

The dance which took place at the residence of Mr Wm McGill on Thursday evening last was well attended. All report everything went good, and having enjoyed themselves to their hearts' content.

We are very sorry to report that Mr J D Rielly is not picking up in health as we would like to see him.

We are sorry to report the severe illness of Mr James Mooley. We wish him health at an early date.

From all appearances the bear will be able to see his shadow on Feb 2, of the weather doesn't change in the meantime.

EAST BRUCE

The annual meeting of Centre Bruce Church was held in the church on Jan. 27th. There is a surplus of money on hand and some improving is to be done in the church. Mr Geo Brown was elected Chairman of the committee, McLean Young, Secty; A Wood, Treas; Jas Pace, Caretaker and Miss McKenzie, Organist.

The petition circulated the beginning of the week for prohibition was signed by 95% of the ratepayers of Bruce Tp. It will soon be that prohibition will be from coast to coast of Canada and the liquor men will wax fat no longer.

Pte Bob McGregor is around getting recruits. Bob knows all the boys around and is the right man in the right place. He wants more to put on the King's uniform. Pte Bruce, his brother, also visited his home last week. They intend to be with the other boys having Xmas 1916 in some of the Kaiser's palaces in Berlin.

We all extend congratulations to Mr Joe Foster on his marriage to Miss C McGregor of Cargill on Wed, Jan 26th. We welcome Mrs Foster to our neighborhood.

Miss Snowdown has been visiting friends at Owen Sound.

PINKERTON

We understand that two more of our young men have enlisted in the persons of Edgar Campbell and Beaton Wells. Success to both.

Pte Elmer Gregg is home from Galt on sick leave suffering from a sore arm.

A number from here attended the dance at Mr And Alexander's on Monday evening and report a fine time.

Mr Howard Garland paid a business trip to Listowel last week.

Prayer-meeting will be held on Thursday evening at the home of Mr Joe Rourney.

Mr Albert Pinkerton spent a few days in Toronto last week.

EDEN GROVE

Mrs M Thompson, who has been employed at the hotel for the past year, left on Thursday last for Toronto where she has secured a position.

The box social held here on Friday last was a great success. Over sixty-five dollars was realized which will go to supply the much needed comforts for the boys at the front.

Miss Ella Ledgerwood returned from Walkerton on Friday last, where she was visiting acquaintances.

Miss Mildred Bell of Walkerton is visiting her friend, Miss Della Reed.

Some of the local soldiers from Walkerton went on a route march after the box social Friday night.

We regret to hear Mr John Connors is lying at his home here dangerously ill with pneumonia.

MALCOLM

The Malcolm Farmers' Club has been having some lively debates lately on timely topics. On Monday evening they discussed Country Life vs. City Life. The affirmative, led by Herman Monk, and supported by Wm. Bierwirth and Andrew O'Neil, descanted on the virtues of pure food, pure air, and the joys of the rural existence. Messrs. Frank Fisher and Walter Findlay stuck up for the city. The judges, who were M. A. McCallum, F. Jacklin and J. Schwindt, awarded the verdict to the affirmative. At the next meeting the club will debate the question "Resolved that women have more influence than men".

CARGILL

Mr. Nelson Clark of Weston visited here last Thursday.

Mr. C. B. Robinson of Walkerton was a caller in our burg on Thursday.

Mrs. Jas. Chathurn of North Bay arrived on Thursday to attend the funeral of her father, the late Joseph Menelley.

Messrs. W. D. Cargill and John Clancy attended the funeral of James Coulter in Walkerton on Thursday.

Miss Maude McCoy is spending a week with friends in Toronto.

Mr. John Clancy is delegate to the Fairs Association in Toronto this week.

Pte. W. Loughleen of the 71st Batt. Galt, and Ptes. Hanson and P. Sparling of 160th Batt., Walkerton, spent the week-end here.

A number from here attended the Red Cross Box Social in Eden Grove on Friday night. Speeches were delivered by the Chairman W. D. Cargill, M. P. P., Capt. McNally, and John Rowland of Walkerton and Rev. Gale of Pinkerton, but no recruits have been signed from there while our little burg down the track has contributed no less than 22.

Misses Nellie Clancy and Verna Loughleen are the two latest to enlist, they having secured positions at the Armories at Walkerton as stenographers.

After an absence of 20 years Mr. D. Stevens of Hartney, Man, called on friends here last week.

After a few days' illness, the infant son of Henry Spitzig, jr. died on Thursday and was buried in the R C cemetery at Chepstow on Saturday. We extend our heartfelt sympathy to the parents.

The petition for Dry Ontario was passed around last week and largely signed. Messrs Joe Napper and Gilbert Hettrick are looking after Brant, with Joe Lambertus and G R Wells for the Greenock side.

We notice some of the signers are still taking advantage of the free stabling at the Power House.

Corp R Loughleen returned to Alliston on Friday.

Wedding bells are ringing!

Mr Walter Clark moved his family on Monday to Southampton where he has a lucrative position with the Bell Furniture Co. We wish them every success in their new home:

Mr Chas Kyle was in Walkerton on Monday auditing the Treasurer's books of Brant township.

Mr J D Schuett made a business trip to Walkerton on Saturday.

Mr Norman and Miss Eleanor Jordon left on Saturday for a two weeks' visit with friends at Grand Valley and Fergus.

Mrs Golden of Chepstow spent the past week with her daughters, Mrs Wm Moyer and Mrs Thos Mahoney.

One of the young gentlemen while driving to Formosa and Walkerton last week lost a black robe for which Liveryman Hanmore offers a liberal reward.

Dr Sinirle Lawson of Toronto, a nephew of Arch Young, and who has visited here frequently, has been selected as one of thirty physicians on the hospital staff of Ontario Government, situated at Orpington, Kent, Eng. We wish Sinirle every success.

Mr J J Dick of Teeswater and Mr J H Lipsett of Chesley were in our burg during the past week, the former for Crown Assurance Co., and the latter for the North American Life Co.

Mr and Mrs James McLaren of Paisley visited with the latter's brother, Mr Frank Mawhinney for a few days.

Mr Cliff of Dundas returned home on Monday after spending the past week with his uncle, Wm. Cliff.

Mr Jas Garland entertained a number of his neighbors of friends to a progressive Euchre party on Thursday evening, and all report an enjoyable time.

Mrs D Gilson and Miss Emma Loughleen were in Walkerton on Tuesday.

SOLWAY

Mr. and Mrs. John Whitehead are spending a few days at the home of Ben Mitchell.

Born—To Mr. and Mrs. Frank Hanmore, of Pinkerton, and formerly of these parts, a daughter.

Pete Bruder from the West and an old resident of this vicinity is a visitor here this week.

Miss Bertie McGarrity spent a couple of weeks with Toronto friends.

Millard Craig spent Sunday at Maple Hill.

OTTER CREEK

The weather is somewhat Spring-like with lots of rain as usual. There were three snakes seen in this vicinity. We do not know whether the weather is out of season, or if the snakes are. We think they both are.

Mr Thomas Hutton was laid up with a bad attack of blood poison in his finger. We are glad to say he is recovering.

The Temperance people were busy canvassing this week. Some apparently had good success, while others had not.

Mr Ferdinand Wicke from Mildmay is at present visiting friends in Stratford.

Mr. Milton Weber from Carlsruhe seems to have a very bad attack of La Grippe which went to his eyes.

Mr and Mrs E. Remshaw intend leaving for their home in Nokomis Sask., on Friday.

A very amusing incident took place in our neighboring village. When a certain good housewife was baking doughnuts, a man came in and looked so much at them that she offered him one. He generously helped himself to five, after a while another happened to come along and he gave her such fine compliments about her doughnuts that she offered him some too; he helped himself so generously till he had disposed of half a dozen. After the second one was gone the third appeared and he was so struck on those doughnuts that she offered him some to; and he ate until he had his abundance. We do not know whether this was a made up scheme among the three or whether the sweet scented doughnuts reached half way over the village. Hurrah for the doughnuts!

It is reported that the latest remedy for heart failure is eating lots of doughnuts. Try it.

SOLDIERS BANQUETTED

Methodist Ladies Provided Delectable Feast for Boys of 160th—Officers Prove Themselves Orators

That nothing is too good for the boys of the Bruce Battalion appears to be the thought of the people of Walkerton, of the ladies especially. On two occasions this last week the officers and non.-coms. and men, have been the guests at royal feasts, prepared only as Walkerton ladies know how to provide such things. A report of the Knox banquet appears in another column. On Tuesday evening the soldiers were the guests of the ladies of the Methodist Church. Besides the members of the regiment, the officials of the church sat down to a very sumptuous supper. The tables were set in the Sunday School room, which was tastefully adorned with flowers, flags and bunting, and presented a very attractive scene. It goes without saying that the good things were dealt with in a fitting manner by a very appreciative company of men. A short toast list followed. The pastor, Rev. D. A. Walker, who acted as toastmaster, gave the regiment a very warm welcome on behalf of board, the ladies and members of the church and incidentally told a story which brought down the house. In ably proposing the toast to King and Country, he referred to the striking fact that the churches, the followers of the Prince of Peace, were backing up military measures at the present time. Nothing but the fact that the Allies were fighting for those principles which are the foundation of our Christianity, would warrant the churches in taking their present stand. He urged the recognition of the individual responsibility of every loyal subject at the present time.

The toast, "The Boys At The Front' met an appropriate response from Capt. A. J. McNally who told something of the life of the boys at the front from his own personal experience.

"Our guests", was proposed by Mr. L. C. Benton. He referred to the needs of the situation for men and for patriotic contributions in terms which stirred the hearts of all. Everybody who left his factory to enlist would get his job back was the statement of this speaker. Fifteen had already gone and he would not care if he had to close the factory.

In rising to his feet to respond to the above toast, Major Moffat was greeted with three cheers by the company, and by a spontaneous outburst of applause from the soldiers that left no doubts in the minds of anyone as to where the Major stands in the hearts of the men. Already there is a strong spirit of camaraderie among the boys of the Battalion, and between officers and men there appears to be a feeling and understanding which is bound to make wonderfully for esprit de corps. In the [illegible] Major Moffat spoke most appreciatively of the goodness of the ladies, and the kindness of the people of Walkerton. He anticipated that every element of the community would do its duty but reminded his audience that while Great Britain had given one in ten of its population for the King's service, Bruce County had not yet given one in forty.

Capt. O. E. Klein urged the necessity of the local patriotic society dealing fairly with the wives and families of soldiers at the Front, referring to instances outside of the county of which he had personal knowledge. The Captain said he was leaving on February 11th to take a further military training at London before beginning his duties with the 160th.

Captain Farquhar Shaw gave a bit of literary color to the program by illustrating the true soldier's spirit from a passage in Shakespeare's King Henry V.

Capt. Allen Todd thanked the ladies for their splendid feast; and Lieut. Roy Whitehead gave a brief but very neat speech. Lieut. Whitehead also delighted the company by a well rendered solo, Miss Watt acting as accompanist.

"The 160th. Bruce Battalion," a stirring poem composed by Mrs. Stauffer, and recited by Miss Gladys Rife, made a great hit. The poem will appear in next week's Telescope. An enjoyable feature was the music furnished on the piano during the supper hour by Mrs. Wilson, wife of Sergt Geo. Wilson.

Every soldier present had a part in a new regimental "stunt" which was given for the first time, each soldier rising in order and giving his name, and his occupation before joining the King's Colors.

An enjoyable and profitable evening was concluded with the singing of "God Save the King."

Cleaning Up
After the Big Sale

Our Stock-Taking Sale proved a wonderful success and we find we have short ends of all kinds of materials as a result. These all go on the remnant table this week so come and get your share.

OUR FATE IS AT STAKE

Able Speakers Drive Home the Seriousness of the Situation to Walkerton Audience – Eleven Recruits Join at Monday Night's Meeting.

The invited audience of eligible men who attended the recruiting meeting in the Town Hall on Monday night, were treated with a straight-from-the-shoulder line of argument that must have made a very deep impression even on those on whom it did not land. Eleven recruits came forward and others will no doubt be secured within the next few days as a direct result of the meeting. In looking for speakers with a "punch", no mistake was made in securing the ministers of the town, who from first to last have been leaders in a movement which they are convinced is a fight to preserve those fundamentals which are the very foundation of our religion. "We are here for business," said Chairman David Robertson, who needed no apology for his attitude, having his family of three sons at the Front. The Chairman's words were the keynote of the meeting.

OUR FATE IS AT STAKE

Rev. Father Cummings emphasized the necessity for unity in our new nation of many elements, like the bundle of sticks which could not be broken if united. We are not fighting any particular people, but fighting the world policy of a nation which if carried to its natural conclusion would mean our destruction. With the British Empire overcome, we, a nation of helots, would be used by the German government as a source of supply. Of what value would be the deeds of our homes and lands now vested in the British crown? Everything that we have we owe to the British Empire. No other people in the world enjoys the same freedom and same justice. We have everything to live for, everything to work for, everything to die for. Our fate is at stake. He called upon all eligible men to act as true Canadian citizens and British subjects and do their duty.

A POINTED SPEECH

Rev. R. Perdue, who takes pardonable pride in the fact that one man on an average from each family in his church, has enlisted, asked the pointed question: If we are not doing our bit, why not? Was the outrage on Belgium not enough? We are fighting for the freedom of our Country. The German Militarism had come to worship a different God "Woden" as is evidenced by the definite statement of Von der Goltz in his writings. Every man who is a man should come and fight on the side of God and humanity.

APPEAL TO MANHOOD

Rev. D. A. Walker emphasized the seriousness of the recruiting question not only from the standpoint of our country, but from the standpoint of the individual in the audience, from the standpoint of his manhood, his character and his life. The speaker advanced three propositions which he enlarged upon with telling effect. (1) We have an Empire worth fighting for; if need be, worth dying for. (2) We have a cause worth fighting for, and worth dying for. (3) To fight and die for our country at an early age, does not necessarily mean that life is a failure. That man is a failure who at the end of his life can look back over a life of selfish purpose. The time is come when every eligible man must face the issue fairly and squarely. The speaker urged every man to be true to his manhood, true to his sense of duty, and true to his God.

CONVICTED ON THREE COUNTS

A three-fold question was propounded by Rev Thos. Wilson. Does the time ever come when a Christian nation is justified in going to war? If so, when does that time come? Has the time come when Britain is justified? The speaker gave a four-fold answer. A Christian nation is justified if a powerful nation tries to crush a weaker nation, nation, the ally of the Christian nation. A Christian nation is justified when a lays down a deliberate plan of wholesale murder of men, women and children. It is justified when a nation ignores the rules of war and pays no attention to its solemn agreements. It is justified when a nation tries to destroy the peace, happiness and prosperity of the whole world. The speaker gave instances within the personal knowledge of his own daughter, of the enemy deliberately firing on the ambulances of the Red Cross.

The audience had an unexpected treat in a few words from Major Osborne, of London, just back from the front, who made a stirring appeal for recruits. The Major, who is headquarters inspector, just dropped in on the night train.

A PERSONAL APPEAL

It was a fitting thing that the speaker chosen to make the direct personal appeal to the young men of the town should be one of their own number. Lieut. Roy Whitehead got down to hard-tacks in talking to the young men. He pointed out the utter unfairness of fellows hanging back when their chums and pals, and the neighbor's boy next door, were "doing their bit". The appeal was no longer general, but to you, and you, and you (pointing to individuals in the audience). Are you going to come, or are you going to back up and be a flunker? Even the married men, said the speaker, must seriously ask themselves

Corp. Ralph Glave was home from the school of instruction, London, over Sunday.

Mr. Wm. Ballantyne went on Monday to Collingwood where he has taken a position.

The County Auditors were here on Tuesday making their yearly audit of the House of Refuge books.

Mrs. Leslie of Guelph, who has been visiting her daughter, Mrs. H. V. Bean, returned home on Tuesday.

Miss Martha Fortune, who is going to the Front shortly as a nurse, spent Sunday here at Dr. Fortune's.

The Baptist ladies will give a banquet to the soldiers of the 160th in the Town Hall next Tuesday evening.

Brooke Attwood, who has been visiting his uncle, Mr. T. E. Attwood, returned to Lima, O, on Saturday.

Mrs. Thomas Douglas of Crandell, Man., has been visiting her parents, Mr. and Mrs. Routledge, con. 6, Brant.

Mrs Joseph Schnurr, who has been visiting her sister, Mrs. George Reinhard and relatives in Mildmay, returned last week.

Wilfred McFarlane, son of Registrar McFarlane, is home from Toronto, he intends taking a lieutenant's course at London.

Miss Rausch of Detroit, who had been visiting her grandmother, Mrs. Glintz, McGivern St., returned home on Tuesday.

Col. Weir who is in command is an ideal military leader, one with whom parents may safely trust their boys. —Chesley Enterprise.

Mr. James Morrison, who was here attending his mother's funeral, and later visiting friends in Port Elgin, returned to Toronto on Monday.

Mrs. Lambertus and daughter of Goderich, attended the funeral of the former's brother-in-law, M. John Connor of Eden Grove.

Judge Klein was in Kincardine last week in the interests of recruiting for the 160th Bruce Batalion. The judge is the president of the Bruce War Auxiliary.—Kincardine Reporter.

Mr. Thos. Darling has sold the house in which he has been living on Yonge St. to Mr. Joseph Frieburger of Carrick who is coming to live in Walkerton.

The members of the Methodist choir gave a miscellaneous shower for Miss Lou Fraser at the home of Miss Edna Rasburn on Tuesday evening.

Capt. Allen Todd, has been up in the Wiarton district lately in connection with his duties as Quartermaster, checking out equipment for the men.

W. H. Price M. P. P. of Parkdale, who spoke at the reception to Capt. McNally here, has been recommended by Gen. Logie to organize a unit in his district.

The Rev. R. Perdue M. A. has gone to Toronto to officiate at the marriage of Miss Norah O'Connor, youngest daughter of the late N. P. O'Connor M. P. and Mrs. O'Connor.

Rev. D. McLennan was at Hepworth on Friday, investigating a case of child neglect. He took over four children as wards, whom he would like to place in good homes.

Mrs. (Rev.) David Williams, sister-in-law of Mr Henry Williams of Walkerton, passed away at Winnipeg recently. Before her marriage she was Miss Polly Bruce of St. Marys.

Irwin Bros. shipped a carload of horses to the West on Tuesday. Mr. Bob Irwin left on the afternoon train the same day for the West to look after the disposal of the shipment.

Sergeant James, the architect and draughtsman of the 160th, has been making some good sketch maps of the County, town, and various municipalities, in connection with his work.

Marguerite, the little four-year-old daughter of Mr. Arch. Tolton of Brant, had her leg very badly scalded on Monday evening when the tea pot was accidentally upset at the supper table.

Bob Turner says in a letter published on page 4:— "The Red Cross certainly is doing noble work for the wounded Canadians. You can't realize it unless you come through it all."

Saturday's Toronto Star had a good photograph on the sporting page of Private Harry Weitzhofer, the well-known Walkerton hockey player, now at Sandling Camp, England, with C. Co., 38th Battalion.

The Soldiers' Club was finally opened on Saturday. The quarters have been comfortably and attractively furnished by the ladies, and already have become a very popular resort for the soldier boys.

"Jack" Frost, the plucky little pigmy from Chesley, whose lack of stature prevented his acceptance, has at last been accepted as a bugler at Toronto, after five vain attempts to break into his Majesty's forces.

The first two cases of sickness in the 160th occurred the past week. Pte. Symons formerly of the Bank of Commerce, is laid up with measles. Sergeant Geo. Wilson is in the County Hospital with an attack of pneumonia.

In spite of the measles quarantine the epidemic has spread throughout the town, and the majority of the families which have hitherto escaped are now having their experience. It appears to be a very mild type.

Two more of Chief Ferguson's sons have joined the colors. "Bob" enlisted at Vancouver and Stan. who has been firing on the Grand Trunk between Port Colborne and Merriton, has resigned and will join the 160th shortly.

The ladies of St. Thomas Church, with the approval of the Daughter of the Empire, and Col. Weir, hope to entertain the local company of the 160th Battalion in the Soldiers' Club Room on March 17th from 8 to 10 p.m.

A very serious operation was performed at the Bruce County Hospital on Saturday morning on Mrs Rankin, an elderly lady from Parry Sound by Drs. Hall and Bricker. Prospects of her recovery are considered favorable.

Mr. E. H. Leeson, organist and choirmaster of Knox Church, offered his services to King and Country, but failed to pass the medical examination. Mr. Leeson, who has a wife and family of three children, sets an example which should appeal to many men who have no such ties, but still are holding back.

Mr. R. E. Truax M. P. returned to Ottawa on Tuesday afternoon, having quite recovered from the indisposition which confined him to his room the past two weeks. He was accompanied as far as Toronto by Mrs. Truax and Miss Lizzie, who will spend a month in that city with Mrs. W. H. Adams.

Not every citizen who is anxious to serve can be found in khaki. On Friday last Customs Officer L. H. McNamara offered his services to the 160th Regiment in any capacity. On coming before the medical examiner, however, he failed to pass. Mr. McNamara is now the possessor of one of those certificates of Offer of Service which will be highly prized in years to come.

A dance will be held in the Town Hall, Walkerton on Monday evening, February 14th, 1916, the proceeds to go for the purchasing of Band Instruments for the 160th Overseas Battalion Band. The Walkerton Orchestra, assisted by members of the Battalion Band, will be in attendance. Assist your band and spend an enjoyable evening. Gentlemen 50c. Ladies, Cake.

Mr. Ray Vogan has been quite ill the past few days and his condition is causing some anxiety.

Charlie Tisdale, formerly of Brant, a graduate of the local high school, has enlisted with the 48th battery of the Canadian Artillery at Toronto.

Tom Marks Co'y supporting the popular comedian Tom Marks, will appear in in the town hall Wednesday and Thursday, February 16th and 17th. On Wednesday they will present "The Irish Attorney," an extremely funny comedy drama in 4 acts, with new vaudeville numbers between acts. Complete change of programme on second night. Name of play will be announced later. Prices 35c and 50c. Children 25c. Seat sale opens at McCrum's next Saturday. Book your seats early.

We understand that "Bob" Rowland, son of Mr. John Rowland, is returning from the Front shortly to take a commission in the 160th Batt. This is in line with a recent movement which should make for the efficiency of our Canadian battalions. For some little time the Militia Dep't has been encouraging the return of a limited number of seasoned men of the ranks who have had the experience of trench fighting at the Front to take commissions in the regiments now forming.

Yaeck up for Wife Desertion

Frank Yaeck who was brought back from Hamilton last week by Chief Ferguson charged with deserting his wife, appeared before Magistrates Tolton and McNab on Friday morning, and was ordered to pay his wife $3 per week. Yaeck claimed that he was already paying $8 per month for the maintenance of his children. The costs of the court, amounting to $14, were assessed to Yaeck. Yaeck is making $2 to $2.50 a day in a Hamilton factory, working on piece work.

Invited to Preston

An invitation to the pastorate of Preston Methodist Church has been received by Rev. D. A. Walker B. A. of this town, and is receiving his consideration. Mr. Walker's four year term will expire the coming July. By his devotion to the work and to his people, Rev. Mr. Walker has won a place in the hearts of his congregation here that will make leave-taking anything but pleasant. The reverend gentleman is regarded as one of the most promising of the younger men in the work and those who know him best predict for him a career of great usefulness.

Bonds Sold Well.

Fifty-seven thousand dollars worth of Bruce County 5½ per cent debentures were sold on Saturday by Warden A. E. McNab and County Treasurer Robertson to Wood, Gundy & Co. bond dealers, of Toronto, for a shade better than par. These debentures represent all the county debentures issued up to date, and constitute the balance of the Patriotic Fund of 1915. The debentures were offered last fall at 6 per cent and a little better than par was the best bid. Warden McNab and others counselled holding them and the result is that the county gets the money ½ per cent cheaper which is a big thing on the amount of money involved.

McNeill—McConkey.

A quiet wedding was celebrated at the home of Mrs. John McConkey, Springhill Farm, Brant, on Wednesday, February 2nd, at six o'clock, when her daughter, Miss Winnifred Victoria, was united in marriage to Mr. Thomas A. McNeill, of Brant. The ceremony was performed by Rev. R. Perdue, rector of St. Thomas Church, Walkerton. Only a few immediate friends were present, including guests from Guelph and Toronto. The bride who was unattended, was handsomely gowned in embroidered voile. Mr. and Mrs. McNeill will reside on the former's fine farm in Brant, south of the Walkerton G. T. R. station.

Funeral of Dr. Reed

The funeral of the late Dr. J. S. Reed was held from his late residence Saturday afternoon. Rev. D. A. Walker conducted service at the house. At the grave the brethren of the Oddfellows' lodge, also took part, giving the burial service of their order, the parts of Noble Grand and Chaplain being taken by Bros. F. Spelran and E. S. Lerenz. The pall-bearers were, —Messrs James Whitehead, G. T. Rourke, R. J. Hepburn, K. M. Taylor, R. Lee, H. G. Hunter. Among the relatives present from a distance were:—Mrs. Reed, sr., Miss Reed, Mr. E. C. Reed, Mr. Marshall, Mr. Zogers, Mr. John Alward and Mr. Riches, of Toronto; Mr. and Mrs. A. B. Dowling, of Winnipeg; and Mrs. W. G. Scott, of Calgary.

A SUDDEN CALL

Came To William Wesley, the Veteran Publisher of the Herald & Times On Friday.

For the third time in as many weeks a well-known citizen has been called away suddenly and unexpectedly. On Tuesday evening of last week, Mr. William Wesley, the senior publisher of the Herald & Times, was going about his work as usual. Within three days he had passed to the Great Beyond. An attack of grippe kept him from his duties on Wednesday, but still he was up and around the house, as indeed he was until Friday, when a weakness of the heart developed with fatal results. This condition was brought on by chronic asthma from which Mr. Wesley had suffered for forty-two years.

The late Mr. Wesley was the dean of Bruce printers in fact, the only surviving member of the original Bruce Press Association, and at the time of his death he was Hon. President of the Publishers' County Association. He was widely known not only in the surrounding district, but among the members of the newspaper fraternity, and his genial presence will be missed by his many old time friends. He had not an enemy in the world. Geniality and kindness were outstanding qualities of the man, and though of a quiet disposition, he numbered his friends by the score. For those whom his passing has bereaved, deep sympathy is felt by all.

Born in the Town of Barrie, 62 years ago, he was the youngest son of Mr. and Mrs. Samuel Wesley. His father died early in life and at twelve years of age, William was sent to learn the printer's trade at the Barrie Advance, which later on his brother published for no less than forty years. Mr. Wesley acquired some skill in the typographic art and took pride in his workmanship. In his twentieth year he became a victim of asthma from which he suffered constantly the rest of his life. With a view to freeing himself from the malady, he travelled considerably as a young printer, spending considerable time in the Southern States, chiefly in South Carolina, and later in the Canadian West. Returning to Canada he bought the Collingwood Messenger, which he published until the big fire in that town. In 1884 he came to Walkerton and bought the Bruce Herald, which he conducted for about five years. Then he published the Ridgetown Standard for several years. In 1905 he established the Bruce Times which he amalgamated four years ago with the Herald. Mr. Wesley was married in early manhood to Miss Jane Fullerton, daughter of the late Adam Fullerton, M. D., of Barrie, who predeceased him three years ago. Three sons and three daughters survive:—J. A., editor of the Herald & Times, Roy, Bertha and (Vera) Mrs. Capt. Arthur McNally of Walkerton, Will, of the 12th Canadian Field Battery in France; and (Maud) Mrs. Fred Williams of Toronto.

The funeral took place on Sunday afternoon, the remains being interred in the Walkerton Cemetery. Service was conducted by Rev. R. Perdue, Rector of St. Thomas Church. The following friends were pall bearers:— Messrs John Rowland, John Wingefelder, W. J. McNally, C. A. Fox, Thos. Dixon, David Traill.

A GOOD RECORD

Inspector Highly Commends The Work Of Walkerton High School

The Walkerton High School Board held its reorganization meeting for 1916 on Wednesday evening of last week. Mr. H. M. Lay was re-appointed chairman for the ensuing year and Mr. M. G. Dippel, sec'y-treasurer. Messrs. Dixon, Shaw, Goetz and McKay were named as the Educational Committee and Messrs. Dr. Stalker, Klein, Lay and Halladay as the Property Committee. The treasurer's report showed receipts of $7808.29 and expenditures of $6300.01, leaving a balance of $1003.28. It was referred to the Town Auditor for verification. The report of the inspector was read, showing the work of the school to be of a satisfactory nature.

A very lengthy report is briefly summarized:—

The classes are growing and I foresee the question of increased accomodation coming to the front. Division of duties among teachers: satisfactory. Discipline, excellent. Attendance, boys 54, girls 55, total, 109. Teachers' work all graded 1. Excellent work in both years in Art. In conclusion the inspector stated:—"My favorable remarks of last year as to the general satisfactory condition of the school may be considered as repeated. I am pleased that the board have carried out my recomendations as to urinals, library, equipment etc. Now I am asking for equipment for Physical Education. This is absolutely necessary to make the work in that subject what it should be. The board will agree with me when I say that the pupils are well worthy of all that can be done for them.

MISJUDGED

Of Miss Langton's attitude she was to learn more very quickly, for Sir John Weston called to see her. He was more than kind, but he urgently begged her to give the information which all could see she was withholding, and to help the police to discover the murderer.

"I am so sorry, but I cannot do it," she said. "I tell you truly that I believe nothing I know has the most remote connection with the actual tragedy."

"My dear Miss Daintree, you will be compelled to speak sooner or later. Certainly I feel—we all feel—that you are generously shielding some one else. But there is a limit to that. You must let us know all you know, or you will be left to bear the brunt yourself."

"I know that," she said.

"No woman's strength could possibly be equal to that task," he said.

"Is a woman not bound by the laws of honor as much as a man."

Sir John had never thought of it in that light. He began to wonder whether a "strong-minded woman" and "a woman of honor" were interchangeable terms.

As he left he drew a letter from his pocket.

"My cousin, Miss Langton, asked me to give you this: she said she must send you a line of sympathy."

Beryl read it after he had gone. It ran:

"How can I thank you? You are the noblest woman on earth! You will never give me up, I know. Even if you did, it would not bring the murderer to light. And you promised!"

"Yes," thought Beryl, "I promised."

On his way home Sir John met the rector, who said:

"You have seen her?"

"Yes. She will not speak."

"But she will have to!"

"I know," said Sir John, "that the police have applied for a warrant and it has been granted. The magistrates will sit the day after to-morrow."

"Do they seriously suspect her?" asked the rector.

"Not of the actual crime, I believe; but they believe they will get at the mystery if they put her on trial. That detective man, Groves, has insisted on it. I am told that he is perfectly convinced of her innocence, all the same. Could you not speak to her?"

Mr. Vernon looks very serious.

"I will try," he said.

He called on Beryl as she sat trying to face the situation intensified by the tone of Dora's note.

"You know why I have come?" he said.

"I fear it is to ask me to do something which I cannot do."

"Yes; I am as sure as I am alive that you have no guilty knowledge, but you must not hinder the course of justice."

"It is unwomanly, is it not?" said Beryl, with a little smile.

"It is at least highly inconvenient for you," he said.

"I know that; but, Mr. Vernon, it may sometimes be necessary to do things that are inconvenient. In this case there are two 'rights' warring against each other. How am I to decide between them? If I throw in my lot with the stronger side I shall be saved all inconvenience; if I try to help the weaker side I shall suffer. Which would you do?"

"It is mistaken chivalry," he said.

"Was not all chivalry more or less a mistake? Don Quixote suffered because he did not realize that fact. Yet you would revive the age of chivalry if you could!"

The rector did not argue this question.

"Do you know that a warrant has been issued against you?"

"I thought it not unlikely."

"And yet you will not speak?"

"And yet I will not speak."

"I do not know if it will interest you to know that the verdict of a dozen benches of magistrates supplemented by a dozen juries would not make me believe that you had any part of which you need be the least ashamed in the whole affair."

"Is that not rather a serious defiance of the laws of the land?" asked Beryl, with something like a smile. "But it was very good of you to come to tell me that."

"I came to tell you rather more than that," said the rector. "I came as the man who loves you."

"You tell me this at such a time?"

"I thought it rather a good time," said the rector. "It occurred to me that you might be interested in knowing it. Naturally you may feel a little surprised. I was a little surprised myself when I discovered it. I had thought myself incapable of anything of the sort, but I was able to realize the fact when it presented itself before me."

"Yet you do not even approve of me!" said Beryl, struggling between laughter and something not unlike tears.

"That is perhaps true. But since I approve of so many people whom I do not love in the least, there seems a certain justice in loving one of whom I do not approve."

"You had better forget it," said Beryl, gravely. "In a day or two you may find that my name is associated in all men's minds with the committing of a terrible crime. You would scarcely continue to care for me in those circumstances."

"That is a touch of arrogance on your part," he said. "Why do you assume that you have all the virtues and leave none for us? I should merely wait until you were free, and present myself at the prison gates with a marriage license in my hands."

"Without going through the formality of finding out whether I had the least liking for you or not?" asked Beryl.

"If you had not had some liking for me you would have told me so in an unmistakable way the moment I began to speak on the subject. I am not going to ask you to say anything more now; but remember I shall expect you to do the best you can, consistently with honor, to clear the name of my future wife."

He went away, leaving Beryl with a confused sense of having lost her identity, or at least her posession of herself.

CHAPTER VI. AND LAST.

One whole day intervened before the magistrates were to meet. The charge of murder would then be formally preferred against Beryl Daintree.

It was a day of great activity, but no one was more active than the detective Groves.

With what his colleagues considered sheer perversity he persisted in ignoring the convincing case they had already prepared for him, and believed that the key to the mystery was till to be found at White Farm.

It was true that all the belongings of the dead man had been thoroughly overhauled and that nothing had been found, but his opinion remained unshaken. He went to the farm and enlisted Mrs. Riggs to aid him in his search. The farmer was back at work, and the pretty daughter crept about the place looking like some wan little ghost. It was only natural that she should be upset; but Groves had his eye on her all the same.

Guided by Mrs. Riggs, he examined the room which had been occupied by the dead man. He had some vague hopes of finding a secret cupboard or a hiding-place under the uneven oak floor, or some unexplored recess in some old piece of furniture. Nothing of the sort rewarded him; the room, with whitewashed walls, contained no secret panel that he could discover, nor did the plain, old-fashioned furniture contain any secret drawers.

"I shall be giving the room a good turn out and a thorough cleaning to-morrow," said Mrs. Riggs. "It ought to have had it before, but you told me it must be left alone for a time. If I find anything at all, no matter if it's only a bit of torn paper, I'll let you have it."

With this promise he had to be content and to leave the place no wiser than when he came.

Beryl duly appeared in answer to the warrant, and was accommodated with a chair whilst the evidence was heard.

The first part of the proceedings was merely a repetition of what had taken place at the inquest. Sir John Weston was present, but declined to take his place on the bench. Beryl was again strictly questioned, but repeated only what she had already said, and declined to give any reply to the questions she had refused before to answer.

She had at Sir John's earnest request consented to employ a solicitor, who now sat beside her; but the solicitor was almost in despair over the obstinacy of his client, although he still loyally fought for her interests.

The great point at which all the inquiries were aimed was the identity of the mysterious woman who had been seen meeting the man, and to find out if she were or were not the almost equally mysterious wife.

The court adjourned for a short time for luncheon, and Beryl was left with her solicitor, although she was under a certain amount of observation from the police. The solicitor made one more effort to bring her to reason.

"Miss Daintree, the case is going against you."

"I know it is."

"For all our sakes, speak out! You know who this mysterious woman is."

But she refused to discuss the subject.

"It is too annoying!" said Mr. Carter to his confidential clerk. "That woman is innocent. I'll stake my professional reputation on that; but she will ruin herself by her own obstinacy. Where is that fellow Groves? He is as convinced as I am that she is innocent."

Mr. Groves, sore indeed with a sense of failure, had been sitting in court listening to the evidence. Just before the adjournment he received a message that Mrs. Riggs wanted to speak to him. He hastened out, and, seeing by her face that she had something important to reveal, he took her to a private sitting-room which he had reserved at the little hotel near the court.

"What is it?" he asked when they were alone.

"Well, sir, I was turning out the room, as I said I should, and I came to the tallboy's chest of drawers."

"But we searched that."

"Yes, sir; but you forgot that we always put a nice piece of white paper to line the old drawers. You saw they were empty, but you never thought of looking under the paper. I did when I was cleaning out, and there under the lining of the top drawer was a printed form. I took it out, and then I found it was something you ought to see."

Groves clutched the paper. He recognized the form at a glance—it was a certificate of marriage before a registrar.

With unbounded amazement he read it. It was dated in the October of the previous year, and set forth the fact that in the parish of St. Pancras, London, James Richardson and Dora Langton had been married. The names of the witnesses were there, and Mr. Groves had not the least doubt that it was a genuine document.

"Did you show this to anyone?" he asked.

"No; I brought it straight to you, as I said I would."

"It is most important. You have probably saved an innocent woman. Please may I depend on your not mentioning it until it is produced in court?"

"I won't say anything. But I wish Miss Dora's name wasn't on it."

Groves rushed away to find Mr. Carter, and together they examined the document.

"This is light with a vengeance," said Carter. "The lady must appear."

"You had better tell Sir John that you intend to call her. He is somewhere about the place, and so is his motor. He can bring her—it is only a couple of miles."

Sir John was apprised of the fact that Miss Langton's presence was considered advisable. He was rather surprised, but thought it was a move on the part of Beryl's solicitor to show that his client had friends who were above suspicion. He at once offered to go back and to bring his mother and his cousin.

This he did, and they came with him. Lady Weston was rather astonished, but ready to do anything she could to help Beryl, whilst Dora was utterly dismayed, but unwilling to resist.

"Did Miss Daintree send for me?" she asked.

"No; I don't think she knows anything about it. It was her solicitor; he thought you might be called."

The magistrates reassembled, and Beryl was asked once more if she could give any information about the marriage of the deceased.

She declined to do so.

Her solicitor gave a paper into the hands of the chairman.

"Is Miss Dora Langton present?" he asked.

Dora, looking very frail and very pathetic, had to come forward and to be sworn. The chairman ordered a seat to be given her, and she found herself close to Beryl. The two did not look at each other, and Beryl was as pale as she was.

"Miss Langton, were you well acquainted with this James Richardson?"

Sir John Weston flushed indignantly, and Lady Weston half rose from her seat as if to protest against such a question.

Dora sat mute.

"I do not wish to entrap you in any way, but you must answer me. A very serious development in the case has taken place. In the room of the dead man has been found a paper which purposes to be a certificate of marriage between you and him."

Dora's head was bent low, and a breathless silence reigned.

"I must ask you, is this paper a genuine document, referring to a real marriage, or is it an impudent forgery?"

If she answered at all it was inaudible.

"Are we to conclude that it relates a fact?"

Lady Weston sprang up, made her way to the side of the girl, and bent over her.

"Dora, my dear, it is not true! Certainly it is not true; but tell us so. Say that it is a lie!"

Dora laid her head on her cousin's shoulder and sobbed aloud. Only one sentence was audible at all—

"You must ask Beryl; she can tell you all now."

"Miss Langton, you must acknowledge or repudiate it."

But Dora fainted and had to be carried out of the room.

Into the mind of every one present flashed the description that had been given by the laborer of the lady he had seen talking to the murdered man. "A slip of a thing with yellow hair."

Beryl said in the lowest of tones—

"Yes."

"You believe that such a ceremony did take place?"

"I fear so."

"Then it was Miss Langton's name which you have been shielding so carefully?"

"Yes."

"And was it on her account that you quarrelled with the deceased?"

"Yes. He had her in terror, and she did not know what to do. I begged her to tell all and to get free from him, and I told him that was my advice. She was afraid, and made me promise not to speak until she gave me permission."

"That makes your conduct intelligible, even honorable, but misjudged."

A murmur of applause ran through the court, but was instantly hushed.

Then from the centre of the room rose the burly figure of Mr. Blake.

"I would take it kindly, sir," he said, "if any one would tell me if that bit of paper tells mischief for Miss Dora."

"What do you mean?" asked the Chairman.

"Will it give any one the idea that she killed that man?"

"Your questions are most irregular," said the magistrate. "I cannot hear you."

"You will have to hear me, sir—meaning no offence—and so will others, too! I won't have Miss Dora dragged into it. I have known her since she was a little bit of a thing, with a word and a smile for every one. And she is one of the old family, to, and Blakes have rented farms from Westons for more than two hundred years. Whatever happens to me, Miss Dora shan't be touched!"

"If you have any evidence to give, come forward," said the Chairman, perceiving that Blake really had something to say.

"I tell you," said the farmer, as he stood before the magistrates, "Miss Dora knew nothing of the death of that man, no more than a babe unborn. No one knew anything except—

Except?"

(To be Continued.)

Curious Condensations.

The catgut use for violin strings is not obtained from cats, but from sheep or goats.

Fifty years ago tea was too dear to be an ordinary beverage in the average household.

Great Britain's per capital coal consumption is about three times as great as that of France.

Semi-official Spanish estimates place the world's production of wine last year in excess of 28,417,000 gallons.

One ship in the British fleet in the North Sea is required to be always in touch with the admiralty.

There are about 35,000,000 fur felt hats made in the United States each year, and about 7,000,000 wool felt ones.

The February records of the public service commission of New York city show that of 720 gas meters tested on complaint, about 58 per cent. ran fast, six per cent. slow and the remainder correct within the legal limits.

A forty-foot deposit of colemanite, the source of borax, is reported to have been discovered at a depth of 370 feet by ranchmen drilling for water, about four miles from Rich station, in the Kramer district, San Bernardino county, Cal.

The largest single law office in the country is the attorney-general's of New York State, which takes up all the time of Attorney-General Woodbury and his 25 assistants. At present the office is handling 8,238 cases involving more than $150,000,000 in money and property.

Whenever a shell comes screaming in the direction of Polly, a pony now in the transport service at Gallipoli, she stretches out her forelegs, lets her head drop to the earth, closes her eyes and is instantly "dead." Then when the shell has passed she rises again.—Exchange.

Many a girl who marries a man to reform him passes up a lot of fellows who don't need it.

"NERVILINE" STOPS EARACHE IN 10 SECONDS, FIXES TOOTHACHE IN 2 MINUTES

It Seems to Possess Almost Some Divine Power Over Pain.

RUB ON NERVILINE

Toothache is usually due to neuralgia in the gums or to the congestion and swelling of the nerve pulp.

As "Nerviline" relieves congestion, you can easily see why it cures toothache.

Nerviline does more—cures any ache or pain—in any part of the body.

It matters not where you pain is. It may be in a joint or muscle; it may be neuralgia or lumbago; it may be a surface pain is deeply situated in the back, side or chest. Nerviline will reach it; Nerviline will drive it out.

What is Nerviline, you ask? Just a liniment, but very much stronger in pain-subduing power than other liniments—one that penetrates more deeply in the tissue than any other liniment. It is a liniment that cures quickly, that gives permanent relief.

You might spend ten or a hundred dollars, but you couldn't buy as much relief as you get from a single bottle of Nerviline.

We guarantee Nerviline; we refund your money if it does not relieve you.

In many lands it is a household trust, a remedy that has justified itself under the experience of those who have used it. Guaranteed for neuralgia, sciatica, lumbago, rheumatism, pleurisy, strains or sprains; the large 50 cent family size bottle is more economical than the 25 cent trial size. Dealers everywhere sell Nerviline, or direct from The Catarrhozone Co., Kingston, Canada.

ANTIQUES

The eighteenth century seems to have been a remarkable period for the bringing together of craftsmen in various industries working in harmony in their different spheres to evolve from antique motives the creations destined to revolutionize then existing artistic handicraft.

Two of Britain's most useful and ever necessary commercial enterprises, pottery-making and furniture-making, arose like the phoenix from the ashes of antiquity at this period, and, championed respectively by those great master craftsmen, Josiah Wedgwood and Thomas Chippendale, established the union of interests which will carry the joint industries hand in hand through all time.

The twenty-two century old Portland, or Barberini, vase, made of glass, universally regarded as the finest antique still preserved to us, gave Josiah Wedgwood the inspiration which led to the vast range of ornamental forms in pottery, which not only secured for his country the worlds trade in the classes of shape and material invented by him, which marked an epoch in the history of ceramics, but also provided a reason for the Chippendale, Hepplewhite, Sheraton and Adams influence, which determined the styles of the cabinets in and upon which these ornaments were to be displayed, protected and preserved.

These cabinet creations in their turn had developed from the antiques of Egypt, Greece, Italy and the Orient, and it is quite easy to trace in them the characteristics of the five orders of ancient architecture, the Tuscan, the Doric, the Ionic, the Roman and the Corinthian, as also the Oriental fretwork motifs which figuratively and actually threw light upon the objects of art the cabinets contained.

As the secrets of the sepulchre surrounded the first periods of vase production, the "Barberini" was a mortuary urn—so the association of pottery and furniture, a combined decorative features, raised the veil of the tomb's darkness and diffused light upon the work of the artificer in both industries.

VIOLENCE IN THE U. S.

(Chicago Tribune)

We have established a condition of [illegible] law and successful lawlessness. We do not punish, we do not correct. We fume and forget. Violence is encouraged by every settling everything from a barroom row to an argument in commerce, from a labor feud to a political quarrel.

Minard's Liniment Cures Burns, Etc.

EXPLANATORY.

(Youth's Companion.)

"Why are you raising the price of milk 2 cents?" asked the housewife, grimly.

"Well, you know," returned the milkman, "winter is coming on and ——"

"Oh, I see," resumed the woman, softening in manner. "The water will be needed for making ice."

A Million Mothers behind the purest, cleanest, most nutritious of all cereal foods—Shredded Wheat. They have tested it and found it best for youngsters, best for grown-ups—a food to work on, to play on, to think on. Contains the life of the wheat in a digestible form—puts gimp and ginger into the jaded body. Delicious for breakfast with milk or cream or for any meal. Made in Canada.

A Washing Machine of New Order.

In one of the newest washing machines a fan or propeller within the tub sends a constant stream of hot suds through the soiled clothing, contained in a movable cylinder, which is slowly revolved by the action of the stream of hot water upon it. The machine has neither gears nor belts. A small electric motor fastened beneath the tub does the work and also operates an electric wringer attached to the top of the tub. No manual labor other than placing the soiled clothes in the tub and placing hot water and soap therein is necessary.

Flaxseed Good for Humans

Many people think flaxseed merely a wonderful stock food. It's good for human beings, too, in fact, is the most nutritious seed grown. Dr. Jackson discovered an electric treatment for deodorizing flaxseed and removing all flavor. There is no reason for not eating it, and every reason why it should be used daily. 25 per cent. of Dr. Jackson's Roman Meal is deodorized flax seed. This meal, if not stirred while cooking, makes most delicious porridge. Stirring spoils it. It is guaranteed to relieve constipation or money back.

At grocers', 10c and 25c.

Try the ready cooked Roman Meal Nuggets. You may soften with boiling water, drain and add milk or serve with hot milk.

Made by Roman Meal Co., Toronto.

Hymns at $500 a Yard.

A musical composer once said to Mr. Sankey with more frankness than courtesy that he could write such tunes as those of the "Gospel Hymn Book" by the yard if he were willing to come down to it. "Well, sir, all I have to say is that I am willing to pay $500 a yard either to you or to anybody else for all the tunes you can bring me like those in our 'Gospel Hymn Book.'"

Hawkshaw, N. B., Sept. 1, 1905.

Japan's Sacred Places.

Japan abounds with sacred places—Shintoist and Buddhist—formerly reputed for the appearances of the so-called "Dragon's Lamp." This is a mysterious light that comes out of a pond, lake or sea and alights on a certain tree, mostly on a certain night. It was held that the light was dedicated by a dragon dwelling in the water to a god whose shrine stood near the trees. For example, the famous Ryuto of the temple of Avalokitesvara on Nagusa Hill, Province of Kii, made its annual ascent from the seat to a pine tree in the precincts every ninth night of the seventh moon. At the midnight of the sixteenth of every month, a Ryuto came from the northeast offing to the so-called "Dragon's Lamp Pine," near the shrine of Mandjusri at Kiredo, Province of Tango; whereas on the same another light, named "Celestial Lamp," made its descent from the heavens every sixteenth night of the first, fifth and ninth months.

Minard's Liniment Relieves Neuralgia

The New Lord Rothschild.

Lionel Walter, the new Lord Rothschild, is said to possess none of his famous father's business ability, cares nothing about business and is devoted to the collection of animals and birds and possesses a zoo of great merit. Though heir to millions, it is announced that his father, in view of his lack of the material nature, cut him off with $25,000 a year, leaving the bulk of the fortune and the partnership in the house of Rothschilds to his second son.—Exchange.

Minard's Liniment for sale everywhere

Amply Supplied.

"I wonder," said a strange old man
As pondering he stood,
If I could get a bite to eat
Within this quiet wood.

"Ah, yes! I know I can; for there
Before my eager eyes,
Behold a sandwitch-hazel tree
Of very goodly size.

"Ah, bliss! Hot squirrel-corn, I see,
Served on the cob-web, too!
That firm soft-shell-crab-apple tree
I'll try without ado.

"I scent roast duckweed in the air;
And spice-bush-cake I smell.
And what is in that distant nook?
Planked-shad-bush? Well, well, well!

"And there a little to the left,
Wild ginger-bread I spy.
Just newly sprouting near a piece
Of fine Joe-Pye-weed pie.

"Down yonder, too, I'm sure I note
A ripe sumach apron
Beside a fricas-cedar tree.
I'll need them both by noon."

When last I saw the strange old man
He'd just begun to dine
Upon a glass of milkweed and
Some scrambled-eglantine!

—New York Evening Sun

As we advance in life we learn the limits of our abilities.—Froude.

Canada's New Highland Regiment

The city of Hamilton has given her share of men and money for the war, but she is determined to do more. There is a good strain of Scottish blood in that fair city. The Lieutenant-Governor, Sir John Hendrie, Sir John Gibson, and Hamilton's grand old man, Adam Brown, and many more, although reared in that city, are thoroughbred Scots in blood, in sentiment and in religion. Scotland has made a great record in this war. Harry Lauder on his recent visit said that he motored through the Highlands last summer and found that all the young men had gone to the war. The heart of Scotland is to-day stirred to the depths, and there comes an answering throb from every Scottish heart and from every man with a drop of Scottish blood scattered over the wide world.

The heather is on fire. Hamilton is to raise a Highland regiment, allied with the 91st of the old land, the Argyll and Sutherland Highlanders, to wear the Sutherland tartan. What memories the name stirs! The thin red line at Balaclava, the sinking of the Birkenhead, and the days of the Indian mutiny! The regiment has been gazetted the 173rd Canadian Highlanders, and is to be commanded by Lieut.-Col. W. H. Bruce, of the 91st Highlanders of Hamilton. Again the name Bruce awakes many memories! We remember Bannockburn, and all the fighting of Wallace and Bruce which led up to that great victory for freedom. "Scots wha hae wi' Wallace bled" must rally to the call of a Bruce. If Germany wins, freedom dies, and every man of Scottish blood must now rise and keep the heritage with the great men of old so valiantly fought for.

The 173rd Canadian Highlanders should appeal to all men whose ancestry goes back to Glasgow, to Stirling, to the west of Scotland and to Sutherlandshire. Here is a regiment for every man, who is a Campbell. The pipe-march of the regiment is "The Campbells are Coming."

The pipe band is in able hands to keep up the glorious tradition of the pipes. A Highland piper plays in the thick of the fighting, appealing to the men through the tunes familiar from childhood—tunes to make the blood quicken in their veins. The other day we read of Piper Laidlaw, of the King's Own Scottish Borderers, who revived the exhausted spirits of the Borderers at the battle of Loos by jumping on the parapet, and coolly strutting up and down, he played the tune of "March, March, Ettrick and Teviotdale." His example and the auld Scotch air brought them to their feet, and, led by a young Scotch-Canadian, they jumped the parapet and charged the enemy's position. Laidlaw was wounded, continued playing, and is now a V. C. for his gallant behaviour.

Another glorious tradition which is to be maintained in the 173rd Canadian Highlanders and which is fostered in every Highland regiment, is the fine feeling existing between officers and men. This relationship dates back to the days of the old clans, when the clansmen followed the chief and the chief recognized kinship with every member of the clan. A Highland regiment is proverbially clannish but what a splendid quality that is! The regiment is one big family, every one sticks together to keep the good name of the regiment to the fore—the regiment comes first every time. No wonder the Highland regiments get splendid results. On one occasion General Wolfe, whose own health was wretched, was giving an aide-de-camp an order calling for the execution of a dangerous piece of work to be taken to an officer who was in hospital. The aide reminded the general that the officer was ill. Wolfe replied: "I dont care how ill he is. I want to know how much spirit he has got." A Highland regiment cultivates, fosters, strengthens the spirit of comradeship which holds like a chain in the day of stress and inspires the regiment to stand firm in the day of trial.

The 173rd Canadian Highlanders will also have a splendid brass band. Hamilton has been famous for the 13th and 91st Brass Bands, and every effort will be made to have a good band.

The second in command will be Major Frank Morison, D. S. O., who got his decoration when with the 16th Canadian Scottish at Festubert. The regiment will be well officered. The 173rd has all the makings of a great regiment. Its appeal is to men of Scottish blood and descent. What an opportunity for young men to join its ranks? Recruits are fast coming in not only from Hamilton, but from many districts in Ontario. Keep your eye on the 173rd Canadian Highlanders—Canada's youngest Highland regiment.

Most Abundant Metal.

Although aluminum was almost unknown but a few years ago, it is now declared by the United States Geological Survey to be the most abundant of metals. In the form of its oxide it constitutes about 15 per cent. of the earth's crust. Within a generation it has been so extensively exploited and developed that its price has fallen from $11 or $15 a pound to 20 cents. There are further opportunities in the perfection of a process whereby it may be commercially extracted from the unlimited deposits in the clays and rocks which are to be found in all parts of the world.

ZAM-BUK CURED IN 2 MONTHS

After 2 Years' Useless Treatment.

The healing power of Zam-Buk is so much greater than that of other ointments, that it has cured in many cases when all other ointments have failed. One such instance is that of Mr. Earle E. Gardiner, of Marquis, Sask., who writes: "For two years I suffered with a bad attack of salt-rheum on my feet. During those two years I tried every known remedy, but could find nothing that would cure the disease. Then I heard of Zam-Buk, and commenced using it. After the first few applications I noticed an improvement, and this encouraged me to continue. Although I had suffered for two years, after only two months' treatment with Zam-Buk I am completely cured."

Zam-Buk is equally good for eczema, ulcers, abscesses, blood-poisoning, piles, cold sores, chapped hands, chilblains, eruptions, etc. At all drug stores, 50c. box, or from Zam-Buk Co., Toronto.

LADIES WANTED—TO DO PLA and light sewing at home, wh or spare time, good pay; work sent distance. Charges paid. Send st for particulars. National Manufactu Company, Montreal.

WANTED—GIRLS OF GOOD EDU tion to train for nurses. A Wellandra Hospital, St. Catharines.

Solid Petroleum.

A patent has been recently to a Frenchman for a process which petroleum and its derivat may be transported without the danger of explosion during and in shipments. The process consist making the oil into a solid by addition of a solution of soap in proportion of one to fifty of oil. This makes the mass of gelatinous consistency, which renders it entire safe. The material may be lighted with a match, but it will burn so slowly that there is no danger of disastrous results. The oil may be brought to its original state by treatment with alcohol or other solvent.

In Tropical Countries Liver Chill Very Common

In northern latitudes also the liver is a very sorely organ and requires careful watching. The concentrated vegetable juices in Dr. Hamilton's Pills act directly upon the liver and stimulate its action to a normal basis. The blood is purified, the skin grows clear, headaches disappear and robust health is firmly established. No medicine for the stomach, liver or kidneys can compare with Dr. Hamiltons' Pills; 25c. box at all dealers.

Try to Look Like the Boss

"Did you ever notice how employees try to boss?" inquired an obse "It's not always true, of co the boss is a grouch and unpopu with the men under him, but where is popular and sizes up as a pretty gun to the staff you'll find that abo half the men in the place wear their mustaches or whiskers or both about the way the boss does. If has a stubby little business mu mustache you'll see several more those around."—Pittsburgh Dispatch.

PILES CURED at HOME by New Absorption Method

If you suffer from bleeding, itching blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

IN CASE.

(Penn State Froth.)

"You sentimental boy, why do you have my picture in your watch case?"

"Because I thought you might learn to love me in time."

Minard's Liniment Cures Dandruff.

Legal Verbiage Reform.

A bill passed by the British parliament at the present session abolishes the time honored wordy indictment against prisoners, which, in the form of a parchment scroll frequently twelve feet long, has for many generations been a feature of the British criminal courts. The bill requires that a prisoner shall be charged in few and simple words and the charge must be written or printed on paper—not parchment—not larger than a foot square.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order, and he becomes peevish and cross. To guard against this, the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels, and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co. Brockville, Ont.

Human Hearts in Caskets.

Before the Russians left Warsaw they sent away from that city its most precious relic, the heart of Chopin which had been kept in a casket in the Church of the Holy Cross there since 1849. It is now in a place of safety at Moscow. Shelley's heart was also preserved in a casket. When King Robert Bruce of Scotland died 1329 his heart, too, was preserved a casket. It was given to his friend Sir James Douglas, to be buried Jerusalem. On his way out of Pa tine Sir James Douglas fell, fighting against the Moors, and as he fell he threw the precious relics before on the battlefield, crying out, " pass onward as thou were wont, heart was found next day by Sir men Leigh, who brought it back Scotland, where it was buried in monastery of Melrose. — Lo Chronicle.

A nice cologne water may be with 60 drops of oil of lavender, 60 bergamont, 60 of oil of lemon, 60 orange, and one pint of alcohol. well and shake well.

ELLA'S RECOMPENSE

CHAPTER III.

Ella paused before she reached the middle of the room, feeling dreadfully embarrassed, yet inclined to laugh. Her first idea was, "I have missed the meeting!" her next, "Am I not intruding, and in the way?" Behind her stood Reichenberg, who, putting his heels together, executed three profound bows, and expressed the hope that he saw "Mrs. Vereker in sound health."

"Ella," cried that lady, "what in the world has become of you? I thought you were lost!"

"I should have been but for Herr Von Reichenberg. I met him coming here."

"To pay my devoirs to you, gracious madam."

"Oh, good morning!" returned Mrs. Vereker, indifferently. "You see I have my brother with me," she added, with undisguised anxiety to get rid of him.

"I disappear all at once!" cried Reichenberg, with a still more profound bow than before, and turned to leave the room, not before he heard the thin-faced gentleman exclaim, as he arose and held out his hand, "My young cousin, I am very glad to see you," while a kindly look lit up his dull, sad countenance; he kept Ella's hand in his for a moment, while he perused her features. "There's a little of your mother in your eyes," he said, with a slight sigh.

"That will do, Ella; you may, —" Mrs. Vereker was beginning, when, to her surprise, not to say indignation, Ella turned to the other gentleman, who had also risen, and stood as if expecting to be spoken to. But Ella colored and hesitated, while he bowed.

"This is quite unexpected; I had no idea I should have the pleasure of seeing you at Friedrichstadt," he said, his face relaxing into a smile—his smile was always an agreeable surprise to the beholders.

"Yes, it is very curious," replied Ella, simply.

"Why—when—where—how did you ever see Colonel Cecil before?" cried Mrs. Vereker, her very bonnet-strings quivering with amazement.

"He was so good as to prevent a drunken man from taking a walk with me the morning I was on my way to pay you my first visit, Mrs. Vereker."

"[illegible] me! quite a romantic adventure," [illegible] Vereker, with a giggle. "[illegible] Ella, that will do; you may go."

"No, she may not," said Mr. Lyall. "You come over here and talk to me, Ella—that's your name, is it not? Let them have their talk, and hunt their tigers over again; I want to hear your own account of yourself."

Ella hesitated, colored, and looked very prettily embarrassed.

"Here you are," continued her cousin, "we'll have a couple of chairs on the balcony, and look about us while we chat."

Ella followed him, Colonel Cecil's keen eyes following her with much interest.

"Do you mind if I smoke a cigarette?" asked Mr. Lyall, taking out his case.

"Oh, dear, no, Mr. Lyall."

"That's right; and mind you call me Cousin James, or Jim if you like it better. It puts me off into the frozen regions when you tack Mr. on to my name."

"Very well, Cousin James."

"Now I see you, there are turns in your manner and tones in your voice that make me feel like a boy again." A long sigh.

"You have had hard times of it, Ebsdale tells me. I fancied, when I heard he had recovered your grandmother's bequest for you, that it was enough to live upon. I did not know it was such a beggarly pittance, or I should have looked after you a little sooner. I was away in Ceylon when your father died, and hadn't heard anything of the family for years."

"My poor father was not happy, I fear."

"I should think not with such a Tartar as he caught. I fancy you have had very hard times of it."

"I would rather not think about them," said Ella, her soft eyes growing moist.

"Right; don't let the past poison the present. You're a sister, a sister of your own, haven't you?"

"Yes; she is like a daughter to me."

"[illegible] a juvenile mother. Pray, how old are you?"

"Very nearly two-and-twenty."

"I should not have taken you to be so much."

A pause, during which Ella could hear Mrs. Vereker uttering occasional little shrieks—she usually began her sentences with a kind of burst to all—Colonel Cecil's replies were short and [illegible], then Mr. Lyall began again, and put a series of very leading questions to his young cousin, beginning with her life under her father's [illegible] after his second marriage, and extracting the pith of her sad experiences without much difficulty. He growled a few strong expressions under his breath as she spoke; then, after another pause, demanded:

"How do you get on with her?" pointing over his shoulder toward the salon.

"With Mrs. Vereker? Oh, very well; she is kind enough, and I am glad to have a little change and rest."

"Rest!" repeated Mr. Lyall. "I fancy Fanny Vereker is about as good an illustration of perpetual motion as could be found, and you had better provide against contingencies. Some fine morning she'll send you adrift without a penny; that she will, by Jove."

"Oh, I cannot believe that. I am [illegible] so far. If I only had more time to study German, it would be a great help."

"Oh, we will see about that," Mr. Lyall was saying when Colonel Cecil appeared at the window. "I say, [illegible], I am keeping you from a chat with your sister, and I must be going."

"Well, I will come with you; just wait a bit." He stepped into the room, and Cecil took his place. Looking with a sort of grim kindliness at Ella, he said: "So you keep up your habit of walking out alone, eh?"

"Oh, yes," laughing. "I must, and there is small danger of meeting drunken workmen in Dresden."

"No. It is pleasanter certainly to meet smart young cavalry men."

"Much pleasanter," returned Ella, with a little nod—a defiant nod it seemed to the severe judge to whom she directed it.

Colonel Cecil smiled, and pulled his long dark moustache reflectively. "It is rather curious that you should have been on your way to see an old friend of mine when we had that encounter, for it was not altogether harmonious," he said, looking at her, as if trying to read her thoughts.

"No. You expressed some fatally old-fashioned ideas, and I tried to correct them," said Ella, who felt in unusually good spirits.

"Ha! I don't think you succeeded."

"No. Still it was right to give you a chance."

"Thank you. Now tell me—how do you like travelling about with Mrs. Vereker? Does she keep you in order?"

"I like travelling about immensely, and I think Mrs. Vereker does exercise a certain amount of power over me."

"She is a more wonderful woman than I took her for, then," replied Cecil gravely, though a laugh glittered in his eye.

"Come here, Cecil, and you, Ella," called Mr. Lyall from the salon. They found him leaning against a high carved oak Schrank, or press — one of the ornaments of the apartment, opposite Mrs. Vereker, who was looking slightly flushed, and was twitching her head from side to side, throwing back her streamers, and otherwise showing signs of displeasure familiar to Ella. "Here's this foolish sister of mine objecting to go to the opera! They give the 'Barbiere' to-night, and I suggested taking a box." Ella's eyes sparkled, and then her countenance fell. "You forget, James," cried his sister, "what deep sorrow I have endured so lately. I have no inclination for worldly amusement. I am not so heartless, Colonel Cecil! You know of old I was not heartless." Cecil bowed. "Besides, how could I appear in a widow's cap?"

"Take it off, then. You have hoisted the broom long enough."

"What a vulgar expression!" exclaimed Mrs. Vereker, who did not understand it.

"I don't think you appreciate your sister's feelings, Lyall," said Cecil, with grave rebuke. "She knows best what she can and what she can not do."

"Thank you, Colonel Cecil; you always understood me," cried Mrs. Vereker with a slight sob, and she put her handkerchief up to her eyes.

Her brother looked at her with a curious, half-amused, half-contemptuous expression. "Well," he said, "if you like to shut yourself up, pray do; but you have no right to keep this poor child shut up as well. What do you say, Ella? Will you come to the opera to-night with me?"

"I should like it very much," coloring with pleasure. "If Mrs. V[illegible] does not want me."

"Not to-night, Ella dear," said the fair widow, removing her handkerchief and casting an effective glance at Cecil, who was standing beside her, his arms folded, "I feel so wretchedly lonely. And the Brownes are going, I know; so I should have no one with me. But another time, James, if you like."

"Oh, of course, Mrs. Vereker, I would not leave you by yourself," cried Ella.

"Very well, Ella, let us see what the Anzeiger says," taking up the paper from a side table; "hum—ha—Friday, 'Robert der Teufel'—we'll try for that."

"Oh, thank you; 'Robert der Teufel' music is so lovely! I have only heard bits but they are delicious!"

"I am such a poor, weak, broken-hearted creature," Mrs. Vereker was saying meantime to Cecil, "culpably weak, I dare say, but it has always been my nature to cling, and it is cruel to leave me by myself. Then I always sit and think, and think, and—and—cry my eyes out."

"You must not do that, Mrs. Vereker," returned Cecil, with an air of sympathy, and a little puzzled how to express it; "that would never do."

"Ah, I have quite done with life," shaking her head and looking down at her clasped hands—rather bony, shrivelled hands, for Time will stamp his mark somewhere. "I used to like music once—not to rave about it, which is generally just affectation and pretense, but still I enjoyed it. Now," pronounced with a small shriek, "it would break my heart, it would drive me mad."

"Poor little soul! she is a thorough woman, and full of feeling," thought Cecil. "You must not give way to such despondency, my dear Mrs. Vereker. Let me venture to hope there are yet some happy days before you."

"Ah!" more handkerchief.

"Well, that's settled," said Mr. Lyall, breaking in on their conversation. "On Friday I will call for you at 6.20."

"You will have Lady Browne with you, perhaps?" observed Ella pleadingly.

"Oh! in any case I will not deny you that pleasure, as I know you must not go to plays unless some one pays for you; but as I shall have my own sittingroom after to-day, I hope you, Jamie, and Colonel Cecil will often come and take a cup of tea of an evening. It will be a melancholy pleasure, Colonel Cecil, to talk over things of the past!"

"You don't intend to be melancholy all the days of your life, do you?" asked Mr. Lyall, as he nodded his adieu and turned to leave the room. Mrs. Vereker slowly shook her head, as she gave her hand to Cecil. "Where are you staying?" she asked.

"At the Belvedere, not a bad sort of old place. I hope you help us in sight-seeing. Good morning, Mrs. Vereker. Good morning, Miss a—"

"Miss Marston," said the widow, mentioning her name for the first time. A bow, and he was gone.

Mrs. Vereker stepped out on the balcony, which, being at a corner, commanded both the street and a square. Ella followed her, and they watched the retreating figures of their visitors with interest. Was it possible, thought Ella, that in this lanky, weakly, faded Cousin James she had found a friend as well as a kinsman? She had met much kindness from a woman here and there, but a real man friend, to advise and support her in the struggle which she knew awaited her in the future, would indeed be valuable.

What a remarkably good figure Colonel Cecil had, so stately and soldierly! what a firm, elastic tread! and how well he looked in his admirably-fitting dark rough tweed travelling suit! what a tower of strength beside the drooping, almost tottering, form of Cousin James!

Here the object of her thoughts suddenly looked back, and turning, raised his hat to the ladies in the balcony.

"Come in, Ella," cried Mrs. Vereker; "I have heaps to do. Isn't Colonel Cecil charming? He is just the same as ever. Ah, that is the sort of man I have been accustomed to; not guzzling, muzzling monsters, like that Reichenberg. Yes, my darling was very like Cecil in many respects. But I want to see Frau Gudscher at once. I must have a private sitting-room. I cannot talk of the dear happy past in a salon full of horrid strangers. Go and see if Frau Gudscher can come to me."

Mrs. Vereker, after much chaffering, and some yielding to the demands of her hostess, got what she wanted, and a corner room on the second floor was turned into a pretty little salon.

Early next morning Ella sallied forth to the market. It was still bright and warm. September and October are generally magnificent months in the old grand ducal city; she had therefore put on a cool, black-and-white print dress, a black sash, a straw hat with black ribbons, and looked as fresh and delicate a little damsel as you would see in a day's march.

Of all the many errands on which Mrs. Vereker was wont to send her, a visit to the flower market was what she liked best. The Alt Market is a pleasant sight of a sunny, autumnal morning. The large square is enclosed by huge high houses, reaching to seven stories, then terminating in double, sometimes triple, rows of sly-looking, eye-like windows in the steep red roofs, gay shops on the ground floor, balconies and inscriptions above, corners decorated by quaint, projecting casements; it is thickly studded with big, dingy, white umbrellas fixed in stands, and sheltering alike the vendors and their stalls, on which every imaginable description of merchandise is exhibited, from evil-smelling piles of cheese on the western side, to sweet, freshly-perfumed stands on the east, bright with variegated blossoms and foliage, sparkling with artificial showers constantly poured upon them from diminutive watering-pots, by their respective owners.

The whole space is full of life and activity toward ten o'clock; gangs of Dienstmädchen, each armed with a huge basket, are chaffering and chattering; old women are seeking to earn a few groschen by carrying home the purchases of buyers, and even a sprinkling of lady baronesses and gentry, each attended by a footman, in a much-laced-and-buttoned livery, holding a huge net, which incloses the cabbage, onions, lettuce, cauliflowers, and cucumbers, even radishes, his noble mistress had purchased, and which he carried after his honored lady with dignity and satisfaction, while English "flunkeys" would have faced death before he would consent to such degradation. Over all a deep, clear blue sky, against which occasional flights of pigeons executed evolutions, and then flew down again, to strut about among the moving crowd with amazing familiarity, and peck up seeds and other dainties between the stalls.

There is something deliciously mellow, yet fresh, in the beauty of these autumnal mornings, a sense of repose, of having enough, which is nearly unknown in busier England, where leisure is a word almost without meaning. The narrow thoroughfares leading out were still in deep shadow, while here and there some break in the houses, or an occasional low roof, permitted a bright glancing ray of sunshine to stream down across the soft gloom of the shadowy street. The aspect of the old market pleased and attracted Colonel Cecil, who had sallied forth to prowl about alone, as his travelling companion had felt a threatening of fever and ague, and preferred keeping in-doors. There was a homely beauty and air of real business about the place that charmed him. He longed to buy something, but he could speak no German, so he strolled in and out the stalls, shaking his head when accosted by their owners, and as he wandered he thought of his interview the evening before. Was it possible that years could so metamorphose a timid, silent, graceful woman into a fidgety, shrieking chatterbox who had plagued him into making somewhat insincere speeches the night before? It had been but a boyish dream. Yet Mrs. Vereker had once been his ideal, and partly from this arose his confusion of ideas between [illegible] and helplessness. He [illegible] of that pretty, rosy girl, Lyall's cousin, a sort of [illegible]. In fact, Colonel Cecil had been somewhat spoiled, having [illegible] and elsewhere eager to agree with him and give him trouble to his heart's content. And he was right. A nice, attractive, nay, striking-looking girl like that ought not to be allowed to walk about [illegible] to have her head, either, by George! He would speak to Lyall about it, for there was no telling what mischief she might get into with such a set of raff as German officers; Cecil taking the view in general with [illegible] and other Englishmen unused to the continent at the date of this story, that military men of all nations were noisy, fire-eating adventurers, scarce fit to sit at the same table as themselves. Yes, that Pretty Miss Marston had considerably too much the air of being at home with that [illegible] a German, and she was no doubt a headstrong—here he turned round a large stall crowded with flowers, and nearly jostled the young lady herself, who had her hands occupied with a pot of mignonette, while a basket full of flowers stood at her feet; she was speaking with much earnestness, and persuasive smile, to the fat, clean, pleasant-looking old woman who kept the stall.

"Oh, Colonel Cecil! Good-morning! I did not think you would go to market by yourself," she said, looking up at him in some surprise.

"'The other piggy stayed at home,'" returned Cecil, smiling, as he lifted his hat. "I am rather fond of markets, and this is picturesque in its way."

"Is it not a nice old place? I delight in coming here. Oh, please call that woman with the basket to me I can not carry all these things myself."

The man who was shot by a Washington boy in mistake for a garbage can is wondering whether to sue for libel or negligence.—Washington Herald.

SUNDAY SCHOOL LESSON

Lesson VII. Feb. 17, 1918.

Humbled and Exalted.—Philippians 2: 1-11.

Commentary.—I. Christian unity (vs. 1, 2). 1. Therefore—Paul had already exhorted the church at Philippi to unity (1. 27), and now he introduces motives to that end. If there be .... any consolation in Christ—If exhorting you in the name of Christ have any influence with you.—Clarke. The apostle does not have any doubt about there being consolation or incentive to action in Christ. He might have said, "Since there is consolation or exhortation in Christ." Comfort of love—Comfort flowing from love to Christ and to one another. Fellowship of the Spirit—All those in whom the Holy Spirit dwells have fellowship one with another. Bowels and mercies—"Tender mercies and compassions." R. V. The ancients considered the bowels the seat of pity and compassion. 2. Fulfil ye my joy—Paul had a hearty interest in the church at Philippi, and he rejoiced in the spiritual prosperity of the saints there. They would make his joy complete if they would be one in Christ Jesus. He urged this unity by the four considerations named in v. 1: (1) Consolation in Christ, (2) comfort of love, (3) fellowship of the Spirit, and (4) tender mercies and compassions." That ye be likeminded—Of the same mind.—R. V. Having the same love—This and the two remaining expressions are explanatory of "likeminded." This is to be a unity of affection. Of one accord—In full agreement. The exhortation of the apostle in this verse indicates that there might be a tendency toward a division in the church, which he greatly desired to have removed. The desire of Jesus is for the unity of his followers, as expressed in the prayer, "That they may all be one; as thou, Father, art in me, and I in thee, that they may also be one in us, that the world may believe that thou hast sent me" (John 17: 21). Christian unity exists among those who are in fellowship with Jesus, even though they may not hold the same views on non-essential matters. In Christian unity there is strength. The army of Jesus Christ marches with a victorious tread. While unity insures strength and success, the lack of unity means weakness and failure.

II. Humility (vs. 3, 4). 3. Let nothing be done through strife—Let there be common interest in every undertaking. Let there be no self-seeking. Vainglory—Boastfulness, pretentiousness. Lowliness of mind—Humility, the absence of vain self-assertion. "In the essential principles the mighty positive morality of the gospel is based on the profound negative of the surrender and dethronement of self before a redeeming Lord who has had compassion on perfectly unworthy objects."—Moule. "Lowliness of mind" leads one to realize his littleness in the sight of God and guards him against seeking for honor and high position. Esteem other better than themselves—Instead of fixing your eyes on those points in which you excel, fix them on those in which your neighbor excels.—J., F. & B. 4. Look not every man on his own things—This is an exhortation against being self-centred. Many who profess to be followers of Jesus are mostly taken up with their personal interests, thinking not of the need of others. Where there is the unity of the Spirit which the apostle urged upon the church, there will be a hearty interest taken in the welfare of others. "Let each rejoice to see another, whom God may be pleased to use in a special way, acquiring much reputation by the successful application of his talents to the great work."—Clarke.

III. Christ, our example (vs. 5-11). 5. mind—Disposition. Which was also in Christ Jesus—Paul is urging the Christians at Philippi to be humble and thoughtful of others, and he introduces the example of the Lord Jesus. The disciple of Jesus must partake of his nature, must have his mind. They in whom is the mind that was in Christ will be united in spirit, and will possess the other graces which the apostle enjoins. The passage which follows is one of the most sublime in the scriptures. It sets forth the humiliation of our Lord and his infinite and eternal exaltation. 6. Being—The Greek word signifies previous existence. It declares the pre-existence of our Lord. In the form of God—Being in the form of God, or like God, and being in reality God. "Form of God," and "Form of a servant" (v. 7), are used in contrast. Robbery—A highly prized possession. The thought seems to be that the being on an equality with God did not appeal to Jesus as being a possession so highly prized as not for a time to be relinquished for the sake of saving mankind. 7. Made himself of no reputation—He not only did not enrich himself, but he emptied himself; he used his equality with God as an opportunity, not for self-exaltation, but for self-abasement.—Alford. The form of a servant—He laid aside the glory which he had with the Father and took upon him the form of a man. It was not in the form of a king or prince that he came, but in that of a servant. As truly as he was God, so truly did he become man. He became man, but he was sinless. He did not shun to take the lowly place of a menial servant. In the most complete sense he identified himself with those whom he came to save. By coming in the form of a servant he for ever ennobled service.

8. Being found in fashion as a man—His appearance was that of a man, and his nature was in agreement therewith. Humbled himself—He had already humbled himself in leaving the glory of the Father to take upon himself the form of a man, even that of a servant. He humbled himself further in becoming subject to death, and death in its most ignominious form. The death of the cross—Execution by crucifixion was employed by the Roman government in the case of the worst criminals. So disgraceful was it considered that Cicero said, "Far be the very name of a cross not only from the bodies of Roman citizens, but from their imagination, eyes, and ears." "What must sin have been in the sight of God, when it required such abasement in Jesus Christ to make an atonement for it, and undo its influence and malignity."

God also hath highly exalted him—The exaltation of Christ followed his deep humbling of himself. He was exalted in being taken from the dead and in being received up into glory and seated at the right hand of the Father. Given him a name which is above every name. The name Jesus was borne by our Lord before his exaltation, but after he ascended on high a deeper significance than ever before was given to it. "The lowly and suffering Jesus is, as the abased and slain One, now to be found and worshiped on the eternal throne; recognized there by all creation as he who for man's sake, in pre-existent glory and Godhead, willed to be humiliated even to the cross."—Cam. Bib.

10. Every knee should bow—Every creature of God shall bow in adoration to Jesus, acknowledging his secret, love, power and kingship. Of things in heaven. Angels of every rank bow themselves in the presence of Jesus the Lord, and the spirits of just men made perfect pay glad homage to him who redeemed them and washed them in his blood. Things in earth—All men and every object shall acknowledge the excellency of Jesus. Under the earth—These three expressions include all existence everywhere. Even in the abodes of despair the lost will acknowledge that Jesus is Lord, is just and merciful. 11. Every tongue shall confess—Those who in life paid allegiance to Christ as King will with rapture confess his name, and those who by rejecting him have sealed their doom will be forced to confess his power, authority and glory. That Jesus Christ is Lord—This is a confession that Jesus is divine. All who had to do with the betrayal, arrest, trial, condemnation and crucifixion will make the confession. Judas and Annas and Caiaphas and Pilate and all who were eager to take upon themselves the responsibility of his death will be among the number. To the glory of God the Father—God gave his Son for the sins of the world, and all the good that comes to the world is from him through the Son, hence the glory of the Messiahship and work of Christ is attributable to the Father. Those who become the children of God are moved to give glory to him who saves them. They disclaim any credit for the glorious work done in them, but they give the praise to God. The redeemed in heaven ascribe to God the glory of their salvation, and will sing endless praises to him.

Questions.—Who wrote the Epistle to the Philippians? Give an account of the establishment of the church at Philippi. Of what graces did the apostles urge the church at Philippi to become possessed? What duty do we owe to others? What does it mean to have the mind of Christ? Describe the humiliation of Jesus. In what manner and to what degree is Jesus exalted? Who will bow the knee to him? What should be our attitude toward Jesus now?

PRACTICAL SURVEY.

Topic.—Christian unity.

I. The standard outlined.

II. The practise enjoined.

I. The standard outlined. Paul's happiness was bound up with the spiritual welfare of the Philippians. The ground of his appeal unto them was upon their undoubted possession of certain spiritual experiences. A false estimate of themselves threatened to be a dividing element among them. Paul's anxiety for entire oneness in the church was in harmony with Christ's prayer. Paul's desire was identical with Christ's purpose. Strife was to be kept out of their communion and vanity out of their character. Self-renunciation was the secret of unity in the church, of humility in the individual and of charity in all the relations of life. Paul exalted Christ with reverent joy and tenderness as the supreme pattern of sacrificing love. He thought that love, the faculty of soul sight, looks at others' endowments and appreciates them; at their blessings and rejoices in their possession of them; at their sorrows and weeps over them; at their wants and seeks to supply them. If the Philippians entertained a like mind with Christ was the mind of perfect love manifesting itself in perfect humility, in the surrender of all and the endurance of all for the good of man. Hence humility lies at the very basis of Christian character. Paul's exhortation to self-renouncing devotion was based upon union with Christ. He cited Christ's spontaneous, perfect self-sacrifice as an example, as the ruling and regulating principle of all Christian devotion and service. His delineations of Christ reveal the true method of rendering service to man. In Christ's great condescension there was no degradation.

II. The practise enjoined. Paul called upon the Philippians to show their love and compassion by living in unity, in harmony of feeling, humility of deportment and with generous concern for one another. Their church fellowship necessitated internal harmony. Christ's character was exhibited for imitation. The best evidences of their union with him was their likeness to him. He gave his life with all its preciousness, a free will offering, a priceless sacrifice. He was the greatest of all characters, because in him met all the attributes of the God-head and all the perfections of mankind. Had not the Son of God assumed the life of man, no son of man could have found the life of God. Christ looked upon man's helplessness, his danger, and beheld his need of a Saviour. His entire humiliation was his own voluntary act, undertaken solely for others. He accepted the true position of man, which is that of obedience. His work of love for the redemption of a lost world caused him to veil his divine glory. In his human nature he was depressed beyond the ordinary condition of man. He emptied himself that man might be filled with all grace. He humbled himself to teach man the sin and folly of pride and the duty of humility. He became obedient to teach passive and active obedience to God's will. He endured the cross to teach man self-denial. His death was the completion of his life of obedience, the supreme expression of his submission to the will of the Father. Deepest humiliation culminated in highest exaltation. Christ humbled himself. God highly exalted him, empowered him with the prerogative of bestowing the gift of eternal life upon all who believe in his name. The redeeming God-man merited and received an eternal and unlimited acknowledgment of his claim, that the merit of his supreme obedience availed for the whole world. This was his exaltation to become the mediatorial Redeemer. It pleased God that he who appeared as a servant should be revealed as the Lord of glory. The glory of Christ's name is such that it shall be celebrated through all ages. Christ Jesus was held up by the apostle as the model after which the Philippians should shape their lives. He made the imitation of Christ the one rule of Christian practise in the outward life and in the inner life of thought and feeling.—T. R. A.

Von Tirpitz
An Impression

(By Silas K. Hocking, in the Daily News and Leader, London.)

Yesterday I had what housewives call "a clearing up," and in the process stumbled across some notes I made a few years ago of an interview I had with Admiral von Tirpitz. The occasion was a banquet given in Berlin by Count Douglas to the members of a peace delegation representing the British churches.

How it came about that my seat was at the host's table and next to von Tirpitz I don't know. Scarcely were we seated when he turned and spoke to me.

"My name is Tirpitz," he said, and he handed me his card.

For the moment the name conveyed nothing to me. I was not familiar at the time with the names of German naval or military officers. Professors and pastors had been more in my day. Then his resplendent uniform, richly decorated with gold braid, gave me a clue. I adjusted my spectacles and read his full name, "Admiral von Tirpitz."

"I am glad of the opportunity of talking to an Englishman," he said. (To be strictly accurate, he used the term "representative Englishman.") "I am exceedingly anxious that English and Germans should understand each other better. I had a great admiration for you English. I admire your customs and institutions. Two of my daughters are at present in an English school at Cheltenham. England and Germany have so much in common. Our commercial interests are almost identical. We are one in literature and one in religion. There ought never to be enmity between us. I welcome your visit to Germany. I hope it will do good—I believe it will. We are a peace-loving people. Our greatest desire is to live in the friendliest relations with the whole world. Particularly are we desirous of living in peace with England. I fear sometimes you do not quite understand us—"

* * *

I looked at him while he was talking—forgetting to eat—and I am free to confess that I was immensely impressed both by his manner and his appearance. He spoke fluently, and in quite correct English. His voice was pleasant and carefully modulated, and the impression he conveyed was one of absolute sincerity.

I should describe him as of rather handsome appearance—tall and well-built, though inclined to rotundity. He had a long blonde beard, only slightly tinged with grey, frank blue eyes, and a square forehead. His full beard hid his mouth and chin.

"I hope you have been pleased with your welcome?" he went on.

"Very pleased, indeed."

"I am glad. I hope after this visit you will understand us better. England and Germany ought to be close friends. Standing shoulder to shoulder we could preserve the peace of the world."

"From one in your position," I said, "such sentiments are peculiarly gratifying. What we in England fail to understand is your vast and feverish preparations for war."

"Vast and feverish preparations," he questioned, with a gentle and disarming smile.

I felt that I was in for it now, so I said quite bluntly, "There seems to us nothing in the present condition of Europe to lead you to amass and equip such a vast army as you are doing. Moreover, we frankly do not understand why you have accelerated the building of your warships. Who are you building against?"

He looked at my card, which he had placed on the table in front of him, and smiled.

"I can assure, Mr. Hocking, on my word of honor," he said, "that there is nothing in this so-called acceleration. Our ships are built by contract and are to be delivered at a certain date. If in the meanwhile labor or materials should happen to be cheap, we do not interfere with the contractors taking advantage of that cheapness; but the ships will not be taken over by the Government until the time specified."

"But why do you need a big navy at all? You have not a long coast-line to defend?"

"But we have a considerable mercantile marine," he smiled. "Also we import fifty million pounds' worth of foodstuffs every year—that must be protected."

"Against whom?"

"Against any possible contingency. We have enemies. France is not friendly, Russia is uncertain."

"But neither France nor Russia can attack you from the sea, and your army is sufficient to defend your land frontiers."

"Every great nation in these days must have a sufficient navy," he replied gently.

"But yours is out of all proportion to the coast you have to defend. Excuse me speaking quite frankly. We in England do not understand it. There are many amongst us who regard it is a direct menace to our naval supremacy."

"I am sorry if they think so," he replied. "We have no desire, believe me, to rival your fleet. We could not do so if we tried. Let me repeat again that we are anxious above all things to live in peace with England. Why, a war with England—he added, earnestly—would ruin us for a generation."

* * *

The banquet came to an end. The guests retired to an adjoining room, and still we talked on. He met all my questions in the frankest way, replied to all my criticisms in the friendliest spirit, and when at length he shook my hand and said good night, I honestly believed that England had at least one staunch friend in Germany. It seems incredible that this man, with the pleasant voice and frank blue eyes, and disarming smile, was even then plotting and scheming for the downfall of England. Surely he is the mildest-mannered pirate that ever sailed the seas—the most ingratiating hypocrite that ever wore an officer's uniform.

I want to wash my hands every time I think of that handshake. This is the man who is responsible for the sinking of the Lusitania with its precious freight of human lives—the pirate "par excellence"—the murderer on the grand scale.

Up to the outbreak of the war I believed in the German people. I had visited most of their cities, had been entertained in their homes, had fraternized with their professors and pastors. Now I wonder if there is an honest German alive. I read their contributions to literature with a new understanding. Men like Nietzsche and Treitschke and Bernhardi were not the exceptions; they but voiced the general feeling and spirit of the people.

It is not pleasant to feel that one has been fooled, but it is sadder still to have one's faith in a nation destroyed. This will remain one of the bitterest legacies of the war.

Heart Would Beat Violently. Nerves Seemed to Be Out of Order.

The heart always works in sympathy with the nerves, and unless the heart is working properly the whole nerve system is liable to become unstrung, and the heart itself become affected.

Milburn's Heart and Nerve Pills will build up the unstrung nervous system, and strengthen the weak heart, so that the sufferer will enjoy the very best of health for years to come.

Mrs. John N. Hicks, Huntsville, Ont., writes: "I am sending you my testimony for the benefit I have received from using Milburn's Heart and Nerve Pills. As a nerve and heart builder they have done wonders for me. At times my heart would beat violently, and my nerves seemed to be all out of order, but after using a few boxes of Milburn's Heart and Nerve Pills I feel like recommending them to others that they might receive benefit as I did."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years, and are universally considered to be unrivalled as a medicine for all disorders of the heart or nerves.

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

TELLING MOTHER ALL ABOUT IT

It's a thing of dreams, that home-going, and haunts Tommy's songs with heart-felt melody.

It begins with rumor, and, when real, is too wonderful to be believed.

He and his mates climb on to a 'bus one morning—a London 'bus!—and jolt to railhead along endless poplar-shaded roads, where the havoc of war is now covered with fallen leaves.

And then the troop-train, with its excited crowd of lads sorting their belongings, and warning each other on no account to be "late in the morning."

"Not half, chummie!" comes gaily in reply. "I'll sleep in a real bed tonight with all my clothes off. Early tea in the morning, then off to sleep again. Don't care if I never get up!"

Now comes the base quayside, with everybody kindly—even the military police. Here's free refreshment, free food, and fruit and tea.

Now on board, with hungry eyes on the visible white cliffs of Kent. The disembarking—the staring from windows, a strange emotional silence.

To-morrow is sure; to-day—a couple of hours hence—brings the eyes of love, loved faces and voices, and hand-clasps.

How great is the joy, how vast the delight of the present: the ghostly past is only a nightmare!

The casual 2.15 rolls into Victoria Station amid a crowd of too deeply moved for words, or cheers or songs.

Mothers and wives are here; sweethearts, sisters, little brothers, and life-long friends. Tommy is bewildered with all the cross current of welcome. What a tea awaits him! What a houseful of neighbors, who knew him as a schoolboy, and now crowd in with questions, and comforts and all good wishes, to say nothing of invitations to the pictures, to country places, and the sea.

Poor Tommy doesn't get to bed at all, and his poor old mother must save him from his friends!

"Short leave," she explains, "is only for five days, and the army doctors advise peace and quiet. Come away, Fred!"

And Fred follows her to some quiet garden spot where he can pour out his confidence. Why, she's seen his picture in the papers! Her boy'll be an officer yet, with other boys saluting him as though he were a lord. Oh, it's wonderful!

And what escapes he's had! How well he's looking! with all the good food and fresh air. Why, there's a man to look after his feet, another to see to his teeth, an Army Service Corps to cater for his body, and the pick of parsons to ease his soul. Well, well!

And mother puts down her paper to stare at Fred again, with loving amazement and pride.

Still, a change of food'll be nice, and garden laziness with a book or the girl playmate of his childish years.

"We've kept the home fires burning," mother assures him. And today is "The Day" of day he'd told her of in his letters warning her to—

"Turn the dark clouds inside out
Till the boys come home!"

NOT A BIGAMIST.

(Yonkers Statesman.)

"There's a gentleman in the parlor, sir," said the maid.

"Did he give you his name, Katie?" asked the man of the house.

"Oh, no, sir; but I think he's the one who wants to give it to your daughter."

The moral system of the universe is like a document written in alternate ciphers, which change from line to line.—Froude.

Had Dyspepsia.

Says: HE NEARLY TURNED UP HIS TOES.

Burdock Blood Bitters CURED HIM.

Mr. H. N. Manderson, Stettler, Alta., writes: "About twenty-five years ago, in the Province of Quebec, I came pretty near turning up my toes with dyspepsia. A cousin of mine persuaded me to try Burdock Blood Bitters. In about two weeks I could eat anything from raw fat pork to unleavened bread. Three bottles did the job, and I have never been troubled with my stomach since. You would say that this is wonderful if you could only see what we sometimes have to live on in this country; bannock, half cooked beans, etc."

Burdock Blood Bitters has been on the market for the past forty years, and cannot be excelled as a medicine for all diseases or disorders of the stomach.

WALKERTON, FEBRUARY 10th '16

MILK INSPECTION IN WALKERTON.

A letter to the editor of the Telescope published in these columns last week, called for more publicity in regard to the quality of milk supplied the people of Walkerton. The Telescope has since made inquiry into the matter of milk inspection and finds that milk inspection in Walkerton is a dead letter, that no definite provision is made either for the inspection of the milk sold to customers, or for the inspection of the cows giving the milk, or of the premises where the animals are kept. Provision is made for periodical inspection in the Statutes of the Province of Ontario, and no one will contend that it is not in the highest interest of every community and a matter of vital importance that such provision be acted upon in Walkerton as well as in other towns and cities. We doubt not that the milk we get here is of first rate quality, coming as we understand it does from some of the finest farms around Walkerton but that is not the point. If it is of best quality, the people are entitled to know it, and if it is not, they are entitled to know it, and a proper remedy applied. It is as much in the interest of the dealers as of the public that this important matter receive definite attention.

+ + +

GETTING RECRUITS

Judge Barron, of Stratford, has taken a very keen interest in recruiting, an interest that can be classed as both enthusiastic and sane, for it can be truly said that his appeals for recruits lose nothing of their common sense by reason of the enthusiasm with which he delivers them.

Judge Barron has tabulated a set of "dont's" which it might be well for those addressing recruiting meetings to bear in mind. In brief these are given as follows:

"Don't, if we are genuine in heart and soul, let us be seen on the public platform, and decline the 'collar work' which we leave to others.

"Don't let us confine our canvassing to public meetings. Reason and the gentle word have no school hours.

"Don't let us release or give up because we fail to see immediate results.

"Don't let us call a man a 'shirker' and a 'coward' because we fail to get him. Abuse loses; it does not win the game.

"Don't let us choose the wrong time. There is always a time when it is wise to leave a man alone. "To everything there is a season and a time to every purpose under the heaven."

"Don't let us lecture other people on patriotism and on their duty, so long as a single patriotic duty of our own remains undone.

"Don't let us pass a man in khaki without greeting him with the kindly smile of approval. Remember that he is ready to fight, and if need be to die for you, for me, and even for the 'shirker.'

"Don't let us judge any man with the question: 'Why aren't you at the front?' Let us persuade, urge and even request; but let it be in reason. Let us refrain from individual judgment. Let us follow the example of the One Man, whose example no living man has ever presumed to question: that Man who wrote upon the ground, 'I judge no man.'

MR. ROWELL AND THE FARM

"We must raise the required number of recruits, but we must also so organize our system that the agricultural production of the country will be maintained."

"We should have in Ontario something between Public Schools and the O. A. C. at Guelph: something, for example, like the Agricultural Schools in Alberta, to bring agricultural education closer to the farm".

"There is no occupation more noble or independent than that of the farmer".

"There is need for more co-operation in the raising and marketing of farm produce".

"It is a matter of real public interest when we find some 6000 farmers in the province taking advantage of the Field Crop Competition".

"The cities have been over-built at the expense of rural communities."

EDITORIAL COMMENT

The Hugheses are a great family.

+ + +

Last year they were cheap enough to feed to the hogs, but look at the price of potatoes now.

+ + +

It is stated on authority that giving up sweetmeats and eating coarse war bread has benefited the health of the children of Germany.

+ + +

This is an era in which the young man leaves the country and works like the deuce in the city for thirty years so that he can afford to go and live in the country.

+ + +

It is suggested by an English contemporary commenting on the tendency of women to adopt mannish attire that while men are at the front, women may fill the "breach" at home—without twisting the word into the plural number.

Are the Canadians becoming teetotalers? The imports of tea have increased 30 per cent, during the past year, while the spirituous liquor traffic has decreased.

+ + +

The social game of cards has practically gone out in the Mother Country. The women of Great Britain take their work for the soldiers too seriously just now to think of bridge whist.

+ + +

The postal department has sent out circulars informing the public that all letters addressed to soldiers at the front must have the sender's name on the envelope, otherwise they are liable to be sent to the dead letter office.

+ + +

Walkerton is making preparations for the whole Bruce battalion there next summer. How would it do make Wiarton the centre of gravity? If Walkerton, however, shows up well in recruiting, the honor may be conceded.—Wiarton Echo.

+ + +

If it comes to a fight this autumn between Wilson and Roosevelt—and they are not wanting many signs that they will be the rival candidates of the Democratic and Republican parties—then Teddy will have more friends and well-wishers north of the boundary than he had four years ago.

+ + +

If a kilowatt is a unit of power equal to 1,000 watts; it is well for us to know accurately the nature of a watt. It is the power conveyed when a current of one ampere passes through a conductor whose ends differ in potential by 1 volt, or when an ampere flows through a resistance of 1 ohm. NOW we can go on with our work.

+ + +

Of the 5821 persons killed on steam railroads in the United States last year, 5084 were trespassers, who, had they obeyed the law and stayed where they belonged, would have been out of harm's way. Nor were most of these vagrants, the great majority being foolhardy citizens who entered the railroad premises without authority, risking their lives for convenience or to save steps. Had they paid the least regard to the "safety first" signs which are now everywhere displayed about railroad tracks, the toll of human life caused by trespassers on railways would have been insignificant.

+ + +

The question has frequently been asked why Germany does not fight Italy, and a reply to this question has been given by an attache who writes in The Pittsburgh Dispatch. He says the Kaiser is extremely careful not to give Italy cause to declare war on Germany because of the fact that every port in Italy is crowded with German ships, driven there for refuge from British and French cruisers. All this shipping, which is very valuable would be at once seized by Italy in case of war being declared. Italy would also sequester all German capital and German property, and moreover Italians would be relieved of their financial obligations to Germany, which are immense. On the other hand, Italy has refrained to declare war on Germany because there is no point where the two countries touch and they do not want to do anything that would bring the Germans in force against her. She is gradually gaining on Austria and the time is not ripe to declare war against Germany. That time will come later.

+ + +

The following important notice in regard to the withholding of fifty per cent of the pay of troops on overseas service as a savings nest egg until their return to Canada at the conclusion of the war, is contained in militia orders issued recently. "It has been found necessary in the interests of discipline and in the interests of the men themselves, to withhold a portion of the pay of troops on overseas service until their return to Canada. From the first of January, therefore, 50 per cent. of pay of the rank and file will be withheld from those who have not made any assignment of pay. As regards those who have assigned less than 50 per cent. of their pay, the difference only between the portion assigned and the 50 per cent. of their pay is to be withheld. The pay so withheld will be paid to the men in Canada at the termination of their engagement, but in the case of men invalided home, the overseas paymaster, London, is authorized to issue it before the soldier sails, if the latter so desires.

Rod and Gun.

Bonnycastle Dale contributes the leading article to the February issue of Rod and Gun in Canada, published by W. J. Taylor, Limited Woodstock, Ont., writing with his usual skill on observations which he has made of wild animals in British Columbia. "Roughing it de Luxe" by Judson Gaylord is an account of a visit to a Quebec club for millionaires as set down by one who was succesful in invading the millionaires' stronghold. "Wilhelm the Hawk: A Tragedy of the Prairies," by James S. Jones is the biography of a hawk whose dominant characteristics are analogous to those of a human Wilhelm now much in the public eye. "The Home Trail" is the tale of a heart breaking trek to Oxford House and is related by R. J. Fraser. F. V. Williams contributes a story, "The Ranger's Friend," and a cover design illustrating the story, which portrays a fight to the death between a moose and a pack of wolves. The regular departments are well maintained and the number as a whole an attractive one particularly to sportsmen and lovers of out-door life in its various phases.

LETTERS FROM THE FRONT

"Squee" Huck Sends Some Hot Shots on Recruiting—"Bob" Turner writes Interestingly of France — How It Feels To Be Hit.

"SQUEE" TALKS OUT

Mr. Frank Spelran received the following letter from his friend, Norman Huck, who is over in Belgium "doing his bit". "Squee" gives his views on the recruiting question very pointedly.

Belgium, Jan. 26, 1916.

Dear Friend,

Pleased to get your most welcomed letter to-night, Jean. I wish to thank Mrs Spelran and Franklin for their remembrance. As I haven't yet taken a course in hieroglyphics the latter's wee letter was unintelligible but I quite understood his thoughts. It is a little keepsake and if spared I hope some day to show you the letter. I shall endeavor to carry it on my travels.

Give my kindest regards to Mrs Spelran and tell Franklin, Squee hopes to see him again.

I am in the best of health and taking as much enjoyment out of life as the circumstances will permit. We have some fun and it is not all hardships.

I am glad you show my letters to the Brothers at the Lodge as well as my old pals at the shop. I am one of their representatives here and will always try to do as they expect me to do. I have only done my duty. There is no excuse for a young man to hang back. They all have the same excuse.(?) I had none so I enlisted. I could easily get my discharge if I wanted to, but signed and don't want to go half way. I want to see it to a finish. Like every other lad I had friends I had to leave behind, but I signed first, the right way, and did the parting stunt afterwards. Every able bodied single man should be in khaki. Why aren't they? I guess they know and others surmise the real reason.

Look at the Cartwright family. Three sons all in khaki, and the youngest ran away to join. There isn't a mother who loves her boys more than Mrs. Cartwright, and, hard as it has been for her to see them go, she says they are only doing their duty.

You know what happened here in Belgium. What do you think if all Britishers were "stay at homes"? Thank God I am in khaki now and not at home soaking in "thin heat". I am not referring to married men. I am referring to those who say, "Oh I really can't leave Miss—", that's all bosh. Many a lad left a nice little girl in Canada, why can't the rest, I guess they can if they want to, but, well they need more socks. There's too much "Henry Ford," about them. You can tell them in the old town for me, that the 160th B. Batt. is the golden opportunity for them. But will telling do any good? I hope so.

I would love to be back with you again but I will, if possible, stay right here till the final gong. I want to see the finish first and then my old pals and friends afterwards.

I was very pleased to get the Lodge card and emblem, Jean, and will wear the latter. Kindly express my thanks to the Lodge.

I enjoyed my Xmas and New Years, everything considerd and there are no complaints from me. I am glad you are busy. There is nothing like prosperous prosperity, is there? Please remember me to all.

Bert and I had a funny experience the other day. We were out in a field digging in a shell hole for a shell nose and one of our planes was overhead but very low. Fritz got his guns busy sending shrapnel after the plane and the pieces commenced to strike in all directions. We each got a chunk of tile roofing and put it over our heads and Bert held the shovel in front of his face. Some stunt, eh? We weren't touched and had a good laugh over the incident.

Now Jean, I must close for this time. Hoping I shall hear from you soon and that this finds all well. I remain

Your Pal,
Squee.

AN INTERESTING LETTER

How it feels to be hit is one of many interesting points dealt with in a letter of more than usual interest received by Private Ed. Eidt, of the 71st Batt., Galt, from Private Bob Turner, another Walkerton boy, who is recovering from wounds in England.

West Sandling,
Kent, Jan. 15, 1916.

Dear Ed.—

Received your welcome letter and glad to hear you are in the land of the living. I didn't know what had become of you untill Frank told my Aunt you were with the 71st in Galt. Well how do you like soldiering now. I suppose it will be a little different from Tobermory. Galt is a nice city, we marched through it once and stayed for lunch on the Fair grounds on the way through. I got a card from Ross Clark the other day. It was written on Nov. 17, and had been over to France. You say he is down in Walkerton. I am well pretty well recovered, I was up before a board of doctors the other day and they gave me two month's light duty, so, if I go back, it won't be until nearly spring. They want good mechanics to take the place of the Lord Derby men who were attested. An officer sent my name and five others to headquarters this morning, so I may have to make munitions. I have also put in for a transfer to the Canadian engineers, so I guess there will be something doing before long. Well, the sooner I get out of here the better. F Company is the casuality company and all we have to do is almost just put in time. Just now we are quarantined for cebra-spinal meningitis and that makes it worse still.

I spent Christmas in London at the Maple Leaf Club, we had six days leave. Lady Drummond of the Can. Red Cross gave us a dandy dinner and lots of presents. The Red Cross certainly does a noble work for the wounded Canadians. You can't realize it unless you come through it all. Nothing is too good for them. Maple Leaf Club is Lady Drummond's house which she gave free for the use of colonial soldiers on leave in London. I was lucky to be able to go through the House of Lords and Commons and it is a sight worth seeing, of the many places of interest in London. It would take a book to tell you about France, so I will try and give you something you have not read about. Bailleul is a large French town, I have been in, near the town is a British soldier's cemetery with about 1800 graves. They have a wooden cross engraved with R. I. P. name, no., regiment, nature of casualty. A French cemetery is worth seeing, the graves are decorated with shrines, vines, sundials and trellis work all in marble. The country is dotted all over with little cemeteries, some are buried just at the front line. One grave we used to pass every day was headed with "An unknown British soldier who died for his country, R. I. P." and his rifle and bayonet are laying on the grave. Although that is the sad side of the war, we had some good times out there. One night an owl lit in a tree where we were standing too. I shot it with my Lee Enfield and it fluttered down just outside of our front trench, I crawled out to get it but I couldn't find it among the barb wire and long grass. I wanted some of the feathers for a souvenir so that shows how much we are scared of the Germans. Sometimes you will be on sentry at night with your nerves all taut watching for a German attack. Then a rat who has been licking around bully beef cans, knocks a couple down off the trench and you think it somebody coming through the barb wire.

One of the best sights of the war is to see the big guns firing at night. You will see the flash as the shell leaves the gun and then the flash of the explosion. An aerial flight is very interesting to watch. I saw a British bring a German down about a mile away. I have fired at German aeroplanes. The hardest is the trip from the trenches back to London, when you are wounded. I was nearly dead when I got back to London. It was the time of the fight at Loos and the hospital trains were crowded. I had several close shaves but I was lucky so far considering. Quite a few of the boys who went out with me have paid the price. May they rest in peace. (R. I. P.)

It is a very peculiar sensation to get hit. A kind of a numbling, burning and sickening feeling. When I got hit with a shrapnel bullet, I hardly knew what was the matter until I felt the blood running down my leg. One of the Strathcona Horse was near, so he slit my pants leg and bound it up. Then they passed the word for stretcher bearers and away I went. We lost twenty out of a hundred that day. Well I must close. Best wishes to all and write soon.

Yours ever,
R. M. T.

Auction Sale.

An auction sale of farm stock and implements will be held by Joseph Freiburger, on lot 8, con. 14, Carrick, on Tuesday, Feb. 15th at one o'clock sharp.

+ + +

How It Stands

The following is the result of recruiting for the 160th Bruce Batt. up to date:—Ripley, 12; Tiverton, 20; Teeswater, 24; Chesley, 25, Wiarton, 116 Kincardine, 89; Lucknow, 34; Tara, 50 Hepworth, 24. Southampton, 24; Port Elgin, 25; Walkerton, 90; Lion's Head 8; Cape Crocker, 50, total, 535.

Each is a Chairman.

There are eight committees in Bruce County Council and two of them are presided over by the reeves of Chesley and Elderslie, respectively. Reeve Brown is chairman of the Warden's committee and James Elihu Case of Elderslie is chairman of the big spending committee, roads and bridges. Reeve Brown was chairman of finance last year. It is now a fair race with an even start between the butcher and the auctioneer for which reaches the warden's chair first.—Chesley Enterprise.

Byron Pink Tomato

FREE

A post card addressed to us as below, with your name and address ONLY on the other side, will cost but one cent. Drop it in the nearest mail box, and it will bring promptly a copy of our illustrated 80-page catalogue for 1916. With it will come also—free—a 15c. packet of

Byron Pink Tomato

A perfectly formed tomato, the Byron Pink is uniform, large, and attractive. The flesh is firm, and the flavor delicious and full-bodied. It is a robust grower and a heavy cropper. It is an ideal tomato for forcing. You are going to buy seeds anyway; then you might just as well send for our catalogue and get this free premium for yourself.

The Catalogue tells about the other valuable premiums which we give with every order.

POETS' CORNER

THE BRUCE BATTALION

(Written by Mrs. Stauffer)

The Kaiser looked down and said with a frown:
"Is the Bruce Battalion coming, I wonder?"
The Crown Prince said, "Yes."
The Kaiser replied: "I guess this war is settled, by thunder."

"I have heard of Bruce County and heard of its boys,
They are loyal, spirited, splendid,
And if they come here, we have reason to fear
That this great war will be ended."

"I fear not the submarines, torpedoes or 'planes,
Nor the men of all other battalions,
But the Bruce County boys are no Crown Prince's toys,
And my Kingdom is sure to go under."

So he'll saddle his horse, as a matter of course,
And make for his home without plunder,
And shout as he goes, "The worst of my foes
Have come as Bruce County Battalion."

"So I'm conquered, it seems, in spite of my dreams
(To be monarch of Europe, my boast).
By this well equipped host who will stick to their post,
The brave boys of Bruce County Battalion."

So here's to the heroes who fought under Weir
And made them a name that is glorious:
When we thing of their fame we shout loud and exclaim—
"The brave boys of Bruce County Battalion."

News About Town

A letter received by Mr. Gus Royce from his father, Mr. N. C. Royce, Weyburn, Sask., stated that the weather in that part is about the coldest in record. It was 58 below at time of writing.

Mrs. Thomas Dixon had a letter recently from Chester Clendenning, an old Walkerton boy, now with the Pioneers in England. Before enlisting, Chester was with the G. T. R. in Northern British Columbia. He has very little love for the English climate. His Christmas parcel arrived only the day before he wrote.

Dr. Thomas O'Hagan of Paisley, whose recent sketch of Pioneer Life in Brant, was greatly enjoyed by Telescope readers, has returned from the West, and on Friday last lectured before a deeply interested audience at Newman Hall, Toronto, on the great Italian poet, Dante.

A visitor in town on Thursday was Ex-Coun. Samuel Brown of Bruce Township, who was a guest of Mr. Bob Irwin. While here Mr. Brown paid a visit to the House of Industry and was shown over the place. Mr. Brown was loud in his praise of what he saw there and highly commended Supt. Whiles.

Two men (one black) went into the restaurant and said: "We want Turkey without Greece." The man said, "You can't Roumania 'ere because we don't Wantanegro and I won't Serbia." So they said "Call the Bosphorus." So the boss came and said: "Gallipoli now or I'll Russia out. So they went Hungary.

Lieut. Col. Adam Weir is a fine type of man and is as busy as he can be at his office in the armoury at Walkerton. He is very pleased so far with the type of men that are enlisting and he feels that the 160th Bruce Batt. will rank with the best of them when it is finally whipped into shape.--Kincardine Reporter.

Mr. D. O. Wilson, an old Walkerton boy, who had been tuning pianos for a couple weeks, returned on Saturday to his home at Toronto. While here Mr. Wilson was suddenly taken ill with "walking fever" but recovered in a few days at the County Hospital. He expressed himself as greatly pleased with the attention and service at the hospital.

+ + +

Stroeder—Schwehr.

A happy event transpired in the Sacred Heart Church, Mildmay, on Tuesday morning of last week, when Miss Amelia, eldest daughter of Mr. and Mrs. Jos. H. Schwehr, was united in marriage to Mr. Noah Stroeder of the South Line, Brant. The nuptial knot was tied by Rev. M. Halm. The bride, who looked very pretty in a gown of white silk and carried a bouquet of white roses, was assisted by her sister, Miss Velma Schwehr, while the groom was supported by his brother, Mr. Geo. Stroeder. The happy young couple will reside in Brant, where Mr. Stroeder owns a fine farm. —Mildmay Gazette.

+ + +

O'Shea—Giesler.

A quiet wedding was solemnized at the R. C. Church, Walkerton, on Tuesday morning, Feb. 1st, at nine o'clock, when Miss Anna Elizabeth Giesler, daughter of Mr. and Mrs. George Giesler, Jr., Victoria St., was united in marriage to Mr. Thomas Francis O'Shea, of Toronto, son of the late Daniel O'Shea, of Deseronto, the ceremony being performed by Rev. Father Haller. The bride, who was attended by her sister, Miss Ella Giesler, was attired in midnight blue corduroy, trimmed with ermine, with a white hat, her bridal bouquet being of white bridal roses and lilies of the valley. The bridesmaid, wore fawn broadcloth trimmed with mink, and hat to match, and bouquet of pink roses and lilies of the valley. After the ceremony a sumptuous dinner was served at the home of the bride's parents. Mr. and Mrs. O'Shea will make their home in West Toronto, taking with them the best wishes of a large circle of friends in Walkerton and vicinity.

The Firemen's Ball.

The Firemen's Ball on Thursday night was a great success. In spite of the stormy weather over a hundred couples were present and enjoyed themselves thoroughly. Excellent music was provided by the Starlight Orchestra. The net proceeds, which will amount to a goodly sum, will go to the Patriotic Fund.

+ + +

Baptist Congregation Prospering.

That 1915 was a good year in the history of the Walkerton Baptist Church was indicated by reports read at the Annual meeting. Finances raised for all purposes, and membership, showed an increase over the preceding year. After business matters had been dealt with, the ladies served light refreshments and an enjoyable time was spent. The Board is now considering the matter of putting in a new heating system in the building.

+ + +

Brant Pioneer Gone

One of Brant's most highly respected citizens in the person of Mr. Geo. Routledge, died on Friday in his 83rd year. He passed very peacefully away, death resulting from the gradual breaking up of physical forces which is usual with old age. He had been poorly for the last six months and for about a week had been bedfast. Mr. Routledge was born in Cumberland, England. At the age of 20, he came to this country, settling first in Burlington. Seven years later he came to Brant Township, and tasted the pioneer life of the bush. On the property which by dint of hard and patient effort, was converted from impenetrable bush to a highly productive farm, he lived and died. In matters of principle the old woodman hewed to the line; and was respected by all for his sterling qualities. Besides his wife a large family survive:—Mrs. Thos. Douglas of Crandell, Man.; Wm. Routledge of Lenore, Man.; Henry Routledge of Unity, Sask.; Rev. Robt. Routledge of El Cristo, Cuba; Mrs. R. W. Garland of Malta, Montana, Mrs. T. H. Williams of Gladstone, Man.; John Routledge of Brant, Dr. James Routledge of Unity, Sask.; Mrs. Walter Bradley of Brandon, Man.

+ + +

Don't Have To Pay

Division Court was held at Underwood. Two cases occupied the day until lamp light. Great interest was taken in the cases as was evidenced by the crowded court room.

It appears that two McKenzie Bros. were around for a couple of months in 1913 selling real estate in Melfort, Sask., representing it to be the gilt edge stuff. Afterwards these representations were found out to be absolutely untrue and McKenzies were found to be anything but what they represented themselves to be. They sold these notes which they agreed not to sell, and which are now beginning to come due. The cases concerned at this court were Wadell vs. Geo. H. McKay and Farquharson vs. J. B. Struthers. It was clearly proven at the trial and admitted by the plaintiff side of the case that there was fraud and false representation made. But the matter rested on whether the third parties were bona fide owners of the notes, it being generally understood that that the third party is always an innocent party and must be protected. This is the law as far as that goes, but if such party is aware of, or tries to keep from finding out circumstances which point out to him in any way that things are not what they should be, or, in other words, which was explained at the trial, shut his eyes and buy the notes without making any inquiry whatever, knowing second party to be unreliable, he must look to the man who sold him the note. Evidence was brought out to show that McKenzies were not very industrious fellows and would not be expected to have much money, notes or property, without causing some suspicion as to how they came by notes of such amounts as these real estate notes. In this case McKenzie was sued along with the defendants, but did not appear. After hearing the evidence of all parties, Judge Greig gave a verdict in favor of the defendants, McKay and Struthers. So the purchasers of the notes are likely to lose what they paid for them. Detectives have for months been looking for the McKenzie Bros. but so far without result.—Kincardine Reporter.

TREASURER WANTED

Applications will be received by the undersigned up till 2 o'clock P. M. on Friday the 11th day of February (when the council will hold a special meeting to appoint a treasurer) for the office of Treasurer of the Township of Brant. Alterations have been made in the system of book-keeping whereby the Treasurer has only to countersign the orders instead of writing the cheques, and is required to provide only $5,000 security. Salary $100.00.

By order of Council.
M. A. McCallum,
Clerk.

HIGH SCHOOL EXAMS

Results of Weekly Tests Held During December and January.

The following are the results of the weekly examinations held during December and January. For honors 75% is required, for pass 60%, except in Form I where 70% and 55% respectively are required. The names in the various lists are given in order of merit.

FORM I

Honors—N. Ley, Leo Yaeck, A. Johnston.

Pass—W. Polfuss, P. Myles, J. Coumans, A. Reinhart, F. Garner, L. Wiser, E. Ramsey, M. Bannyman, H. Moore, H. Everett, J. Mitchell, W. Brown, B. Cunningham, G. Hibbert.

Below Pass—M. Wilson, F. Young, H. Johnston, C. Wilton, D. Kenny, B. Farewell, H. Lewis, F. O'Neill, S. Taggart, W. Lettner, J. Gill, G. Henderson, H. Jasper, L. Elder, W. Small, A. Mielhausen, N. O'Malley, E. McNab, J. Patterson.

FORM II

Honors—E. Coulter.

Pass—A. McCool, C. Tovell, M. Batchler, E. Glave, Leander Bilger, M. Forsythe, G. Pfohl, B. McCool, B. Hendhauer, G. Young, R. Weinert, D. Frost, E. Hyslop, A. Tolton, V. Eidt.

Below Pass—V. Tovell, A. Weiler, Mary Kenny, L. Batte, N. Wilson, P. Moore, W. Ramsey, R. Garner, N. Pinkerton, E. Lindsay, G. Lewis, M. Hyslop, E. Stevens, H. Thompson, C. Cargill, L. Bilger, S. Brocklebank, H. Irwin, M. Ernest, T. Queen, M. Leech, F. Sharrer, E. Mielhausen, M. Chisholm.

FORM III

Pass—G. Siegner, I. Everett, A. Pinkney, F. Cunningham, M. Coulter, G. Rogers, F. Taylor, S. Bush, C. Fortune, J. Frame.

Below Pass—O. Schwindt, W. Wilson, E. Bilger, A. Garland, M. Weiler, G. Wanless, L. McConnell, C. Petteplace, J. Alexander, J. Rowland.

FORM IV

Honors—W. Borho.

Pass—W. Tanner, J. Wells, C. Thornburn, M. Green.

Below Pass—K. Foster, J. Hickling, M. Coumans.

HANDSOME PRESENTS

Mr. and Mrs. Joseph Dosmann of Culross Remembered by Friends on their Departure from the Neighborhood.

A large number of the neighbors and friends of Mr. and Mrs. Joseph Dosmann of the 4th. concession assembled at their home recently they having decided to move to Mildmay. The following address was read by Mrs. R. Moran and the evening was most enjoyably spent in music and dancing. Mrs. Dosmann was presented with a mantle clock and Mr. Dosmann with an upholstered rocker. The following is the address:—

Mr. and Mrs. Dosmann.

Having learned with regret that you are leaving our midst, we, your neighbors and a few friends have assembled here this evening to spend a short time with you before you leave the old homestead in which you have spent many years. When we consider the length of time you have been in this vicinity, we cannot let this occasion pass by without giving expression to our feelings and for this reason we have gathered here this evening to bid farewell to you and Mrs. Dosmann. You have been on this farm since it was almost a wilderness and by your industry and labor you determined to make a home for yourself and family. This beautiful farm with its modern improvements shows to a slight extent what great success you have attained. Many would have been discouraged at meeting with losses but by your judicious management you have overcome all difficulties and by perseverance they have given way to comfort. In all this you were most ably assisted by your most worthy companion Mrs. Dosmann, God has blessed you with a family of which you may feel proud; that they have benefited by your good example is shown by the success they have met with in this world. They have gone to seek homes in the West and with God's blessing and your assistance they too, have met with success. When they were all in our midst we could not go to a better place for amusement and many happy evenings were spent in your home. One consolation left us is we can see you often, since your future home is not far distant. We would ask you to accept these gifts not for their intrinsic value but as a slight remembrance of our esteem for yourself and Mrs. Dosmann. We hope you may be long spared to enjoy the comfort which you deserve in your new home. Signed in behalf of your neighbors and friends.

Signed, ANDREW SCOTT,
ROBERT MORAN.

FORMOSA SCHOOL REPORT

FORM IV.

BRANT COUNCIL

Elmwood, Ont., Feb. 2nd, 1916.— Brant Council meeting, Feb. 2nd, 1916. The municipal council of Brant township met at the Township Hall on Tuesday, the 1st day of February, 1916. Members all present, minutes of last meeting read and declared correct.

Gregg—Johnston: That the Auditors' Report be received and adopted and that the Reeve have 200 copies printed for distribution.—Carried.

Gregg—Rowand: That a grant of $10.00 be made to the Richardson family, destitute, Cargill, for to provide the necessaries of life. Cheque to be issued to Rev. Homer, of Cargill.—Carried.

Weir—Rowand: That this Council accept the tender of the Walkerton Telescope for the township printing for the year 1916 for the sum of $160. —Carried.

Rowand—Johnston: That the east half of Lot 32, Con. 12, be changed from Road Div. No. 75 to Road Div. No. 74.—Carried.

Gregg—Johnston: That this Council accept the application of Sidney Parker as Assessor for the township for the year 1916 and that the Clerk draft a Bylaw confirming this appointment. —Carried.

Rowand—Weir: That Bylaw No. 80, A.D. 1916, confirming the appointment of Sidney Parker as Assessor be now read the usual number of times and finally passed and seal attached thereto.—Carried.

Rowand—Weir: That Bylaw No. 79, A. D. 1916, a Bylaw fixing the salaries of township officers be amended by changing the salary of Treasurer from $150 to $100 per year and the Clerk prepare a Bylaw confirming this resolution.—Carried.

Gregg—Johnston: That Bylaw No. 81, A. D. 1916, be now read the usual number of times and finally passed. —Carried.

Weir—Rowand: That this Council hereby authorize the Clerk to advertise for applications for the office of Treasurer for the township of Brant. Alterations have been made in the system of bookkeeping whereby the Treasurer has only to countersign the orders instead of writing cheques and is required to provide only $5000 security. Salary $100, applications to be placed with the Clerk before two o'clock p.m. on Friday the 11th day of February, 1916, when the Council will hold a special meeting for the purpose of appointing a treasurer.—Carried.

Rowand—Johnston: That the Collector's Roll be accepted and Joseph Monk, Collector, be paid his salary in full, $100.—Carried.

Johnston—Rowand: That the Reeve be empowered to have the late Treasurer's books put in proper shape for the special audit.—Carried.

Gregg—Weir: That Alex. Robertson and Chas. Kyle be appointed Auditors of the Treasurer's accounts with the township for 1916 up-to-date.—Carried.

Gregg—Johnston: That this Council wishes to express to Mrs. Coulter and family their sincere sympathy in this, their hour of bereavement and the Clerk be authorized to draft a suitable letter of condolence on behalf of this Board.—Carried.

Rowand—Johnston: That this Council do now adjourn to meet as a special meeting on Friday, the 11th day of February, at two o'clock p.m., for the purpose of appointing a township treasurer and that the regular meeting be held on Monday, the 6th day of March, for the purpose of appointing Pathmasters, Poundkeepers, Fenceviewers, Etc., and general business.—Carried.

M. A. McCALLUM,
Clerk.

COL. WEIR'S APPEAL

Lt.-Col. Weir has addressed a personal appeal to each elegible young man of Bruce. The Colonel's challenge is one that no worthy citizen can regard lightly. It should meet with a hearty response. The letter says:—

A public meeting was held at Walkerton on Dec. 21st last, at which a representative body of citizens of this County pledged themselves to "do all in their power" to secure the necessary men to complete the organization of the Bruce County Overseas B'n. The Dominion Government has ordered a Battalion to be recruited from this County, to which I have been appointed Commanding Officer; a census of men of military age is being taken, and your name has been handed to me with those of others, as one who should enlist. I therefore write to impress upon you that your services are urgently needed by your country, and I beg of you to consider your own position; ask yourself whether, in a country fighting as ours is for its very existence, you are doing all you can for its safety, and whether the reason you have hitherto held valid as one for not enlisting, holds good at the present crisis. Your fellow citizens of Bruce County have named you as one who should enlist, and your king has asked for your services. As one who should, will you not respond to your country's call?

Winter Tours to Florida, Lousiana, Mississippi, California, etc.

The Canadian Pacific Railway offers particularly good service to Detroit where direct connection is made to Florida, via Cincinnati and Atlanta, Ga. Jacksonville, Florida is reached second morning after leaving Detroit. Excellent connection for Florida is also made via Buffalo.

The Canadian Pacific-Michigan Central route will be found the ideal line to Chicago, where direct connection is made for the Southern States. New Orleans is reached second morning after leaving Toronto. Excellent connection is also made at Chicago for points in California, Utah, Nevanah, Texas, Arizona, etc.

The Dining, Parlor and Sleeping Car service between Toronto, Detroit and Chicago is up-to-date in every particular. Connecting lines also operate through sleeping and dining cars.

Those contemplating a trip of any nature will receive full information from any C.P.R. agent; or write M. G. Murphy, District Passenger Agent, Toronto.

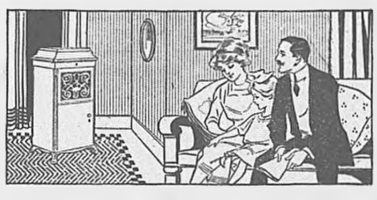
Successors to H. A. Havill



The Tone of the NewEdison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so lifelike, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

WINTER GOODS

Our stock in all lines is complete and if in need of any of the following, give us a call and we will endeavor to satisfy you both in quality and in price.

Axes from 90c to $1.25, Meat Grinders and Fillers, Sleigh Bells, Coal Oil Heaters, Snow Shovels, Grain Scoops and Bags; the celebrated "Racer" Cross Cut Saw and others; Coal Scuttles, Coal Oil Cans, and Coal Oil, Gasoline and Gas Engine Oils, Oil Cake, the celebrated "Bibby's" Calf Meal and ground Flax

Our stock of heavy mitts is large, well assorted and prices right.

We are sole agents for the celebrated D. L. W. Scranton Coal, the standard anthracite, pri right and quality the best. Try a ton or two.

S. W. VOGAN

The Crookedness of Callahan

Policeman Callahan was getting the silence. Not a patrolman in his district was any longer his comrade. Whispering of his intimacy with burglars had grown to such a blasting volume, and had obtained so wide a credence among his fellows, that his ostracism was decreed. The social frigidity in which he moved was given climatic augmentation by a Christmas eve blizzard, and still further intensified by the infinite loneliness which Christmas always brings to bachelors.

Callahan was a round, red-faced, red-haired man, and as he propelled his corpulent being through the snowdrifts toward his station house for the midnight roll-call he wheezed asthmatically. Occasionally he paused a little under the bundle he carried or to peer through frosted windows at scenes of Christmas festivity. But in spite of the weight of his burden he sighed deeply when he reached his station house, and showed little evidence of gladness over his journey's end.

Two shifts of policemen stood before the high desk in the roll room as the hands of the house's grimy clock moved toward the midnight hour. One detachment was reporting off duty, while the other waited instructions before taking up the district beats for the remainder of the night. At the word of command they showed their revolvers and blackjacks, and then stood at attention.

"The district's seen three burglaries in a week," said the lieutenant, scowling over his desk; "and the cell room is still empty. Furthermore, this week hasn't been different from a good many that have gone before. There is something rotten somewhere. But the papers are getting wise to us. It looks like some of you was in on the deal, and maybe it won't be so long before there'll be a badge missing in the district's line-up. Now, I want a prisoner, even if he's only a suspect, and I want him before morning. That's all."

When the lieutenant had concluded his harangue the two files of stalwart, blue-coated men relaxed their rigidity and the midnight roll-call was over. Thirty-nine of the 40 men were morally certain that they could name the arch culprit in the series of burglaries. As for Policeman Callahan himself, he was at the time neither morally or absolutely certain of anything. He was too numbed of wit to think. The unspoken verdict of his silent peers was stretching his soul upon a rack of exquisite torture. As the roll room cleared of men he took up his bundle again and strode back into the snowstorm.

He had hardly pulled shut the door against the violent rush of snow and sleet when Hearn, who with O'Fallon made up the district's complement of specials, darted into the office of the lieutenant.

"Say, look here! Lieutenant," he cried in a voice of repressed excitement, "I've got the goods on Callahan. You know he has been making suspicious trips to a house on Fourth street. We've watched him several times and have spotted the place. He always makes his visits at night, and never enters the place until the street is clear of people. It was his frequent trips to this house that made us suspicious in the beginning.

"Now, when he came in here this evening he had a kit of cracksman's tools. I felt it all over while he was at roll-call, to make sure. I could feel the saw and screw-driver, and the whole bundle rattled like it was full of jimmies and glass cutters. O'Fallon and I want to take a squad down to Fourth street to-night and raid his place."

This last was given a questioning inflection, but it was several minutes before the lieutenant replied. The robberies must be stopped, he knew; yet he was loath to begin a course that would end in the open disgrace of his district. Also in his heart he liked Callahan.

"Go get him," he answered at last, "I guess he deserves it. If he had settled down and gotten married when the rest of us men his age did, he'd have been too busy thinking about his wife and kids to get into a scrape like this. Go get him."

There was little enthusiasm in the squad of policemen that followed Hearn and O'Fallon into the snows of the early Christmas morning. The resentment they had felt against the man they had given the silence was melting into pity. They knew they were closing like a trap upon a doomed felon and the most imperturbable of them felt a sense of rising shame.

At first they waded through the snow drifts as silently as warring Indians. Then one of them fell sprawling as he tripped over some submerged obstruction. He swore a good deal more than he would had his mission been less onerous to his conscience. Someone remarked on the bitter chill of the night. Someone else replied that he didn't see how talking about it was going to raise the temperature. After that they relapsed into a sullen, dogged silence again, and looked the black looks of men who are mutinous. The faults of Callahan were beginning to find their record in the whirling drifts, while his gallant eye and brave heart, which had been all but forgotten, were looming up with a compelling brightness.

True to the calculations of Hearn the squad reached the little house on Fourth street before the miscreant policeman. The virgin drifts before the door had not been disturbed for hours. An alley running between the houses on the opposite side of the street furnished a good place of concealment, so Hearn and the squad retired to await the coming of Callahan. They had not shivered long in their coign of vantage before the quarry appeared, throwing up clouds of the dry snow with his heavy boots and staggering slightly under the heavy bundle on his shoulder.

While he was still several yards from the door of the house he stopped and, with the exercise of as much care and solicitude as he would have shown to a swaddled infant, laid the [illegible] on a doorstep.

[illegible]ess he's got a yegg's outfit in [illegible]nd is afraid the soup will ex[illegible] muttered one of the squad.

[illegible] of the squad's conjec[illegible]ustified by the caution of [illegible] walked about for sev[illegible] to make certain that the [illegible] before opening the [illegible] trice he turned the [illegible]or and went inside.

[illegible] had disappeared into [illegible]rn told off his men in [illegible]rd all the houses approaches. He then beckoned to O'Fallon and tried the door knob. The door had been left open. Stealthily the two men crawled through the darkness of the narrow stairs. They paused to listen when they reached the second floor, but could detect no flow in the silence. Another flight of stairs lay before them. For an instant they flooded it with the brilliant gleam of their pocket flash lamps and then continued their noiseless ascent. As they neared the top of the stairway they saw a tiny glow of light issuing from a keyhole. The manner of men on such a errand is not the imperturbable calm that comes with the light of noon, and their quick intake of breath hissed through their teeth as they paused to reach for their guns. As they stood motionless upon the narrow treads of the stair they heard a voice. It was Callahan's.

"Sure, I'm telling you the truth. Ain't I a sober man? It was right up here at the corner he stops me and he says: 'Officer Callahan, I'm a tired saint, and my job's too big for an old man. You'll have to give me a life in distributing these here presents or some little boys in this town won't get any.'"

Hearn and O'Fallon stood as men entranced as the kindly voice continued:

"'All right,' I responds, 'give me a box of tools for a little fellow I'm just now going to see.'

"'How am I to know he's a good boy?' says Saint Nicholas, kind of fretful, as he goes hunting all over his auto truck for a tool box.

"'Because I, Officer Sarsfield Callahan, knows he is,' I answers him. 'Didn't I find him five years ago tonight, an abandoned baby in an ash barrel?' I says. 'And didn't I carry him to a hospital to be nursed over a cold he catches from being left in a snowstorm when he's only two days old? And when I finds out that the nurse at the hospital gives him my name because she don't know what his name is, don't I take him down here to old Mrs. Mulligan and get her to take him for her own baby? Ain't I both his father and mother?' I says to the saint 'because I finds him in this ash barrel?'

"'Sure you are, Officer Callahan,' he answers back to me. 'Take this handsome box of tools to Master Callahan and say as how I'm sorry I can't come personally—' What! you have to go to sleep while I tell you about Saint Nicholas? Tuck him into bed, Mrs. Mulligan, and I'll slip away home. Mind you never tell anyone about my coming here to see him. If the fellows on the force heard about it, they'd never leave off talking."

Hearn had his eye glued to the keyhole as Callahan handed a little sleeping boy to an old woman. Then he and O'Fallon crept swiftly down the stairs. It was the work of an instant to recall the men posted at the doors and hustle the whole squad away. The report of Hearn and O'Fallon to the lieutenant was brief and omitted certain essentials it might have contained. But it was sufficient to lift the silence from Callahan.

Montenegro and the War

There is nothing more difficult than to preserve a perspective in the midst of a great war. Again and again the mind is distracted from the actual value of the event by some spectacular appeal that it has or by some imaginary value attached to it by the nation which hopes thereby to impress its enemies and the neutrals.

To take the case of Montenegro: If you say that a nation with an area about equal to that of Connecticut and Rhode Island and a population of half a million has been conquered and probably eliminated from the war, it is plain that you are saying that nothing of real importance has happened. Montenegro never possessed an army of the strength of a regular corps, it began the war with only a weak division and its resources in men are exhausted.

On the other hand, if you say that Germany and her allies have conquered another nation, and that now not less than three countries have been swept by the victorious armies of the two kaisers; if you dwell upon the extent of this victory as witnessed by the submission of nations you can easily become the victim of your own words and perceive a triumph which does not exist and has never existed.

The real issue of the war has depended for many months, actually from the start, on the outcome of the duel between Germany on the one hand and France and Great Britain on the other. Austria's mission has been to deal with Russia and the Balkans, and Austria has never been able to perform its mission alone, thus weakening Germany's position in the face of her true foes. Now, in this war between Germany and her western foes the campaigns have proceeded about as one might expect, when regard is had for the superior preparation of Germany and the long time in which Germany had been maturing her plans.

After 15 months 68,000,000 Germans have been able to take from an Anglo-French alliance a little more than 8,000 square miles of French territory—a 25th of France. When this conquest was made France had a little more than a million troops in the field and Great Britain rather less than 150,000. Germany had for use against France and Great Britain combined a little less than a million and a half. To-day Great Britain has a million troops in France and France has on the first line something over a million and a half. On the same front Germany has between 1,500,000 and 1,750,000.

To-day French and British reserves exceed all remaining German reserves and thus insure to France and Great Britain a permanent superiority in numbers on the Western front. With the help of the munitions plants of the United States, France and Great Britain have overtaken and passed Germany both in the manufacture of munitions and of artillery. In man-power and gun-power Germany is now and will remain for the period of the war at a disadvantage.

Taking now the case of money: Before the war the combined wealth of France and Great Britain was not less than twice that of Germany, and the reserves of capital were even greater. Germany was in the process of extending and developing her plant and was putting her earnings back into her plant. France and Great Britain had great investments all over the world, from which they drew and continue to draw revenue. They are now from time to time disposing of them to get new supplies to run the war.

Against the 8,100 square miles of France that Germany has acquired she must set the complete loss of the use of the sea, and the loss of the whole colonial empire that she has built up in the last generation. The latter is a consideration for the future, but the loss of the use of the sea amounts to a complete paralysis of her industry, so far as the outside world is concerned.

The population of the portion of France occupied by Germany did not exceed 2,500,000 before the war. German losses as tabulated by German official reports show a greater casualty total than this. The population of France and Great Britain before the war was 86,000,000 in Europe, plus not far from 15,000,000 whites in their colonies, and their combined casualties do not exceed the German.

What we have is the plain fact that before the war the resources of France and Great Britain in men, in money and in all save preparation were incomparably greater than those of Germany. Thanks to superior preparation, Germany was able to strike first and to take a small portion of French territory. But sixteen months ago her progress in the west was brought to a halt and she has never been able to move forward again. Since then the latent resources of Great Britain and France have permitted them to overtake and pass Germany, and British sea power has enabled the Western Allies to deprive Germany of all commercial activity—to paralyze her foreign trade.

If observers would remember the history of the civil war, of the Napoleonic wars, and not fix their attention upon the minor incidents as contrasted with the larger facts of the present war, they would perceive that the conflict is proceeding about as all similar conflicts have proceeded, and that such differences as there is inures to the advantage of the enemies of Germany. Between midsummer of 1805 and the spring of 1807 Napoleon defeated Austria at Ulm and Austerlitz, Prussia at Jena and Auerstadt, Russia at Friedland. He compelled Austria and Prussia to make peace on his terms, and by threat and artifice persuaded beaten Russia to become his ally at Tilsit.

In the American case Bull Run was fought in July, 1861, and then followed the long series of defeats in the Peninsula, at Second Bull Run, at Fredericksburg, at Chancellorsville, before we came to Gettysburg in July, 1863, and superior resources and numbers at last began to tell. Now, nothing is clearer than that the German success has not approximated Napoleon's and that Allied defeats have not compared with those of the Northern armies in the first two years of our conflict.

All that history can teach us points to the fact that unless the smaller nation, the country with fewer men and smaller resources, can achieve its victory while its superiority in preparation is decisive, it is beaten, and the only question is the length of time that the war must run before exhaustion strikes it down. In the case of Napoleon not even the decisive victories of the earlier years of the empire were sufficient. Louis XIV. also failed, despite his enormous advantage in preparation.

The real truth about the great war is that day by day and week by week the nations which have every advantage in resources, numbers and sea power are bringing up a greater part of their strength, and the nation which with smaller ultimate resources was able to bring a greater strength up in the opening days, is falling behind, by reason of approaching exhaustion. If Great Britain or France should decide to stop the course of the war would be changed, but aside from this there has never since the Marne and the Yser been any real question of the outcome of the war.

Germany has already failed in her main object; she planned to defeat France completely and take from her a tremendous indemnity; she planned to turn her armies to the East and dispose of Russia. She was then prepared to challenge Great Britain, her real rival and her true enemy. She planned to dominate not alone Europe, but the world. To-day she is fighting not Great Britain alone, but Europe, with only weak allies, and on no side is there any promise of a victory.

The decision of the war, then, has been had. It could be changed only by a changing of the alignment of the contestants, and history does not show that in tremendous struggles like the present such changes are to be expected. Germany is not exhausted, but exhaustion is coming in her case first because she is inferior in all resources and because she made greater earlier drafts upon her strength. The war is proceeding quite as normally as any disease whose periods and progress have already been established by science. The outcome is not in doubt and has not been for many months.

As for unlucky Montenegro, its miseries are certain to excite sympathy, its defeat to make the German gazettes talk, but it has no meaning in the war. Cattaro and the Montenegrin coast were a part of the empire Napoleon resigned at Fontainebleau, but possession on the Adriatic coast did not postpone or prevent decision in Champagne and Ile de France.—New York Tribune.

His Trouble.

Tommy's Aunt—Won't you have another piece of cake, Tommy?

Tommy (on a visit)—No, I thank you.

Tommy's Aunt—You seem to be suffering from loss of appetite.

Tommy—That ain't loss of appetite. What I'm sufferin' from is politeness.

Revised Versions.

Handsome is that handsome is made up.

Those who live in glass houses should always have the largest siege guns.

Necessity is the mother of pretension.—Life.

"What are your objections to me as a son-in-law?" "To tell you the truth," replied Mr. Comrox, "I haven't any serious objections. I may seem a little reluctant. But if you get into our family and don't like us, I don't want you to blame me."—Washington Star.

ENOCH ARDEN OF THE WAR

English Soldier, "Missing," Returns to Find Wife Another's.

"What Could I do? Ah've Just Coomed Away!"

Out of the lists of the "missing" have arisen a few tragedies that recall Tennyson's haunting poem of "Enoch Arden," the shipwrecked and marooned sailor, given up as dead, who returned to find his wife remarried.

The other day I met one of the soldier Enoch Ardens.

It was in a train. I noticed him because, all through the long journey, he sat silent and statuesque, staring with unseeing eyes out of the window. The car attendants came and summoned us to lunch, but the lonely, crippled soldier sat on. Other passengers brought out bags of sandwiches or fruit, but the lonely soldier ate nothing. One jovial fellow passed him food with rough hospitality. "You must be hungry, old mate," he urged. "No, I'm not hungry, thanks," said the soldier leadenly. The other passengers alighted, and I was left alone with him.

Suddenly, above the roaring of the train, I heard the silent soldier speaking to me.

"I've got to talk to someone—and tell someone," he said, slowly and heavily, "or else I shall just break." I looked up to him, leaning towards me in the dim light of the waning afternoon, and the stony eyes were on me with a look of appeal.

As lightly as I could I asked "What's the trouble, old man?"

And then he told me.

He was a Sunderland man, a riveter in the shipbuilding yards, and an army reservist. When the war broke out he was called upon the first mobilization. He had been married only four years, had two children, and lived only for them and his wife. He was sent to France with the first expeditionary force, with the Gordons, and fought in the battle of Mons. He was severely wounded and captured just outside Bertry on August 26, 1914. After lying on the field all night he was brought into a captured British hospital in a school building at Bertry by a British R. A. M. C. prisoner, whose party were told off by the Germans to collect British wounded. He remained there for a week, treated by captive British medical officers under German supervision. As soon as he was recovered enough to travel—according to the German idea of a wounded prisoner's endurance—he was sent in a batch of thirty other British prisoners on a four days' journey to Duisburg, on the Rhine. He nearly died on the journey, was again placed in hospital, and was sent home by the German authorities as "unfit for further military service" last October.

His fellow-British prisoners were allowed to write home a month after their capture. For some reason he could not elicit this man was forbidden to write, and his fellows were forbidden to mention his name in their letters. If ever they tried to do so the letter was torn up by the Germans and they were threatened with punishment.

His name was never furnished to the British authorities by the Germans, and he was gazetted as "missing." I take up the tale of the war Enoch Arden in his own words.

"Ah left Duisburg on October the first. Ah couldna' believe it was true when the German commandant chap coom an' told me I was to go. 'Why, gang away, man,' I says, 'whose leg are you pulling?' The commandant he say fiercely, in a sort of 'arf English, 'Ged your glose on in den minudes. You go England.' An' I did dress in ten minutes an' all. Twenty other poor broken chaps went with me, an' some of 'em didn't 'arf laugh and cry in turns. At a place called Aachen (Aix-la-Chapelle) we were joined up by a lot more British; then we went to Leegee (Liege), Antwerp, and then Rosytarl (Rosendaal) or summat like that, in Holland. An' it didn't 'arf churn us up when we crossed that frontier and saw the Dutchies smiling at us. No smiles ever in Germany.

"We crossed in a rough sea, but 'ad it been ever so rough I was too sick with home-sickness to 'ave any other sort. I thowt an' thowt o' my wife and bairns, an' the moment when I would walk oop Coronation street in Sunderland and turn oop that other little street where yarm (home) lies. An' after we landed at Tilbury they told me to go to a hospital in London for one night, an' in four days I got my papers straight, and they said 'Ye can gang yarm now.' An', all the time, I thinks I won't telegraph the wife I'm coming. I wanted to just walk in t' house like and say "Ah've coom."

"Ah 'ardly knew how to sit still in you train that day to Sun'land, master. Ah've sat still enough to-day though. Just as 'twere gettin' dark—just at time she used t' make me coop o' tea—I stops oop t' door—all shakin'—and turns t' handle. Ah walks in, tremblin' so ah could 'ardly breathe—straight into kitchen."

The lonely soldier here stopped and bent his head. He did not speak for a few minutes, and we both sat still in the roaring train. When he spoke again he looked up and his eyes were dry, but stonier than ever. "Master," he cried, "my Mary has married again. She thowt I was dead. She had no man to keep the yarm. Don't blame her," he said hoarsely, "a yarm an' a woman wi'out a man is a poor thing. I don't blame him, master. Both were certain I was dead." He was silent again.

"What did you do?" I asked gently.

"Ah've don nowt," he cried brokenly. "What could I do. Ah've just coomed away. An' my heart's broken—an' I know Mary's is too." T. H.

ARMY BUGLES.

Fashioned From Sheets of Copper by an Ingenious Process.

From start to finish the making of an army bugle is a process of much ingenuity and interest. A bugle may not at first sight present a striking resemblance to its cousin, the coach horn, but one is practically a curled up version of the other, for before the bugle is bent into shape it consists of a narrow tube fifty-one inches long.

In the first stage of manufacture the bugle is cut out of sheet copper and rolled into two thin cylinders, technically known as the "bell" and the "branch." The narrow tube, which is the "bell," is gradually shaped out on moulds until the opening is the regular four inches in diameter. It is then "spun" on a wonderful machine, and an expert workman takes the rough edges off the copper.

Both sections are afterward filled with molten lead preparatory to the bending stage, and it is this solid stuffing which prevents the tube breaking in the process and allows it to keep its shape. The expert workman, with the aid of a formidable lever and hammer, bends the bugle into the familiar shape, the lead being subsequently melted out at a charcoal furnace, after which the instrument is sent off to the polishers.

One of the most intricate parts of the bugle is the mouthpiece, which is made of nickel silver and turned out on a special lathe. With the mouthpiece fixed the instrument is ready for the testing room.—Pearson's Weekly.

Under the Second Empire

(By John Turnbee.)

Henry Hitchcock after being graduated from a medical college in America went to Paris, which was then the centre of medical science of the world, to complete his education. That was in the days of the second empire, and Paris was a gay city. An acquaintance with one of the American branch of the Bonaparte family who had been summoned by Napoleon III. to join him on his accession to the throne of France gained Hitchcock an introduction to the court circle.

One evening during a ball at the Tuileries the American was sauntering through the apartments, crowded with the new aristocracy of France. A couple, an elderly man, highly decorated, and a young girl, approached him.

The man was coarse looking; the girl was comely and refined. They seemed ill matched, and, while the man appeared from his appearance to court the girl's favor, she was plainly ill at ease in his company. In advance of Hitchcock walked a young man, who on meeting the couple bowed ceremoniously. His salute was returned by a glance from the girl that clearly bespoke love. Her companion returned the salute with a malignant scowl. Since the young man's back was toward Hitchcock, his face was not visible to him.

The doctor drew his inference, which was by no means doubtful. The older man had come between the young lovers.

This was the theme of the story; the story itself was not manifest.

The next day Hitchcock's Bonaparte friend called upon him and asked him to act as attendant surgeon at a duel. The principals were of high rank, one of them being an intimate friend of the emperor. The affair was to be kept secret, and Hitchcock was summoned because he was a foreigner and there was less danger of its leaking out through him than a Frenchman. He agreed to serve, promising to be present at a spot in the Bois de Boulogne the next morning at dawn.

On reaching the ground he found the principals masked. They fought with foils, and one was severely wounded. After binding up the wound the doctor got into a carriage with his patient and drove to his apartments.

Unmasked, the wounded man revealed the face of a person of twenty-one or twenty-two years of age. Hitchcock watched over him during the morning, when, believing him to be out of danger, he left him. Returning at nightfall, he surprised two women, one of whom was kneeling by his patient's bedside.

Her figure was very youthful, while her companion, who stood apart, appeared to be an elderly person. The latter wore a mask on her face, the former had taken one off, but hearing the doctor's footsteps hastily replaced it. Then, rising, she turned, hesitated, put out her hand to the patient as if for an adieu, when, noticing a sudden pallor come over his face, she started. Hitchcock saw it, too, and sprang to the bed, pulled down the covers and discovered a fresh hemorrhage.

"A cloth!" he cried.

Whether through excitement at receiving his visitor or from other cause the wound had begun to bleed afresh. The doctor stopped the flow, then turned. A young girl whose mask lay on the floor stood before him.

She was the girl he had noticed at the Tuileries ball.

She gave no sign of having seen him before, and he controlled an impulse at recognition.

"It's all right, doctor," said the patient. "Since you have come to know me and now have seen the face of this young lady I suppose we shall have to take you into our confidence. When one possesses half a secret it is unsafe to keep from him the other half."

"Not now," interrupted the doctor, "wait till you are entirely out of danger. Your secret is safe enough as it is."

The young man was Count Victor Deville, a scion of the old French nobility, and was the person who had saluted the couple at the Tuileries ball. He was in love with Louise, the grandniece of Napoleon I. The man with whom the count had fought was the Duke de ——, a Bonaparte title. The emperor had arranged a marriage between the duke and Louise, his grace having been of great use to him in executing the coup d'etat by which he had seized the crown. Napoleon was not averse to marriages between the members of his family and the old nobility of France, but the duke had set his heart on Louise and would not be gainsaid. The count and the duke had naturally become antagonistic, and the antagonism had ended in the duel. Both principals feared the emperor's resentment that would result if he should hear of the encounter, and arrangements were made to keep it a secret in case there should be no fatal result. Louise heard that her lover was dangerously wounded and with a friend visited him secretly.

The count recovered, and about the same time the war between France and Prussia broke out. The lover went to the war, and on his return, the emperor having been dethroned, there was no one to oppose his marriage with the girl he loved. The Napoleonic dynasty has never since been restored to the sovereignty of France, nor have the royalists. The pair lived long in France, and their grandsons are now officers in the French army.

There is much question in Iowa as to who own the dried beds of lakes which the State recently sold at auction. The upshot of it is that the State will turn the money over to the county, but require the latter corporation to give bond for the re-deliverance of the money in case the title proves to have been vested in the Federal government.

Chats With the Doctor

BY A PHYSICIAN

STOMACH—DIGESTION.

As everyone knows, the human body is a machine, of which the driving power is a mysterious something called Life. Nobody can tell or understand in the least what that something is. We realize that it is a force, that is all; and reverently regard it as the breath, or spirit, or essence of the Creator. Perhaps some day we may understand more about it; but at present all the speculations of all the most learned scientists on earth amount to nothing more than empty babbling. There is, however, every reason to believe that all life is one: that the meanest animal or insect is guided by the same force that moves ourselves.

All we can humanly do in the matter is to secure the proper working of the machine, and the right, easy movement of all its component parts. The stomach ranks first among these. It is the principle fire or store for converting the necessary fuel into motive force. When its functions are in any way impaired, nothing can go right. Hence it is before all things important to secure its health.

The stomach secretes an acid material called the gastric juice, which converts the food swallowed into assimilable substances termed peptones, which can be readily absorbed into the blood, and so keep the wheels of machinery in motion. This it does in response to impulse from the nerve-centres. Anything which affects the proper balance of the nerves—of the cerebrum, the organ of mind, more particularly—checks, and probably stops digestion by the stomach. And so we find that dyspepsia or indigestion is brought on most commonly by anxiety or worry in some shape. You may safely say that 90 per cent. of the cases of dyspepsia you meet with are brought on primarily by worry.

The moral from that fact is that you should eschew worry as much as circumstances will permit. In these days, and especially under the heavy shadow which now overcasts us all, no one can wholly escape. But still, by refusing to brood over what cannot be helped, and by resolving not to make molehills into mountains, not to magnify trivial matters into big ones—a besetting sin with women most of all—we can always do a great deal to prevent the very common trouble of indigestion.

There are, of course, other causes than worry; and very numerous contributing factors. If you take improper food, which disagrees with you, you will naturally be dyspeptic, and if you habitually suffer thus it will be your own fault. Alcoholic drinks, taken at wrong times, and in immoderate quantities, count more as causes of indigestion than anything else—at least among men; whereas women sin, in exactly the same direction, by drinking tea with inordinate frequence. It is nearly always wrong to drink alcohol in any shape, except with a meal. I forget whether it was a Scotchman or an American who made the very practical and pregnant remark: "It is not the drinking that kills; it is the drinking between drinks."

PEPSINE.

By treating the mucous membrane of the stomach of a calf or pig chemists obtain a powder called pepsine, which carries with it most of the active principles of the gastric juice. By taking this with a meal you cannot digest—and such meals should be casual only—you obtain artificial digestion with great ease. Only two things have to be considered in this connection. Good pepsine is very expensive, when given in doses that are of any value. And I suppose for this reason, the doses that doctors prescribe or chemists advise are usually far too small to do you any good whatever.

Pepsine should be taken only at odd times, to help the "lame dog over the stile." Keep a little by you, the best you can buy, and made by a good firm. Then take a level teaspoonful when you find yourself in trouble. It is best to obtain the powder, and not to be seduced into buying lozenges, tabloids, or similar preparations; in which heat may have possibly deteriorated the quality of the particular drug involved.

REMEDIES FOR DYSPEPSIA.

If there be severe pain after meals your best remedy is 15 grains of bismuth carbonate, taken with an ounce of infusion of gentian an hour before the meal. In a mild case you may take 15 grains of bicarbonate of soda instead of the bismuth.

Should constipation prevail, you should also take a mild aperient—say 5 grains of blue pill every night for three nights; and abolish that difficulty by plenty of fruit, plenty of vegetables, and proper outdoor exercise. In any case, find out what causes your trouble, and do your best to avoid that. Go early to bed, cultivate a calm mind and tranquil nerves, and lead a wholesome, natural life.

MEGRIM OF MIGRAINE.

There are headaches and headaches. The title above refers to a peculiar variety of the affection, which attacks only persons highly neurotic or coming from a neurotic family, in the form of a more or less sudden seizure, analogous to the epileptic fit. The sufferer has violent pain across the forehead; or it may be in one temple. Concurrently he or she becomes temporarily blind—of one eye, or even both. Some see peculiar zig zag curves called "fortification outlines." They feel very sick and bilious, but rarely vomit. When one temple only is affected, the ear on the same side becomes red and hot.

The "cure" for an attack of well-defined migraine, with blindness or other visual disorder, is guarana, the powdered seed of a Brazilian plant, Paullinia Sorbilis. You take a teaspoonful in milk or plain water every three hours. The affection may be more or less blended, however, with headache arising from internal derangements—the so-called "bilious attack," and may then demand similar treatment. Sam Weller, in "Pickwick," is described as putting his head under the pump for one of these. That kind, under the rule of grandmaternal government, presumably or soon will be, extinct.

OTHER FORMS OF HEADACHE.

Most headaches are of nervous origin, and follow over-excitement [illegible] some similar form of nerve stress. Th[illegible] best all-round remedy is phenazo[illegible] (the old antipyrine.) You take fr[illegible] 10 to 15 grains of this, dissolved i[illegible] wine-glassful of water. Usually it [illegible] like a charm; if not there is some thing radically wrong with you—attack of fever coming on, or something like that. You may repeat [illegible] dose in two hours, but not again. A[illegible] be sure you get the phenazone ma[illegible] by a reliable wholesale firm of druggists.

Habitual headache often proceeds from habitual constipation. For the[illegible] take a dessertspoonful of Epsom salts in warm water every morning before breakfast.

Bromide of potassium is useful in headaches associated with the epileptic tendency; as in some others. The dose is [illegible] grains in a tumbler full of water every three hours, until the headache ceases.

Always sleep with your bedroom window a little open, and your head well raised on the pillow.

LIFE IS ALWAYS DYING.

And Just as Soon as We Cease Dying We Cease to Live.

Living is a continuous process of dying. When we cease to die we cease to live. One can readily understand this by means of a very concrete example. Suppose you arise some cold morning and find the fire in your furnace has "gone out." It will do no good to utter mulleious adjectives against the poor furnace. Just philosophize as follows: "My furnace has ceased to die. In other words, it has ceased to consume that very expensive article called coal. The continual consumption of coal is fire or life in the furnace. When the consumption or dying ceased the fire or life ceased." Accordingly y[illegible] make the furnace "die" som[illegible]

What is true of the furna[illegible] of ourselves. All organic li[illegible] a state of continuous de[illegible] and rebuilding or a co[illegible] of dying and living. As[illegible] position ceases reconst[illegible] ur. In common terms, [illegible] cease dying we cease [illegible] poisons, if swallowed b[illegible] ing, destroy life by [illegible] decomposing or dying pr[illegible] is necessary for life. When [illegible] the system a chemical comp[illegible] formed which resists decomposition. Upon examination of the dead body it will be found that putrefaction does not take place. With these poisons in the body there is no process of dying; hence there is no life.

The same truth holds in regard to our mental and moral existence. If we cease to struggle or think and are content to live a purely animal life the activity of our brain powers quickly ceases and we are mentally dead. Struggle, action, aspiration, is dying, but it means living. Introduce the poison of vice and there is a cessation of mental life as fatal as that caused to the body by arsenic.—New York American.

PLENTY OF CALLERS.

(Kansas City Journal)

"Why aren't we in society like those people across the street?" grumbled the citizen who was spending an afternoon at home. "That man's salary is no larger than mine."

"What makes you think they are in society?" asked his wife.

"The string of people going up the steps. At least 25 people must have left cards."

"They didn't all leave cards," remarked his wife quietly. "Most of them left bills."

Was All Choked Up
Could Hardly Breathe.

BRONCHITIS
Was The Cause; The Cure Was
DR. WOOD'S
Norway Pine Syru[illegible]

Mrs. Garnet Barr, North August[illegible] Ont., writes: "I caught a dreadful [illegible] going to town, and about a week af[illegible] I became all choked up, so I could ha[illegible] breathe, and could scarcely sleep [illegible] night for coughing. I went to [illegible] doctor, and he told me that I was ge[illegible] bronchitis. My husband went to [illegible] druggists, and asked them if they h[illegible] cough medicine of any kind that t[illegible] could recommend. The druggist brou[illegible] out a bottle of Dr. Wood's Norway P[illegible] Syrup. I started using it, and it c[illegible] pletely cured me of my cold. I [illegible] tell you how thankful I was to get [illegible] that awful nasty cold. I shall a[illegible] keep a bottle of Dr. Wood's Norway [illegible] Syrup on hand, and I shall only be [illegible] glad to recommend it to all others."

Dr. Wood's Norway Pine Syrup h[illegible] remedy that has been on the market [illegible] the past twenty-five years, and we ca[illegible] recommend it, without a doubt, as be[illegible] the best cure for coughs and colds th[illegible] you can possibly procure.

There are a lot of imitations on th[illegible] market, so when you go to your druggi[illegible] or dealer see that you get "Dr. Wood's;" put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

The genuine is manufactured by The T. Milburn Co., Limited, Toronto, On[illegible]

Use MILBURN'S
LAXA-LIVER PILLS
FOR A SLUGGISH LIVER.

When the liver becomes sluggish it is an indication that the bowels are not working properly, and if they do not move regularly many complications are liable to set in.

Constipation, sick headache, bilious headache, jaundice, heartburn, water brash, catarrh of the stomach, etc., all come from a disordered liver.

Milburn's Laxa-Liver Pills stimulate the sluggish liver, clean the coated tongue, sweeten the obnoxious breath, clean away all waste and poisonous matter from the system, and prevent as well as cure all complaints arising from a liver which has become inactive.

Mrs. John V. Tanton, Birnam, Ont., writes: "I take great pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad, I would have severe headaches, but after using a couple of vials, I am not bothered with them any more."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

MEANING THE COLT.

If the fowl has been properly cared for during the summer months, being fed a little grain in addition to the roughage and dam's milk, weaning time will be merely a matter of separation.

The time of weaning will vary with conditions, but the best rule is to allow it five to seven months as the time will be merely a matter of separation.

The time of weaning will vary with conditions, but the best rule is to allow it five to seven months as the work of the mare varies from heavy to light, but if possible don't wean the foal before four months.

The important stage of the youngster's life is now at hand. Separation from the dam must be complete to be satisfactory, and the colt kept in a small lot fenced either with boards or poles. While all colts may not run into the wire, the one that tangles itself in the wire is invariably the most valuable.

The weaning that is most successfully accomplished is the one through which the colt suffers the least setback in growth. If at weaning time the colt can at its full allowance of grain, 2 to 3 pounds of oats or 1 1-2 pounds of oats and 2 pounds of ground barley mixed together with plenty of clean alfalfa or timothy hay, it will continue growing and cease to fret for its dam.

Weaning time is the best time to gentle the youngsters. Catch them, handle carefully, halter them and teach them to lead. Also inspect their feet and gentle them in regard to handling the feet. If the colts are carefully handled a few times each day for several days, it will greatly simplify the breaking later on.—R. Bentley, Colorado Agricultural College, Fort Collins, Colo.

CARING FOR THE COLT IN WINTER.

As the pastures dry up and cold weather approaches, the question of how to care for the growing colt through the winter confronts the farmer. Many colts will be taken from pasture with a goodly store of fat, only to be turned out to a straw pile for feed and shelter, and will come out next spring lighter in weight than they are this fall. On the other hand, not a few colts may be ruined by heavy feeding in stalls where they cannot take exercise.

The ideal shelter for colts is a tightly built shed, open to the south, where the animals may go in and out at their own pleasure, and where they may have the run of a good big field for exercise. Idle farm horses can best be sheltered in the same way. A dry shed, protected from cold winds, snow and rain is all that is needed.

Two parts of oats (preferably crushed) and one part of bran makes a very suitable feed for growing colts. In cold weather a little corn may be added not to exceed 25 per cent. of the ration. If clover or alfalfa is used as half of the roughage ration no oil meal will be needed. But if the roughage consists of wild hay or corn stover about 8 per cent. of oil meal should be added to the grain ration. Where oats is high in price and barley is plentiful a ration of crushed barley 60 per cent., bran 30 per cent. and oil meal 10 per cent. should give good results.

There is a little danger of overfeeding a colt if it is properly exercised. A colt should receive at least one pound daily for each 100 pounds of live weight, and if out in the cold a little more may be used to advantage.

Growth can be made more rapidly and cheaply during the first year than [illegible] time, and feed should not [illegible] at this time.—J. S. Mont- [illegible] University Farm, St. Paul.

[illegible]TUTE FOR BUTTERFAT.

[illegible] best way to feed the calf [illegible] it to run with the cow. [illegible] thing like its mother's [illegible] it grow rapidly. But [illegible] the advent of the separator it [illegible] become a common practice to [illegible] ate the butterfat and feed skim [illegible] to the calf. This calls for a re[illegible] substitute for proper nourishment. In preparing this substitute it is well to consider the composition of whole milk. Chemical analysis shows that whole milk contains one pound of protein to every 3.5 pounds of carbohydrates and fat combined. This, then, will have to be our standard for the calf rations. The average nutritive ratio of skim milk is 1:1.9. Taking the adopted standard ratio of 1:3.5, we find that something wider than skim milk will have to be used. In making up a calf meal there is nothing better than unbolted corn meal, ground oats and wheat bran. This gives us the following proportion:

	Lbs.
Corn meal	20
Ground oats....	15
Wheat bran	14
Skim milk	75

Mix the ground feed together and give the calf two parts of this to nine parts of skim milk. The main thing is to get the calf to eat it. The best way is gradually to introduce the substitute till the whole amount is eaten. This combination will be found thoroughly reliable.—E. W. Good, in Prairie Farm and Home.

Keep The Toes In Your, Harness

Keep it strong and good looking with

EUREKA HARNESS OIL

Makes harness last longer and look better.

Dealers Everywhere

NOTES.

An experienced horseman gives this hint: To make a new horse collar come to a perfect fit, soak it overnight in a tub of water, buckle it on the horse next morning and go to work. It will soon adjust itself to every part of the shoulder, and thereafter be as comfortable as an old shoe.

Potatoes may be used for feeding cows, horses, sheep and pigs, but they are best adapted for pigs. To secure the best results for swine, according to a Government stock-feeding expert, the potatoes should first be cooked and then made into a thick mush mixed with corn meal or other grain. If skim milk is added the value of the feed is increased. In feeing potatoes the feed is increased. In feeding potatoes to one peck should be fed to start with. They should be given raw and should be run through a root cutter, to prevent choking the cows. An excessive feed of potatoes to a dairy cow is liable to cause scours, but as much as one-half bushel per cow per day has been fed without bad results. In addition to the nutrients contained, potatoes give succulence to rations, a factor of importance in feeding dairy cows.

Farmers have long known that skim milk is a profitable hog feed, but they have had no means of knowing how this compared with grain. Experiment station tests have shown that five pounds of skim milk are equal to one pound of grain for pigs.

A Buffalo live stock commission dealer says that the hog weighing from 160 to 190 pounds is the most profitable. "If I were raising swine," he says, "I should make it a point to turn them into money as soon as possible and have others coming on in their place."

Whether you realize it or not, your plans and methods are imitated by your neighbors. A successful farmer has the satisfaction of helping his neighbors by helping himself. The unsuccessful man may be leading others to fail. A few selfish people may not like to see you succeed, but most people are glad to have neighbors who do great things, and very few are so selfish as not to be willing to follow a successful example.

A good many fruit trees are set out every year and allowed to just grow in their own way and fashion, without cultivation or pruning. This is especially true on village lots, grain and dairy farms. And it is also true to some extent in the fruit belt, where fruit culture has developed to a high state of efficiency.

No farmer should make the blunder of breeding to a nondescript sire.

FIGHTING BY NIGHT.

"A nocturnal attack on the firing line looks like an exhibition of fireworks magnified a thousand fold," says a writer in the November Popular Science Monthly and World's Advance, describing the various devices used by the warring armies to illuminate the battlefields.

"At the first shot in the blackness brilliant searchlights, mounted on motor trucks, criss-cross the battlefield with their blinding shafts of light, confusing the attackers and exposing them to a death-dealing fire of guns and rifles. A sound like a giant skyrocket is heard, and over the opposite trenches a huge rocket bursts, and, descending slowly under a parachute, an incandescent ball throws down a fan of light, which illuminates the surrounding territory for several minutes. Before it goes out others take its place, keeping the field under a brilliant light during the entire engagement. A glance down the length of the line reminds one of the drop lights of the stage, magnified a thousand times. As far as one can see these lights are dropping, shedding their lights the better to allow their makers to kill.

"The whirr of an aeroplane's propeller is heard overhead. Another danger is added to the melee, and bombs drop in rapid succession from the swift machine. The searchlights flash upwards, sweeping the sky, and finally focus their pencils of light upon the fragile, flying thing. One beam holds the range, while the rest return to the battlefield. Guns fire in quick succession and a series of fireballs chase across the sky. The anxious gunners follow their shots with their eyes, only to see them fall wide. By watching the course of the illuminated projectile, they are sometimes able to reach their mark, and the aeroplane crumples and falls to earth.

"From three-legged standards, much like our own skyrocket holders, rockets are shot out over the field and explode in a great glare of light.

"The soldiers defending their trenches place small grenades in the barrels of their rifles and, resting the butts against the ground, pull the trigger. There is a violent recoil, and an illuminating bomb is shot, to explode over the heads of the attackers and bathe them in light for nearly a minute."

MEAN TRICK.

(Judge)

Maud Willis—So Percy and Claude are both crazy about you?

Bess Gillis—Yes, and they have become the most bitter enemies over it, too.

Maud Willis—Indeed?

Bess Gillis—Yes. The other night when Percy was calling, Claude bribed the milkman to come at 11 o'clock in the evening and to be sure to have father hear him.

Mother who pays the bills—What are all these charges on the Country Club bill—To Tom Collins? "That's all right, mother. He—he's my caddy. —Life.

THE POULTRY WORLD

CHEAP STOCK SPELLS FAILURE.

A few years ago, in the advancing poultry boom, the price of stock in some cases was above its true value. When the boom days ends, a reaction in prices set in, and with the so-called utility craze starting on its boom, prices fell to figures far too low, with the result that many beginners yet uneducated in the true value of good stock purchased much of the cheap bargain counter fowls, which were little more than culls. The outcome of stock of this kind can have but one result—failure. To-day the purchasers of poultry are asking for stock at figures far below what good stock is worth, with a result that the so-called utility poultry keeper has obtained a trade on cheap stock.

The beginner who purchases cheap stock has no one to blame but himself, for it is utterly impossible for any poultry breeder to properly handle the flock, trap-nest the pullets each year or determine the future breeders, all knowledge in the art of properly mating the flock for best results, in so caring for the flock that it remains healthy; the extra poultry buildings required to handle the breeders; the advertising bills to pay—for advertising must be resorted to that poultry keepers can know of the merits of the fowls, all this and much more will show that no sane poultry keeper could afford to sell stock at but a few cents above the market quotations. Yet that is what many beginners expect, and in the bargain-counter seeking they find stock that in a measure meets their ideas of poultry value, but cannot in a majority of cases give lasting results; nor does it meet with the expected requirements of the purchaser.

In plain words (since the reaction of the poultry prices has set in, above what was received in the boom days, which granted in some cases was too high) the beginner is asking the impossible in demanding good hatching eggs, day-old chicks, or breeding stock at a figure far below for what they can be produced. Haphazard bred stock can be purchased at any time for almost market quotations, and the purchaser will obtain the full value for the price paid, but seldom can this kind of stock give the returns expected by the purchaser, who has read from time to time of the producing powers of the hens.

Proper housing, feeding and care play important parts, but the foundation back of it all, the first essential, in fact, toward the best results, is in proper breeding. Hence greater care should be observed by beginners in their efforts to obtain as good a foundation in the way of breeding stock, whether it be from the results of eggs for hatching, day-old chicks or stock.

Unreasonably low prices will not do the industry any good, for the poultry breeder cannot possibly sell high-grade fowls for low figures, and the beginner obtaining any other than the kind of stock that must make good is on the road to failure. The trend today should be for a better standard-bred fowl, one that is a good producer, and looks like the breed it is named for. At fair prices the beginner can obtain results from the stock purchased. At so-called bargain-counter prices the result will be failure.

FOWLS NEED MEAT.

A large part of the high-quality egg is what is known to science as protein, and protein, while found in greater or less quantities in most all poultry feed, including the grains, is in shape to be made best use of by the fowls in animal material, like meat or milk. This is why poultrymen buy so much meat scraps and why those who are in a position to do so furnish considerable milk. It is easy to figure out a ration in which there is considerable protein without furnishing either meat or milk, but experiments have shown conclusively that vegetable protein will not do so much to enable hens to lay as animal protein will. Therefore, provide meat scrap or fish scraps, or plenty of milk. Even when milk is provided liberally, a little of the meat food will usually add to the good results.

NOTES.

Book your order now for stock, day-old chicks or eggs for hatching. In spite of the advocates of the late hatched chick, the average beginner will find that the early hatched chick will make the winter egg producer and the best breeder.

The outlook for a good poultry year is brighter. Eggs and poultry have kept at a fair figure, and the price of poultry feeds, while still above normal, and may keep for a time at least, at around high watermark, the poultry keeper is yet unable to place the balance of the right side of the ledger.

DON'T GO INTO CONSUMPTION--CURE YOUR CATARRH NOW!

When your throat rattles, your lungs and chest are sore, your throat is stuffed with cold—don't fear consumption—use Catarrhozone and get well. It clears the throat, cures hacking, relieves tight chest and soreness in the bronchial tubes. To clear away Catarrh of the nose, nothing could be better. Catarrhozone is nature's own remedy. It heals and soothes—cures every form of throat, lungs, or bronchial trouble. Prescribed by many specialists and used by thousands every day. Get the dollar outfit. It lasts two months, and is guaranteed. Small size 50c; trial size 25c. Sold everywhere.

THE CIGARETTE BEETLE.

This Tough Little Pest Will Flourish Even in Cayenne Pepper.

A tiny but withal practically omnivorous little fellow, the cigarette beetle is known to science as Lasioderma serricorne. It is common in nearly all tropical and subtropical countries, and as a sample of its catholic tastes, we may mention that it will breed in raisins, rhubarb, cayenne pepper, rice, ginger, dried fish, upholstery, ergot, turmeric, books, cane work, gun wads, liquorice, saffron, belladonna and in pyrethrum powder strong enough to kill cockroaches—a varied catalogue to be sure. It is chiefly as a pest of tobacco, in various forms, however, that the cigarette beetle has become notorious. The greatest damage is done to the wrappers of cigars and cigarettes, through which it eats small holes.

The larvae live upon the tobacco leaf, and a very interesting fact is that the size of the adult beetles, into which are larvae eventually develop depends not only on the quantity, but also on the quality of tobacco that has been devoured in the immature stages. Experiment has shown that in every case beetles obtained from selected cigars were double the size of those from low grade tobacco. It will be remembered that the cheese "skipper" is partial to the better cheeses; similarly, the cigarette beetle is somewhat of a connoisseur, for given a free choice cigarettes are always the first to be infested, while cheap grade tobacco and cigars kept in the same room will remain uninfested for years.

Apart from the actual destruction of the tobacco leaf, the larvae spoil its aroma and accordingly depreciate its value; it is some consideration to know that the adults themselves do no damage. This little beetle is most difficult to eradicate, and, to that end, an experimental X ray machine was specially built at great expense in America. The machine was to be capable of "sterilizing" cigars, on a commercial scale, at the rate of 10,000 a day; voltages of 61,000 to 70,000 and exposures as long as an hour were tried without the slightest effect upon eggs, larvae, pupae or adults — the experiment was a failure.—"Insects and Man," by C. A. Ealand.

MODES OF BURIAL.

Customs Vary Vastly in the Matter of Posture and Direction.

The modes of burial differ widely among various peoples, from the rude ceremonies and methods of the wandering tribes to the ornate, impressive, revent services of "the heir of all the ages in the foremost files of time."

Among some the dead are buried lying, others sitting, as is the case with several of the Indian tribes, and instances are related where warriors or leaders in the nations have been buried seated upon their favorite war horses, as was done with the famous Blackbird, the chief of the once powerful Omahas.

But there is a remarkable agreement of custom for the practice of placing the body east and west. Sometimes the body is placed with the head to the east and sometimes to the west. It is held by certain writers that this custom is due to sour symbolism, and the head is placed to the east or to the west according as the dead are thought of in connection with the sunrise, the reputed home of the diety, or the sunset, the reputed home of the dead.

There are, however, some tribes that lay their dead north and south, and others bury men with the face to the north and women with the face to the south, while among some of the African tribes, if one happens to die away from his home, he is buried facing his native village.—St. Louis Globe-Democrat.

Dumas' Last Jest.

Dumas the elder was the son of a general of Napoleon Bonaparte, who would take his soldiers by the breeches and fling them over the palisades to an assault.

Dumas inherited much of that same spirit. It is said that Dumas left Paris for the last time taking with him a single gold piece, which he solemnly laid on the mantelpiece of his room at Puys. Toward the end his eye wandered across the sick room to this coin, and, pointing to it, he said to his son:

"See there! Fifty years ago, when I came to Paris I had one louis in my possession. Why am I accused of being a prodigal? I have preserved and possess it still. See! There it is!"

This was Dumas' last jest.

Knowledge is of two kinds. We know a subject ourselves or we know where we can find information upon it.—Samuel Johnson.

RULES OF HEALTH
Daily Movement *of the* Bowels.

If every child in every school in this great country could be taught this one rule of health in such a way as to appreciate its value, and live up to it, health would abound, a multitude of pains and aches would disappear, and Canada would be known as a country where people live to a great age.

When you call the doctor his first question refers to the condition of the bowels, and his first medicine is intended to ensure the activity of these organs. Whether you have a cold or appendicitis, kidney disease or rheumatism, there are poisons in the system which must be removed, and which would not have lingered to cause trouble if the bowels had been healthful and active.

For this reason we claim that **the First and Most Important Rule of Health is "Daily Movement of the Bowels."**

If the bowels can be kept in healthful action at all times there is little need for either doctor or medicines, and about nine-tenths of the annoying and dangerous ills of life are avoided.

The ideal corrective treatment for the bowels is Dr. Chase's Kidney-Liver Pills. Not only because of their promptness of action, but also because they immediately arouse the sluggish liver, and by so doing cure constipation.

The bile which is filtered from the blood by an active liver is Nature's cathartic, so if you can keep the liver right there will be no sluggishness in the action of the bowels. Keep the liver and kidneys healthy and active by using Dr. Chase's Kidney-Liver Pills and you will prevent and cure constipation, and thereby avoid a multitude of ills.

One pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Still Singing Their Praises

DODD'S KIDNEY PILLS CURED HIS RHEUMATISM.

Mr. D. A. Brotherston Tells How His Rheumatism Disappeared Over a Year Ago and Has Never Come Back.

Victoria Harbor, Ont., Feb. 7.—(Special.)—Cured of rheumatism over a year ago by using Dodd's Kidney Pills, Mr. D. A. Brotherston, a well-known resident of this place, is still singing the praises of the great Canadian kidney remedy.

"I was troubled with rheumatism in my left hand, which would shift to my elbow and then to my shoulder," Mr. Brotherston says. "It was very annoying and painful at times, but I heard of Dodd's Kidney Pills helping others so I quit the liniment I was using and took six boxes of them. The rheumatism disappeared. That was over a year ago, but it has not returned.

"I know Dodd's Kidney Pills are good for kidney trouble both in my own case and through others who have used them."

Rheumatism is caused by uric acid in the blood. If you cure your kidneys by using Dodd's Kidney Pills they will drain all the uric acid out of the blood and there can be no rheumatism.

BETTER PLANES THAN FOKKERS

Britain Has Machines Which Can Outfly the Huns' Best.

Marvelous Change in War Owing to the Airmen.

That the English have had battle aeroplanes capable of developing speed as high as, if not higher than, that of the famous German Fokker aeroplane was asserted recently by Henry Woodhouse, a governor of the Aero Club of America, who has been in close touch with the aeronautical development on both sides ever since the beginning of the war. These machines have not been generally used, because in the beginning there were not enough pilots to be spared to take them out, although a few have been used on the western battle front for reconnaissance.

"England developed more than a year ago planes that could make from 140 to 160 miles an hour," Mr. Woodhouse said yesterday. "The Royal aircraft factory developed machines of both the Bristol and Sopwith types that could make 150 miles an hour with ease. In addition to these, there were various other fast machines, such as the Avro, Short, Wright, and Martinsyde types, all of which were small scouting aeroplanes, and usually manned by the pilot only.

"It was the very fact that they were not needed that kept them off the battle front. The Germans had nothing that could compare with them, and the ordinary planes of from fifty to seventy-five miles an hour speed were all that were needed for observation and bomb dropping. Now, however, that the Germans have developed their Fokker class until they are nearly as fast as the Sopwith and other British speed machines, the fast British machines will be sent to the front."

N. W. Wilson, of London, England, in writing on the developments of the war, has dwelt at length on the changes wrought by the use of the aerial scouts, and shows what changes their use has made in strategy. The annual manoeuvres of the British navy, which were to have taken place a few weeks before the war, were abandoned because the use of aerial scouts made the sham battles and other evolutions useless. The airmen were able to follow the movements of the opposing fleets so well that the secrecy necessary to the success of the manoeuvres was done away with.

Mr. Wilson, in reviewing the work of the aerial scouts during the last year of the war, says in part:

"This remarkable simplification of the art of war was the supreme achievement of the military airmen during the first nine months of the campaign. Next to it was the increased importance of long-range howitzer fire, and the general improvement in the destructive power of artillery due to fire direction from aeroplanes. In the third place came the long-range power over the enemy lines of communication, derived from the bomb-dropping art of the airmen. The best example of it was seen in the part played by our Royal Flying Corps during the attack on Neuve Chapelle in March, 1915.

"This was, in place at least, the first classic airmen's battle. But for an accident it might have resulted in the breaking of the German front and the recapture of Lille. Much time was spent in preparation. The enemy's trenches were minutely studied and photographed from the air. The artillerymen had simply to calculate the elevation of their howitzer, so as to drop an enormous number of high-explosive shells into the German line.

"Then when the terrific bombardment opened, and our infantry advanced, our Royal Flying Corps was used, probably for the first time in the history of warfare, in a masterly manner. They flew behind the enemy's lines and bombarded the railway station at Don and the railway bridge at Meinin, by which reinforcements could have been sent to the breaking-point of the German front.

"Our airmen got behind the fighting German force and attempted to isolate it from the rest of the German army. They were not in sufficient numbers to control all the roads, but they seriously interfered with the working of any munitions. It was only lack of thousands of airmen and of thousands of machines which prevented them from dealing the enemy a series of terrific blows from the air."

Hokus—Flubdub seems to have a wonderful opinion of his knowledge.

Pokus—I should say he has. Why, I have actually heard him attempt to argue with his son, who is in his freshman year at college.

Labor's Position After the War

In the Labor Year Book for 1916 the Rt. Hon. Arthur Henderson discusses the labor problem after the war as follows:

From the commencement of the war the forces of industrial democracy rallied in support of the cause of the Allies with unprecedented unanimity and determination. To-day, generally speaking, their one concern is to see the war through and not to fritter away their opportunities in futile discussion as to its causes or as to the conditions on which an insecure and artificial peace might be obtained. They are convinced that this war was none of our country's seeking, and they are confident that if civilization is to be delivered from the tyranny of an oppressive brute force it must only end one way.

This attitude is good, so far as it goes. But there is a danger that all sections of the great Labor and Socialist movement may concern themselves too much with the effects of this world struggle, as we now see them, and fail to give sufficient thought to the position in which the wage-earners may find themselves on the termination of hostilities. Yet it needs little reflection to see that the wholesale destruction of wealth which is going on before our eyes must profoundly affect the position of Labor and the future of the Workers. When the war is over Europe will be faced with a gigantic task of reconstruction, and it is the duty of the workers to ensure that in the carrying out of that task their rights are safeguarded and their just demands satisfied.

This will not happen if, as the result of an unsatisfactory peace, this country finds itself, with diminished resources and a vast accumulation of debt, forced to maintain for its defence a larger Navy and an Army on the Continental scale. It will not happen if we are beaten. And it will not happen if, through impatience, or shortsightedness, or sectional jealousy, organized Labor compromises that unity which has been so nobly manifested under the stress of war, but which will be even more required in the coming test of peace. For, unless all experience is misleading, the first years of peace will be a time of grave depression, affecting not one or two trades, but the whole of our industrial system. Machinery has been diverted from productive to unproductive uses; the savings of past years are being absorbed in the cost of the war; the whole economic system, under which Labor produces capital and capital in turn maintains Labor, has been violently disturbed. The labor has gone into other channels, and the capital is being consumed in indispensable but unremunerative manufactures.

The utmost economy that can be practised in war may alleviate but cannot wholly avert the distress that is bound to follow it. There are indeed economies than may aggravate the evil. Every penny that is wisely spent on the care and upbringing of children, and on the health of the people, will shorten the period of depression by increasing our capacity for productive industry, when the war is over. And every penny which, in response to ill-considered appeals, for economy, is unwisely saved will postpone the return of prosperity. In the interests of the coming generation and their welfare organized Labor has a duty to protest against misplaced parsimony by public authorities as much as against untimely extravagance.

Both politically and industrially, the next few years will be a time of trial for organized Labor. For a national object the unions have been willing to abandon many of the safeguards which have been devised by the experience of generations for securing the rights of the workers. The most definite pledges have been given and received; the unions will have to see that on both sides they are scrupulously observed.

During the past twelve months organized Labor has established its right to be regarded as an integral element in the national life. After the war it will have to retain the position it has achieved. A period of depression imposed a great strain on the resources and coherence of Labor. The return of peace will mean the renewal of many old struggles. If Labor is to face them victoriously it must be animated after the war by the spirit it has shown during the war, by unfailing loyalty to its principles, and by a firm resolution to maintain its unity unimpaired.

A MOTHER'S DUTY TO HER DAUGHTER

Her Health Must Be Carefully Guarded as She Approaches Womanhood.

The mother who calls to mind her own girlhood knows how urgently her daughter is likely to need help and strength in the years between early school days and womanhood. It is then that growing girls droop, become feeble, bloodless and nervous. Nature is calling for more nourishment than the blood can supply. Signs of distress are plainly evident in dull eyes, pale cheeks, weak and aching backs, fits of depression and often a dislike for proper food. These signs mean anaemia—that is bloodlessness.

The watchful mother takes prompt steps to give her girl the new, rich, red blood her system calls for, by giving her Dr. Williams Pink Pills, which transform, weak, anaemic girls into a condition of perfect health, through the rich, new blood these pills actually make. No other medicine has ever succeeded like Dr. Williams Pink Pills and thousands of weak, disheartened girls have proved their worth. Miss Mabel Sinclair, Cobourg, Ont., says: "About three years ago I was a very sick, nervous and run down girl. At the least excitement I would tremble and faint away, and the slightest noise would annoy me. I had severe pains about the heart, and would often take dizzy and smothering spells. I lost in weight and the color all left my face. My mother got all sorts of medicine for me, but all failed to do me any good and I was still going down hill. One day we read in the newspaper of a similar case cured by Dr. Williams Pink Pills and the next time my mother went to town she got three boxes. In a short time I felt the Pills were helping me and from that on every day they helped me more. I took altogether nine boxes and felt like a new person. I was ready for all my meals, gained in weight; the color came back to my cheeks, and I was again enjoying perfect health, and have ever since enjoyed that blessed condition. I earnestly advise all weak girls to give Dr. Williams Pink Pills a fair trial, as I am sure they will do as much for them as they did for me."

You can get these pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

Life and Its Creations.

Creation is the way life's records of experience look from the outside. Every cell in your body is a moving picture film of life's experience. The soul of the film is indestructible life itself, and life knows it without eyes or ear. The body of this movie film self of you is the mere outward appearance of it. Bergson calls it the "scum" around the edges of the stream of life, and he says this "scum" grows thicker and thicker until finally the stream of life is choked and the cell is sloughed off. Then something happens to the body as a whole.

Life flows through its organized channels until it loses interest and slows down, the channels eventually accumulating enough scum to keep life from playing freely. Thereupon life drops the body, and goes playing somewhere else, while the body itself disintegrates to its original thoughtlons, the "building blocks" of the eternal child which is life.—Nautilus.

New Window Hangings

For he Spring Season

Select Patterns in New Scrims, Marquisettes and Curtain Nets

SCRIMS

Evenly woven scrims of particular good quality in two splendid shades of Ivory and Paris 36 inches wide, Per yard....................25c.

CARLSRUHE

The engagement is announced of Miss Paulina Hoffarth, eldest daughter of Mr. and Mrs. Paul Hoffarth, to Mr. John Kupherschmidt of Deemerton. The marriage to take place about February 22nd

Miss Bertha and Veronica Hoffarth were visiting at their sister's, Mrs. Frank Reich on Sunday.

CARGILL

Mr C W Keeling made a business trip to Walkerton, on Thursday.

Dr Parker of Listowel, was in the village on Thursday.

Misses Marie and Loretta Mahoney of Walkerton, spent the week-end under the parental roof.

Miss Kittie Stelling of Mildmay, spent Saturday here.

Mr W D Cargill, M. P. P. and Geo Sirrs attended the funeral of the late Wm Wesley in Walkerton, on Sunday.

It was with deep regret when the news was given out on Thursday, that John Connors of Eden Grove had passed away. He was a genial Irishman, and the funeral on Saturday to the R C Cemetery, North Brant, was largely attended.

Rev J Lionel Hemer conducted the funeral services of the late Geo Routledge in Walkerton on Tuesday.

Since last weeks' budget we notice two men in khaki from the Grove, Station Agent Connell and Chas Hold, both of whom sacrificed their good positions for their King and Country.

Mrs W J Loughleen is visiting her daughter, Mrs Gordon Young, in Woodstock.

Ptes Jack Hamilton, J Hudson, and F Anderson, of Walkerton, and Ptes Peglo and Zimmerman of Southampton spent Sunday here.

Lieut Krug spent Sunday with his parents in Chesley.

Policeman Dan Desmond of Berlin, was in our village on Saturday.

Mr and Mrs H M Cargill and daughter Isabella of Herschel, Sask., are visiting friends here. It is 11 years since they left here, and find many changes since then.

Mr Martin Baxter was in Walkerton on Monday.

Mr John Rowland, of Walkerton, was here on Tuesday.

Mr Harry Routledge of Unity, Sask., arrived on Monday to attend the funeral of his father, the late Geo Routledge.

PINKERTON

Lieut A E Reid of Chatham, spent a few days at his home here.

A number from here attended the skating rink at Paisley, on Saturday evening.

Messers Richard Garland and Hugh Campbell, visited at Chesley, on Sunday.

Mr Harvey and Miss Aileen Pinkerton visited at Mr H D Robertson's of Glamis on Sunday.

Rev Mr Gale preached preparatory services in Glamis, on Friday last.

Pte Gordon Garland of Walkerton, has been confined at his home here on account of a bad cold.

Mrs H D Robertson of Glamis, spent a few days at her old position in the store, in the absence of Mr A Pinkerton.

MILDMAY

Pte Trywhitt Kidd of Toronto is visiting at his home here this week.

Mr George Prass who has been ledger keeper in the local branch of the Merchant's Bank has been moved to Brampton. George was a most obliging bank clerk. Mr Floyd Fink of Mildmay has been added to the staff here. His duties commenced on February 2nd.

Pte George Richards of Harriston was in town over Sunday, hunting up old friends. He is training at Harriston.

Miss Grace Yost has left for Hanover where she has accepted a position as clerk. Her friends gathered together on Thursday evening and gave her a surprise party, and presented her with a beautiful clock as a token of remembrance.

On Tuesday evening a party was given to George Prass at Mr G Lambert's home.

Mr Antony Schuhbeis has opened up a general tailoring shop in his father's store next to Mr. Bridge's harness shop.

A successful box social and dance was held in the Town Hall on Monday night. Mr. Purvis hammered off the boxes, and the Waechter orchestra supplied the music. The sum of $25 was handed over to the Red Cross by Mr. Frank Steiffer who had charge of the social.

Miss Mary Schneider is spending a week with friends in Stratford.

Mr John M Fisher attended the Provincial Fair Convention at Toronto last week as a delegate of the Carrick Agr. Society.

MAPLE HILL

Mr. J. Fair, Maple Hill, purchased a short-horn Durham bull, from Mr. J. Thompson, Elora Road. This animal is got by imported stock.

Mr. Fair, while sawing wood the other day at Mr. Rogers, cut eight cords in an hour and a half. Beat that, if you can!

Maple Hill people are clubbing together and making up loads to go to the Box Social at Forester's Hall. Some time is expected.

Wood-bees are all the go around this burg.

We are glad to hear that Mr. James Bolden who was on the sicklist, is getting along nicely.

Mr Norman Brockelbank has hired Wm Lawrence of Elmwood to take the place of Wilfred Felsing, who is going West with Charles Lines.

Mr. Robt Gowanlock of Deloraine, Man and Stephen Little, visited friends in Paisley last week.

Mr W J McNally, Walkerton's horse king, bought a number of horses in this vicinity last week.

Mr. John D. Little has been on the sick list.

Mrs. Geo. Wilson is going to Toronto to undergo a very serious operation.

GLAMIS

Sacrament of the Lord's supper was observed in St. Paul's Church on Sunday. On Friday afternoon, Rev Mr Gale of Pinkerton conducted the Preparatory Services.

Miss Elizabeth Campbell returned home from Harriston, on Thursday.

Mrs J D Robertson spent a few days last week at the home of Mr Albert Pinkerton, in Pinkerton.

The Ladies Missionary Society held their meeting this month at Mrs W J McKeeman's on Wednesday.

Miss Margaret Campbell of Harriston, who has been ill for the past three weeks, was able to be brought home on Thursday. All wish her a speedy recovery.

Mr. Fred Attan left here on Monday, to pay a short visit to Milton and London friends, before leaving for his home in Sask. on the 15th of this month.

Mr. Barker, who assisted Mr McCauly in Evangelistic Services in the Baptist Church for the past two weeks returned to Port Elgin on Saturday.

Mr Alex Carr, of 14th Con., Greenock, has been spending a few days with relatives in Toronto.

The recruits from here and vicinity have entered in training at Tiverton.

Mr. and Miss McGregor, 9th Con., Bruce, were Sunday visitors at Jos McLennan's.

Mr Mac McKinnon is another of our young men, who enlisted here.

Privates John Kitchner, Ted Chapman and Joe Sproule, were visitors here over Sunday.

Mr. Jack Groves spent the week-end with friends at Lovat.

WESTFORD

(Intended for last week)

Miss Bessie Murray of Holyrood, spent Sunday, with her parents here.

We are sorry to report that Mr W O Smythe is under the doctor's care at present. His many friends join in wishing him a speedy recovery.

Mr A E Waldenby, attended the annual meeting of the Huron & Kinloss Telephone Company at Ripley on Wednesday of last week.

Mr Joseph Dietrick of Riversdale, spent Monday eve with his friend, Mr Arch Campbell.

Miss May Kelley of Chepstow, is visiting her aunt, Mrs Dan Murray.

Messrs John & George Boyd of Indian Head, Sask., visited their aunt Mrs James Thompson, last week.

Mr M S Haldenby has purchased the Young farm on the 12th con. Kinloss, from John Colwell of Kinlough.

RIVERSDALE

Thursday, January 27th, being the fiftieth anniversary of the wedding of Mr. and Mrs. John Hergott, a number of their friends called at their home and spent a very pleasant evening at cards and dancing. The many and useful presents which the happy couple received testified to the good will and esteem of their neighbors. Although past the three score and ten mark Mr. and Mrs. Hergott are both hale and hearty. We join the friends and neighbors in wishing that this merry old couple be spared to enjoy many years of happiness and good health.

SOLWAY

Mr and Mrs John Stemler spent a couple of days with friends here last week.

Mr and Mrs Len Long and babe spent Sunday at Mr B Mcnell's

The party at Mrs Dietrich's last Friday eve was well attended and much enjoyed by all present.

Miss Edith Farr of Cobourg and formerly of this part is a visitor at the home of Mr Ed Hopkins on the South Line.

Mr and Mrs Cunningham of Burgoine were visitors at the home of Mr David Thomson last week.

Mrs Rankin, mother of Mrs Charles Ormiston, underwent a successful operation at the Bruce County Hospital on Saturday.

Mrs Gilbert and two children from Regina accompanied by Miss Helen Rankin from Parry Sound are visitors at the home of Mrs Charles Ormiston.

Among the casualties appeared the name of Mr Kober from the West and a nephew of Mr Tony Kober here. He was buried by the explosion of a mine and his body was recovered a few days later along with several others.

Mr and Mrs Kober from Berlin are on their wedding trip to Mr Tony Kober's here.

OTTER CREEK

Mr and Mrs Harry Hall have arrived at the home of Mr and Mrs H Wolfe, after spending a few weeks in St. Marys.

Mr and Mrs Ernest Ramshaw left for their home in Nokomis, Sask., Friday last.

Mr Simon and Miss Carrie Macke from the 8th concession, were visiting Mr and Mrs Wolfe

Mrs Peter Pletsch from Walkerton was visiting her daughter-in-law Mrs Amos Pletsch who is again on the sick list.

Mr John Fenner has for the last few days been down with a severe cold, we are glad to say he is recovering.

Mrs Ernest Eckenswiller of the 10th con has been seriously ill for some time. We hope for her speedy recovery.

Mrs Sadie Schumacher from the 4th con was visiting friends on the 11th, Thursday last.

Mr and Mrs William Klein of Mildmay were visiting at the home of Mr and Mrs Philip Gress last week.

FORMOSA

The funeral of the John B. Techirhart, was largely attended. The children present were:—Joseph of Red Lake Falls, Minn; Miss Martin Meyer and Regina, Mildmay; Mrs. Rosa Kraemer, Formosa; Mrs. (Dr.) J. M. Uhrich Hague, Sask.; and George and wife from Chicago. Relatives from a distance were: Mrs. M. O'Hara, Wiarton Mrs. J. Lobsinger, Carlsruhe; Mrs. H Mosack, Riversdale; Minnie and Lydia Kraemer, Chicago; and Louise Kraemer, of Preston.

The first annual meeting of the Formosa Electric Light and Power Co., was held in Opperman's Hotel on Jan. 26th. The old board of directors were re-elected, namely F. A. Heisz, Dr. McCue, O. G. Henninger, A. Opperman, J. H. Schefter. After the meeting the board of directors held a special meeting and elected F. A. Heisz President and Dr. McCue Sec.-Treas.

A recruiting meeting was held here on Friday night addressed by Judge Klein, Rev. Father Cummings, Rev. Father Brohman, Mr. John Rowland and others. No direct results were secured from the meeting. It is understood that the ladies are going to organize for Red Cross Work. The new 160th Band enlivened the proceedings. After the meetings, the speakers were entertained to a banquet, by Mr. John Rowland.

OUR FATE IS AT STAKE

(Continued from Page 1)

the question: Can I conscientiously stay at home in view of the fact that the government has provided for my dependents?

160TH BREAK ALL RECORDS

Before the appeal to step forward was made, Col. Weir summed up what had been accomplished in the recruiting line. 650 men had enlisted in seven weeks. The 160th had got more men in less time than any other county. At the same time Walkerton had been a little slow. Of the men enlisting here, only 40 were actually from the town, and of these 11 were married men. The military census showed that there were still in the town of Walkerton 107 single men and 120 married men of military age.

Eleven men came forward, amid great enthusiasm, in response to the appeal for recruits. Their names appear in another column.

The musical numbers with which the speeches were interspersed, were more than ordinarily good. The band is making good progress under Sergeant Wright and gave a good account of itself. Several selections by the orchestra were greatly enjoyed. Miss V. Loughleen's solo, "Khaki", made a great hit. A male quartett, composed of Messrs. Taylor, Marsh, Thompson and Leeson, gave an excellent selection. Mr. Marsh's solo, "Angus McDonald", was greatly enjoyed by all, as was Mr. Taylor's rendering of "The Boys of the Old Brigade."

The 160th has already the sum of $600 available towards the expense of band equipment. The County Council having given $500, Mr. John Rowland $100, John R. Shaw of Woodstock, $100, and Mr. Krug, of Chesley, $100. Four hundred dollars is still required.

THE TOWN MILK

Editor Telescope,
Dear Sir:—

Re an article in the Telescope of Feb. 3rd, headed, "The Milk Question", and signed, "Observer", the writer of said article acknowledges it to be his but not in any way intended to reflect on the milk sellers of the town, but rather to help them to have the milk inspected as in other towns and cities and to their advantage in removing any suspicion that otherwise might reflect on their legitimate business. I therefore hereby retract the statements of said article and regret that they conveyed a meaning absolutely not intended.

"Observer"

MARRIED

FOR SALE

The property of the late Joseph B. Taylor, situated on the west side of Yonge Street, south of McGilvern St. in the town of Walkerton. On the property there is a brick house with eight rooms with town water, also a barn with stone foundation, accommodation for 3 horses and 4 cattle; water in barn. Poultry house and pig pen. 12 acres of good land, all available for crop, drained; ½ acre in orchard, young bearing trees, apple, plum and cherry. For particular apply to Joseph B. Taylor, R.R. No. 2, Eden Grove or to Geo. D. Mackay, Walkerton.

WALKERTON COUNCIL

Hears Kick From Firemen and Reduces Cigarette License.

The Town Council held its regular monthly session on Monday night. Present, Mayor Lippert, Reeve McNab, Couns., Russel, Leitner, Douglas, Pletsch, McCarter.

The report of the town auditors, W. H. McIlurney and K M Taylor was read and ordered to be printed.

A cigaret license by-law was passed fixing the fee at $20 per year instead of $50 as previously. The large fee proved a failure, owing to the fact that the hotels sell cigarets without a license from the Town Council. Coun. McCarter favored charging a $15 license fee for tobacco-selling also. He contended it would be a good thing for the real tobacco-dealers and would bring the town a nice revenue.

Chief Ferguson asked permission to get a new uniform at the town's expense. Granted, cost not to exceed $25.

A communication was read from the Walkerton Fire Brigade opposing the reduction of the brigade from 25 to 15 members as suggested by the Mayor, claiming that it could not be done without interfering with the efficiency of the Brigade. The firemen also took issue with the Mayor in his statement, that "a lot of dead timber needed weeding out" and that they "thought too much of the Scotch to attend to their work". They denied having had anything to drink while on duty.

Thos. Hyslop, a member of the brigade, was also present, to defend himself against the statement made by the Mayor. He had never, he said, touched a drop of liquor at a fire in his life. Mayor Lippert said he would meet the firemen at their meeting the following night and thresh the thing out with them.

Reeve McNab said in reply to question as to how the proposed non-coms school was coming along, that the County Council had contributed $500 towards remodelling the building, the Government would make a further contribution towards the expense, and then it would be up to the Town to pay what balance remained to complete the job.

Con. Leitner suggested that the Council consider the matter of fixing up the Fair Grounds and the adjourning property for a camping ground for the 160th Batt. the coming summer.

Wanted

Sunday was missionary day at the Methodist Church. Able sermons, appropriate to the day, were preached by Rev. S. M. Roadhouse of Southampton. The collections showed an increase for the day over last year.

Dr. Geo. Nasmyth, the celebrated Toronto scientist who was made a C. M. G. at Windsor Castle by the King last week for valued service in the present war, is a nephew by marriage of Mr. Thos. Cunningham of Walkerton.

Walter Lamb M. A. master of Harbord St. Collegiate, Toronto, is joining the King's colors as captain in a regiment composed principally of Harbord graduates. Capt. Lamb is the only son of Mr. James Lamb of Brant.

On account of the very small attendance in the primary room of the Public School it was decided to close the room till Monday the 21st of Feb. It will greatly oblige the teacher of the room if, if possible, all children except beginners be back to school on that date.

Mr. Megaffin of Suningdale, Alta is here on a visit to relatives. He is an old Brant boy, born on the 10th con., and has been in the West twenty-three years. Mr. Megaffin farms a three-quarter section, dealing largely in stock, and had a bumper crop the past season.

Mr. Arthur Heughan, who arrived home last week from Truax, Sask., has signed up with the 160th Batt. and will enter the non-com's school later on. Before leaving Truax the citizens of the town presented him with a purse of gold to be used in purchasing a wrist-watch. Art. has been granted two weeks' leave of absence to help his father remove into his new business stand on Durham St., before donning the khaki.

Young lady wanted for steady position. Apply in writing to Drawer 14, Walkerton P. O.

Mr. Norman Wilkin, son of the late C. Wilkin of north Brant, has enlisted in the 174th (Grey) Battalion.

Mr Wilbert Cross of Wiese, Alta., spent a few days of this week with his uncle, Mr. W. J. McNally in Brant.

Mr. and Mrs. Jas. Flett and Miss Flett of Wiarton were visitors here this week and left on Wednesday for Richmond, Va., where they will spend two months with Rev. and Mrs. Wesley Baker.

Coun. Robt. Russel had a cablegram last week from his son, Pte. James Russell who has been in the trenches in France the past eight months and is now enjoying a short visit to Old London on leave. "Jim" has experienced many close calls on the firing line but so far has kept off the casualty list.

Mrs. (Rev.) David Williams, whose death was reported in last week's Telescope, was a very old and well-known former resident of this town. Mrs. Williams had been very poorly for several years. Her death occurred at the family residence, Winnipeg on Feb. 2nd. Two sons and one daughter survive.

Mr. Norman McDonald of Tiverton, who has been visiting his son, Sergt. Neil McDonald, is one of the stalwart pioneers of Kincardine, is proud of the fact that he has two sons with the 160th. He has no regrets and only wishes he had six sons to answer the call of men and more men in the present crisis.

License Inspector White has been instructed by the License Department to see that all license holders in Bruce are loyal British subjects. It happens that in this riding all the hotel-keepers are native-born with the exception of one man, Mr. John Vogt, of the Queen's Hotel, Walkerton, who is a native of Denmark, but an enthusiastic Britisher.

Announcement

We have not disposed of our blacksmith business as advertised by an unfair business rival, but have moved to a better location. We are now located opposite the Royal Hotel, in a building which we have purchased and where we will remain permanently. Customers will find us there at all times and work and prices right.

Jenkins & McCannell

+ + +

85 Years Young!

Mr. N. Crawford, tax collector, is the youngest old man or rather the oldest young man in Walkerton. Possibly the youthfulness of spirit is the elixir with which he successfully defies the ravages of old age. At any rate he is as active as many a man twenty years younger, and has had the best of health throughout this trying winter season. Mr. Crawford celebrated his 86th birthday on Sunday, having been born on Feb 13th 1830.

+ + +

The Aeroplane Story

A rumor was circulated in town that a big aeroplane had been seen south of the town on Sunday night. A resident of the South Line was reported to have seen the lights of an aeroplane very clearly passing at a high elevation. As the thermometer dipped to eighteen degrees below zero that night, folks were inclined to sympathize with with any aeronaut who had to be out prowling around. What the South Line man really saw no doubt was the crossing of the planets, Jupiter and Venus, an astronomical event which occurred on Sunday night for the first time in twenty years.

+ + +

"Doing Its Bit"

One of the neighborhoods that is holding up its end well in the recruiting line is the portion of Brant township adjacent to Walkerton. Polling sub-divisions 1 and 2, Brant, have so far furnished twenty recruits. We give their names:—No. 1, Robt. Merchant, Jos. Krenie, John Lundy, Jos. Chesney, Chas. Lundy, Herb Woods, Hugh Torendyle, Alfred Tolton; no. 2, J. E. Plowright, Fred Hawkes, Thos Firne, Geo. Jackson, Jas. Scott, T. C. Lamb, Walter Lamb, S. T. James, S. B. James, Capt. A. W. McNally, Gordon McNally. Sub-div. no. 3 has so far furnished one recruit, Stuart Pinkney.

+ + +

Too Much Booze

Too much conviviality got a former Walkertonian into serious trouble here last week. He was back from Michigan on a visit to the old town, and by the time he had met a few of the boys and got started on war talk, he was ready to "lick" the whole German army. He called at the recruiting office on Durham St. and signed up for the 160th. His enthusiasm soon melted however and he succeeded in getting hold of the papers and tearing them up. The next day in police court he said [illegible] he guessed he must have enlisted [illegible] because everybody said so, but claimed he had not known what he was doing. Magistrate Tolton took a lenient view of the case merely taxing him $5 and costs, a total of $10.75, for what is according to the statutes, a serious offense.

CLAIMED, BY DEATH

Ray Vogan Suddenly Stricken with Appendicitis, Passes Away at the Bruce County Hospital

Not in a long time has the uncertainty of life been brought home so irrefragably to the citizens of Walkerton as during the last month, when no less than four well-known citizens have been removed by death almost without warning. During the past week anxiety was again roused by the sudden and severe illness of Mr Ray Vogan, who was taken sick on Tuesday of last week. On Friday morning he was operated upon for appendicitis when it was found that the trouble had reached a very advanced stage and peritonitis set in. The bereavement in the family last month heightened the sympathy of the community for the family and the question oftenest heard during the week was, "How is Ray Vogan?" From the first his condition was critical but as late as Monday evening, a specialist who was called from Guelph gave some hope that his condition might yet take a favorable turn. He became suddenly worse about 5.15 o'clock yesterday morning and two hours later the end came.

The deceased was the elder son of Mr and Mrs S W Vogan, and was well and favorably known throughout the district through his connection with the hardware business in which he was associated with his father. He was a stalwart specimen of young manhood and his demise at the very prime of life is deeply mourned. For those near to him by family tie, profound sympathy is felt. Besides his young wife he leaves an infant son. Sam W. Vogan jr. is an only brother, and his sisters are:—Mrs. Dowling of Winnipeg, Mrs. Scott of Calgary, Mrs. (Dr.) Reed and Miss Vogan at home. All the members of the family were present throughout his illness, having been called here the first of the month owing to the death of their brother-in-law, Dr. J. S. Reed.

AN ELDERSLIE PIONEER

Death of Patrick O'Hagan, a Well-known Citizen of Paisley.

The death occurred at Guelph on Saturday, Feb. 12th of Patrick O'Hagan, a pioneer settler of Elderslie, and one of the most popular residents of that township. The deceased had been in poor health since the end of July last, when he was stricken with paralysis. It is over sixty years now since the five year old lad came to the Elderslie bush with his parents, and there experienced those hardships of which a later generation can scarcely appreciate. This true-hearted young Irishman grew to manhood on the farm. He sat for several years in the Elderslie Council, was widely known and as widely esteemed. Latterly he had lived in the village of Paisley. The remains were taken on Tuesday from Paisley to Chepstow R. C. cemetery for interment. The funeral cortege, which was a large one, was added to when it reached Chepstow by the many relatives and friends of the deceased in Greenock. At the service of which Rev. Father Boudreau was the celebrant, Rev. Father Zettler acting as deacon, and Rev. Father Capus of Teeswater, as sub-deacon, a beautiful sermon was preached by Rev. Father Zettler, who referred to the life and character of the deceased. He said that the late Patrick O'Hagan was loyal and devoted to his faith as a Catholic and in his devotion to God he served his neighbor. He dwelt on the need of being always prepared for death, as we know not the day nor the hour when it may come. The pall-bearers, all old neighbors, were:—Job. Turner, Alex. Mitchell, Albert Lowes, W. Miller, John Bannerman and James Hammond. Among others who attended the funeral from Greenock was the Hon. Senator Donnelly, a life-long friend. The chief mourners were his wife, formerly Miss Hannah Barrett of Guelph, and Dr. Thomas O'Hagan, the well-known litterateur, the last surviving of four brothers.

Auction Sale

Auction Sale of farm stock and implements will take place on lot 62, con. 1, S. D. R., Brant, on Feb. 22nd, 1916, at one o'clock sharp. J. J. Woods, prop. Robt. Brigham, auct.

+ + +

Former Carrick Resident.

A telegram was received here on Monday announcing the death at Grand Rapids, Mich., of Mr. George Gress, a former resident of Carrick. Particulars have not been received regarding the cause of his demise. Mr. Gress resided in this vicinity until about eighteen years ago and was well known here. The late Mr Gress was in his 68th year and besides his wife he leaves a grown up family of two sons and two married daughters, all living across the line. Philip and David Gress of Carrick and Jacob Gress of Galt are brothers and Mrs. John Fenner, Mrs David Bell and Miss Katie Gress of Carrick are sisters. The funeral is being held at Grand Rapids this (Thursday) morning.

MISJUDGED

"Except myself. There—you have it! I'd have stood against anything else. Not that I wanted any harm to come to Miss Daintree; but she is a foreigner in these parts, and I did think maybe she had been carrying on with him. But Miss Dora is different, and I'll speak out."

"No on! What have you got to say?"

"I killed him!" said the farmer, hoarsely.

Groves, in the distance, nodded his head; it was as he had always suspected.

"Mind you," went on Blake, "it wasn't to be called a murder. I never thought of hurting him till that day, and I hadn't even a stick in my hand when I went to find him. I had just learnt the sort of serpent it was that I had let crawl round my home."

"Why did you kill him?"

The farmer turned to the magistrates. They were all men from his own part of the world, men whom he had known and looked up to all his life. Many were elderly men, married, and with children of their own. They were widely his superiors in birth and breeding, yet there was a kinship of ideas, a common speech between them, and a deep-seated relationship due to their deep-rooted love for their own country and even more for their own county. He looked straight at the Chairman, behind whom he had ridden time after time to the hounds.

"Squire Trevor, what would you do to a man that you found had been making up to your daughter and spoiling her young life? If you found he meant to ride away as jaunty as you please, would you see him off and say 'Good-bye'? Ah, it don't come home to you, for your good lady is yet alive and she would see what was going on! But think of yourself left with a motherless girl, and she only a child of seventeen."

Mr. Trevor did not answer the question directly, but his voice was pitiful as he said:

"Your daughter said she did not consider herself engaged to this man."

"Ay, she was not engaged—he had known too much for that! And she said, truly enough, that he did not love her, for it is hate, and not love, that goes to work to break a heart. She said, too, that she was glad for him to go, and that was a true word, too."

"How long had you known of the relationship between them?"

"Squire, do you think I would have let an hour pass without seeking that man out once I knew? I saw my little girl's face all white and sad. If she had had a mother she would have seen it before I did. My sister was good enough to her, but she never got at the maid's heart. I stopped behind after dinner on that day, and I made my girl come with me to the room I had made pretty years ago for her mother when I brought her home. Then she told me all."

"And then you went in search of him?"

"Yes; but I never thought of killing him. No, my lass had not thought to tell me that he was married, and I went to tell him that he must right my girl and that I would find the money so that they should not want. I had no liking for the man at all, and wanted him little enough for a son-in-law, but it seemed what her mother would have told me to do. I went round the farm and I looked for him everywhere; at length I came along by the boundary between the fields belonging to the farm and the Hall estate, and there I saw him alone down by the sister pools. I didn't come along the road, but across the fields. He started when he saw me, for I think I was not looking pleasant at him.

"'What is it?' he said.

"And then I told him he was a thief and worse than a thief. I had meant to keep quiet and reasonable for her sake, but in the sight of his bad, black looks, something seemed to turn to fire inside me.

"'And what do you think you are going to do now?' I asked.

"'I am going back to London, farmer,' he said, smiling, and as bold as brass. 'Are there any little commissions I can execute for you or for the ladies of your family?'

"'You are not going yet,' I said—'not until you have married my girl; but it is sorrow to me that such a husband should be for her.'

"'Marry your daughter!' he said, and he smiled as if I had made a joke. 'Why, my good man, I am not prepared to commit bigamy!'

"That staggered me, and he saw it. "'No, my dear sir,' he said, and he smiled worse than before; 'I can assure you that your charming daughter understood from the first that our little flirtation could not end in marriage.'

"And then the fire blazed up in me beyond and above all. I was standing on the pathway between the pools, and he was a bit below me. When he said that about my girl, I felt I had to strike him down and to see that smile go from his face. Something let me know there was a biggish stone at my feet. I lifted it and shouted, 'Take this!'—and I dashed it against his wicked face. Ah, I saw the smile go then! He gave a sort of jump, and then spun round and fell down towards the water. I did not heed him; I did not touch him again. If he died he died, and deserved to; if he lived he could send me to prison. I neither knew nor cared to know which it would be. I had struck down the man that made my lass cry, and I went back to my work."

"You would have saved much trouble to yourself as well as to us if you had told this tale at once."

"I would not bring a breath against my girl, unless it was forced on me."

"But you knew that suspicion was attached to someone else?"

"Yes; but she was foreign to us, and I had small cause to love strangers. It came into my mind, too, that she might be the lady wife of whom he had spoken. No: she had to bear her own troubles. But Miss Dora is different. Maybe, sir, since you know now who killed him, you won't want to have her back here; it is hard enough for a man to have to answer questions. And if my lass may be kept out of it, too, I'll do anything you wish and sign anything you wish. I will put the rope round my own neck if so be the law is going to hang a father that stood up for his motherless girl."

There was something fine, even gallant, in the bearing of the burly farmer, something that touched all that were present. There was no one who was not very sorry for him. Still there was but one course open to the magistrates, and that was to commit Joshua Blake for trial on the charge of murder.

"They'll never hang him, will they?" asked Budge of Groves, whom he now began to look upon as a miracle of wisdom.

"Not they!" said Groves. "He was a fool not to speak out at once, and then they might have charged him with manslaughter, and it would have come a deal cheaper to him. I'm sorry for that man: he was in the right."

The case was concluded, and everyone, except poor Blake, went home.

Beryl discovered that she was in the position of local heroine. Everyone managed to greet her, and to do so with a warmth which had never been shown before. Budge, amongst others, managed to intercept her as she made her way to Box Cottage.

"Begging your pardon, Miss," he said, "I hope you will understand that anything I said or did was only in the way of duty, and not meant personal?"

"I quite understand that!" said Beryl, with a smile.

"And if you please, miss, I speak for Slade as well as for self: he hopes you will not be having any feeling against him for what he said."

"Certainly not," said Beryl; "he only spoke the truth! You may tell him, though, that I shall have a lot of feeling against him unless he comes tomorrow to help me bed out the seedling asters."

"I am speaking now, miss, as myself—that is, not as a constable—you will understand."

"Exactly!" said Beryl.

"And, speaking as a man, miss, I have never known a lady more like a gentleman. Not in appearance, miss"—as the fearful thought that he might be insulting her crossed his mind—"but in conduct in sticking to her word and going through with it."

"I am sure you mean that as a great compliment," said Beryl, "and I am grateful to you."

She received many visitors during the next day or two, including Lady Weston.

"My dear," she said, "how good you were to that poor, misguided child! She has told me everything, including your efforts to make her confide in me."

"Poor Dora! How is she?"

"Very weak and ill. The shock and the long strain have been too much for her. I want to take her away; but John says we must not go yet."

"No, not until after the trial, I suppose? And after all it is best for her to get used to meeting people, or she would have it all to face when she came home."

"Yes, that is true. Beryl, John is determined to marry her."

"I thought he would."

"He says she has been so infamously badly used by one man that there is all the more reason for another to see she does not suffer again. I have not said one word against it. Once it was my dearest wish but that is not the case now."

"She was frightened," said Beryl, "and she was in the hands of two accomplished villains. It would have taken almost abnormal courage for any girl to cut herself free."

"You would have done it," said Lady Weston. "My dear, I should have no fears for the courage of grandchildren of mine if you were to be their mother. But I suppose that is not to be."

"No," said Beryl. "But you must not be afraid of Dora. She has had a bitter lesson and it will last all her life."

"Yes. And she is very sweet and lovable; but she always seeks instinctively for the easiest way out of a difficulty. You are the best friend she can possibly have, and her gratitude to you is very great; so is her penitence for having placed and left you in such a dreadful position. She wants to know if you can forgive her."

"May I go up to the Hall and see her to-day?" asked Beryl.

She went and saw Dora, who clung to her and begged her for forgiveness.

"I know how wickedly selfish I was," she said. "I have always thought too much about myself, Beryl. I have had a terrible time during the last few months."

"I know you have, poor child," said Beryl.

"That ought to have taught me—the suffering, I mean. But it only made me think of my worries. Even the thought of your courage and goodness did not really touch me, for I was still thinking of myself; but I began to see what a shallow little wretch I was when John came and spoke to me and told me that he loved me, even after all I had done. I did say then that I could not marry him, because people would always talk of this terrible story; but he got stern and said he did not think anyone would say anything against his wife. When I saw that he really meant it it almost broke my heart to think of all that I had nearly thrown away, and how utterly unworthy I was of this man's love."

"Yes, love teaches us more than anything else," said Beryl.

"You must stay here always, Beryl, or I shall find myself slipping back, I know. There—is that not the old Dora peeping out? I was only thinking of myself, not of you, or whether you would be happy here."

Beryl blushed a little.

"Dora, I am going to tell you a secret of my own. I think I shall probably spend a great part of my life here."

"You like the cottage so much?"

"I am not sure that I shall be living at the cottage."

"Where, then?"

"What would you say to the Rectory?" asked Beryl, mischievously. Then she kissed her friend and left her.

Mr. Vernon had lost no time in making Beryl listen to him once more.

"You are much too fine a character to delight in keeping me in suspense," he said. "Beryl, tell me that you love me and that you will be my wife."

"Even your position as Rector of the parish does not justify that very peremptory tone!" said Beryl, laughing.

"No, but my love for you does. My darling, you have the truest heart that ever beat! Do you love me?"

"I love a man who came to me when I was under a cloud of suspicion and told me then that he loved me. Do you happen to know his name?"

Apparently her answer was satisfactory.

The village received the intelligence with mingled wonder and satisfaction. The Hall heard it with joy.

"Am I not a bit of a prophet, mother?" asked Sir John.

"You must not let the habit grow on you," said his mother.

"And after old Vernon had been losing his head at the idea of my having let her the cottage and babbling about his dislike of strong-minded women!"

His mother thought, without saying it, that there was far more reason to fear the actions of weak-minded women.

Budge laid down the law, as was his custom and right.

"I have not a word to say against it. Whatever may have been her past mistakes, she will now have the arm of the Church close beside her, so to speak. If that don't keep her right, what will?"

"But supposing she is one of the sort that won't obey their husbands?"

"We have heard tell of such women, Slade," said Budge, with portentous gravity, since he knew that his wife and Mrs. Slade were within earshot, "but we never see them down in these parts. No, in Dalehurst, thank heaven, a man can still be master in his own house!"

Mrs. Budge and Mrs. Slade, who could each of them twist her lord round her little finger when she chose, looked at each other with a world of meaning in their eyes.

"Sakes, let 'em talk, my dear!" whispered Mrs. Budge.

(THE END)

AIR SIGNALLING.

Devices Used by the Aviators in the European War.

When we read what the airmen write about their experiences during the present war, we learn that the chief purpose of most of their flights is not to drop bombs on the enemy, but rather to locate the enemy's artillery and to aid their own artillery in directing their fire. The airman is often sent up at the order of the commander of a battery to ascertain whether his guns are overshooting the mark, do not reach, or are too far to right or left. It is imperative that he be able to communicate his information almost instantaneously, and some very ingenious methods of transmitting it to the earth have been devised.

Telephone systems are good for anchored balloons, but are out of the question for aeroplanes or Zeppelins. Wireless telegraphy has so many difficulties and dangers as to prove quite impractical.

The French are using a very ingenious method of signalling by means of soot clouds. An apparatus filled with lampblack rests near the hand of the airman, and when he presses a lever some of this soot passes down a pipe and is discharged into the air in a black cloud. This pipe is so delicately arranged that the clouds may be small or large. The operator can spell out the Morse telegraphic code in the little clouds and they can be read from earth.

The Germans have adopted what they consider a far more practical mode of communication. Prof. Donath has invented a system of signal mirrors, lighted by a very strong lamp, which permits the airman to send his messages and also to receive instructions in the daytime as well as at night. The apparatus is so regulated that the operator may send a long or short flash, thus utilizing the Morse code or any other code which may have been agreed upon.

The light in the little lamp of this apparatus has a flash of 10,000 candle-power, and while it can be used for only forty or fifty hours without renewing the burner, this is enough for all practical purposes. The power for the light comes from a special seven-celled battery, weighing only eight pounds, including the metallic covering.

When a message is to be sent the operator directs a telescope over the reflector to the desired point. Then he presses on a button, the lamp lights, flashing long or short, according to the pressure.

The officers on the earth receive the message, and may return a reply in the same way, being provided with similar mirrors and lamps.

By this method messages can be flashed not only at night and in foggy weather, but also in the daytime, in clear weather. The temperature of the filament in the lamp is so high that it sends out a ray of light almost as bright as sunlight, and this is why the flashes are visible even in the daytime. The signals can be read with the naked eye for a distance of four miles or more in the daytime, and at night for a distance of eight miles and upwards. With a field-glass the signals may be distinguished for a far greater distance.

When it is necessary to send a written communication, such as a plan for a fortification, as seen from the aeroplane, the primitive method of dropping the sheet of paper tied to a stone has long been abandoned. The airman is provided with a special bomb in which the letter or plan is placed.

He then drops the bomb, which is so weighted that it falls sharp end first. As the end strikes the ground a trigger is released which sets fire to a torch on top, and thus the location of the bomb is indicated by day or night.—Tit-Bits.

Food Value of Milk.

One quart of milk costing eight cents is equal in food value to any one of the following:

Five bananas, costing 5 cents.

Eight oranges, costing 23 cents.

Ten eggs, now costing 30 cents.

One dozen apples, costing 9 cents.

Five ounces of cornmeal, costing one cent.

Five ounces of dried beans, costing 2 cents.

Fifteen ounces of boneless codfish, costing 14 cents.

Eleven ounces of fat round beef, costing 15 cents.

Seven ounces of full cream cheese, costing 9½ cents.

Six and one half ounces of prunes, costing 6 cents.

Four and one half ounces of walnuts, costing 17 cents.

"Who was it," inquired the student, "that said, 'After me, the deluge'?" "Don't ask me," rejoined the superficial person. "I never did pay much attention to weather prophets."—

Tonsilitis, Sore Throat, Chest Colds, Can Be Cured Over Night

They Vanish Quickly if Nerviline is Well Rubbed in.

When the throat tickles, when it hurts to draw a long breath, when you feel as if a knife were stuck in your side, it's time to draw out the congestion that will soon become pneumonia.

An ordinary cough syrup has no chance at all—you require a powerful, penetrating liniment.

Nothing is known that possesses more merit in such cases than Nerviline.

Rub it liberally over the sides and chest—rub it in hard.

The warm, soothing effect of Nerviline will be apparent in five minutes.

Nothing like it for quick relief—takes soreness out of the throat in one rubbing—breaks up the chest cold, draws out the inflammation, stops the cough quickly.

Rub it on for rheumatism—it destroys the pain—drives it right away. Try it for stiff muscles—it works miracles in just such cases.

Give Nerviline a chance on your neuralgia, prove it out for lumbago, see what it can do for sciatica.

No pain-relieving remedy compares in power to cure with Nerviline. Largest sale in Canada of any liniment for nearly forty years. The reason is plain. It satisfies every time.

The large 50-cent family size bottle is more economical than the 25 cent trial size. Sold by dealers everywhere, or the Catarrhozone Co., Kingston, Canada.

ANTIQUES

An antique of the "household word" type is the old blue-willow pattern. Where will one find a home without a specimen of blue-willow, possibly regarded as an antique, or maybe a family heirloom. Its history is a mystery; its age and origin as a pottery decoration is the cause of much trouble to collectors of it. The story it illustrates is a veritable "picture show"—and just as silent—with the dramatis personae as follows.

A Chinese Mandarin—Koongshee, the mandarin's daughter; Chang, the mandarin's secretary and suitor for the hand of Koongshee; Ta-jin, a duke of high degree, a rival of Chang. Handmaids, spies, soldiers, boatmen, gardeners, an emperor or two, and a pair of doves for the "immortal emblems of constancy" role at the end of the play.

Scenes—A mandarin's home, a humble dwelling, an island of the Robinson Crusoe type, a rice field, a terraced garden, an orange and a citron grove, a turbulent river—the Yang-tse-Kiang, if possible, and a bridge to span it.

Properties—A box of jewels, a distaff, for the emblem of purity (art); the half of a cocoanut shell, for overseas mailbox duties, and a couple of boats.

As this "Bill of Play" was all that Thomas Turner, of Caughley (Coalport, Shropshire, England), china works, had to guide him, when, at the end of the eighteenth century he commissioned Thomas Minton to engrave the copper plate for printing the first production of this delightful episode in oriental life, the reader must be content to draw his own conclusions from the pattern on the plate in the same way that the screen tells its story at the picture show.

The blue willow-pattern plate gave Charles Dickens a happy inspiration on the occasion of a visit to a Staffordshire pottery town, the birthplace of millions of blue willow pattern plates. After seeing a plate made, he wrote in "Household Words" as follows: "—that astounding blue willow, with knobbed and gnarled trunk, and foliage of blue ostrich feathers," —"that blue bridge, which spans nothing, growing out of the roots of the willow, and the three blue Chinese going over it, into a blue temple, which has a fine crop of blue bushes sprouting out of the roof; and a blue boat sailing above them, the mast of which is burglariously sticking itself into the foundations of a blue villa, suspended sky-high, surmounted by a lump of blue-rock, sky-higher, and a couple of billing blue birds, sky-highest—together with the rest of that amusing blue landscape, which has—in defiance of every known law of perspective, adorned millions"—of plates and dishes.

Minard's Liniment for sale everywhere

APPEAL FOR THE HELP OF SUFFERING SERBIA

The Serbian Minister in London has the honor to convey his warmest thanks to all the benevolent donors who generously have sent until now their donations through the Serbian Legation for several Relief Funds existing in Serbia.

At the same time the Serbian Minister has to announce that several Relief Funds in Serbia are sending through him their appeal to all benevolent men and women, fathers and mothers and all philanthropic institutions, painting the horrible suffering of the Serbian refugees, the starvation of the population staying at home in Serbia, the painful scenes of the desperate mothers and frozen children. Many thousands of refugees are dispersed in the villages of Greece, in the Albanian desert or in the rocky hollows of Montenegro, without house, without food! The life of these refugees is now nothing else than a slow dying out. This help will be a real help only if it comes as quickly as possible. Such appeals have been made from the following funds: The Serbian Archbishop of Belgrade's Relief Fund for the families of the fighting men, the St. Helen's Relief Fund for the Orphans, whose fathers were killed in the war, the Parliamentary Fund for the Relief of Serbian Refugees, the Serbian Red Cross fund for the Wounded Soldiers.

The generous donors, who would help any of the above mentioned funds are kindly requested to send their contributions through the Serbian Legation, 195 Queen's Gate, London, S. W.

Please do not forget to mark for which of the funds the donation is destined, which will be duly acknowledged.

Minard's Liniment Cures Dandruff.

Bullets and Aeroplanes.

Observers have been surprised to discover the slight effect bullet holes, even in great numbers, have on the effectiveness of the wings of the aeroplane. It is usually assumed that its sustaining power is proportional to the area of the plane, but it is also known that its shape is also an important factor, but the injurious effects of the holes is not in proportion to the diminution of the area produced by them. The efficiency of the ship's sails is not much affected by the holes, and Vassalo, in 1894, experimentally proved to his own satisfaction that sails are improved by perforations. Even injuries to the motor of an aeroplane are less dangerous than would naturally be assumed, provided that the pilot retains control of the vessel. He can descend by gliding and can advance nearly four miles in a descent of one mile.

Gargoyles of Notre Dame.

The gargoyles of Notre Dame are commonly associated with the mediaeval spirit and queer obsessions of old Paris. As a matter of fact, most of them were executed under the direction of Viollet le Duc when the cathedral was restored, no earlier than the middle of last century. Mr. Henry Heine, who is an authority on architectural subjects, declares that most of the gargoyles carved for Notre Dame at the time of the restoration were done by an Englishman named Frampton, "though I believe this fact is now remembered by very few."—Pall Mall Gazette.

Better Than Spanking

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her today if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

HE COULDN'T GET IN A WORD.

(Harper's Magazine)

Blanche met Carolyn at a ball and they were talking of one of the young men.

"I don't care for him at all," remarked Blanche. "He's a regular bore."

"Indeed," replied Carolyn. "Why, I thought he was perfectly lovely."

"Well," said Blanche, "he yawned three times while I was talking to him."

"Perhaps he wasn't yawning," suggested Carolyn. "He may have been trying to say something, dear."

You'll always have nice clean pantry shelves if you go over them occasionally with Old Dutch

PETROGRAD IS A WONDER.

A City Built by Russia in Defiance of the Laws of Nature.

It is an amazing monument to the despotism of the czars that Petrograd has flourished, as it was built, in defiance of the laws of trade and of nature herself. As a port it is immeasurably inferior to Riga, which has a much longer open season, for Petrograd is icebound from early November to the end of April. As a building site it has been repeatedly and disastrously flooded by the Neva. The highest elevation within the bounds of the city is less than fifteen feet above sea level, and the cellars have to be baled out nearly every spring when the ice melts and the wind blows.

And the rigorous climate constantly gnaws at walls and columns until the city has been twice and thrice rebuilt by the czars. Many of the most imposing structures are held together only by means of iron clamps, and the huge bowlder on which Peter rides his bronze horse is ever crumbling away. The stones of the streets are continually sinking below the level, and the great Cathedral of St. Isaac never ceases to settle on a foundation in which nearly $1,000,000 was sunk. No less than six tiers of piles were driven for the beautiful column of Alexander I, yet that eighty foot monolith, the tallest and largest in Europe, has to be clamped in iron.

As a dwelling place Petrograd remains the most fatal of any great city in the civilized world, with a mortality of twenty-eight to each 1,000 of population, and within ten years its death rate actually exceeded its birth rate.—Argonaut.

The Appetite of Youth Quickly Restored

Appetite is useless unless digestion is good. Dr. Hamilton's Pills make tremendous appetite and keep digestion up to the mark as well. The liver, bowels and kidneys are stimulated, the stomach strengthened, and robust health quickly follows. Dr. Hamilton's Pills instil vigor and snap into the system, make folks feel youthful and happy. You'll forget you had a stomach, forget your days of sickness if Dr. Hamilton's Pills are used. Insist on having Dr. Hamilton's Pills, 25c per box, no other medicine so good.

Sunset and Twilight.

Twilight is a phenomenon caused by atmospheric refraction. When the sun gets below the horizon we are not immediately plunged into darkness of the night. Although the sun is below our horizon, rays of solar light are bent or refracted by the terrestrial atmosphere and continues to furnish some slight illumination. The process continues with diminishing intensity until the sun is so far below the horizon that the refracting power of the atmosphere is no longer able to bend the rays enough to produce a visible effect. The time after sunset that the sun reaches such a position varies with the latitude of the place. There is less twilight at the tropic zone than at the temperature or frigid zone. This is due to less time taken by the sun's rays to pass through the atmosphere, at the tropic zone the sun's rays being perpendicular and at the temperate and frigid zones oblique.

OBJECT, MATRIMONY.

(Judge.)

"So you don't believe in advertising, eh?" scornfully remarked the up-to-date business man.

"No, I don't," insisted the sad-eyed neighbor. "I got my wife that way."

MAKES DELIGHTFUL PORRIDGE

Many women who have purchased a package of Dr. Jackson's Roman Meal disregarded instructions to make the porridge without stirring. They made a [illegible] instead of a delightful porridge. The flax oil in Roman Meal has been changed into a laxative and nutritious [illegible] by driving oxygen out of it by chemistry. If stirred while hot this [illegible] takes up oxygen from the air, becoming linseed oil, and making the porridge taste of linseed. The family will not eat it, and are deprived of the very best food on earth, and the most delicious if made properly. In justice to your family try it again and make the porridge as directed on package. At grocers' 10 and 25 cents a package.

Made by Roman Meal Co., Toronto.

AUTUMN SUNSET.

By ARTHUR L. PHELPS.

This evening while the colour glowed and waned
A [illegible] sense that ancient wanderment
The which eternally incompetent
Is used of man to imitate, was bred
Dumb yearning spirit only half suggested.
The vast and cloudy pageant of the sky,
A host from some strange cataclysmal,
That swayed in [illegible], going down the west.

Stirred me. A great and silent loneliness
Smote in my heart its fever of affright.
A dumb fear grew, and all the shapen mists
Of solemn grandeur made it more, not less.
Seemed that brushed by me, passing very near,
The awful entrails of the stricken year.
—From The Canadian Magazine for February.

THE REMEDY.

(Puget Sound Trail)

"I told father I loved you more than any girl I've ever met."

"And what did father say?"

"He said to try and meet some more girls."

Minard's Liniment Relieves Neuralgia

The Coffee Cup in Persia.

The expression "to give a cup of coffee" has in Persia a somewhat ominous significance. This is due to the fact that the coffee cup is one recognized medium for conveying poison. Some years ago the governor of Aspamia, having long been at daggers drawn with the chief of a powerful mountain tribe, determined in this way to put an end to all trouble. He professed to entertain a great degree of friendship and esteem for the chieftain and invited him to visit him at his palace. The chief unsuspiciously came, accompanied by his two young sons. For a week they were royally entertained. But at last one morning when the chief came into his host's presence he was coldly received, and an attendant stepped forward with a single cup of coffee in his hand, which he offered to the guest. The latter could not fail to understand that he was doomed. Preferring, however, steel to poison, he declined the cup and was thereupon, at a signal from his host, stabbed to death.

CRASH.

(Kansas City Journal.)

"What's the racket over at Flubdub's?"

"Sounds like they are having a china shower."

WANTED—GIRLS OF GOOD EDUCAtion to train for nurses. Apply, Wellandra Hospital, St. Catharines, Ont.

Perfect Pitch.

A fairly large number of people are gifted with a good ear of music, and their friends think it is quite wonderful that they are able to play or whistle tunes which they have heard only once.

But this gift, however remarkable it may seem, is by no means extraordinary or exceptional, especially when compared with the possession of what is called an "ear of absolute pitch." This means that the person possessing it is able to stand away from the piano and tell you what note you are playing or in what key. One well known lady pianist is able to read over the score of a piece of music in the train or omnibus, leave the book behind her and yet play the whole piece through by memory when she reaches home.

Perfect pitch is a gift to some people, but it can be acquired. Indeed, many authorities say that to be a really great musician this power must be possessed.—London Answers.

STORMY WEATHER HARD ON BABY

The stormy, blustery weather which [illegible] we have during February and March is extremely hard on children. Conditions make it necessary for the mother to keep them in the house. They are often confined to over heated, badly ventilated rooms and catch colds which racks their whole system. To guard against this a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. This will not fail to break up colds and keep the health of the baby in good condition till the brighter days come along. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Co., Brockville, Ont.

Bullet Wounds in Stomach.

In some experiments with bullet wounds it was determined that when a hollow organ such as the stomach is perforated by a bullet, it sustains more damage if it contains fluid than if empty. The author fired a 0.303 bullet at a sheep's stomach, in the one case when it was full of water, and in the other case when it was empty, with the following results. The aperture in each wall of the empty organ was .02 in.; the aperture in the first wall of the full stomach was also 0.3 in.; but that in the second wall was 0.7 ins. From that it follows that a man hit after a full meal would have less chance of recovery than had this occurred when the organ was empty. Bullet wounds of the lung, provided no large vessels are touched, are seldom fatal in man or beast.

We have been using MINARD'S LINIMENT in our home for a number of years and use no other Liniment but MINARD'S, and we recommend it highly for sprains, bruises, pains or tightness of the chest, soreness of the throat, headache or anything of that sort. We will not be without it one single day for we get a new bottle before the other is all used. I can recommend it highly to anyone.

JOHN WALKFIELD,

LaHave Islands, Lunenburg Co., N.S.

A MOCKERY OF MARRIAGE.

(Pittsburg Gazette-Times)

People enter into the married state with too little thought of its real meaning and without sufficient regard for its solemn obligations. In many instances it is more of a jamboree than a ceremony and the grotesque antics of so-called friends frequently make of it a farce and a mockery. When married life at its very inception is made the center of buffoonery and rough horseplay, what wonder that when its novelty has worn off it should be lightly cast aside?

Lazy Livers Come from Lazy Living—sometimes from food follies that tax the overworked digestive organs. Get back to Nature by eating Shredded Wheat. It puts you on your feet when everything else fails. It supplies the muscular energy and mental alertness that put you in fine fettle for the day's work. Delicious for breakfast with milk or cream, or for luncheon with fruits. Made in Canada.

ELLA'S RECOMPENSE

"I should think not; but I can't speak German;" still, he overtook the woman in question, and attracted her attention by pointing with his stick to Ella. The woman quickly obeyed her summons, and sundry flower pots were placed in her basket.

"Now I must go to the fruit-stalls," said Ella.

"May I go with you?"

"Oh, yes—certainly, and I have plenty of time. It is so nice to be out in the morning!" A few steps brought them to a tempting pile of fruit, and Colonel Cecil felt quite pleasantly amused to watch his companion's pretty wiles and efforts to beat down the price of sundry abundant bunches of big purple grapes.

"The fruit is quite dear this morning," she said, with a little pout; "and yet I feel quite ashamed of always trying to get them cheaper."

"What do they ask?"

"Oh, twenty-five groschen."

"Thats' how much?"

"I am not quite sure—something like two shillings."

"Then, Miss Marston, I think you are rather stingy."

"I think I am," she said, laughing; "but pray remember I am not spending my own money."

"Ha, that is a different matter. Here," to the vender of fruit, this time a middle-aged man, "Here, give me two—" holding up two fingers, and taking from his purse the sum demanded. Whereupon two splendid bunches were deposited in the "Bote-Frau's" basket.

"Oh, thank you!" cried Ella. "Mrs. Vereker will be so pleased! I shall give her a pretty message."

"That you can do as you like," he returned rather shortly; and Ella thought, "Is it possible he can have been a shy, chivalrous young man, unobtrusively devoted to a married woman!" She looked at him with smiling but reflective eyes, as she thought, while Cecil asked himself if she were presuming to chaff him.

"And why didn't Mr. Lyall come with you?"

"He is very seedy and feverish, so he kept in his room."

"I am afraid he is in bad health."

"He is greatly out of health; he wants a woman to look after him. He ought to go and live with his sister."

"That would never do!" The words were hardly out of her mouth before Ella would have given a good deal to recall them.

"Why would it not do? Lyall is an [illegible] fellow, a [illegible] blunt [illegible]"

"Oh, I am sure he is good. I knew he is kind; but he has been used to have everything his own way, and —" she paused. Cecil did not pursue the subject.

"Stop a bit," he said; "where are we going?"

"I am going home."

"But it is so fine. Can't you come round by the walls? The river and hills look splendid this morning. Do come. Suppose we buy some more grapes and sit on the terrace and eat them."

"That would be delightful," gravely; "but I must not. I must go straight back."

"Ah! perhaps you prefer walking by yourself?"

"Why do you think so?"

"Well, I find you all alone in this crowded place."

"Because Mrs. Vereker sends me, and she is my mistress for the time being; not that I dislike coming, or am a bit afraid. What is there to fear in such a homely, busy place as this?"

"Perhaps not; but I thought Lyall and Mrs. Vereker were your cousins?"

"My mother was their first cousin; but Mrs. Vereker did not know me till that day, you remember; and she took me as—as half-companion, half-courier maid," laughing, "because I asked her. I wanted so much to come abroad again and learn German. So you see she is my mistress."

"I see," rather dryly. Here Ella stopped and bought some small pears twelve for a groschen to [illegible] for which she took a thaler from a different purse, and put the change carefully back, bestowing some coins on the carrier woman who attended her.

"You should have taken some of the [illegible] pears," said Colonel Cecil.

"Ah, this is my own affair," returned Ella, "and I want quantity, not quality. Nor are these bad. Will you try them?" taking one out of the paper bag in which she had put them carefully apart, and offering it.

"Thank you, no. I never eat fruit except at breakfast." They walked on, talking easily, Ella giving some account of the town, having, as she told her companion, "read up the subject"; then somehow she found herself telling him her desire to study the language with a professor; and generally growing confidential—so confidential that she stopped, and asked if he would come in and see Mrs. Vereker. This privilege the colonel declined. Then Ella asked if he would come in the afternoon, and bring Mr. Lyall, if he were well enough, or a report of him if he were not? This Colonel Cecil said he would do. Then she [illegible] to know about what time—two o'clock? half past three?

"She is a remarkably cool hand," he thought, stiffening. "Does she want to be sure in order to be in the way?" The idea set him in battle array. He was not going to be hunted by any one, or treated as an old fogey either. He couldn't quite make out that young cousin of Lyall's. In fact, girls of the period were beyond his comprehension.

But while he thought, Miss Marston was speaking.

"[illegible] will not come in, I [illegible] morning," dismissed him, as though he were a [illegible] only joined [illegible]. But what a bright smile she gave as she bowed and [illegible] off! He returned to his hotel, and [illegible] his [illegible] letter, [illegible] and eating a late breakfast.

"Here, Mrs. Vereker, I have brought you a present," cried Ella as she entered the room followed by a servant with the basket, which she preceded [illegible] on the table. "Colonel Cecil begs your acceptance of these grapes."

"No, really, you don't say so!" jumping up from the writing-table, where she was inditing an epistle to her man of business. "What lovely, beautiful grapes! How good and nice of him! [illegible] is just the same thoughtful, devoted creature as ever. It seems a shame to take them, eh? don't you think so—when it is all no use?"

"Oh, if the offering was a diamond necklace or a carriage-and-four, I should refuse, but a couple of nice bunches of grapes! Why, just eat them up, and give him a few sweet thoughts to make all square."

"Really, Ella, you have an extraordinary way of talking, as if you didn't care for anything, or had ten thousand a year! It's not nice—or ladylike," twisting her thin bony fingers together, "or respectful to me. I don't like and won't have it. You must treat me with more respect, you know you are dependent on me for the present, and you ought to treat me as such, I repeat accordingly."

"I did not intend to offend you, Mrs. Vereker; I only meant to persuade you to eat poor Colonel Cecil's grapes. Then you could tell him how nice they were when he calls—he said he would [illegible] me about three, if you were likely to be at home. I told him he had better try."

"Very well, get me a plate now I will eat some; and I will look over your nonsense then. Ella—but do take care. I believe fancying you can write things and get them printed has turned your head. Women who write always have such bad manners."

There were no exceptions to Mrs. Vereker's rules.

CHAPTER IV.

The indisposition of which James Lyall complained proved troublesome though not serious. He was feverish and weak, irritable and discontented, yet unable to travel, and averse to see the only English doctor in [illegible].

Colonel Cecil evidently thought him very unwell; and Mrs. Vereker thought it necessary to show her sisterly affection by worrying him with daily visits. These usually ended in her carrying off Cecil to some sight-seeing, or in some other excuse for tying him to her apron string.

Ella was occasionally present at these interviews, and one day, seeing Mr. Lyall throw down an English paper with a weary, wistful look, she offered with some hesitation, and blushing brightly, to stay and read it to him if he wished.

The invalid caught at the idea, though he was too cross and out of sorts to express himself [illegible].

"That's just what I want! Cecil never thought of reading to me. Indeed, I doubt if he could."

"Very likely not, my dear fellow," said Cecil, good-humoredly. "I certainly never dreamed of trying."

"Then go your ways, and I'll see what this young lady can do. Mind your stops, miss, and don't make greater nonsense of the stuff than you can help. I am afraid our visit to the theatre is rather indefinitely postponed."

"You must not frighten me, Mr. Lyall—I mean Cousin James, by expecting too much," said Ella, rising to take the paper.

"She's a plucky little soul after all," thought Cecil, who had always some sparring with Mrs. Vereker's young courier, and was generally provoked by her quiet assertion of her own opinions. What long lashes she had! how prettily they swept down upon her cheek and curled up again! What a pity she had not been brought up under different influences, and saved from imbibing those horrible doctrines of independence and self-assertion!

Thus it became an established custom for Ella to spend a part of every day reading to, or talking with her elderly cousin. They soon grew fast friends. She found him a very intelligent and surprisingly sympathetic companion; while, on the other side, he was delighted to find that she could read well, and took a genuine interest in his talk on theories. He often spoke of her mother, for whom Ella began to suspect he had felt more than a cousinly affection in years long gone by, and this drew her still closer to him.

Often, when Mrs. Vereker was carrying him off to a museum or gallery, the cathedral or the botanical garden, Cecil would cast a lingering look at Lyall in his easy chair near the open window, a pretty, sweet basket of flowers at his elbow, and Ella on a low seat opposite him, her hat on the floor beside her, with a lapful of books and newspapers, ready to begin her duties as soon as he was banished into penal servitude with Mrs. Vereker.

Gradually Lyall grew interested in his kinswoman, and, as they sat and talked together, he drew from her the history of her neglected girlhood and brave struggles for herself and her little sister, of her simple plans and humble ambitions.

She did not complain of poverty or hard work—only a few strong words and the tears that would for a moment brim over, depicted the cruel loss she had in the estrangement of her father—the want of parental love.

"And when my sister sends you to the right-about, what shall you do?" asked the crochety valetudinarian, who felt vaguely grateful to his cousin for amusing him, and drawing him from the contemplation of his own maladies.

"I never intended to stay longer than six months with Mrs. Vereker; perhaps shall not stay long. Then I shall try to get an engagement with a tolerably good salary, so as to be able to save a little of my large income; but my chief hope is to join Miss Griffin later on—she says she wants a partner to take some of the work off her shoulders. Her school is very well-established, and when I am older, it would be my best chance of making a home for myself and Kitty."

"Hum! You would have to put some of your little capital into the concern?"

"Oh, yes, of course. I have thought so much about what was best to be done and I believe I could not do better than join Miss Griffin; she is very clever and very kind, and would stay with me until I gradually learned how to manage as she does. You know I have Kitty to think of. It will be nine or ten years before Kitty is able to take care of herself," and a little unconscious sigh escaped her.

"Oh, Lord," cried James Lyall. "This is a blue look-out for you, my dear! Ten years' hammering at grammar, and deportment, and irregular verbs, and—Why, you'll be an old woman with gray hair at the end of such a grind—all through what ought to be the best years of your bright youth!"

"It's not so bad as you make it out, Cousin James," said Ella, smiling; "there is a great deal of fun in a girl's school sometimes. I do not mean to say I would choose to keep one if I had any other choice. Indeed there is something that makes me a little reluctant." She stopped, with some embarrassment, and colored vividly.

"Oh, ho!" thought Lyall. "We are on the verge of something interesting—and what may that be?"

"You will perhaps think me foolish?"

"Never mind," returned Lyall, encouragingly; every one is a fool at one time or another."

"Well, I am very fond of writing. I wrote a child's story, and," proudly, "I got five pounds for it. I should so like to go on trying to write till I got to something better. If I were alone I would persevere, and give up everything for it, but I can not leave myself in uncertainty as to the future, because of Kitty."

"You wrote a book!" cried Lyall. "Why I had no idea you were such a clever little baggage."

"Oh, I am not clever. If you have it in you to write, the stories will come. I think it is a sort of natural growth quite distinct from cleverness."

"Then, my dear, it is a distinction without a difference. Look here, don't go and commit yourself to anything till you have a talk with me in London. I shall soon be going up there, and then away to Torquay till after Christmas; but I'll be up and down if I feel better, and can always write to you. I don't fancy your being shut up in a school. It would be better to marry a good, honest man."

"Where am I to meet him?" returned Ella, laughing. "You do not find such commodities in schools; moreover, I have the modern feeling of not liking to enter penniless into a partnership of life; over and above which I shall never, never desert Kitty!"

"I suspect this Kitty of yours is rather a millstone round your neck."

"If it were not for Kitty," cried Ella, with indescribable fire, "I would not be alive, or I should be withered, and loveless, and hard. When I was driven from my home, and robbed of a father's affection, it was the mother-feeling for that poor, desolate, tiny little creature, that kept my heart from turning to stone. I may probably never marry or have children, but Kitty has taught me what motherhood means."

"You are a trump!" cried Lyall, heartily; "and if I were twenty years younger I'll be hanged if I would not marry you myself."

"You can be far nicer and more useful as a friend than anything else," said Ella, laughing.

"So you want to make use of me?"

"Yes, Cousin James; you can be of great use to me if you like. I haven't a man friend in the world, and men know about business, and things I can not understand or have had no chance of understanding. A little counsel sometimes would be very important."

"Very well; I'll bestow the results of my experience on you—and mind, it has cost me dear. But I thought you were a strong-minded, independent member, and quite equal to stand alone, eh?"

"I wish I were! Who put that into your head? Colonel Cecil? Ah, he does not like me! It annoys him to speak to me, and he is cross if I speak to him. What have I done?"

"Hey! What's this all about? Cecil is a capital fellow, a trifle stern and stand off, but a perfect gentleman, and not without a soft corner in his heart. He does not dislike you, you little goose! I dare say he never heeds you."

"Oh, no doubt," returned Ella, a little nettled; "and now do not let us talk about uncomfortable things any more. Let us enjoy this beautiful evening. Don't you think a drive would do you good?"

"Ay, I believe it would! You have been a capital doctor, Ella; your reading has been a tonic, your talk a restorative. Ring and order a carriage. We'll drive across the bridge to Johannisdorf," and Lyall fell into a fit of musing.

Though skeptical and tolerably hardened by the battle of life, albeit a successful one, he was more touched than his companion imagined by the unfaltering courage and cheerfulness with which she looked forward to a youth of hard work and self-denial—for what? To secure a bare competence for old age. He was deeply interested; he was drawn out of himself—a boon for which he felt profoundly grateful. The motherly love of the elder orphan for her helpless sister was a refreshing glimpse of holier things than the parched, dreary traveler on the dusty, stony ways of business life; his money assumed new value in his eyes if it could give some help, some brightness to these struggling young creatures, who had never known home or the shelter of paternal love.

"When shall you be free of my widowed sister?" he asked, as they approached the town on their return.

"Not till we return to England."

"Hum! How soon will that be?"

"I am not sure, I don't think it will be long—she sometimes talks of going to Brighton. I shall ask Miss Griffin to look out for an engagement for me in the meantime for—"

"Don't," interrupted Lyall, with emphasis. "I am going to London in about a week, and when I see you there, I shall explain some plans that are working in my head, and you shall introduce me to your sister."

"I shall be so glad," cried Ella; "you will be sure to like Kitty, she is so pretty, and such a dear altogether."

"Hum! maybe I may; any way, let me know your address as soon as you arrive in town."

To Cecil this interview was dreary though. During the day Lyall, who could be an amusing companion, appeared quite occupied with his young relative, while in the evening the invalid was weary, drowsy, and disposed to go to bed at an early hour; moreover, Miss Marston seemed so taken up with her self-imposed duties toward Cousin James that she took small notice of Colonel Cecil, who was thrown unrelating into the toils of the disconsolate widow.

(To be continued.)

The Blue Heron.

Notwithstanding the nature fakirs who write wonderfully unsound natural histories, the heron does not spear prey with its bill [illegible] it bites them, pins them between the long sharp mandibles. We have had captive herons and have seen thousands of wild ones all over this continent, and they do not do the silly trash told of them by the nature fakirs.

Some of the nests are as big as a small haystack, built upon year after year until they reach enormous weights, very often up to 300 pounds.—Outing.

SUNDAY SCHOOL LESSON

LESSON VIII. February 20, 1916.

The Christian Brotherhood at Jerusalem—Temperance Lesson—Acts 4: 32-5: 16. (Print 4: 32-5: 5.)

COMMENTARY—I. Christian liberality (vs. 32-37). 32. The multitude of them that believed—The number of believers had become several thousand and more were constantly being saved, and that in spite of the opposition that was directed against the new sect by the Jewish leaders. Of one heart and of one soul—This is a Hebrew form of expression and means complete accord. "It is the outpouring of the Spirit, melting every heart in Christian love, which produces oneness. And that same melting of heart causes the stream of benevolence to flow.—Whedon. Was his own—These Christians had in their possession more or less property, but they considered that they were stewards rather than owners of it. All things common—That is the only instance in scripture of a community of goods and this arose from the exigencies of the occasion. A gracious revival was in progress, and all were earnestly co-operating to carry forward the work of spreading the gospel. There must also have been many strangers in Jerusalem whose prolonged stay left them without sufficient means to provide for themselves. A common treasury seemed necessary that all might be cared for. 33. With great power—It was the anointing of the Holy Ghost that gave this power. Gave the apostles witness—The apostles were doing the work which had been assigned them (Acts 1: 8). They were bearing witness in Jerusalem to the fact of Christ's resurrection. Great grace was upon them all. The divine favor was upon all the believers, and not merely upon the apostles. Not only so, but the Lord gave the Christian continually favor with the people.

34. Neither that lacked—Being "of one heart and of one soul," the needs of all were met. This was not a time for withholding and accumulating temporal gods, but for distributing as need required. Sold them—This indicates how lightly in comparison with spiritual good these early Christians held their earthly possessions. 35. Laid them down at the apostles' feet—Owners of property sold it and placed the proceeds at the disposal of the apostles to be used for the support of the needy. Those who had means supported themselves, and those who were destitute were supported by the surplus of those who had more than they needed. Distribution was made—Not that an equal amount was given to all, but the needs of all were supplied. 36. Joses—The same as Joseph. Surnamed Barnabas—Joseph was a very common Hebrew name, hence the necessity of convenience in designating this convert by an additional name. He was henceforth to be prominent in the work of studying the gospel. A Levite—Of the priestly tribe. Cyprus—An island in the eastern part of the Mediterranean. Barnabas had come to Jerusalem to attend the feast of Pentecost and had tarried with the apostles, having received the Holy Spirit. 37. Having land—Probably in Cyprus. Barnabas is particularly mentioned in contrast to Ananias. He was a whole-souled, honest giver, an honor to the Christian brotherhood.

II. Hypocrisy punished (vs. 1-11.) 1. Ananias—The Greek form of the Hebrew name Hananiah. Sapphira—The name means beautiful. Sold a possession—It was a piece of land (v. 3.) 2. Kept back—The Greek word is sometimes rendered to purloin or to rob. Part of the price—They were under no compulsion to sell the land. Their act of selling it was entirely voluntary, but having sold it, they were grossly wicked in keeping a part of the proceeds and declaring they had given all. They were acting the hypocrite. Their motive apparently was to make a show of liberality, while they were retaining what they pretended to give. His wife also being privy to it—This act was premeditated and was agreed to by Ananias and Sapphira. 3. But Peter said—It is very evident that the Holy Spirit revealed to Peter the deception which Ananias was practising. This was to protect the purity of the church, and Peter was used as the human means to this end. Satan filled thine heart—Satan, the deceiver, moved Ananias to practice deception that he might gain a reputation as a Christain giver. Satan fills the hearts of many professed Christians to vote for the continuance of the saloon. To lie to the Holy Ghost—The Holy Spirit was dwelling in individual believers and in the church as a whole. The Holy Spirit was moving the believers to sell their possessions and place the proceeds in the apostles' hands; and Ananias gave the lie to the Holy Spirit when he practised this deception, for he virtually claimed to be likewise moved by the Holy Spirit, while in fact he was moved by Satan.

4. Thine own—Ananias need not have sold the land. In thine own power—He could have kept the whole amount that he received from its sale and the church would not have censured him, but he sinned against the church and the Holy Spirit when he pretended to do what he had not done. Thou has not lied unto men, but unto God—Ananias had lied "to the Holy Ghost" (v. 3) and "unto God," hence this is a clear proof of the deity of the Holy Spirit. He had lied not merely to men, and he had lied to men, but his great sin was against God. 5. Hearing these words—That his sin was known, as well as the enormity of his sin. Fell down, and gave up the ghost—This summary punishment shows God's estimate of sin. "[He was] smitten through the power of that Spirit whom he had intended to deceive. Here is no description of a death from apoplexy or mental excitement under the rebuke of the apostle, but a direct intervention of the divine power."—Cam. Bib. Great fear came on all—This judgment was calculated to inspire fear of a false profession of religion.

6-11. "Young men," probably selected because of their strength, at once wound his garments about him and carried him away for burial. In that country burial takes place within a few hours after death, usually the same day. Because of the heat decomposition quickly set in. Sapphira came in shortly after her husband's death and burial, ignorant of what had transpired. She declared that the sum brought by Ananias was the whole proceeds of the sale. Her death swiftly followed and the young men who had buried her husband carried her body to be placed beside his. Ananias and Sapphira deliberately undertook to deceive the Christian community in which they had a place. They desired to be highly esteemed by the church. Their concern was not so much to relieve the needy as to make for themselves a name. The enormity of their sin is declared in Peter's words, "How is it that ye have agreed together to tempt the Spirit of the Lord?" (v. 9). We need not be surprised that in the company of believers there were two persons who were false, for in the little band of twelve disciples of our Lord there was one who was base and sold himself to Satan.

III. Divine power displayed (vs. 12-16). The progress of the gospel was not impeded by the opposition brought against it from without nor by the hypocrisy of professed Christians, which was summarily dealt with. The Lord wrought miracles by the hands of the apostles. The Christians made Solomon's porch their place of meeting when they went to the temple for prayer, and others did not intrude upon their devotions. Through the work of the church multitudes were "added to the Lord." Sick people were brought to the apostles in great numbers and all were healed. The work that Jesus had begun and which had been committed by Him to the disciples was thus being carried forward with great success.

Questions.—What is meant by one heart and one soul? Why did the apostles preach on the resurrection? What is meant by great grace? Why did the Christians sell their possessions and lay the proceeds at the apostles' feet? Was this practice compulsory? Who was Joses? What did he do? Why did Ananias sell his possession? What was his sin? What judgment came upon Ananias and his wife? How were the people affected? Was it just? How did this punishment benefit the church? What sins are here mentioned that are closely connected with the liquor traffic?

PRACTICAL SURVEY.

Topic.—Christian Fellowship.

I. Under divine leadership.

II. Under satanic servitude.

I. Under divine leadership. The apostolic church had become welded into a remarkable unity of experience and purpose so that men had forgotten their selfishness and lived for each other and their Lord. From the founding of Christianity the duty of living for others was insisted upon. The apostles were so animated with the joy which the resurrection was calculated to inspire that they manifested an anxiety and diligence to maintain and propagate the religion of their Master. The resurrection was a triumphant refutation of Jewish error. Accordingly the apostles pressed that fact with great persistency. In this happy state, in this clear atmosphere of love, the great truths of the gospel shone out with marvellous brightness. The whole multitude of believers were so united in Christ that all distinctions were lost. The ordinary worldly life seemed to have melted into the life of faith and godliness. The whole body received the apostles' doctrine, submitted to their rule, committed everything to their ordering. The holy fervor manifested by them at this time was not accounted for by the incoming of wealthy members, but by the increase and enlargement of the grace that rested upon them. Their unity rested on a common faith, a common ideal, a common sentiment. There was a harmony, a union unknown before. The love of money was swallowed up in the love of Christ. The community of goods was their expedient to accomplish the will of God. It was a marvellous sign of the Spirit's presence and power, the result of a supernatural Being working in their hearts. Extraordinary times and circumstances required extraordinary methods.

II. Under Satanic servitude. Great grace and true benevolence were suddenly followed by deception and counterfeit benevolence. A deliberate attempt to impose upon God and his church was followed by a solemn display of divine pleasure that the growing society might be guarded from being corrupted in spirit as it increased in numbers. Like lightning from a clear sky came the crime of Ananias and Sapphira. No sooner did evil reveal itself, within the church than the Holy Spirit detected and judged it. Without any heart sympathy with the community of goods Ananias and Sapphira professed to adopt it because it was popular. They did outwardly that for which they had no real respect. They pretended to be moved by a divine influence; not by doing a thing which was pre-eminently the fruit of the Spirit in the hope of securing to themselves the good opinion of the congregation to which they belonged. They desired to have all the credit of the church for acting as generously as Barnabas had. Their act was proof of hearts alienated from God. Their purpose was veiled under the pretence of religious principles. Their sin was deliberately and presumptuously directed against the Holy Spirit. They knew of the Pentecostal gift and yet definitely proposed to deceive the Spirit of God in the persons of his chosen ones. Their deliberate act proved them hypocrites. Peter's question, "Why?" implied that resistance to Satan's influence had been possible. There was apparently no necessity laid upon them by outward circumstances. They were not helpless creatures whom the enemy had made his tools. They agreed together to deceive. The deep, sad cause of their conduct was the stirring of the religious emotions without the corresponding quickening of the moral sense. In vain did they secretly concert their plan and assume the confidence of conscious integrity to hide any suspicion of their baseness. They would have succeeded if only they could have kept God from interposing. The fate of Ananias and Sapphira operated as a warning to all who were of like spirit and made them afraid of tempting God by a false profession. It was a strong manifestation of God's condemnation of hypocrisy. This affection was made to bear good fruit under the providence of God. The effect on the church was salutary. It recalled the church to a sense of what righteousness implies. T. R. A.

HER FEAR.

(Judge.)

Nervous Old Lady (as train stops suddenly)—What's the matter?

Trainman—There is a 200-foot embankment here and a whole train just rolled down it.

Nervous Old Lady—O dear. I hope it wasn't ours.

A baldheaded man has had spiders painted on the top of his head to frighten off the flies.

Chats With the Doctor

BY A PHYSICIAN

NERVE SYMPATHY, PHYSICAL AND OTHERWISE.

Very few people realize the immense influence sympathy —using the word in a broad and general sense —has upon health and physical conditions. Yet the mental state, thoughts and emotions of those with whom we come into even casual contact—much more of the people with whom we daily live—exercise a most important and powerful impelling force over our bodily welfare; to say nothing of our feelings and actions.

The most familiar, everyday example of this sympathetic agency, potent for good or evil, is afforded by the yawn. You are sitting, not particularly tired or sleepy, in a 'bus or railway carriage. Somebody opposite yawns. Perhaps you are looking directly at him or her; perhaps you are not, you catch the fact of their yawning by the corner of your eye, while thinking only of your own affairs. But instinctively you yawn also, in response to the mysterious sympathy, and do not realize that you are so doing until the act is over or nearly so.

When somebody yawns in company, in the family circle, or crowded church, the malady quickly extends to others—may involve everybody. That again is a fact sufficiently familiar. But the contagion is not nearly so instinctive. There is much more of deliberate consciousness, and even reflection. The occurrence is far from striking illustration of this principle afforded by the yawn in a railway carriage, brought on you by someone you are not thinking about in any way, or even looking at.

OLD AGE AND YOUTH.

There is a well-known proverb, "Crabbed age and youth cannot live together." That is generally taken to denote incompatibility of temperament and of mental outlook. But I think it also holds good in respect of the mysterious physical sympathy—or, rather, in this case, the want of such.

It is always most objectionable and deterrent to bodily health for an aged person and a youthful one to sleep for any length of time in the same bed. The health of the younger, and therefore more sensitive person always suffers. This no doubt is due in great part to physical emanation, and other material causes. But I should consider it also caused in no slight degree by the unnameable and obscure sympathetic agency here hinted at.

Hamlet says, "There are more things in heaven and earth, Horatio, than are dreamt of in our philosophy." And in this age, when the tendency is to regard everything from the ultra-material point of view, it is the more necessary to recognize that profound and significant fact. At every turn we encounter incidents and also diseases, such as lunacy, altogether incapable of explanation from the material standpoint. We have to admit —doctors especially—that we know very little, and cannot in the least understand a very great deal of what is happening around us, or of what we see every day.

There is nothing more remarkable in the present condition of medicine, and its vast pretensions to scientific knowledge of disease, than the fact that there is no special pathology of insanity. As a rule, a lunatic's brain is quite as healthy-looking as that of a normal individual — possibly even more so.

MORAL INFLUENCES.

We all know what it is to be in the company of others whom we loathe and detest instinctively, without being able to give the smallest reason that could count for this aversion. Brown put it well when he said:

"I do not love thee, Dr. Fell.
The reason why I cannot tell;
But this alone I know full well,
I do not like thee, Dr. Fell."

Why this poet chose a doctor to apostrophise in this way I don't know. Possibly he owed the latter a bill. I have often known doctors roundly abused for no other apparent reason.

Conversely, the moral effect of high courage, of steadfastness and "backbone," of unselfishness, of pure and lofty endeavor in a worthy cause—are admitted to count for much in worldly affairs, and that without deeds to illustrate them, or spoken words to point out their existence. They influence by sympathy. A great general's ruling power in the minds of his army is largely moral and sympathetic. Napoleon counted his own arrival at headquarters as the equivalent of a reinforcement of 10,000 men; and probably that was only a modest estimate.

IMITATION.

An example of sympathetic imitation, I am afraid human nature is always far more prone to copy a bad example rather than a good—is found in the habit of stammering. That is commonly conveyed at school by a child imitating someone else in the class. And when once begun, it is very difficult to eradicate.

Among savage and primitive races this tendency to imitate is found in very striking and peculiar forms. In the Middle Ages we had a dancing mania, which impelled those who fell under its influence to dance without ceasing. Hence the name "St. Vitus' Dance," now given to the disease chorea. Also we had the Flagellants, who wandered about in bands flogging themselves (or each other) very lustily. The religious revivals of some 50 years ago show the same curious phenomenon among ourselves; still more among our American cousins and their belongings. The ecstacies of the negroes at a camp meeting are still proverbial. I have read of nuns at a convent who underwent an epidemic seizure which forced them to mew continuously like a cat. It was put down only by severe corporal punishment.

There is always considerable risk to bodily health when undisciplined emotion (of a religious character or otherwise) thus overcomes and takes the place of reason. Many of the above become mad. There are, of course, other dangers. A crowd will do atrocious things at which every single person in it would shrink. Even these horrible German atrocities would scarcely have happened had their perpetrators been solitary or even members of a small group. But they were in an armed crowd, and ruthlessness, fiendishness, deliberate terrorism by cruelty, were in the air—the inward spirit of that crowd.

HYPNOTISM AND HYPNOTIC SUGGESTION.

The phenomena of mesmerism (known in these days as hypnotism) afford an apt illustration of the medical maxim that "whatever is powerful for harm is also, if rightly employed, equally powerful for good." Hypnotism has done much evil, and has driven many people mad. It has also cured many others, who could not have regained health otherwise. It is worthy of much more attention by the faculty than it has hitherto received, and is now practised by many educated practitioners of the medical art.

Unfortunately no one with any mental soundness or deficiency can be hypnotized, or one would naturally look here in quest of the greatly needed cure for lunacy. But to speak of my knowledge (I can speak from actual experience) hypnotism constitutes the best remedy we have for alcoholism and the drug habit.

THE MORAL.

The moral of my little sermon is that each of us is a single brick in a vast edifice, and that every one affects others (both far and near) in all sorts of known and unknown ways. Each individual has responsibility to all the rest for the influence exercised—it may be at a considerable distance, and should take heed that it is for good.

ICELAND'S EIDER FARMS.

How the Ducks Are Guarded and Are Robbed of Their Down.

The down of the elder duck is more highly esteemed and brings a higher price than any other down. In Iceland and the Vestmanaeyjar Islands, where the duck nests it is rigidly protected by law and by public sentiment.

These ducks make their nests of down from their own breasts. They pluck it out with their bills and form it into a circular mound which has the property of retaining heat to an extraordinary degree. If this down on removed the duck supplies a second and even a third lot from the same source.

The elder farms in Iceland are frequently situated on little islands off the coast, covered with low hummocks. To protect the brooding ducks from the elements the Icelanders construct small shelters of rough stones. On these farms, it is said, the ducks become so tame that any one with whom they are familiar may handle them without frightening them.

Separate buildings on the Icelandic eider farms are devoted to the cleaning of the product. Down clings tenaciously to anything on which it is thrown, a circumstance that is utilized in cleaning it. There are a number of frame of oblong shape, and along these numbers of strings are stretched loosely. The down is cast on these near one end, and a piece of wood is drawn rapidly backward and forward over the other end. The down clings to the strings, but all impurities, such as grass and seaweed, fall to the ground.—Every Week.

"Give me an illustration of the theory that every cloud has a silver lining," said the teacher. "When a feller is too sick to go to school," replied the boy at the foot of the class.

A COLD
Settled On Her Lungs
Causing Great Pain.

THE CURE WAS
DR. WOOD'S
Norway Pine Syrup.

Miss D. M. Pickering, St. Catharines, Ont., writes: "Having derived great benefit from Dr. Wood's Norway Pine Syrup, I thought I would write and tell you of my experience. When I first came out from England I contracted a severe cold, owing to the change of climate. It settled on my lungs, and caused me a great deal of pain. I tried every remedy I could think of, but got no relief. My father, who had heard a great deal about the good qualities of Dr. Wood's Norway Pine Syrup, advised me to try it. I did so, and I am pleased to say, found immediate relief. I only took one bottle and it cured me completely. My mother had a severe cold also, and Dr. Wood's Norway Pine Syrup cured her, so we never fail to keep a bottle of it in the house."

See that none of those so-called "pine syrups" are handed out to you when you go to your druggist or dealer and ask for "Dr. Wood's." It is put up in a yellow wrapper; three pine trees the trade mark; price, 25c and 50c.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

When the Back Becomes Lame
IT IS A SIGN OF KIDNEY TROUBLE

Doan's Kidney Pills cure the aching back by curing the aching kidneys beneath—for it is really the kidneys aching and not the back.

Doan's Kidney Pills are a special kidney and bladder medicine for the cure of all kidney troubles.

Mrs. Louisa Gonshaw, 663 Manning Ave., Toronto, Ont., writes: "I take great pleasure in writing you, stating the benefit I have received by using Doan's Kidney Pills. About three years ago I was terribly afflicted with lame back, and was so bad I could not even sweep the floor. I was advised to try your pills, and before I had used one box there was a great improvement, and my back was much better. However, I kept on taking them until my back was completely cured. I highly recommend 'Doan's' for lame back."

Doan's Kidney Pills are the original pill for the kidneys. See that our trade mark the "Maple Leaf" appears on the wrapper.

Doan's Kidney Pills are 50c per box, 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

WALKERTON, FEBRUARY 17th '16

Shivery weather this—but think of the boys in the trenches.

+ + +

"Do you think stimulants would hurt me, doctor?" "Not if you leave them alone."

+ + +

A question for every day: What am I doing to help in the great struggle for human liberty?

+ + +

The rainfall in Bruce last year was about 38 inches, according to figures just published by the Ontario Bureau of Industries.

+ + +

A recent government report states that Bruce had 27,821 acres under fall wheat in 1914. The total yield was 614,844 bushels, an average of a little over 22 bush.

+ + +

Captain Jack Miller says that if it was a battalion of officers he was trying to raise he would have no difficulty.—Orillia Packet. The same applies to a good many other counties.

+ + +

Preparedness shows itself in many ways. To a nation it means being ready for any emergency that may arise. To the thrifty housewife it means always having a can of salmon in the pantry in case the minister drops in for supper unexpectedly.

+ + +

There was no one better known in Bruce County than John Tolmie. He was a strong Liberal, but politics interfered little, if at all, with his personal relations. There was no more typical representation of the Scottish element in Canada and Bruce is greatly bereaved by his death.—Toronto News.

+ + +

It is said that about twenty-five per cent. of the men who have offered themselves as recruits in Canada have been rejected because of some defect, varicose veins and flat feet being the most common. In some cases the examining physician discovers more serious troubles of which the would-be recruit was quite unaware. It is not unlikely that the war and the conditions which it discloses will result in greater attention being paid to physical training and the building up of sound, healthful bodies. The softening effects of modern conditions of life should be counteracted by a conscious effort to maintain a good physique.

+ + +

Bruce County Council voted $7500 per month to the Patriotic Fund, which amounts to two dollars per head of the population. Makes Norfolk's ninety cents look rather cheap and yet Norfolk is double some other counties. In fact, the patriotic giving throughout the country is most unequally distributed. If the end could only have been seen from the beginning possibly different methods might have been adopted. Now the only possible thing to do is to continue on existing levies, and the less generous communities educated up to better things. In June Norfolk's grant will have to be doubled and the people should prepare themselves for that amount as minimum.—Simcoe Reformer.

+ + +

END OF WAR NOT IN SIGHT

There is still no prospect of the end of war, which General Hutton announces may last longer than the three years estimated by Kitchener at the beginning. That the war goes on even in midwinter, Canadians are daily reminded by the casualty lists. The news from Europe creates the impression that determined effort will be made in the spring to drive the Germans from Belgium. The world already shudders at the cost, which must, in any event, be borne. Another military authority tells us that the allies will never be able to pass the defences of the Rhine. The duration of the war would, therefore, remain after the clearing of Belgium to be determined by the slow wearing down of resources of men and materials. The English economists and bankers, despite the failure of their past assurances, are still confident that German finance will presently collapse and with it the German military power.

+ + +

"HOW IS IT GOING?"

(Toronto World)

One question is first on every lip when friends meet: "How do you think the war is going?" It does not matter in the least how you think the war is going, if you are not doing something to make it go. Every man in Germany can answer to the question what he is doing for his country, but a definite statement of fact. In Canada and in other parts of the empire there are many men who can only say they do not like the war, but they would not raise a finger to stop it nor to shorten it. This is what makes the problem of how the war is going a difficult one to solve. If every man turned to and did what was in him, by enlisting, by subscribing, by taking some share of the burden, however slight, the whole force of the country would soon be able to settle the question. It must be settled this way sooner or later. It may be very much later, after fiery trials and sufferings which can only be avoided by immediate action. Those who refuse to act now, are laying up for themselves suffering in the time to come. It is inconceivable that the British Empire should surrender while the spirit of Nelson and Wellington survived even in embers and gleams among the ashes of her people. It is not sufficient to talk heroics, however. People must do what they say and act as they think. There is need of men. There is some evidence of an awakening, but we cannot be too wide awake.

LETTERS FROM THE FRONT

Lieut. Eric Robertson Tells of His Experiences at the Flying School—Has Canada Begun to Realize Her Responsibility?

LIEUT. ERIC ROBERTSON.

We are privileged to publish a most interesting letter this week from Lieut. Robertson, to his parents, the County Treasurer and Mrs. Norman Robertson, from a flying school in England. His remarks on recruiting should stir up some of the boys at home to a recognition of their responsibility.

Norwich, Jan 20, 1916.

* * * Yet I feel in spite of my longing to be at home, that home is not the place for me just now. I felt that before I left Canada of course, but it is surprising how strongly the military atmosphere of England impresses the thought on one. Now it is simply beyond my comprehension how any able-bodied man can keep out of khaki. Everywhere one sees soldiers and blue jackets and the number of men wearing "Lord Derby's armlets" is increasing every day. People in Canada pride themselves on doing their bit for the Empire, but believe me, Dear People, Canada hasn't begun to wake up to its responsibility and its duty. Even when that whole contribution of 500,000 men is raised, there will be thousands of slackers walking the streets in Canada. You ought to see the number of them in Montreal and Quebec now. It made me a little bit ashamed when I came through there a few weeks ago, even before I realized what England has done in the way of recruiting. Perhaps I am understating what Canada has done—I hope so—but certainly that is the way I have felt all along, ever since I landed here.

I don't believe I ever told you what one day's work consists of. We rise at about 7.30. A tender calls for us at at 8.15 and we go up to the aerodrome for breakfast. At 8.15 we have squad drill and rifle drill until 9.30. In the meantime all the instructors have gone up to try the air and if it is not too bumpy, flying begins as soon as drill is finished. If there is flying we stick at it until noon, and again at 2.00 p. m. until dark, which at this time of year is about 4.30 p. m. After that there is always a lecture, usually by the C. O. In case the weather is unsuitable for flying,—and that, by the way, is the case about two days out of three—we go to the workshops and have instructors give us practical instruction on one or the other of the various aero engines. After that there is a lecture or we practise Morse code with buzzers or with signalling lamps. In the afternoon if there is no flying, there is an extra lecture and more "buzzing". In fact we "buzz" in every spare minute and even here at the billet too, as we have instruments rigged up between a couple of the rooms.

I have had some good times during the past few days, as we have been able to get away between 12.30 and 4.00 p. m. One of the officers, a chap named Tillard, has a car, and has been very good about taking us out for drives. On Saturday we went to Cromer and had our first glimpse of the North Sea (which as someone has said, "was once known as the German Ocean"). On Sunday we went to Blickling Hall, a magnificent old place which is connected with the name of Anne Boleyn, and to-day we went to Yarmouth, made famous by the German raids last year. All these places are within an hour's drive of the aerodrome, and the country through which we passed was just as well worth seeing as the destinations to which we were bound. We saw a submarine to-day—in fact we were close beside it as it scooted past us in the harbor.

The other day I asked the C.O. to take me for a joy ride some time, and to-night he told me he was going to try out one of the new flying planes in the morning, so I am looking forward to having the best flight I ever had, tomorrow. We never use goggles with the long horn and short horn (type of aeroplanes) as they are supplied with windshields, but I'll have to wear them tomorrow as the machine we are going in has no wind-shield and moreover is very fast. I'm afraid I will have to leave this letter unfinished until I can tell you about my flight, for I am sure you will be worrying about me unless I do. Good-bye then for just now.

Tuesday, Jan. 25th.

I am sorry I didn't send that letter off at once, for five days have passed while I was waiting for that flight. It has rained or something every day since until to-day, but after all it was worth waiting for, as this morning we finally did get off. It was so clear and bright that it made a flight well worth remembering. I borrowed all the necessary flying togs and was snug and comfortable all the time. We were in the air forty minutes and covered about fifty miles in that time, so it was rather a speedy little trip. We climbed up and up all the time too, and did most of the journey at the height of a mile and a half. There wasn't a cloud or a bit of mist anywhere and we could see not only the North Sea, but could follow the coast line for I suppose twenty miles both north and south, and distinguish ships here and there. Oh it was glorious! I am sure you have seen pictures of the very machine we were using. The observer's seat is in front and much lower in the nacelle than the pilot's seat. There was lots of room for me to move around (and the wonderful stability of those "buses" permits one to do so too), so that part of the time I was on my knees looking down at the scenery over the nose of the machine, and the rest of the time I cuddled back out of the wind and kept track of where we were with a map and compass. That wrist compass which the little Aunties gave me was mighty handy and I used it all the time this morning. When we got back above the aerodrome the C. O. turned off his engine and it surprised me more than a little to see how long it took us to come down—fully ten minutes I should think and with one throttle back to zero all the time. It was the smoothest ride I have ever had, none of the usual bumps at all, and the C. O., who is "some" pilot, landed us so smoothly that I never knew when we touched the ground.

ERIC.

WALKERTON BOY IN TRENCHES

The following extracts from a letter written home by Walter Pitt one of the Walkerton boys now in the trenches with The Royal Canadian Regiment somewhere in France, gives some idea of the soldiers life in the front lines.

"I am under canvas now for a rest. We came out of the trenches night before last after four days duty. We do four days in and four days out. The trench I was in, was in good condition down to my gun, beyond that it starts to get worse until the mud and water is up to the hips but most of the Machine Gunners have a pair of waders. I had a pair on all the time we were in the trenches. Where I was we were only about eighty yards from the German lines and with the periscope we can see everything that happens to come up above their trenches, and at night the flare lights from both sides are going up nearly all the time. You have to watch and keep down or if you are out in No Man's Land, either lie down if you can do so quick enough or stand still until the light dies out. "The Whiz bang" shells are true to name. You hear a whiz and then a bang. I've seen shell holes you could put a team and wagon in. The dug-outs we had were very good, two of them with three men in each; six men with each gun. We had a cook-house in our trench all fitted up.

While in the trenches I got a parcel from the Ripley Red Cross ladies containing socks, scarf and shirts. They were fine. I sure would liked to have eaten my Christmas dinner with you. I was helping the cook that day and had some plum pudding alright.

I suppose there will be quite a stir in Walkerton recruiting for the new battalion. I wish them luck.

+ + +

CORP. A. DEAN WRITES

The magnificent way in which the men of the British Isles have responded to the call for service is well brought in a letter which Mr. A. C. Royce received a few days ago from Corporal A. Dean, No. 602196, formerly of Walkerton, who is now with C. Co., 34th Batt. He writes:—

Bramshott Camp,
Jan. 23rd, 1915.

Dear Friend:—

Just a few lines in answer to your letter which I received last week and was glad to hear from you and to know that you are all well as it leaves me fine. Well, this is Sunday, the day a soldier does all the odd jobs. We all may say: Six days shalt thou work in the army and the seventh do the odd jobs and I think that is right over here for that is the only day we get a chance to do anything for ourselves. My mate and myself went out for a little walk this afternoon. We went about eight miles. The roads are much better here than over there, just like a sidewalk, and there is lots to see. But no matter where one goes you see troops on the road. The country here is nothing else but camps. I have been to Oxford to see my people and I never saw so many troops in my life as I did when I was there and every day some come home on leave and others go back. Oxford has done the second best in the British Isles. There is not a man that is fit for service that has not got the khaki on. I have thirteen of my people on the firing line now and I have lost one of my brothers. I am the only one fit to go that is not there but I am on my way.

+ + +

LETTERS FROM VIC. BELL

Mr. Henry Williams has received the following interesting letters from Signaller Vic. Bell:—

Just a few lines to let you know I am well and happy and hope you are the same. Gee, I've struck a good job while the boys are in the trenches. All I have to do is see that the signallers' rations are sent up to them every night while they are there. I get up every day at 8.20 a.m. and done at 11.30 a.m. I wish they would let us send home some souvenirs. We certainly see some dandies just around here. German helmets and swords, everything you like for a souvenir. I believe you asked me about our church. Well, any field that is not ploughed is our church. The Chaplain gets in the middle or rather we form a circle around him and then he lets it fly. That is all the church we have so good-bye,

Lovingly yours,
VIC.

Somewhere in France,
January 14th, 1916.

+

A later letter reads as follows:—

Here goes for another letter you will certainly think I have a pull with some one over here as I seem to be getting all these soft jobs. I have got one now—hope it lasts for a while as the trenches are a little too wet for saw me just at present, you would think I had been rolling in the mud, as it has been raining pitchforks and saw logs all day. We are in rest billets now. I have a space 6 ft. long, 18 in. wide. That is my home in France. There is twenty of us in a hut 14x18 ft., a stove in the centre sometimes a fire in it and sometimes not, mostly not. I am writing this sitting in a corner with the candle sitting on my knife which is stuck in a crack of the hut which are plentiful. Oh, this is the life for me I am getting to be a pretty old soldier, it will be one year next week since I signed up with the 34th at Guelph. It doesn't seem that long to me. Have been in France three months and it certainly does seem more than a couple of weeks. I saw five of the old 34th boys who left Canada about two months before we left. They were certainly glad to see us. They are camped about two miles from us. You were wondering where all the sox were going. Well, the companies get bags of sox and mitts every month but you see I am in a little section of 37 and they think we do not need them, so course we don't get them. Well, hoping you are all well, I will close, so good-bye.

Lovingly yours,
VIC.

Somewhere in France.

THE SENTRY

Pte. Miles J. Parsons, the writer of the accompanying clever verses is a son of Mr. W. G. Parsons, the well-known leather merchant of Toronto, and a brother-in-law of Mrs. John H. Appel. He is now doing his bit in Belgium with the 19th Batt.

"Halt! Who goes there?"
Alone in the Belgian front there stands,
With rifle clasped in his ice-cold hands,
In a lonely spot in the dank lowlands,
A tired sentry.
His wet feet stuck in the muddy ground,
His eyes and ears strained for sight or sound
Of approaching figures o'er a far-off mound
To stop their entry.

"Halt! Who goes there?"
"Is that a rat that hovers nigh?
"Or a sulking coward? Or a German spy?
"Halt! Who comes across that grass so sly—
"Is't friend or foe?"
"Friend," the answer came in the nick of time,
"Advance friend, give the countersign"
And he whispered clearly across the line:
"Ontario!"

"Halt! Who goes there?"
A long way off down the muddy street
He hears the slushing of many feet
Approaching him on his sentry beat,
"Halt! Who goes there?"
"Friends and stretcher, and comrade who gave
"His life and his all that he might save
"His fighting pals from yonder grave
"He knew no fear."

"Pass, friends; pass on."
Silently he watched them pass in line
By the little slope 'neath the ridge of pine,
And his thoughts roamed back to the countersign:
"Ontario!"
How good it would be to be back once more,
Back to that place on Ontario's shore,
Away from this hellish flood of war
With its blood-stained snow.

Not fifty yards from the sentry's wood
Ten thousand men in the trenches stood—
And the night was dark and the wind was good
For the Huns' attack.
Some crouched by on the firing bench,
Others stood in the muddy trench—
Where the earth breathed up its sickening stench—
And the night was black.

Pals and comrades, divided, mixed;
The bombing squads in the bays betwixt,
With their nerves all tense and their bayonets fixed,
They waited there.
Long into the night they crouched in mass,
Prepared for the deadliest fumes of gas,
When its green-grey clouds o'er the glacis passed
Through the foggy air.

Suddenly then, in a great array,
A thousand flares for miles away
Changed all the darkness into day
With a light that blinds,
And a thousand guns from the enemy's hill
Flashed with a roar on the night so still—
And the shrapnel whizzed on its path to kill
In our swollen lines.

Loud were the cries of the men,
"We're gassed!"
And every man in frenzy masked,
As the cloud rolled on to the trenches fast,
O'er no man's land.
With Maxims and Colts again and again
We swept their ranks with a leaden rain,
But the Huns drove on in an endless chain,
By cruel command.

And their shells burst on with an awful din,
As our first line parapets fell in,
And the cries were hell, and our ranks grew thin,
On that awful night.
Closer and closer the advancing host
Came to fulfil their Kaiser's boast,
And the shrapnel broke o'er the sentry's post,
With flashing light.

Firing like mad in that loosened hell
The Canadian heroes fought and fell
As the Huns came on with their murderous yell
And naked sword.

Again and again we drove them back
And we cut them up in their fierce attack
As our rifles flashed in the night so black
On that mighty horde.

Onward they swept o'er that swampy mire,
And they fell like rats in our tangled wire
As we mowed them down with machine gun fire
From either side,
And then like a war of olden days
A thousand bombs from the bombers' bays
Burst in the ranks of the German Greys
The Kaiser's pride.

All unprepared for this sudden knock
Their disciplined lines like a wall of rock
Swayed and crumpled beneath the shock
In full dismay.
Then as a man the Canucks rose up;
'Twas their time now to taste of the cup
And from it the wine of victory sup
O'er broken day.

With a cheer they charged on the frantic Huns,
Their bayonets fixed on their long Ross guns,
And every man of them Canada's sons
Of the fourth brigade.
And we drove them back in a wild stampede,
With our gallant officers in the lead,
And they stumbled back with relentless speed
Past their barricade.
The grey dawn broke o'er the field of crime,
Creeping with wounded and mud and slime,
And the dead lay thick on the glacis' grime
To fight no more.
No graves were dug, no bells did toll
For the half-unanswered muster roll.
But each man mourned in his inner soul
The price of war.

And not far back by the wooded crest
The sentry sleeps in unbroken rest
With a bullet sunk in his cold white breast
And with vacant stare.
They carried him back by the ridge of pine,
Not far away from the firing line,
And inscribed the word of the countersign
As they laid him there.

And the men worked on from day to day
In the cold, wet mud and the Belgian clay
Clearing the scenes of death away
Under covered night.
And many hearts in a far off land
Bled for the boys who made that stand
And gave their lives in that fight so grand
In the cause of right.

Excepting the guns from the allies' hill
The Belgian front lay quiet and still,
And the days rolled by through winter's chill
On the western line.
And another lonely sentry stands
In the same dark spot in the dark lowland,
Challenging all in his sharp demand
For the countersign.

Visit the
Good Roads Congress
at Sohmer Park, Montreal,
March 6th to 10th inclusive.

Every citizen who is interested in the welfare of his community should take advantage of this opportunity to obtain information about the kind of good roads that will create better and more economical living conditions in that community.

See our
Concrete Road Exhibit
and learn without cost the advantages, the practicability and economy of the "best good road"—the Concrete Road.

Our road engineers will be in attendance to give you the fullest detailed information of the economy of Concrete as a road building material. Don't wait for someone else to take the lead. Come in person and get first-hand facts. Ask for our free booklet "Concrete Roads".

Brant Township Farms
I have, in Brant, 2 fifty acre farms, 1 forty-six acre farm, 1 one hundred and thirty acre farm, 2 two hundred acre farms all WELL IMPROVED, convenient to Hanover or Walkerton, and the owners have placed them in my hands because they ARE BOUND TO SELL. I have also a 100 acre farm in Perth, near Listowel, one of the best farms in the County of Perth, with extra improvements, a very great bargain at $7000. I never before had such a choice of Farms as now. My office is HEADQUARTERS and you should come to see me if you want to buy at right prices.

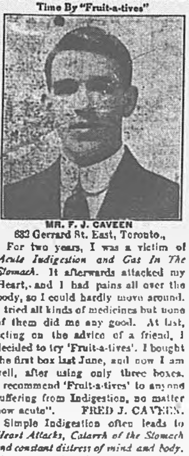
SHARP ATTACK REPULSED

Dangerous Condition Relieved Just In Time By "Fruit-a-tives"



MR. F. J. CAVEEN
632 Gerrard St. East, Toronto.

For two years, I was a victim of *Acute Indigestion and Gas In The Stomach*. It afterwards attacked my Heart, and I had pains all over the body, so I could hardly move around. I tried all kinds of medicines but none of them did me any good. At last, acting on the advice of a friend, I decided to try 'Fruit-a-tives'. I bought the first box last June, and now I am well, after using only three boxes. I recommend 'Fruit-a-tives' to anyone suffering from Indigestion, no matter how acute". FRED J. CAVEEN.

Simple Indigestion often leads to *Heart Attacks, Catarrh of the Stomach and constant distress of mind and body*. If you are bothered with any Stomach Trouble, and especially if Constipation troubles you, take 'Fruit-a-tives'.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

DENTAL

POETS' CORNER

The Ahchoo Army

The rapid-fires may rattle
  A regiment to death;
The howitzers in battle
  May blow a hell-born breath,
    But here at home
    By Kaiek'y dome
  One volley hits the rate—
The choo-ahchoo-ahchoochoo.
Pooh! for the dumdum volley!
  Bah! for the bomb's alarms!—
Tush! for the Gallypoly
  Arbitrament of arms!
    They are as mild
    As some sweet child
  Besides the thing one fears—
The choo ahchoo ahcoochooch in
  Of the Grippy Grenadiers!
There, where all men are maddened,
  Where trenches take their toll,
Your heart may meet a bad end,
  Blown outward with your soul'
    But as my cough
    Blows my head off.
I give, instead of cheers,
The choo-ahchoo-ahchouchoochoo
  Of the Grippy Grenadiers!
O weary-eyed battalions,
  Who naval trumpets blow!
You wear no King's medallions
  For fighting with the foe,
    Yet hope that dies
    Now fills our eyes
  With more than Europe's tears!
Hark to the choo ahchoochoochoo
  Of the Grippy Grenadiers!
—John O'Keefe

News About Town

The Toronto Star believes that Premier Hearst will give Ontario prohibition as a result of the big petition.

Town Clerk Collins has furnished us with the vital statistics for the past year as follows:—Births 52, Marriages 20, Deaths 66.

Seventy-three per cent. of the electors of Chesley and eighty-two per cent of the electors of Elderslie signed the petition for a dry Ontario.

Reeve Nesbitt, Brant's tall tamarack, accompanied by his better half who is a niece of Mr. and Mrs. John Krug, spent Tuesday with their relatives in town. Mr. Nesbitt's increase in majority from 2 to 90 in one year doesn't look as though his popularity was waning.—Chesley Enterprise.

No soldier's pay can be stopped or garnisheed for debt. In this connection the following significant notice is inserted in the last issue of the Militia Orders:—"Notice is hereby given to the public that a soldier's pay cannot be seized for debt, and consequently merchants who sell to soldiers on credit, do so at their own risk."

Manager K. M. Taylor of the Merchants Bank, rode down to his office in state the morning of the storm. In front of his residence he stopped a driverless horse which he recognized as belonging to a down-town resident. Mr. Taylor climbed in and enjoyed a ride through the drifts as far as his office before meeting the grateful owner.

Pte John Walks of the 160th Bruce Battalion was presented, at the residence of his parents, Mr. and Mrs. David Walks, concession 10, Elderslie, with a wrist watch, purse of money and a complimentary address by neighbors and friends. Pte. Walks passed last summer the last part of entrance to faculty, and, not being old enough to attend faculty, did what he saw was his duty and enlisted in the Bruce Battalion. He is fine specimen of Canadian young manhood, being over six feet.

+ + +

Line From Belgium

Pte. George Kingsbury's many friends here will be glad to know that he is well and "doing his bit" in Belgium. In a letter to the Telescope, he says:—"I am living in the hopes to be back in Walkerton before another year has gone. Your paper has reached me quite regularly. Could hardly do without it."

+ + +

Township Treas. Named.

Mr. Fred Jacklin was appointed treasurer of Brant Township to succeed the late James Coulter at a special meeting of the Council held on Friday. There were four other applicants for the position—Wm. H. McNiell, Frank Fisher, Malcolm McCallum, Alf. Garland. Mr. Jacklin was Township treasurer for a year before going west five or six years ago. The fact that he had experience in the work is said to have been the deciding point in his favor. The Council decided to leave the bank account at Elmwood for the present year.

+ + +

"Them Was the Happy Days"

Forty-six years ago this paper was a dollar says Editor Roy Bayles of the Port Elgin Times, and the advertising rates, according to the rate published were a trifle higher than to-day. Now, the weeklies are asking $1.50, and when we quote the prices of produce at that time it is surely convincing that the newspaper in the rural community is deserving of a little extra support. In that year wheat sold for 49c, oats, 29c, peas 35c, butter was 12 and 14c, eggs, 12c, potatoes, 30c. In that day the editor could buy 100 lbs. of oatmeal for $2, a load of four-foot hardwood for less than $2, and with lots of oatmeal and wood and a little beef at $4 per hundred dressed, one could live pretty well.

Printers are receiving notices these days of increases in the wholesale price of printing paper. To the increasing cost of raw material and the new war duty is attributed the necessity of an increase.

+ + +

High School Wins.

Walkerton High School hockeyists showed their prowess on the ice last week by beating a visiting septette from Chesley H. S. by a score of 12—2. The Walkerton line-up consisted of: Goal, Rennie; Defence, Russel and Rowland; centre, Small; rover, Moore; left, Schwindt; right, Skelton.

+ + +

Hydro Men Near Chesley

The hydro-electric gang have the poles, wires and other equipment of the power line from Eugenia Falls erected within four miles of Chesley and they are now boarding and rooming in this town. As they construct about half a mile a day the power line will be completed to Chesley within two weeks.—Chesley Enterprise.

+ + +

Died in the West

Mr. John Collins received a letter on Monday telling of the death of Mr. Alex. Campbell, formerly of Paisley, and at one time landlord of the old Northern Hotel. The deceased had been living with his son, George, and had been in failing health for some time. The remains were buried in the cemetery at Shaunavon, Sask.—Paisley Advocate.

+ + +

Saugeen Acting Up.

A stranger coming into our town within the past week might have thought we were within the Zeppelin radius, but it was only the old Saugeen demonstrating her power, as she has many times before. The ice forming from the mouth of the river back to the dam has caused the water to rise many feet so that the dam was submerged and also most of the power house.—Southampton Beacon.

+ + +

Fined $100 and Costs.

Magistrates Gibson and Ballachey gave their decision on Wednesday in the charges against John Armstrong. The evidence was not sufficient to convict for selling liquor, but both of the charges for intimidating witness they found to be proven, and imposed fines of $50 and costs on each count. Counsel for Armstrong, is moving to have one of the convictions quashed on technical grounds. D. Forrester appeared for the prosecution and A. E. McNabb for the defendant.—Paisley Advocate.

+ + +

Recruiting Meetings

Sec. Geo. McKay of the Bruce War Auxiliary has arranged for a large number of meetings throughout the County the next two weeks. Ripley, Kincardine, Chesley, Elmwood, Underwood, Mildmay are some of the places included in the program. Among the speakers will be: Capt. (Rev.) Duncan, Major J. J. Tolmie' Judge Klein, Col. Weir, J. J. Hunter, John Rowland, Capt. McNally, Hugh McKerracher and others. The 160th Band will be present at a number of the meetings.

+ + +

Recruiting Meetings.

Arrangements are being made for big mass meetings for Recruiting for 160th (Bruce) Regiment. Besides the big Mildmay meeting on the 22nd inst, a meeting will be held at Paisley on 23rd, Port Elgin 24th, Tara 25th, Lion's Head 26th, Wiarton 28th and Hepworth 29th. All meetings commence at two o'clock in the afternoon and will be addressed by good convincing speakers. The military band will lead the parade of local soldiers at each place. Places near each other will send their soldiers to parade so there will be a good lot of soldiers at each place. At Wiarton on the 27th there will be a church parade. Cape Croker soldiers 60 strong will be at Wiarton on 28th inst. Further particulars will be announced by printed posters at each place next week. Anyone living within 10 miles of any of these places should go and see the soldiers and hear the Band and speakers.

+ + +

The Teachers' Donation.

Principal Willoughby, treasurer of the East Bruce Teachers' Association, has received word from Mrs. L. E. Campbell, treasurer of the Municipal Chapter, I. O. D. E., that the sum of $276.15, sent by the Teachers through the Walkerton I. O. D. E., has been apportioned as follows:— Motor Ambulance Fund, $100; Annex to the King George and Queen Mary Hostel, $176.15. The ambulance has already been paid for and sent to the Front, the money for the hostel will be forwarded in a few days as soon as all subscriptions are in. Mrs. Campbell adds:—"Let me assure you that your generous donation has been greatly appreciated and has been of material assistance in the aid we are trying to give to the gallant men at the Front. The gift will be acknowledged in the local press. Kindly convey to the Teachers of East Bruce the sincere thanks of the Municipal Chapter, I. O. D. E.

+ + +

Sproat—O'Connor.

The marriage of Miss Nora Aline O'Connor, youngest daughter of the late H. P. O'Connor, K. C., M. P. P., of Walkerton, and Mrs. O'Connor, to Mr. Adam D. Sproat, son of the late John A. Sproat of Milton, Ont., took place at half-past eight o'clock last night at the home of the bride's mother, in Glen Road, Rosedale. The service was taken by the Rev. Mr. Perdue of Walkerton in the presence of the immediate friends and relatives, Miss Pearl Strinhoff singing the bridal music. The bride, who was given away by her cousin, Mr. George Bell, looked lovely in her wedding gown of white taffeta and old lace, with bouquet of orchids and lilies of the valley. There was no attendants. Mrs. O'Connor held a reception after the ceremony, wearing black charmeuse and lace. Later in the evening Mr. and Mrs. Sproat left for New York, the bride travelling in a suit of African brown, with hat to match, and brown fisher furs. On their return they will reside in Milton.—Toronto Star.

Military Parade At Mildmay.

All those living within 15 miles of Mildmay should put a mark on Tuesday, February 22nd on their calendar so that they will not forget to go to Mildmay on that day to see the big parade of 100 soldiers in uniform, headed by the military band all belonging to the 160th (Bruce Co.) Regiment which will take place between one and two p. m. and followed by a big meeting in the Township Hall which will be addressed by some great speakers. If you can't enlist go and see anyway what the King's soldiers are like. You will be proud of them and will be pleased with them and the sweet and inspiring music of the band.

+ + +

Perram Lost Case.

Mr. George W. Perram, of Cobalt, lost his arbitration case against the town of Hanover which was heard last week. Mr. Perram asked for $1,600 damages on account of the town expropriating the water at the woollen mills. The arbitrators were Judge Widdifield, of Owen Sound, and Barristers Mickle, of Chesley and Collins, of Walkerton. The arbitrator's decision was that the plaintiff had suffered no loss and that he should pay the cost of the arbitration, amounting to $78. Mr. F. S. Mearns, of Toronto, looked after the town's interests while Mr. W. H. Wright of Owen Sound appeared for the plaintiff.—Hanover Post.

+ + +

Our "Yellow Journals."

You likely have remarked the yellow appearance of the paper in this and almost all other newspapers for some weeks past. This deterioration is said to be one of the incidents of the war in Europe. It is said that certain dyes used in the making of the whiter paper are no longer procurable. Germany appears to have had quite a monoply of dye production. Colored papers too such as are generally used for bills and posters, have gone up one and two cents per pound recently because of the advance in blue, green and red coloring dyes. By the time the war is over the German manufacturers will find that they will have lost much of the valuable dye industry.

+ + +

Farmers' Central Co. Meeting.

The annual meeting of the Farmers' Central Mutual Fire Insurance Co. was held at the head office of the Company here on Feb. 5th. The Directors' report indicated that the year 1915 was a year of expansion. During the year 2,495 policies were issued covering property insured to the extent of $4,894,677, an increase of 383 in membership and $1,130,956 in property insured. The total number of policies in force is now 7284 and the total amount of insurance in force is $14,446,890. The available assets of the Company increased during the year from $335,122.14 to $361,905.67. The two retiring directors, Messrs. Wm. Rowand and M. Illiger were re-elected. Mr. M. G. Dippel was appointed Walkerton agent to succeed the late James Coulter. The Board of Directors now are:— James Tolton, president; Wm. Rowand, vice pres.; Val. Fischer, M. Illiger, H. W. Munk, B. J. Clancy; J. J. Schuumacher, manager.

+ + +

"A Day with Burns."

The Walkerton branch of the Women's Institute held a very interesting meeting on Feb. 3rd, at the home of Miss Roetler which was very well attended in spite of the inclement weather. The programme for the afternoon was entitled "A Day with Burns" and was held in commemoration of the 157th anniversary of the poet's birthday which took place on the 25th of January. It was very successfully arranged by Mrs. W. S. McGregor and the following programme was rendered and much enjoyed by all present. The first number, "A History of the Life of Burns," was read by Mrs. Duncan and showed among other things his great natural talent as a poet, which flourished in spite of difficulties and temptations. This paper was prepared by one of the local "Sons of Scotland" and much appreciated. The other numbers of the programme were as follows and were much enjoyed: Solo, "Scots wha Hae," by Mrs. A. McLennan; Reading, "The Cotter's Saturday Night," Miss Havill; Solo, "Afton Water," Miss Gertrude Oberle; Reading, "Lo, a Mountain Daisy," Mrs. McGregor; Solo, "Ye Banks and Braes," Miss B. K. Rowand. The programme was fittingly ended by the ladies joining hands and singing "Auld Lang Syne" after which the meeting was closed with the National Anthem.

WEIGHED IN THE BALANCE AND FOUND WANTING

Some time ago a man went to a store in Brantford to buy a saw. He saw the kind he wanted and asked the price. It was $1.65, the dealer said.

"Good gracious," said the man, "I can get the same thing from the mail order house for $1.35."

"That's less than it cost me," said the dealer, "but I'll sell it on the same terms as the mail order house just the same."

"All right," said the customer. "You can send it along and charge it to my account."

"Not on your life," the dealer replied. "No charge accounts. You can't do business with the mail order house that way. Fork over the cash." [The customer complied.]

"Now three cents for postage and five cents for a money order, to the mail order house you know."

The customer inwardly raving, kept to his agreement and paid the eight cents.

"Now twenty-five cents expressage."

"Well, I'll be——," he said, but he paid it, saying "Now, hand me that saw and I'll take it home myself and be rid of this foolery."

"Hand it to you? Where do you think you are? You are in Brantford and I'm in Toronto, and you'll have to wait a week for that saw."

Whereupon the dealer hung the saw on a peg and put the money in his cash drawer.

"That makes $1.67," he said. "It has cost you two cents more and taken you a week longer to get it than if you had paid my price in the first place."

CULROSS COUNCIL

Town Hall, Teeswater, Feb. 7th, 1916.—Council met today, members all present except Wm. Case. The Reeve in the chair.

The minutes of the last meeting were read and sustained.

John S. Armstrong was appointed Chairman of Finance, pro tem.

The Auditors then presented their report to the Council Board.

Moved by John S. Armstrong, seconded by Thos. McPherson: That as the auditors have reported and the Council have finally audited the Treasurer's books and find that the sum of $1.15 was placed in the salaries column where it should have been placed in the Printing and Stationery column. Otherwise we find the accounts apparently correct. We also find that the sum of $103.77, collected by the Collector on the 31st day of December, 1915, but was not paid over to the credit of the Corporation and we further find that the sum of $100 was paid to the Treasurer since, leaving a balance still due the corporation of $6.93. According to the Auditors' report we find some errors and omissions in the Collection Roll which will be rectified, especially in the dog tax.—Carried.

Moved by John S. Armstrong, seconded by Jas. Donaldson: That we appoint Chas. Button, Clerk, John Clark, Treasurer, Anthony McDonald, Assessor and Joseph Murray for operating the grader to the north and Philip Kieffer to the south at their respective salaries, the same as last year and that a bylaw be prepared and passed confirming their appointment.—Carried.

Finance

C. Button, registration fees	$18.00
P. O'Malley, error in tax bill	.45
N. Melvin, breaking gravel road	8.65
A. Green, breaking gravel road..	2.50

J. Murray, bal. on file for 1915..	13.60
J. Grenache, bal. on sal. as Col'r	49.82
C. Button, pt. salary for 1915....	100.00

Moved by Jas. Donaldson, seconded by Thos. McPherson: That the Finance Report as just read be adopted and orders issued for payment of the accounts and that we now adjourn to meet again on March 6th, or at the call of the Reeve.—Carried.

CHAS. BUTTON.
Clerk.

CARRICK COUNCIL

Town Hall, Mildmay, Feb. 7, 1916.—Carrick Council met this day pursuant to adjournment. All the members present. The Reeve in the chair. The minutes of last meeting were read and adopted.

Finance Report

The following accounts were referred to the Finance Committee and recommended to be paid.

J. N. Schefter, services as auditor	3.00
Geo. Helwig, services as auditor	3.00
J. Diebel, part sal. as caretaker	3.00
Moses Filsinger, 1 meeting	2.50
L. Doering, 1 meeting	2.50
Jos. Montag, 1 meeting	2.50
A. Lewis, 1 meeting	2.50
Chas. Wagner, 1 meeting	2.50

Statute Labor Commutation

D. W. Clubine, 54 hours' works ..	9.45
G. Schefter, 6 hrs. with team ..	1.80

The following applications were received or the offices of Assessor and Tax Collector.

For Assessor—S. F. Herringer.

Tax Collector Div. 1.—Geo. Kunkel, Louis Pletsch.

Tax Collector, Div. 2.—Conrad Hill.

Montag—Lewis: That S. F. Herringer be appointed Assessor, Geo. Kunkel Collector for Div. No. 1 and Conrad Hill Collector for Div. No. 2.—Carried.

Petition of eight ratepayers was presented, asking Council to pass a bylaw imposing a license fee on cattle running on the highways of the municipality.

Doering—Montag: That this matter be laid over until next meeting.—Carried.

Doering—Montag, That the report of the auditors be adopted and that 100 copies of the same be printed in book form.—Carried.

Bylaws Nos. 5 and 6 were read a first time.

Lewis—Wagner: That Bylaws 5 and 6 be now read a second and third time and finally passed.—Carried.

Lewis—Wagner: That this Council do now adjourn to meet again on Monday, the 20th day of March next for the appointment of Pathmasters, Poundkeepers and Fenceviewers and the transaction of general business.—Carried.

SOLDIERS' AID SOCIETY'S WORK

Editor Telescope,

Dear Sir:—

Having learned that there is some misunderstanding as to the disposal by the young ladies of the Soldiers' Aid Tea Room of the money realized by them, I beg to request you to publish the following statement which shows the receipts and disbursements and how the money received has been expended. I take this opportunity of thanking the farmers and others and around Walkerton for their generosity in giving contributions to assist our society.

M. Robertson,
Sec'y Soldiers' Aid Society.

The Latest in Stoves

NOW is the time to buy that new range that you have been wanting for so long. Why not get a

New High Oven Peninsular

the latest and most up-to date stove on the market.
Or perhaps you would prefer a

Happy Thought

a stove that will brighten the thoughts of the Mistress of the House for the coming year.

We also have a nice line of Tea-pots, Electric Irons, Cookers, etc. at a price to suit every purchaser

Patterson Bros.
Successors to H. A. Havill

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so lifelike, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

Our stock in all lines is complete and if in need of any of the following, give us a call and we will endeavor to satisfy you both in quality and in price.

Axes from 90c to $1.25. Meat Grinders and Fillers, Sleigh Bells, Coal Oil Heaters, Snow Shovels, Grain Scoops and Bags: the celebrated "Racer" Cross Cut Saw and others; Coal Scuttles, Coal Oil Cans, and Coal Oil, Gasoline and Gas Engine Oils, Oil Cake, the celebrated "Bibby's" Calf Meal and ground Flax.

Our stock of heavy mitts is large, well assorted and prices right.

We are sole agents for the celebrated D. L. & W. Scranton Coal, the standard anthracite, prices right and quality the best. Try a ton or two.

S. W. VOGAN

THE FRENCH SOLDIER

(Robert Herrick, in Chicago Tribune).

"Here come the civilians—so the war will be over soon!" one "poilu" chaffed to his neighbor as I squeezed past one file of soldiers in the narrow trench of the Bois Brule. Muddy, bearded little figures, in long coats of faded blue with the bottom flaps buttoned back, carrying metal pails or guns, sharp eyed, with ready wit, even when white and worn in face, that is the way I shall remember the French soldier. The note of gayety, of raillery about life is the characteristic expression of the Frenchman. The French soldier has an irresistible good humor, which has been illustrated by a thousand stories, and is so well known that I should not mention it were it not extraordinarily true and almost universal. Nothing apparently can long discourage him, can kill his laugh, his wit, not the deadly grind of trench warfare, not even the nervous peril of the front line. As a human being he is marvelous!.

His officers recognize the value of this temperament in the dreary, unending struggle of this war and do what the yean to sustain it. They provide him with good "shows" to divert him in his off hours; they encourage his knack of making trinkets and adorning his dugout and shelter. Above all, they laugh and joke with him on a basis of perfect equality. I never felt the power of democracy as an idea governing life so much as in the French army. A little experience of it converts one to the desirability of compulsory national service, if merely for the sake of keeping a nation healthily democratic in its instincts and sympathies. It is a great education, this mixing of men from all conditions of life in a regimental unit, where the officer may be of humbler social experience than many of his men. It is a solvent. "We have all the talents in our regiment," one captain said to me, as I watched an excellent professional performance on an out of doors stage.

Last June the experiment of sending the soldiers home for a few days' leave was first tried. Doubts were freely expressed as to its wisdom. It was felt that the soldier, once back among his family and friends, would be loath to return to his trench world. The horror of what he had had to endure might get hold of him and destroy his spirit. I remember reading an address by some prominent woman to the wives and mothers of France urging them not to weaken the wills of their "heroes" on vacations. It was not needed. The men went back cheerfully, with renewed will to fight to the end. It is not because the French soldier is braver than other soldiers, but because he is surely on the average much more intelligent. Understanding perfectly the necessity that has driven him into the trenches for over a year, he does not yield to his discouragements and disgusts. "The work must be finished," he says again and again. Once I met a stout soldier trudging down the boulevard in Paris with his pack on his back. He was on his way to the station, going to the front. It was the third time. The last time a ball had knocked away part of his jaw, and he had been recovering in the pleasant fields of Brittany. He was serious, but not downcast. "It will be a long war," he said, "at least another winter in the trenches."

The soldiers' health is well cared for, and the result is shown in the small number of sick one finds in the hospitals at the front. The men are well fed and are carefully rested. One rest camp which I visited in a forest a few miles behind the lines is occupied in rotation for a week by the regiments in that sector. It had some of the aspects of a Canadian lumber camp, with low wooden buildings covered with tar paper. The instinctive taste of the French was shown in the neat terraces, rustic fences, and passages about the officers' quarters, also in the artistic splashing of green paint with which the raw white boards were made to harmonize with the forest green. A brook was carefully utilized for drinking water for man and beast and lower down for bathing the men and for washing clothes. There were explicit signs everywhere as to what use the water could be put. The roads were neatly brushed with green branches. It was a country home for 3,000 men, and perfectly clean. The same cleanliness exists to my surprise in the trenches themselves, difficult as it often is to keep them thoroughly "propre." In all the miles of trenches that I visited from Argonne to Pont a Musson I saw but one trench that smelled badly and had filth in it, and that was a new trench still under construction.

All this proves that the French, having accepted the conditions of the new warfare, which temperamentally are not congenial to them, are doing their best to "organize" the new life endurably. They are making themselves into campers, woodsmen, burrowers into the earth. And incidentally the French nation is acquiring a familiarity and taste for life in the open which will be valuable. The men not immediately in the front lines—and necessarily they are the large majority—have the hard, ruddy appearance of out of doors workers. They are fat and tanned and sturdy. They have plenty of physical exercise in building trenches, dug outs and roads, abundant good food and no chance for dissipation. That combination means health and strength.

It would be hard to exaggerate the burrowing nature of the new warfare in the woods and fields of the broken country about the Hautes de Meuse. Generally speaking, the French hold the heights above the winding river, and have been eating their way out of the woods down the hillsides towards the river. All the sheltered, lea slopes of these wooded hills are filled with strange campers' villages of dugouts with stone openings. No tents; few temporary wooden shacks. The French have had to dig themselves in, not merely to fight, but to live. Sometimes the shelters are dug in earth, with a roof of logs and dirt and stone; more often an advantage of a rounding slope is taken to excavate into the hillside, to burrow in like the woodchuck. Wherever an old gravel pit or quarry gives help, the dugouts multiply. There are different levels, corridors, inner chambers to some of these warrens. I passed mile after mile of this earth housing, and new building is going on all the time. Like industrious little woodchucks the "poilus" are making ready against another long winter in the trenches. Happily, thanks to their industry, the coming winter will be much safer and more comfortable than the last.

Near these cave villages in the forests under the leafy trees they have made sometimes little gardens and fenced off terraces, even set out little trees in a formal pattern, to give an illusion of that civilization which is so dear to the Frenchman.

Within the trenches themselves, where the men must live on the front line, the dugouts are of longer standing. Some short of shelter must be provided for men and munitions every every few feet. Sometimes they are mere holes covered with logs or sheet iron and dirt, but in a certain stone quarry opposite St. Mihiel the shelters are strong stone bombproof. Their fronts are made of nicely cut stone, and each little cave is reached by a short flight of stone steps. They are snug shelters, large enough to hold a dozen men if they lie close and don't move about. There is plenty of straw in them, and they are kept clean. Here the men at this position sleep and spend their free time crouching or lying on the wooden shelves.

From the necessary silence of these front trenches and the cramped condition of his burrows the French soldier has taken on something of the air of a weed animal, with his unshaved face, his keen, bright eyes. Often I have seen the "plou-plou" squatting at the mouth of his hole with his gun in his hand, perfectly still, waiting for something to happen. The quality of the trapper, of the Indian, is being brought out in him. The life he is leading in the woods and the trenches is like a page from Fenimore Cooper, and is evolving once more the primitive that lies in all men. The Frenchman is not as exacting as the Englishman or German about his uniform. Give him a little kepi to pull over his shock of black hair, and he is a soldier. Now they are taking the kepi away from him and putting him into khaki covered helmets. His bright blue coat soon becomes a dirty folded gray. Unshaved, unwashed, gray clad, he is getting to look more and more like a mole.

Nevertheless, as soon as you talk with him you realize that the Frenchman is, first of all, a civilian and a craftsman. No amount of soldiering will ever take from him his love of the orderly little houses and squares and towns from which he has come. He makes his group of dugouts have something the air of a village. He plants a garden and takes care of it. He will have his terrace, his fenced off enclosure. And his hands turn instinctively to making things, such as the aluminum rings, the pen and ink sketches, the carved heads of stone or wood with which he decorates the door posts and the beams of his shelters. All the exposed beam ends of a certain colonel's dugout are nicely carved likenesses of the officers in the regiment.

Naturally these tastes find expression more freely in the rear lines, but I remember one place not many feet from the Germans where in the shelter of an old mine pit a cluster of shacks had been placed. Just below the dugouts, the kitchen, the post of first assistance for the wounded, the men had arranged a terraced garden, marked off with different shells which they had gathered in the neighborhood. In one corner was a tiny bed of strawberries that had received considerable attention. In the centre of this formal garden a small shrine with a figure of the madonna had been placed. The French cave dweller has not forgotten those gentler arts which he cultivated in the world before the war.

One pleasant aspect of soldier life is supper time, when the men gather in front of their dugouts around small fires and eat their hot soup. In the twilight they seem like some gnomes come back to earth out of the long ago. They always have a cheery word or wave of the hand for the passing stranger. They invite him to come and sit around the fire. One can easily imagine the charm of this wood life, this immense open camp for the younger men, not so easily for the de-mure territorials, fathers of families. Of course such camp life pleasures are not for the men in the advance trenches. At meal times one meets a steady file of those food carriers.

I shall never forget the patient look of the little men as they flattened themselves against the earth walls of the trench to let us pass, holding out in either hand a heavy flat metal pail, which contained soup and meat for the "copains" up at the front. Those little, dirty, rough looking field animals with their keen, human eyes taking in the unusual sight of "the civilians" will always seem to me to have something the quality of mute martyrs in the cause of humanity, in my cause, cheerfully spending their lives for the sake of others, for me, also. For the men in the front lines have not the fat, gay air of the "pollus" behind. Often their faces are worn and white with the strain of perpetual watching, perpetual expectation of death; their movements are nervous, their eyes strained. The unconscious realization of constant danger works upon them. One cannot live always in danger of sudden death without feeling it, even if the temper is gay and brave.

A SKELETON IN THE CLOSET.

The Legend From Which the Well Known Saying Was Taken.

The origin of that singular and widely quoted saying, "A skeleton in the closet," which is found in almost every language in Europe is found in one of those curious collections of stories that have come down from the middle ages. In one of the these collections, compiled by an unknown hand about the middle of the tenth century, there is a story of a wealthy lady who, having a secret grief, confided it to a friend who was apparently a perfectly happy woman. She was the wife of a nobleman who lived in his castle in the south of France. She and her husband were outwardly on the most loving terms. Not a care cloud seemed to cast a shadow on her path.

After hearing the story of her afflicted friend the noble lady took her by the hand and led her to a secret chamber adjoining er bedroom, there opened the door of a closet and exposed a skeleton. "Know, my friend," she said, "no one is happy. Every day I am forced by my husband to kiss this grinning death head, which is that of a gentleman who was my husband's rival and whom I would have married had not my parents willed otherwise."

UNDER COMPULSION.

English Agitators Under Defence of Realm Act.

(London Evening Standard and St. James' Gazette.)

In the many months of discussion whether it would be wise to introduce compulsory service or not, one dominant argument against the scheme has been that compulsion would arouse hostility in certain political quarters. We have never been impressed by that argument, but now that compulsion is actually decided on it is well to consider to what extent hostility may be expected, and in what manner it can best be overcome.

There is no doubt that opposition to compulsory service does exist, and will exist. Strange enough, this opposition comes mainly from Socialist and Labor quarters, whence, in normal times, come the most persistent demands for compulsory interference with individual liberty. Thus the notorious Mr. Ramsay MacDonald, although he once stated that "the war had given arguments in favor of conscription that were absolutely unanswerable," has, nevertheless, uttered the awful threat that "even if the Government says conscription is necessary, I am not going to accept it." His fellow anti-patriot, Mr. Philip Snowden, had adopted the same attitude, while another notorious Socialist has boasted that "many thousands of men of military age are already banded together to resist conscription."

This last is true; there has existed for many months an organized anti-conscription fellowship, whose members have undertaken to resist compulsion at all costs. They have not yet announced their determination to refuse to enjoy the benefits and security which will arise from the war.

This opposition to compulsion is numerically unimportant, but it is not insignificant. It demands prompt measures on the part of the Government. This is no time for a policy of "wait and see." Two steps must be taken here and now.

In the first place the Government must make it perfectly clear why compulsion is introduced, and that it is stated that the object of introducing only being introduced for the duration of the war. Mr. Snowden has said compulsion is "not because it would prove to be of any service in the present war, but because of the use it could be put to after the war." This is a dangerous lie, and must be officially exposed at the earliest possible moment.

Trade unionists fear compulsory service in times of peace because, as France has demonstrated, it can be used to defeat strikes. The merits and dangers of compulsory service in normal times cannot be considered now. This country is adopting compulsion solely in order to win this war.

It is the duty of the Government to make this perfectly clear and to pledge itself that no compulsory system shall be continued after the war unless the electorate demands it.

Secondly, the agitation of the anti-compulsion Die Hards ("Let Others Die" would be a better name) cannot be ignored. Compulsion is now the policy of the Government, and any attempt to stir the public up to resist compulsion must be severely checked.

Sufficient powers to deal with anti-compulsion societies and agitators exist under the Defence of the Realm Acts. These powers must be enforced without any signs of hesitation or weakness.

Of course, there will be bleatings about conscience and the liberty of the subject. But in a war such as this the public has to place its liberties in the hands of its rulers in trust for better times when victory has been won.

The vast majority of the public realizes this, and willingly submits to temporary invasions of its cherished rights. Those who now by pen or mouth preach and foment opposition to compulsory service must be considered public enemies and dealt with accordingly.

If the Government will couple its compulsion proposals with a firm enforcement of the provisions against sedition-mongers, and at the same time frankly explain that its proposals are for the duration of the war only, we have no fear of any opposition to compulsion. But if there is any weakness, we fear that much ignorant and intelligible reluctance to undertake military duty may easily become transformed into determined refusal to serve.

Eggs.

The egg is pure food

Nearly all the essential elements of animal tissues are found in an egg.

Eat an egg and you get blood producers. You get food for the muscles. You get sulphur and calcium for the system, and some iron.

Albumen is the chief ingredient in an egg. Albumen is an organic element, mostly carbon, with a small per cent. of sulphur, and containing hydrogen, nitrogen, oxygen, etc.

It is the sulphur in the yoke of an egg which blackens silver in contact with eggs. The bad odor of rotten eggs is also due to the sulphur, sulphurated hydrogen being formed during decomposition.

The raw albumen of an egg is soluble and consequently raw or soft-boiled eggs are merely digestible. The coagulated albumen (formed when eggs are boiled) is insoluble and indigestible for weak stomachs.

There is no other single element of human diet of either animal or vegetable character which is, perhaps more commonly used the world over, nor served for the uses of man in a greater variety of styles and ways than are eggs.

Eggs are often taken as an antidote in various poisons, including bichloride of mercury (corrosive sublimate), sulphate of copper (blue vitrol), acetate of lead (sugar of lead) and nitrate of silver (lunar caustic), with which albumen forms insoluble compounds.

About six-tenths of all eggs is the white, three-tenths the yolk and one tenth the shell. And of the white of an egg 80 per cent. is water, 15½ per cent. dry albumen and 4½ per cent. salts, etc. Even more albumen is contained in the yolk—17¾ per cent. The yolk has so much oil (28¾ per cent.) that it is really an emulsion.

THE WORST KIND.

(Baltimore American.)

"Billy Blinks is a brutal husband to Mabel."

"Why, I always thought he was the kindest-hearted sort of a man. How is he cruel to her?"

"In the worst way. He never does anything that she can find fault with."

Flower-Studded Armlet, Society's New Fad

ROSE AS ARM ORNAMENT. Photo by Moody, N.Y.

The latest New York feminine craze is so effective, yet simple, that it is being universally adopted. It consists simply of a band of ferns set off with a red rose, or if desired, the wearer's favorite flower.

THE FRENCH OFFICER

(Robert Herrick, in Chicago Tribune.)

I must have met, first and last, at least a hundred French officers of various ranks and branches of the service and had some opportunity to talk with many of them. I met two generals who were corps commanders, one general in command of a brigade, and one in command of a division, half a dozen colonels, many staff captains and commandants, captains, and lieutenants of the line, also a number of medical officers. General impressions have some value. My first impression is that these French officers are reserved, serious, calm men, anything but the popular notion of the flighty, excitable Gaul. Some of them were evidently from the more privileged classes, others of plain, even humble, origin. Some were witty and agreeable talkers, others were silent. All were entirely courteous. Just as their simple uniform did not announce their rank, except in the little stripes of gold and silver on the sleeve, so their bearing and their speech had nothing of military swagger and arrogance. The civilian shines through every French officer, as it does in the soldiers. It is a precious characteristic, safeguarding the nation against an excessive militarization of its life, the danger of which Germany has shown the world.

This does not imply that French officers are amateur soldiers: their record in this war proves that they are not only brave, but intelligent. It means that the Frenchman is, first and always, a man and a citizen, who puts on his militarism as a necessary buckler of defense. France has a citizen army officered by citizens. When I talked with these highly intelligent officers I felt the civilian coming through his uniform. One was a motor manufacturer, another a chemist, a third an engineer, a fourth a teacher. Most of them had some other outlook and interest in life than the narrow one of the army. Even the professional officers, whose life had been passed in the army, had the air of men who were putting through an expected, disagreeable job, which some day would be finished, leaving them free to return to the real life of peace.

* * *

That the French officer is almost recklessly brave needs no proof other than the lengthening roll of honor printed in the supplements of "Illustration." That the French officer is loved by his men in an intimate family way is a commonplace illustrated over and over by touching incidents. That the French officer is a sober, hard working, faithful leader is not so generally known. I never saw or heard of any carousing among French officers, such as has so often disgraced and enfeebled officers in other armies. They drink the ordinary table wine of their country, sentimentally refusing champagne until "afterwards." The French officer observes literally and invariably the military regulation that forbids the taking of any spirits. I never saw, either at the front or anywhere in France, a French officer even slightly under the influence of liquor.

I have the pleasantest memories of these citizen soldiers, of their fine qualities as men, of their personal charm. Many anecdotes have been published illustrating the paternal relations existing between French officers and their men. It is not for nothing the commander-in-chief is called "Papa" Joffre. That Gen. Joffre has a very real horror of losing lives accounts, without doubt, for his disinclination to costly advances. He had rather wait than precipitate a general butchery, such as the Germans made when they tried getting through at Ypres. Gossip says that he relieved a certain general because he lost too many men through neglect in preparing his second line.

The first thing the officers I met wanted to talk about was the condition of their men, physically and morally, not the military situation or public opinion about the war. "Have you seen the new 'jump'?" Gen. C. asked first as we sat down to dinner, and he went on to talk of the comforts the soldiers would have this winter in the trenches, of a new motor ambulance a generous American woman had offered his corps. The first place I was taken to inspect all along the front was the men's quarters, the douches, the regimental hospitals, all simple enough, but showing care for the well-being of the soldiers.

There was Col. A., who believed in order and neatness, and whose little village was swept out with brooms. And there was the regimental doctor at Commercy, which ran a vaudeville for the troops centered there. He had given a performance every day since early January, amusing and distracting and heartening thousands of men. He was a fat, cheerful young man, a clever manager of his "talent." He sat on the edge of a stool, a cigarette in his mouth, playing ragtime on an old piano whose keys ran with the rain drops. When it began to pour he looked around at his soldier audience dubiously, then with irresistible spirit cried out: "Oh, you fellows aren't afraid of a little wetting!" and the performance went on to the heavy accompaniment of thunder mingled with the deeper roar of the evening's bombardment over the hills. The little things that are as indicative of the kindly human relations that exist between officers and men as the more heroic stories—the friendly pat on the shoulder, the exchange of jokes as one passes the "pelius" in trench or on the road at meal time. Best testimony of all is the fact that the men, not the officers, got the first leaves this past summer.

* * *

The Frenchman of the officer class is traditionally a city person, supposed to be rather absurd in the country. Yet they have adapted themselves quickly to the rough life of the front—they are good "campers" and their simple quarters in dugout or cabin or village house are not littered with elaborate kits. I have rarely met a happier man that Capt. S., in command of batteries on the Ailly front, who had an eye for all the wild beauty about him, for the changing seasons, the animals of the forest, and loved the freedom and the naturalness of the outdoor life. "I should ask for nothing more," he said, "except for leave in March to go to Biskra to get warm!" . . .

Together with his charm the French officer has retained a traditional French quality of more importance, and that is his sense of chivalry—of doing certain things because they are beautiful to do and not doing others because they are ugly and such as no high-minded man can bring himself to do. In this fiercest and most brutal of wars the French have distinguished themselves by their chivalry. When they take prisoners the captives are often surprised at the kindness they receive. "Every prisoner must tell us his name," a staff officer said to me, "But all other information is voluntary. We question them, but do not force them to answer." An excellent example of this chivalrous spirit is the order of a general commanding in the small section of Alsace now in French hands that the Government dole of a franc and a half given to all French women whose natural supporters are serving in the French army should also be given to those Alsatian women whose husbands were with the German armies. "They are French women; it is not their fault that their husbands are serving the enemy," he said. Contrast this with the treatment that Luxemburg has received at the hands of the Germans!

The German theory that war is war, in which there is no place for "soft hearted" sentimentality — what other people know as chivalry — even toward the defenceless and non-combatants is resented by the French officers. In spite of asphyxiating gas, submarine murders, rape, arson, and violence, he still preserves his ideals of chivalry. "We do not make war against women and children, against the old and the defenceless, against monuments," exclaimed one general, with curling lip and intensely scornful voice. "There is our ideal of honorable warfare!" and he pointed to a little old faded picture of Jean d'Arc that adorned the wall of the messroom in the military club at Commercy. "We French, thank God, have fought a chivalrous war thus far," he concluded. No doubt a German general hearing him would laugh at such "sentimental weakness." It is just because the Frenchman is exalted by this idea of chivalry, because the German is taught to sneer at it as sentimental that the two peoples can never meet on a common ground. There is not room in this world for the two ideals.

A further sting to the Frenchman is that in this war against monuments and non-combatants there are many of his enemies whom he had received hospitably to residence in his country, who lived long years, apparently friendly, in French towns and cities, only to depart on the eve of war to assist the enemies of France with the information gained by their knowledge of the country. That is legal even, human, but it does not seem to the Frenchman—chivalrous.

One can get the best idea of the French officer by reading some of the letters that have been published by them from the front to friends and relatives. They give much more vitality than the stuff the war correspondents write of the character of these civilian heroes. Some of them are the most moving "human interest" stories I have ever read. The French novelist, Henri Bordeaux, has gathered up two sets of such home letters, written by two young officers from the military school at the outbreak of the war. He calls his little autobiographies, "The New Youth of France." One of these boy officers was killed after being wounded twice previously and returning to his duties; the other has disappeared, last being seen defending himself with his revolver against the enemy. The sense of devotion to their men, of high idealism about their calling, is remarkable in these fugitive letters, written in the lull of the storm from time to time. They grew old fast, these two boys, under the terrible experiences of the first months of the war, but they did not lose their enthusiasm for the cause, their faith in France, their devotion to the men under them.

It is an old tradition of the military academy of St. Cyr that its graduates should go into their first battle in full dress, with white gloves and full dress uniform in red and gold—prepared for their bride. Many of the youthful officers thus sacrificed themselves, in obedience to the tradition, until the authorities forbade them to expose themselves to the enemy's fire. It was not a wholly foolish fit of sentimentality, this reckless exposure of the young officer to the enemy. In a conscript army, such as that of France, where a youth of 20 may be put in command of men much older than himself, it is essential that the young officer should win the respect and confidence of his men. The morale of the whole depends on the hold the boy lieutenants have on the smaller units. One of the boy officers mentioned above relates how he felt his men weakening behind him when they were holding a bridge under a severe fire. He rose and walked back and forth across the bridge, so that his men might see that he was calm and collected. It was a boyish thing to do, perhaps, but it was beautiful. The beau geste—the fine act—still appeals in France.

THE SUBMARINE.

Her Delicate Poise Requires an Expert in Control.

The underwater cruiser is almost as delicately poised between her surface and the bottom of the sea, as is the aeroplane between earth and sky. But, while the aviator has to guard only against taking to earth, the submarine navigator has to contend with the dangers of sinking to the bottom, and the constant ever present danger of floating up to the surface.

The buoyancy of the submarine under water is, under normal conditions, [illegible]. Before diving, the submarine's tanks are filled with water sufficient to bring the boat almost to a sinking point; a few more gallons and it would sink like a stone. But, before the submarine [illegible] the horizontal rudders are tilted to the necessary angle, and the submarine [illegible].

A Japanese naval constructor, Commander-Constructor Matsubara, gave an instructive paper last May before the Japanese society of naval architects in Tokyo. Among other valuable information, he described a particular trial with a submarine of the Holland type. The buoyancy of the boat was reduced to [illegible] pounds. It required a pressure equal to 50 pounds to keep it from rising to the surface. At a speed of 5 1-2 knots the submersible was kept moving ahead in a horizontal plane with the horizontal rudder set at an angle of between 4 and 5 degrees. The boat itself kept at an inclination, by the head, of between 2 and 3 degrees.

The Japanese constructor told how the discharge of a torpedo disturbed the equilibrium; but this is only momentary; until the place of the torpedo in the tube is taken by an inflowing water. Every submarine calls for extreme vigilance. Only the experienced submarine navigator could appreciate what it means to take a submarine successfully through such straits as the Dardanelles, into the sea of Marmora, or through the narrow channels leading from the North Sea to the Baltic.—Ottawa Citizen.

Moral "Risks."

It is pointed out by a modern thinker that there is no such thing as a moral risk, for when we talk about a "risk" we mean that there is a possibility, but not a certainty, that harm will result. A boy takes a physical risk when he goes skating on that part of the river where the ice is thin. He may fall through and injure his health or lose his life. But when we venture on thin ice in our moral life there is no risk in the matter at all. There is assured catastrophe from the moment we start in that direction. No one can do anything which he knows involves possible moral danger without thereby definitely passing beyond the line of mere danger into positive injury to his character.

PALPITATION
OF THE
HEART.

Sudden fright or emotion may cause a momentary arrest of the heart's action, or some excitement or apprehension may set up a rapid action of the heart thereby causing palpitation.

Palpitation, again, is often the result of digestive disorders arising from the stomach, or may be the result of over indulgence of tobacco or alcoholic drinks.

The only way to regulate this serious heart trouble is to use Milburn's Heart and Nerve Pills.

Mrs. J. S. Nicholl, Listowell, Ont., writes: "I was weak and run down, my heart would palpitate and I would take weak and dizzy spells. A friend advised me to try Milburn's Heart and Nerve Pills, so I started at once to use them, and found that I felt much stronger. I cannot praise your medicine too highly, for it has done me a world of good."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25, at all dealers, or mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

HALF THE ILLS OF LIFE
Are Caused By CONSTIPATION.

When the bowels become constipated the stomach gets out of order, the liver does not work properly, and then follows the violent sick headaches, the sourness of the stomach, belching of wind, heartburn, water brash, biliousness, and a general feeling that you do not care to do anything.

Keep your bowels regular by using Milburn's Laxa-Liver Pills. They will clear away all the effete matter which collects in the system and make you think that "life is worth living."

Mr. H. W. Watson, St. John, N.B., writes: "I have been troubled with constipation, for the last three years, and during that time have tried several remedies, all of which failed to help me. A friend recommended Milburn's Laxa-Liver Pills, and after using three or four vials, I felt like a new man. I am now still taking them, and am positively sure that I am on the road to recovery. I strongly recommend Milburn's Laxa-Liver Pills."

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all drug stores or dealers, or will be mailed on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Things You Ought To Know

The principal crop of Barbadoes is sugar cane.

The oldest horse in the United States, Jim, 41 years old, owned by C. L. Rodman, of Ravenna, Ohio, died recently of starvation, due to the fact that he had lost his teeth.

The production of hemp in China, the original home of the hemp plant, is greater than that of any other nation except Russia.

Generally regarded as a modern disease, appendicitis was known in Egypt 5,900 years ago, and accurately described in still existing records.

All comets so far observed have originated in the solar system, according to investigation, carried out by Professor Ellis Stroemgren, director of the Copenhagen Observatory. This plan of research involved the backward computation of planetary perturbations.

Russia boasts of the world's greatest choir. It is in the Cathedral of Alexander Nevski, in Petrograd, and is attached to a convent erected in honor of the patron saint of Russia. Its members, of which there are about thirty, are all monks and are chosen from the best voices in all the Russian monasteries.

Roasted coffee is an excellent disinfectant for sick rooms.

Giraffes can see behind them without turning their heads.

The mere sight of [illegible] induces [illegible] in some people.

The [illegible] are worth twice their [illegible] silver, the finest variety selling as high as $20 a pound.

The Gauchos of the Argentine are in the habit of hunting skunks not merely for the sake of their fur, but also for their flesh.

Manufacturers of fine furniture say that black walnut will rule next year in the making of the best furniture as it did back in the ante-bellum days. Notwithstanding the cry of scarcity there are still millions of feet of this rich and beautiful wood in the Southwestern States, especially in Missouri, which has the largest walnut lumber yard in the world.

The Russo-Turkish war of 1877 cost nearly $90,000,000 a month. When hostilities had ceased Turkey was called upon to pay $725,000,000, but Russia consented to accept various territories in part payment, leaving a balance of some $250,000,000. The total cost of the Franco-Prussian war, which lasted eight months, ran into more than $1,580,000,000. The republic had to pay the sum of $1,000,000,000 in three instalments, and cede Alsace and Lorraine.

The earliest designs used for china at Worcester, Eng., are believed to have been copied from the Chinese.

Aeronauts aver that the barking of a dog can be heard at an elevation of four miles.

A considerable share of labor on Serbian farms is taken by the Serbian women, who also weave the homely material for their clothes. The women are valued highly for their services, so much so that parents not infrequently are unwilling to see their daughters marry. Hence in Serbia wives are often older than their husbands.

The Italian state railways are to be supplied with 10,000,000 Chilian sleepers at the rate of 2,000,000 a year.

No fewer than 176 different kinds of bananas are grown in various parts of the world.

A plant grows in Japan which furnishes a sort of vegetable leather. It is a pretty shrub called the "[illegible]mata," and its inner bark, after going through certain processes, is converted into a substance as tough as French kid, so translucent that one can almost see through it, and as pliable and soft as calfskin.

Fair-haired people usually possess between 140,000 and 160,000 hairs on the scalp.

A man of 70 has [illegible] his finger nails 185 times and has grown 7 feet 9 inches of nail on each finger.

A "slop" shop, one where cheap clothing is sold, gets its name from "sloppr"—Iceland for a coat.

When a Hindoo yawns he at once flips his thumb and middle finger, but has no known reason for so doing.

Yawning is due to a deficiency in the air supply to the lungs, and is nature's method of rectifying the deficiency.

Under the auspices of a government bureau Chinese carp will be imported into Philippine water, where there is a dearth of food fish.

A German zoologist who had discovered in German Guinea a new kind of opossum proposes to give it the name of dactylopsila hindenburgi.

In Britain fossil remains of a larger hippopotamus than those now existing have been found.

New York Police Department statistics for 1914 show a fourth more arrests and a fifth more convictions than the year before.

Experiments in France have demonstrated that the best signals to be displayed from the ground for aviators are Arabic numerals in white on a black background.

The heart of an average man makes about one three-thousandths of a volt of electricity at every beat, and an instrument sensitive enough to measure it has been invented.

Earthquakes cause electric waves, and an Italian scientist has invented apparatus which has registered them several minutes before seismographs have shown earth movements.

Prisoners' Letters Show Conditions in Germany

(Edinburgh Scotsman).

The following dispatch has been received from the representative of the British Press with the French army:

The letters taken on prisoners in the battle of Champagne, towards the end of September last, bore eloquent testimony to the ever-increasing pressure of the economic blockade on the German people. The impression made by these letters, from which I quoted at some length in a recent dispatch, is more than confirmed by letters taken from the prisoners recently captured on the Hartmannsweilerkopf. Several thousand of these letters have fallen into the possession of the French, and in all of them one finds the same perpetual wail as to the dearness of living on the part of the families at home, and of utter weariness with the war on the the part of both soldiers and their families.

"Everything is three times dearer than in the past," says a letter from Vielsen, dated November 14. "It is impossible to drink milk—it is much too rare," is found in another letter (from Hamburg), dated December 12. Here are extracts from other letters, which deal with the same subjects:

Willingen, December 12.

"The Red Cross has given up distributing milk to the women. It was the only thing we had left, and now I must buy it, for I can't deprive the children. I am going to ask for two lots, and afterwards I will see if I can get any money. Mrs R. receives nine marks (9s) a month. How can she live on it?"

"Cologne, December 11.

"I am taking 'Biomalz' and the children 'Emulsion'; that gives us strength. Eggs are too dear, and everything is beyond all reason in price. There are too many people waiting and not enough milk shops open, so we have to wait for hours in the rain and snow."

"Glauchau, December 4.

"We are now eating mainly potatoes and honey. There is very little butter. Either the shops are closed, or they say that all the butter has been sold. There are no vegetables."

(Undated).

"Everything is horribly dear. I wanted to send you butter, lard, or bacon, but it is impossible to find any. Here in the country all provisions are very scarce."

"Kisselwarden, October 2.

"We can't find a pound of butter anywhere. Rice costs a mark (1s) per lb.; it used to cost 20 pfennigs (2½d); oatmeal costs 80 pfennigs (10d). Life is no longer possible, and things are steadily getting worse."

"Tangstedt, September 26.

"Yesterday I went to the wife of [illegible] she gave me [illegible] and milk tickets for three [illegible] which will give us a litre of [illegible] day, and meat tickets with which I shall be able to buy 1½ lbs. of meat, so we are well provided for three weeks. I won't know what we should have done otherwise, for I could not have bought any."

(Undated.)

"Life is impossible. Pork costs 1m. 60 (1s. 9½d.) a lb., and flour, which is practically useless, costs 50 pfennigs (6d.). If we have to spend another winter—I hope we may not—I can't imagine what will happen in the spring."

(No Place) "Nov. 3.

"As the price of pork has been fixed at 1m. 40 a lb. (1s. 5d.), it is impossible to get any, either for love or money."

DIFFICULTIES OF GERMAN AGRICULTURISTS.

The difficulties of the German agriculturists, which are, of course, mainly responsible for the scarcity of meat, are explained in the following letters:

"Volk, Oct. 29.

"It is no longer possible to buy meal for the pigs. It now costs 50 marks (£1) per 200 lbs., and then it is worthless."

(No place) "Nov. 3.

"We have killed our pig without fattening it, for there is no grain to feed the animals."

"Timmerdorf, Dec. 4.

"We are giving our pigs 40 lbs. of meal and 20 lbs. of bran a month. If my brother-in-law had not given me some potatoes, the pigs would have died of hunger."

"Wimmer, Aug. 8.

"There is a great shortage of fodder. My cousin's horses are very weak. I asked him why he was not using his machine for the harvest, and [illegible] told me that this year his horses are not strong enough to draw it. [illegible] fifty pigs receive nothing more [illegible] cartload of [illegible] from time [illegible] 'There is no meal or oilcake.'"

"Bremervoerde, Dec. 10.

[illegible] paid 2m. 75 for my potatoes in [illegible] market. The highest prices quoted [illegible] newspapers were not so high. [illegible] complaints are made as to the [illegible] regulations and their effects upon constitution."

"Tangstedt, Oct. 29.

"We have potatoes, and that is the principal thing. God grant that we [illegible] not die of starvation. If this war goes on we shall lose all our courage and patience. . . . Without the Government allowance one has to go hungry and barefoot."

"Berlin, Dec. 5.

"In Berlin there is nothing that money can buy—no more food, no more milk. Eggs cost forty pfennigs. Life is always more and more miserable."

LIGHTING, HEATING AND WASHING DIFFICULTIES.

The Germans are undoubtedly finding great difficulty with such problems as lighting, heating and washing. Soap costs 1m. 90 (1s. 11d.). There is no paraffin, and the only thing left is electric light.

"Bremen, Oct. 6.

[illegible] is so dear it is scarcely possible to [illegible] anything. We can get petrol only [illegible] a month. Butter, eggs and soap are practically unobtainable."

"Kiel, Nov. 1.

"We shall have electric light this week. At first we were to pay thirty marks to have it put in, but we refused. Now, however, we shall have it for twenty marks, like every one else. Paraffin is so scarce I can't buy more than a quarter of a litre (a litre equals 1¾ pints) at a time. A small candle costs 13 pfennigs, and doesn't last an evening. However dear butter may be, you shall have some, even though we have to live on scraps."

(No place) "Oct. 18.

"We can think ourselves lucky to have electric light. Everyone else has to live in the dark, for there is no paraffin, and a candle costs 25pf. instead of 5. Black soap costs 20 pf. a pound instead of 15."

"Leizen, Oct. 8.

"I shall not finish my letter this evening. Mother says I must go to bed, as otherwise we shall have no paraffin until to-morrow. Life is really cruel, everything is so scarce and so dear. I wanted to buy a pound of bacon, but I could not find any. At Bergsdorf bacon costs 2m. 60 and even at that price it can scarcely be found."

OUT-OF-WORK COMPLAINTS.

Despite the employment necessarily given by war industries, there are many complaints from men and women who are out of work:

"Hoehnenkirch, September 5.

"The factories are doing very badly. For three weeks we have had only two days' work a week."

Forst, December 5.

"Freda has come back from Berlin. The factories have no more coal. Business is very bad."

There is even a case or two of men complaining that the activity of the war industries is slackening:

(No place) "October 3.

"There is no work to be had here. The manufacture of baskets for war material has entirely ceased. Let us hope the war will soon come to an end."

(No place) "November 11.

"Everything is very dear in Berlin, and many flats are empty. We shall probably soon have peace, for we are no longer working overtime in the evenings."—Press Association War Special.

OTHER LETTERS OF COMPLAINT.

Another correspondent sends the following extracts from letters found on German prisoners taken at Hartmannsweilerkopf in December last:—

Schweigel, November 17.—It is natural that one should sometimes lose courage; for the finest song fatigues when it lasts too long.

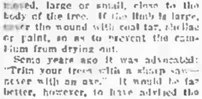
Albarben, 16th December.—We regret that you are compelled to suffer so much and to eat your bread dry. I should like to be able to send you some butter each week. I would do anything for my husband; but it is impossible, and the children are continually hungry.

Letter from Zurich—All that one can learn here goes to confirm the view that "the Boches" have more in hand than they can accomplish. They are beginning to realize that they are not to win. A large wholesale German merchant said that his country wished for peace; unfortunately, the Allies had no desire even to speak of it. There is no doubt there is a dreadful fall in German enthusiasm. It took three hours for the police to re-establish order on the Unter den Linden, Berlin.

Wehr, 21st October, —After the grand mass the priest re-entered the church, and said in a joyous tone that we should have peace on the 20th of February or March. All the congregation began to weep and we could hear sighing all over the church.

Osnabruck, 6th October.—Everything is three times dearer than it it was before. We have not seen meat for a long time.

Dylau, December 14.—Just think of our sick and wounded returning from the Russian front: some with their limbs frozen. They could not die there, for the soil is very soft, and water everywhere abounds. Coal is scarce. We cannot get briquettes. We are burning peat.



PRUNING.

How few farmers there are who have ever made the art of pruning a study. It seems as though they care nothing at all about the matter. It is a sad reflection to think how our shade and fruit trees are literally butchered by men who do not know the first principles of pruning. The "dull axe" and not the "sharp axe" is the instrument in the hands of the unintelligent tree pruner. If trees could speak they would cry out against this inhumanity of man.

The pruner should have some knowledge of vegetable physiology. He should know the habits and growth of trees. Some trees will bear trimming a great deal; others will scarcely bear trimming at all. Some can be cut in pieces almost and recover from the shock; others will rebel if the ends of the branches are cut.

Cut every limb that is to be removed, large or small, close to the body of the tree. If the limb is large, cover the wound with coal tar, shellac or paint, so as to prevent the cambium from drying out.

Some years ago it was advocated: "Trim your trees with a sharp saw—never with an axe." It would be far better, however, to have advised the use of pruning shears. A good pruner seldom uses a saw. He removes nearly all the unnecessary growths on the trees under his charge (which frequently numbers some thousands) with hand pruning shears. In other words, he keeps so far ahead of the pruning that he very seldom must use a saw, except in emergencies.

"Trim your trees in June." Let this be the general rule, for the cambium is at its maximum in this month. The matter of the cambium lying next to the sapwood is being converted into cells to form the new sapwood or yearly growth while the matter lying next to the bark is changed into the new bark.

That advice a few years ago was given by one supposed to be an authority. But that advice will not fit pruning grapevines, currant bushes, trees and flowering shrubs, and only in a very limited way will it apply to fruit trees. In other words, he had in mind, apparently, only a very small part of the subject of pruning, for the authority quoted above was the president of a municipal improvement association in a large city in Illinois, and was, of course, chiefly interested in the management of shade trees. Compared with other problems, like the management of apple, peach, plum and pear orchards, vineyards, bush fruit, plantations, etc., the pruning of shade trees is a small matter. These shade tree rules should not be applied to all sorts of conditions, crops and climates. Probably nine-tenths of the pruning done in all the large orchards of the United States is done during the dormant season, between Nov. 1 and April 1.

RULES FOR PRUNING.

Train all trees while young with a central leader, or main shoot, and never allow two main branches to grow in such a way as to have the weight of the tree to come upon a fork of the main trunk.

When branches cross, so as to be injured by rubbing together, the weaker of the two should be cut out.

Suckers, or water sprouts, should be thinned out before they have made much growth; if the main branches are bare, or if the head is open in places, suckers should be allowed to grow where they will cover this condition. If parts of the tree are weak in growth, this weak wood may be cut out and some of the suckers allowed to grow in its place. The cause of these sprouts is that the sap becomes impeded by the bending down of the branches with weight of fruit, by the hot sun striking the branches, or perhaps by some injury to the bark in pruning or gathering the fruit, and nature makes this effort to repair the injury. The removal of these suckers will soon result in the death of the tree, while allowing some of them to grow where needed will renew the vigor of the tree.

If large branches are to be removed, make the cut in the middle of the enlarged part where it joins the main branch or trunk, and not quite in line with the face of the main branch or trunk.

Paint all wounds about one-half inch in diameter with linseed oil paint, gas tar or grafting wax.

Never cut away the main branches of a tree if it can be avoided, but thin out the head, when it becomes crowded, from the outside. This can be quickly done with a pruning hook on a long pole and little or no injury will result; while if the large branches are cut from the trunk the tree is weakened and soon dies or is broken down.

Cut off dead branches as soon as discovered, and cover the wound with paint to prevent further decay.

In training young trees start the branches low. The trees will grow better, the thinning and gathering of the fruit will be more easily done, and the cultivation can be as well and cheaply done with the modern Acme or spring-tooth harrow and weeder as if the head were higher, while the trunk of the tree and ground under it will be so protected that growth will be better than if more exposed.

FARM NEWS AND VIEWS.

For general purposes stable manures give best results all around. They have the vegetable matter, as well as the nutrient qualities. In some kinds, such as cow, sheep manures, etc., the nutrient qualities are more quickly available than in horse manure. Horse manures, as usually procurable, have a tendency to be either straw, which is more of a mulch than a nutrient, or dry burned out, due to lack of proper care, or mixed with green wood shavings or sawdust, which will sour the ground unless for just surface dressing. All those who have stables and want to get the best out of their stable manures when they clean their stables every day, should make a layer about two inches deep, cover this with about two inches of dirt, and continue this until the pile reaches 4 or 5 feet. Have this pile turned over into a new pile every three months. Be sure the water can get to it once or twice a week to prevent heating. When ready for use, none of the valuable ammonia has escaped and the entire mass is unsurpassed by any fertilizer.

The farmer who burns wood for heating and cooking should carefully store the ashes and not permit them to leach, as they have a peculiar fertilizing value. They not only contain potash and phosphoric acid in appreciable amounts, but also contain magnesia and lime, and when applied to the land they also act indirectly to increase the available nitrogen content of organic matter in the soil.

Ordinary house ashes contain on the average about 8 or 9 per cent. of potash and 2 per cent. of phosphoric acid. Investigators have considered that there is enough potash and phosphoric acid in a bushel of ashes to make it worth 20 or 25 cents. Besides that, some 10 or 15 cents additional might be allowed for the "alkali power" of the ashes. This power is that which enables ashes to rot weeds and to ferment peat. The potash content of ashes will be lost if they are permitted to leach and care should be taken to store them in a dry place.

Wood ashes may be profitably applied as a top dressing to grass land and to pastures, where they will encourage the growth of clover and the better kinds of grasses, and which will then crowd out inferior kinds and weeds. Wood ashes also may be used for corn and roots. Because of their lime content they are not so good for potatoes, although sometimes used for this crop.

Ashes from hardwoods (deciduous trees) are richer in both phosphorus and potash than those from pines and other soft woods (conifers.) The ashes of twigs (faggots, for example) are worth more for agricultural purposes than the ashes of heartwood taken from the middle of an old tree. In general, the smaller and younger the wood burned, the better ashes. The ashes of coal do not contain enough potash to make them valuable in this connection.

The average annual value to the farm family of food, fuel, oil and a roof overhead as reported for several hundred farms studied by the United States Department of Agriculture, was found to be $595.09, of which $421.17 was furnished by the farm.

Crops grown at a potential profit may, by being fed to a poor grade of live stock, be turned into an actual loss.

The cost of keeping a calf during its first four weeks is nearly double that of any other four-week period of its life.

A CONFESSION.

(Chicago Tribune)

None of the arts seem to have thriven in America, the art of living least of all. When we are on parade we deck ourselves out, not wisely but with ostentation, and we quite as ostentatiously fill our insides with all kinds of elaborate and expensive rubbish.

PILES

You will find relief in Zam-Buk! It eases the burning, stinging pain, stops bleeding and brings ease. Perseverance, with Zam-Buk, means cure. Why not prove this? All Druggists and Stores—50c box.

Zam-Buk

When the Grave Yawned for Him

SANDY GOULETTE TOOK DODD'S KIDNEY PILLS FOR BRIGHT'S DISEASE.

Now He Can Do His Day's Work As Well As He Could Ten Years Ago—Offers Proof of His Statement.

Old Fort Bay, Labrador, Que., Feb. 11. (Special.)—Cured of Bright's Disease when the grave yawned for him, Sandy Goulette, an old settler here, wants all the world to know that he owes his life to Dodd's Kidney Pills.

"I was swollen out of shape from head to foot. I was so short of breath I could hardly speak," Mr. Goulette states. "The doctor could do nothing for me. The minister gave me the holy sacrament, and a good old priest came and told me that I could not live much longer.

"I was sick all winter and in the spring I telegraphed two hundred miles for two boxes of Dodd's Kidney Pills. I took three pills the night they came and I got relief before morning. I took Dodd's Kidney Pills and they cured me.

"If anyone doubts this statement they can write me, and I will give them names of people who know me and who will vouch for me. I am able to do my day's work as well now as I could ten years ago."

Dodd's Kidney Pills are no cure-all. They simply cure the Kidneys.

Contradictory Science.

The infinitely little and infinitely vast alike baffle the understanding, developed as it is by our concrete finite life. Creation is typified by the sphere. A circle is a straight line that at every point ceases to be a straight line, and the earth's surface is a plane that every moment ceases to be a plane. Following the surface of the earth does not carry us to the under side because there is no more an under side than there is an upper side. There is only a boundless surface. But if it were possible for us to build a globe on the globe as large as the one we inhabit, would it not have an upper and an under side?

The rain causes the grass to grow, and the sun causes the snow to melt, but we cannot apply the idea of cause in this sense to nature as a whole, but only to parts of nature. Gravitation caused Newton's apple to fall, but what causes the earth to fall forever and ever and never to fall upon the body that is said to attract it?

◆

"Sages Are Not Really Wise."

Sages are not really wise
Till they read in Folly's eyes
Love that puts to rout their rules,
Wisdom that crowns the schools.

Tell me, sages, what love is?
Shrug?—but what fool would miss
Kiss of laughter, shame or sigh,
Waiting for your slow reply?

Sages, tell me, what life is?
While you study of "Is" and "Isn't,"
Mutable, definitions give,
Fools like me rejoice to live!

While you labor, dig and seek,
Dull of eye and gray of cheek;
While you study, delve, explain,
Define, examine, think, retrain,

Ponder on the meaning of
Life and death and joy and love,
Laws, discover, reasons frame,
We folks are playing at the game!

Seers and sages are not wise,
Lacking wisdom to revise
All they've learned and taught in schools
By the laughter of us fools!
—Don Marquis in New York Evening Sun.

A woman can forgive a great deal in a man if he is only a good listener.

NERVOUS HEADACHE

Miss Evelena M. Risser, Dublin Shore, Lunenburg, N.S., writes:—"I suffered from severe headaches for two years. In fact, I had headaches day and night. My appetite was very poor and I frequently had pains in the back. After using a few boxes of Dr. Chase's Nerve Food the headaches disappeared, appetite improved and I gained in health and strength. I am very thankful for the benefit obtained from the use of Dr. Chase's Nerve Food, for I am well again after two years of misery."

The object of pain seems to be to give warning that something is wrong in the human system. For this reason, when you have a headache, for instance, you should honestly seek for the cause.

Headache is not a disease in itself, but rather a symptom. If you find other indications that the nervous system is exhausted—if you are restless, nervous, sleepless and irritable—you may rightly suppose that to be the cause of the headache.

The headache warns you that with neglect of the nervous system you later expect nervous prostration, locomotor ataxia, or some form of paralysis. Wisdom suggests the use of such treatment as Dr. Chase's Nerve Food to build up the system, and thereby remove the cause of the headache, as well as prevent more serious troubles.

The use of headache powders is not only a dangerous practice, but the shock to the system of drugs which are so powerful and poisonous as to immediately stop pain is most harmful. The relief is merely temporary, and with this danger signal removed the disease which caused the headache continues to develop until results are serious. The moral is, when you have headaches or pain of any kind look for the cause and remove it.

Dr. Chase's Nerve Food is not intended as a mere relief for headache. It cures by supplying the ingredients from which nature rebuilds and revitalizes the wasted nerve cells. Some patience is required for this reconstructive process, but the results are wonderfully satisfying, because they are both thorough and lasting.

If you would be freed from headaches, as was the writer of the letter quoted above, put Dr. Chase's Nerve Food to the test. Working, as it does, hand in hand with Nature, it can no more fail than can other of Nature's laws.

THE POULTRY WORLD

BREEDERS WANT UNIFORM EGGS

Much has been said about the high records made by hens in the egg laying contests as well as records made by hens in the yards of poultry breeders. The number of eggs produced is not all that should be considered, for an egg to be of value should be of good size and shape, and be covered with a sound, smooth shell.

It is indeed fortunate for the poultry industry that hens' eggs are all so near the same size. Eggs of the different breeds in the contest at one place varied in weight from 2.03 ounces to 2.29 ounces, while the hens themselves averaged in weight from 3.12 pounds to 6.36 pounds, and strange as it may seem, the hens whose eggs averaged 2.03 ounces averaged only 3.40 pounds each. In fact, we find that the size of the hen has little or no influence on the size of an egg. A four pound hen will lay an egg the same size as an eight-pound hen.

After studying the poultry business from every angle, one recognizes the fact that the size and shape of an egg is the one thing all breeders can work for, for it is the only thing in common with all breeds and varieties. In poultry shows the breeders of the various breeds and varieties cannot enter a free-for-all competition on size, shape, color, comb, ear lobes, shanks or any other characteristic, for they are not the same with different breeds, but the size and shape of all eggs should be the same. Therefore this is one of the most important steps to be considered in breeding.

An ideal egg should be an oblong oval slightly tapering from one end to the other, and should weigh 2.16 ounces, or 26 ounces to the dozen. Eggs of this size and shape are the correct size to fill the standard egg case filler and if incubated will give better results than where various sizes and shapes are incubated together. The old idea that round eggs hatch pullets is incorrect, for a hen lays uniformly shaped eggs regularly which hatch approximately an equal number of cockerels and pullets.

Nothing can be told from the size and shape of an egg whether it is fertile or infertile or whether it would hatch a cockerel or a pullet, but the shape of an egg is a characteristic which is transmitted to the offspring. Therefore use as breeders only the hens which produce eggs of correct size and shape.

FOR THE POULTRY RAISER.

When the fowls get off the roost in the morning they should have a small feed; it may be a wet mash, moistened and not sloppy. If dry mash is used exclusively a sufficient number of hoppers should be used to allow all fowls to feed for an hour, then close the hoppers until noon when they should remain open the rest of the day.

Scratch feed should be scattered in the litter in the morning, sufficient to keep the fowls working until about 3 p. m. in winter and 6 p. m. in summer, when the night feed of wheat or cracked corn should be given, as much as they will eat up clean.

Water: As the egg contains a large quantity of water, and the process of manufacturing the egg goes on day and night, water is just as necessary as grain, and when poultry pays, water must be supplied. The poultry raiser who boasts that he does not water his fowls when snow is on the ground but lets them eat snow or pick at the frozen water cannot boast of large egg production, and therefore cannot make poultry pay.

The egg shell must be manufactured. Grain does not contain a sufficient quantity of lime to supply a business hen with shell matter. Lime must be supplied in some form. Crushed oyster shell is the best. If that cannot be had, old plaster, slaked lime or sifted coal ashes will help, and when fed from a hopper it is surprising how much they will eat.

While supplying the necessary materials for the hen to produce the egg, we must supply the necessary material to sustain the fowl, supply a new coat of feathers and keep her in healthy condition.

The more food a laying hen can digest, the greater will be the egg production. The hen's teeth must be looked after—grit being the only teeth that fowls have. Unless proper grit is always supplied, the health of the fowls will be affected. A very important detail which is often overlooked is supplying granulated charcoal; it helps digestion, purifies the blood, absorbs impurities and prevents bowel trouble to a great extent. —Woman's World for February.

NOTES.

No one can dispute that the poultry exhibits of the country are good educators. It is there that the best in fowls can be seen, the different makes of incubators, brooders and other poultry equipment. A poultry show is always a good thing for the town, and the poultry keepers in which zone it is held. They need not be large, but quality should be the aim.

Early hatched pullets are not stopped by cold weather, after once getting down to regular laying, as long as they are properly handled. For the beginner the early hatched chick is a paying proposition.

Incubators are better this year than ever before. Many advances have been made that improve their hatching of chicks, the kind that live, yet none are yet self-regulating and must still to a certain extent be controlled by the operator.

Perhaps the most rapid improvement in poultry equipment has been the brooder, the one great drawback to many poultry raisers of the past. This year the hovers that care for the chicks have made wonderful improvement over last year, and among the leaders one can find brooders that, with proper care, will successfully raise the chicks.

Failures in poultry will become less as the years go by, due to a better understanding by those starting, due to the teachings of the press and the up-to-date experiment stations. The foundation has been laid, and with increased knowledge each year to the essentials that go to make success, and are now known, fewer failures will result.

The city man with a liking for poultry should lay his plans how to put a few hens in the space he can find for them. Poultry and eggs during the fall and winter of this year will not be any lower, and a few hens well kept will prove a paying proposition as well as a pleasure.

ORIENTAL MENDACITY.

A Little Thing Like the Truth is of No Account in Egypt.

If orientals have one fault more than another it is a disregard for truth. In the early days of the English occupation of India, the English judges were astounded at the conflicting stories told by witnesses, and they soon learned to set them all down as unworthy of credence.

In American courts it is also well known that the Chinese are very penurious of the truth, and that no oath will prevent them from giving false witness. In Egypt it is also very easy to get native witnesses to swear to anything, true or untrue.

For instance: Ahmed, a native of Cairo, had a slave who peeped over a wall into Suleiman's harem, and the ladies considered themselves insulted. Suleiman wanted revenge, but he could not bring his wives into court to testify, so it was agreed that Suleiman should accuse Ahmed's camel of walking on Suleiman's land. A crowd of witnesses came forward and for two days testified about the camel and the land until the English judge decided in favor of Suleiman.

It was not until a week afterward that the judge discovered to his great surprise that Suleiman had no ground and Ahmed had no camel. —Exchange.

IF YOUR THROAT IS HUSKY, CATARRH MAY BE STARTING

A weak or irritated throat is the first step towards Catarrh. Everything depends on your remedy. A cough mixture slips quickly over the weak spots, drops into the stomach and does little but harm digestion. It's altogether different with Catarrhozone—it cures because it gets right at the trouble. You inhale Catarrhozone, breathe in the vapor of healing balsam that strengthen and restore the weak throat tissues. You'll never have colds or coughs. Throat trouble and catarrh will disappear with the use of Catarrhozone. Get the large dollar outfit, which includes the inhaler. It lasts two months and is guaranteed to cure. Smaller sizes, 25c and 50c, sold everywhere.

TRENCH HUMOR.

Soldiers of Three Nations Showed It in This Instance.

There is humor as well as tragedy in the trenches. Not all of the time of the men is given to planning the death of the enemy, although that is the main object in view. Sometimes the soldiers of the opposing armies have an interchange of pleasantries which seem almost inscrutable to the outsider. The Brooklyn Standard Union tells of a most interesting incident which occurred the day before the British made their attack last September in the vicinity around Loos.

When the German trenches were near to the English a board with this printed on it was shoved into view by one of the Kaiser's men: "The English Are Fools." Very probably the Englishmen disbelieved the accusation, but they did not fire on the board.

It disappeared and shortly popped up again with this addition: "The French Are Fools." Still the British did not fire, nor even shout their disapproval. So the board went down once more behind the earthenworks only to come again with a third line reading: "We Are Fools." At this the British shouted.

The comedy was not yet ended, however, and five minutes afterward the board with the fourth black inscription was poked above the top of the embankment. The last line read: "Why Not All Go Home?" The British received this sensible suggestion of the Germans with uproarious applause. It met with unanimous approval. All showed they were tired and disgusted with trench life.

Next day, however, the order to charge was given, and the British troops rushed into Loos using their bayonets on the Germans and getting bayonet thrust and machine fire in return. So they fought and killed each other while, perchance, there was not one man of them who did not wish fervently that he was at home and engaged in some peaceful occupation. —Rochester Times.

TONIC TREATMENT FOR THE STOMACH

The Modern Method is Most Successful in Treating Indigestion.

The old-fashioned methods of treating indigestion and stomach troubles are being discarded. The trouble with the old-fashioned methods was that when the treatment was stopped the trouble returned in an aggravated form. The modern method of curing indigestion and other stomach troubles is to tone up the stomach to do nature's work. Every step toward recovery is a step gained, not to be lost again. The recovery of the appetite, the disappearance of pain, the absence of gas—all are steps on the road to health that those who have tried the tonic treatment remember distinctly. Dr. William's Pink Pills are a blood-builder, tonic medicine, every constituent of which is helpful in building up the digestive organs, and is therefore the very best remedy for chronic cases of stomach trouble. Thousands of cases like the following prove how successful this treatment is: Miss Amy Browning, Cornith, Ont., says: "I have found such great benefit from Dr. Williams' Pink Pills that I would be ungrateful if I did not publicly say a good word in their favor. I was badly run down and my stomach was in a very bad condition. All food distressed me and left me disinclined to eat. I suffered from nausea and dizziness and frequent sick headaches, and this was further aggravated by pains in the back and sides. I was in this condition for several years, and although I had got medicine from several doctors it did not help me. Then I heard of Dr. Williams' Pink Pills and began taking them. I am glad to say that they soon helped me, and now I am as well as ever; can eat all kinds of food, with relish, and have not an ache or pain."

You can get these Pills through any dealer in medicine or by mail, post paid, at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

Wm Sickel is the new engineer at the Greutzner mill.

Peter McRitchie is expected home from Maryland this week.

Mrs Maloney of Deloraine, Man. has been visiting at the home of Mr Hittetsel.

A number of our people attended the patriotic dance at T H Tanner's and report a very enjoyable time.

Cutting ice is the order of the day in this burg.

"DOING THEIR BIT"

Our young people are thinking of getting up a box social in aid of the Patriotic Society. As this is the farmers' slack season they are taking this way of "doing their bit" for King and Country before the spring rush is on. We think the young people are to be highly commended for what they have taken in hand and wish them ever success.

OTTER CREEK

Mr. Harry Brunt spent Sunday with his parents at Hanover.

Mr and Mrs Wm Klein spent Sunday with their uncle, Mr David Gress.

It is reported that Mr Arthur Pletsch purchased the farm of Mr John Pfohl of the 12 con.

A very enjoyable evening was spent at the home of Mr and Mrs Philip Gress, after the young boys had been helping at a wood bee in the afternoon.

Mr Dan Wolfe and Mr Harry Hall were in Hanover on business last week.

NARVA

The Narva Women's Institute will hold their regular monthly meeting at the home of Mrs. T. H. Purdy, on Wednesday Feb 16th, 1916, at 2.30 P. M.

The Box Social which was held in the school on Friday last under the auspices of the Women's Institute was a huge success in every way. A large and orderly crowd listened to an excellent program of dialogues instrumentals and solos. Lieut. MacKay, a former pupil of the school and Capt. McNally of Walkerton gave two excellent addresses. Mr. Harvey Clark acted as chairman in his usual good natured way. The proceeds of the evening amounted to $61.10.

Our teacher is looking rather gloomy these days. I wonder what's the matter?

Mrs. John Moffat returned last week after visiting friends in Durham.

Miss Dolly Bell spent a few days at Burgoyne.

The clover-threshers have been very busy in this district the past week.

PINKERTON

Rev Mr Gale attended the funeral of the late Rev. Mr. Mullin at Fergus on Wednesday last. Rev Mr Mulin was well known here, having occupied the pulpit several times.

A number from here attended the box social at Narva on Friday evening and report a fine program, others attended the Carnival at Paisley the same evening.

Miss Hattie Gale is visiting her former home at Alma.

Miss Pinkerton of Greenock, is visiting at Mr. D. Elphick's.

Don't forget the Box Social in the C. O. F Hall, on Thursday evening Feb. 17 in aid of the Red Cross. Everybody welcome and only 15 cts.

There will be no services in the Presbyterian Church here on Sunday next, owing to anniversary Services at Cargill. The former pastor Rev Mr Mason will conduct the services.

Mr Adam Reid spent a few days in Paisley.

Mr Albert Pinkerton was in Walkerton on Saturday.

GLAMIS

Mr James McCormick visited friends near Kincardine last week.

Miss Kate Urquhart of B. Line, Tiverton, who was a guest of Misses F McLennan and R McKinnon for the past month returned to her home this week.

Mr and Mrs Jack McLean 10th Con, is spending a couple of weeks with relatives at Ripley.

Mrs (Rev) F Reich who was called to Toronto owing to the illness of her brother, returned home on Saturday.

Mrs Alice Dezell returned home last week from a visit with relatives and friends at Hopeville and Dundalk.

Privates Clyde McKeeman, Mac McKinnon, John Thompson and Albert Groves of Tiverton, were Sunday visitors at their homes here.

Mr Neil Currie spent the latter end of the week with relatives on the North Line.

Mrs James Thompson went to Toronto on Friday to attend the funeral of her brother-in-law, Major Farq. Beaton.

Quite a number from here took in the Box Social at Narva on Friday evening. A good program was rendered, including addresses from Capt. McNally and Lieut. McKay.

Mr Dan Finlayson went to Port Elgin on Saturday, where he has secured a position in the Hepner Brush Factory.

Mr Billy Patterson (Pug) is another young man who enlisted here on Saturday night for the 160th. Billy worked last year with Capt P McKinnon, but the last couple of months with Mr R Needham.

Mr and Mrs F Haldean of Cargill were Sunday visitors at Mr. W J Graham.

Miss Pearl Pate of Oxbow, Sask. who spent the past month at Mr Ferris', Boundary West, returned to Dundalk on Monday.

Miss Birdie McLean has returned home from Southampton.

The many friends of Alexry J Smith will be pleased to learn he is home from the Kincardine Hospital, and hope to see him around soon.

Mrs Chas McKinnon took suddenly ill on Monday night. Her many friends wish for a speedy recovery.

CARGILL

Alderman Jas Lawson of Guelph, was here on Thursday.

Messrs John Bester and Fred Hepb were in Walkerton on Thursday.

Miss Margaret Schnitzler is spending a week in Hamilton.

Mr Joseph Jordon of Hamiota, Man., spent a few days last week with his brother William.

Mr Nelson Parker visited his sister, Mrs Oscar McLean, in Paisley last week.

Mr James Alexander, who spent the past month at Allenford returned home on Friday.

Lieut King attended the recruiting meeting in Chesley, on Friday.

Miss Bessie Abell is visiting with Miss Cora Purdy, at Narva.

Mrs A Powers was in the county town on Friday.

Bert Hoover of Walkerton was here on Saturday.

Mr Joseph Kunkel spent a few days in Mildmay last week.

Lieut King, Corp Hamilton and J Clancy attended the presentation at Eden Grove, Thursday evening of wristlet watches to Pte Connell and Reid. Rev W Fiddis read the address and after both recipients spoke. The evening was spent in games and dancing followed by lunch and needless to say was enjoyed by all, as the ladies of the Grove do not take second place in that respect.

Mrs Thos Mahoney spent Sunday with her son George, in Southampton.

Mrs Sam Cargill is spending a few days with relatives in Port Elgin and Southampton.

Miss C Zettler of Walkerton was in our village on Saturday.

Mr and Mrs H M Cargill left Tuesday for Walkerton and Weston. They will attend the wedding of their son Stanley, in Milton, on Saturday 19th.

Dr A G Fortune of Walkerton, passed through our burg on Sunday.

Miss Gertie Koller of Walkerton, spent the week-end with her grandparents, Mr and Mrs John Louchleen, Sr.

Misses N Clancy and V Louchleen of Walkerton, Sundayed at their homes here.

Mr F S Kleyn was in Mildmay on Sunday.

A few from here attended the box social at Narva on Friday night, when a good programme including speeches from Capt McNally, Lieut. McKay, Revs Gale and Fiddes were given. Mr Harvey Clark was chairman and he gave a few of his favorite stories.

R. Wor. Bro. W J Louchleen D D G M of North Huron District No 6, is making his official visit to a number of the Lodges in this district this week.

Our contemporary made some reference to the old bachelors having to get married or enlist. Don't look much like "easier" when they are learning to bake.

The funeral of the late Patzie O'Hagan of Paisley passed through here on Tuesday for interment in the R C cemetery, Chepstow. Mr O'Hagan was well known here and we extend our sympathy to Mrs O'Hagan.

Mr and Mrs J Gray of Toronto spent the week-end with their daughter, Mrs (Dr) Bricker.

Mr Wm Anderson of Walkerton Sundayed with his mother here.

Pte Arthur Burrows of Walkerton spent Sunday at Mrs Jno Hall's.

Messrs Garland, Parker, Crawford, Brocklebank and Hetzler of Garland L O L attended a district meeting in Underwood on Monday.

Walter Grainger jr left on Tuesday for Walkerton where he joined the 160th Batt.

Mr Frank Mawhinney was in Tiverton on Tuesday.

Miss Margaret Garvey of Chepstow spent Sunday at Joseph Clancy's.

Mr and Mrs R A Fowlie entertained a number of their friends to a euchre party on Monday evening.

Dr J G Bricker was in Toronto on Tuesday.

We are pleased to see Mr Sam Cargill around again after a long illness with his injured hand.

Miss Dryden of Hamilton is visiting her aunt, Mrs A Bell.

Mr W D Cargill M P P is spending the week in Toronto.

A few from the village attended the sale on Tuesday of Simon Scharbach, 8th con, Greenock. We understand Mr Scharbach is leaving to take up his residence in Young, Sask, in a few weeks.

Mr M H Zeigler made a business trip to Port Elgin and Southampton on Tuesday.

LEWIS J. SIEFRIED, Walkerton, age 29, machinist, born at Formosa.

E. GORDON SCALES, Walkerton, age 31, restaurant keeper, born at Leicester, Eng.

HIRED MAN SUICIDED.

Young Man Employed by Peter McArthur of Lovat Took His Own Life in the Woods.

George McCracken, a hired man employed by Peter McArthur, lot 11, con. 9, Greenock, committed suicide last Friday evening in the bush where he had been cutting wood all day. After supper on Friday evening he went out. When morning came and he did not return, the family was not alarmed as he was of a reticent nature and very uncommunicative regarding himself and his doings. On going out into the bush the following morning the men were horrified to find his lifeless remains lying near a log with a great gash in his throat, supposed to have been inflicted with the wood-axe. Coroner Gage of Paisley was notified and communicated with Crown Attorney Thos. Dixon in regard to the matter. The Coroner investigated the circumstances and it is unlikely that there will be an inquest. The dead man was about thirty years of age and a good worker. He had no relatives here. He formerly lived at Toronto.

W. B. Thompson Enlists

One of the latest Walkerton recruits is Mr. W. B. Thompson, secretary of the Walkerton Electric Light and Power Co., who has joined the 160th Batt. Band. The example of a married man like Mr. Thompson, who is giving up a responsible position should count in Walkerton.

+ + +

Brant Man Injured

Mr. Andrew Waechter of Brant, was the victim of a rather serious accident in Truax's millyard on Saturday evening. His sleigh sloughed while he was driving over the track, throwing him out against the sharp end of a board. Two ribs on his right side were fractured.

+ + +

Civilian Lands On Soldier

For speaking insultingly of a senior officer of the 160th. Batt. against whom he had a grievance, a returned soldier was treated to a smart smash on the jaw by a well-known citizen on Saturday. The soldier went to Magistrate Tolton and laid charges of assault and abusive language but later decided to withdraw the charges.

+ + +

Must Be British Citizen

Judge Klein, who is the judge of the Surrogate Court of the County of Bruce, will not in future grant letters probate of any will or letter of administration of any estate of any deceased person unless he has evidence to satisfy him that the deceased was not a German, Austro-Hungarian, Turkish, or Bulgarian subject or other alien enemy. Judge Klein has been instructed to do so by the Department of Justice and all Surrogate Judges in the Province will do likewise.

+ + +

Big Meeting At Mildmay

A great recruiting gathering was held at Mildmay Tuesday afternoon. The Walkerton unit of the 160th, including the Band, were in attendance. The speakers included W. G. Weichel M. P. of Waterloo, Rev. Fr. Cummings, Col. Weir, Judge Klein, Major Osborne and others. The places of business were closed and a great crowd was present. Only one recruit came forward at the meeting but prospects are good that a number of others will follow. A fine supper was served for the visitors in the Methodist Church by the ladies of Mildmay.

+ + +

Funeral of Ray Vogan

The funeral of the late Ray Vogan was held on Friday afternoon and was largely attended by the people of the town and countryside. Rev. D. A. Walker B. A. conducted service at the house and at the grave. The Oddfellows, in which order the deceased was a P. D. D. G. M., attended in a body and gave the beautiful service of the order at the grave-side, the parts of Chaplain and Noble Grand being taken by Bro. F. H. Leeson and F. Spielman. The pall-bearers were:—Thos. Pye, F. Godwin, A. P. Johnston, H. E. Truax, H. M. Norrish. The relatives from out of town included:—Mrs. Jos. Vogan of Catrick, David Vogan of Howick, Mrs. Ivy Thompson of London.

Good For Cargill!

The busiest man in the neighboring village of Cargill the next few weeks, will be Manager R. A. Fowlie of the Royal Bank. On Saturday his entire staff, accountant, teller and junior, all decided to join the King's colors. Mr. Fowlie would like to go too, but as he is a married man with a family, and incidentally a staffless bank on his hands, he is not likely to get the "bug". By the way, this thriving little burg to the north of us is certainly "doing its bit" in the recruiting line. No less than 30 men have signed up at Cargill, or ten per cent. of the population. That is a record which equals the British Isles and knocks anything in Ontario cold. Since the above total was reached, two more Cargill boys have offered their services, but were rejected owing to physical disability.

News About Town

Read McBurney's ad.

See McBurney's spring silks.

Miss Nellie Beattie is visiting at London.

For overalls and Smox—S. A. Rife & Co.

Mr. N. Crawford is laid up with a bad cold.

Rev. R. Perdue was in Toronto on Friday.

Mrs. Lay left Monday on a visit to Toronto.

Have you had the measles? If not, why not?

Mrs. Wisser is ill with the grippe this week.

For Ladies' and gents' suits—S. A. Rife & Co.

Lost

Between Post Office and G. T. R. Station, a pair of Tinner's shears and a hammer. Finder kindly leave them at W. J. Hornaston's, and get reward.

+ + +

Women's Institute

The regular monthly meeting of the Women's Institute will be held at the home of Mr. Duncan, on Thursday, March 2nd.

+ + +

Everett Truax Hurt

Pte. Everett Truax of the 71st, is in the hospital at Galt at present, as the result of a jab from a pick in the hands of another soldier while working at trench-digging.

+ + +

On The Firing Line

The Telescope had a service post card from Private Harry Wade who is on the firing line again, after a turn in the hospital stating that everything is well with him.

+ + +

Draft Not Needed

Word was received from the office of the D. O. C. at London last week, asking for a draft of ten men from Bruce, along with men from other counties, to fill up the ranks of the 33rd. Batt. The order was cancelled later.

+ + +

A Property Change

Mr. Frank Antoun has bought the building which he occupies, next door to the Public Library from Mrs. Gibson. This enterprising young fruit merchant is planning to put up a new building on the premises next year.

+ + +

Boys Look Great

Mr. Alex. Hass received a snapshot the other day of his son, Private "Gabe" Hass and his friend, Private "Bill" Reichenbach, taken in London, England. Both boys have put on weight and are in fine shape as a result of the long months of military training.

+ + +

Real Estate Changes.

Mr. James Whitehead sold this week for Mr. James Preston the old Earwaker farm to Mr. William H. Fennel. He also sold for Mr. Thos. Young his property at the corner of Scott and Jackson Sts. including implement shop, motor show room and blacksmith shop, to Mr. Isaac Glintz.

+ + +

Former Walkerton Merchant

A former Walkerton Merchant, Mr. J. B. Kerr, succumbed to an attack of pneumonia at his home in Sault Ste. Marie, Ont., on the 10th inst. The deceased was well-known here, having been in the boot and shoe business with his brother here up to sixteen years ago. He was in his 58th year.

+ + +

825 Strong.

The 160th. Bruce Batt. is hitting off a great clip in the recruiting line. Nearly a hundred men signed up during the past week bringing the total strength, all ranks, up to 825. At the rate at which the men are coming in, it looks as if the Battalion would be up to the full strength by the end of next month.

+ + +

Extending His Business

Mr. S. A. Rife is installing a number of automatic knitting machines in his factory, which will mean considerable increase in the output. There is a heavy demand for certain lines of knitted goods owing to the German market being cut off, and Mr. Rife is planning to increase his output along these lines by installing more machinery and increasing his staff.

+ + +

The Coldest Day

Monday was the coldest day this winter. The mercury dipped to 13 degrees below in the government thermometer at N. P. Schmidt's fruit farm and stayed well below zero most of the day. The lowest temperature registered so far this winter, was 15 below, which was on the previous Monday morning early, but on that occasion the extreme cold did not last any length of time.

Wins First Scholarship

Miss Helen S. Harkley, a pupil of Walkerton High School, and daughter of John Harkley, is winner of the First Carter Scholarship for Bruce County. This scholarship, valued at $100, goes to the pupil who obtains the highest aggregate of marks on the 1915 June Upper School Examinations. Congratulations are due to this young lady and to the Principal and staff of the school in obtaining this coveted honor. The second and third prizes for Bruce county were won by Miss Elizabeth King of Chesley and Wilfred J. Lennox of Wiarton.

NEWS OF CARGILL

Happenings of the Week in the Bustling Village to the North

The Women's Patriotic League sent 50 pairs of soldiers socks this week to the Red Cross Society at Toronto.

Mrs. (Rev.) Homer and Miss Kerr were in the County town on Thursday.

Isaac Chambers jr., left on Thursday for Elora, where he has secured a position.

Mr. Ambrose Zettler, who has been learning the telegraphy at the station here, left on Saturday for Port Elgin, where he has been appointed assistant agent. We wish him every success. His successor here is James Sparling.

Mr. and Mrs. John Clancy attended the funeral of the late Martin Hynes, in Walkerton, on Thursday. Mr. Hynes lived in the village for a number of years and was a good citizen.

Mr. Joseph Kraemer was in London on Friday.

Miss Mary Ann Bester left on Friday for a month's visit with friends in Trout Creek.

Miss Drydon returned on Friday, to Hamilton, after spending the past week with her aunt, Mrs. M. Bell.

Misses C. and M. Zettle of Walkerton, spent a few days last week with Mrs. Jos. Scharback.

Pte. Alex. Thompson of 71st Batt., Galt, spent the week-end with his family here. He expects the 71st will soon go overseas.

Mr. Joseph Clancy was in Toronto, on Saturday.

Miss Myrtle Elder spent Friday with her aunt, Mrs. D. Noble, near Walkerton.

Mr. Chas. Kyle was in Walkerton on Saturday, completing the auditing of the Township books.

Anniversary services were held in the Presbyterian Church on Sunday, when Rev. Geo. Mason, of Harriston, a former pastor here, preached two powerful sermons to large congregations. On Monday evening a supper was held in the basement, and after justice had been done to the inner man, the evening was spent in recitations and speeches by the local clergy, closing one of the most successful anniversaries they have had.

Miss Philipps of Listowel, spent the week-end with her friend, Miss Gladys Keeling.

Mr. Geo. Mahoney of Southampton, was here on Monday.

Lieut. Krug and Alex. McDonald Sundayed with their parents, in Chesley.

Mr. Fred S. Kirwin, the popular teller for the past four years and a half, James Martin accountant for the past 6 months, and Henry Young jr. clerk of the Royal Bank, enlisted with the 160th Bruce Batt., on Saturday, and all are now wearing khaki and expect to leave in the course of three weeks for training at Walkerton. This makes 4 recruits this week and a total of thirty since the war started. Some of them have been in the trenches for some time and so far none have been injured. This makes about 10 percent of our population now with the colors and will stand comparison with most places in the province.

Mr. Shouldice of Mildmay, is the new harness maker at J. W. Reaburn's.

Ptes. Grainger and Thompson, of 160th Batt. Walkerton, spent the week end with their parents.

James Alexander jr., who has been attending the Walkerton High School for the past year and a half, has entered the Royal Bank as junior. Jim will give a good account of himself.

Recruits for the 160th Batt. are still coming. Wm. Browncombe signed up on Monday night. First thing we know they will want to change it to Cargill Batt. instead of the Bruce.

Owing to space we were obliged to cut our budget down this week. Guess it is up to the editor to enlarge the paper.

Dr. Thos. J. McNally of Guelph, Provincial Health Officer, was in our village one day last week.

Mrs. Dr. Gibson is spending this week with friends in Milverton.

Mr. Fred Balsdon is attending the Hardware & Store Dealer's Convention in Toronto.

Alex. McDonald and George Anstett offered their services to the 160th Batt. on Monday but were rejected. These boys will receive Offer of Service Cards from the Battalion.

Two Cargill boys, Phil Sparling and Lew Cliff, who have been training with the 160th Batt., were rejected this week owing to physical unfitness. This is pretty tough on the boys who passed the physical examination when first offering themselves seven weeks ago, and had been looking forward to serving their King and Country on the battlefields of France. We sympathise with the boys and honor them

Through Africa In Time of War

(An Interview in the Christian Advocate with Bishop Hartzell, on his return after an eight-month tour in sections torn by war.)

War conditions are more or less positive and embarrassing in practically every part of the continent. There is heavy fighting between the British and Germans in the southwest. When I was at Cape Town the last regiment of an army of 10,000 was leaving. It is so in German Kamerouns, on the west coast, with the French on one side and the British on the other. There have been frequent and severe battles. In one, eleven out of the twenty-one British officers, and the majority of the native force of six hundred were killed in a few moments by fire from a German fort. In German East Africa there have been three or four conflicts.

There will be a new map of Africa, no matter what side wins. Germany's ambitions and plans are to make herself a leading, if not the leading, colonial world power. The greatest misfortune of that empire was that Bismarck and Prussia had no colonial policy. Until 878 the whole force of Germany's policy was centred in the work of unifying the empire. In the meantime nearly all available territories for colonies were preempted by other nations. If instead of Alsace and Lorraine Germany had taken from France North Africa, and if for these more than forty years Germany had pushed the colonization of North and Central Africa, the friendship between Germany and Great Britain would probably not have been broken. Instead of this, England and France have side by side developed great colonial empires in Africa by which they control nearly eight and a half million miles of the continent. If the allies win, Germany will lose her four colonies, which now aggregate about a million square miles. If Germany wins, and she can dictate terms of peace, Africa will be largely Germanized. Our work is under five flags, Liberian, Portuguese, Belgian, French and English. A Methodist map of Africa would show seven continental strategic centres.

The outcome of the war will mean momentous changes in the Mohammedan mission problem. If Germany should win it means the re-enthronement of Moslem political and military power, with Constantinople at the centre. If the allies win, Constantinople will either be under a Christian nation or made a world city, in which all the allies will be represented. The great Saint Sophia Mosque, built in the sixth century as a Christian church, will again resound with Christian song and prayer. The present indications are that Turkey will prove a weak ally to Germany, and the fact that all effort to raise a Holy War in any part of the Moslem world against the allies has signally failed is very significant. The sixty-five millions of Moslems in India under the English flag, and the fifty-nine millions in Africa under the French and English flags are loyal to their governments. I made a careful study of this question in North Africa, where 95 per cent. of the population is Moslem, talking with French officials, both civil and military, with leading Mohammedans and others, and found the sentiment universal—"We do not want war." With Bishop Anderson I witnessed the prayer service of several hundred Moslems on the edge of the desert, near Biskra. After their Moslem services they prayed for the success of the allies, naming England, France and Russia. This is an epoch-making incident in the relations between Christianity and Mohammedanism. The Moslem world is divided between Turkish and Arabic leadership. The Turks centuries ago, by military force, took the Caliphate away from the Arabs, and have held it, and the discontent of the Arabs has been growing. If the allies win it probably means that there will be a new Caliphate and the head of the Moslem world will be in Asia, under Arabian leadership.

The Dutch Rebellion in the South African Republic was promptly squelched through the leadership of that remarkable man, General Botha. There is no doubt that back of it were German sympathizers. The documentary proof is abundant, that not only was this true concerning the rebellion, but especially in reference to the German plan of supporting and having at least a suzerainty over a Dutch South African Republic which was to supplant Great Britain in that section of the continent. German Southwest Africa was to be the basis of that movement, and some men high in authority in the British South African Government, it has been proven positively, were in communication with German representatives in Berlin and South Africa in following this movement. This accounts for the English army of 40,000 being now in the field in German territory. It is faced by a German force of from 12,000 to 15,000 whites and several thousand native troops. This force on the defensive in a country so well adapted to defensive warfare will be difficult to overcome.

On every ship during these months there were precautions against German vessels and submarines. One of the most remarkable things of the war is the entire destruction of the German merchant marine and the driving from the sea, or destroying, all her war vessels of every type which have ventured out. Her great navy is yet intact in German waters. Another wonderful fact is that the British and French admiralties, principally the former, have their eye on the ship line tracks in the entire Atlantic and Mediterranean; every ship is within wireless communication with some type of English war vessel, and several times during my ship journeys our captain received warnings and ship courses were changed. At all times the lights were shaded every night. For three months the chief dangers have been from submarine crafts.

The black races of the South are everywhere wrought up over the war. It reminds me of the conditions during the Boer War in South Africa. Everywhere the question was asked by the natives: "Why big white Queen and Dutch people fight?" In the present case the natives are much more intelligent, and the effects of the war are felt in so many serious ways that there are constant questions among them as to what it all means. As far as I know the natives are loyal to the country under whose flags they are. In many parts, there is great agitation and some actual uprisings. I was in the Angola interior for a month. The natives resent being called into the war service and very many are hiding in the swamps and timber to prevent being commandeered. All the native boys in one of our industrial schools were taken for the army. Our oxen and carts were also taken.

Intense and bitter feelings are increasing, especially between the Germans and English. All Germans in every part of each colony, English or French, in Africa, who could not get away are held in some kind of prison. There are nearly 200 in a fort in Algiers. It may be that here and there a missionary has been allowed to remain. It is also so under the Portuguese flag. One German printer and his wife at Melange were compelled leave. In North Africa, under the French, the Rev. Mr. Lowther and his wife, the latter being German, and our Swiss nurse were compelled to leave. Wherever Germans are found as having acted as spies they are arrested, and many have been shot, and the rest are closely confined. In the German colonies the same policy is pursued toward French, English and Belgians. In fact, the dreadful methods of horrible war are in vogue to a greater or less extent in three-fourths of the African continent, while the largest interests of the whole of Africa are involved in the world conflict.

FOR OBESITY.

What Overly-Plump Persons Should Do to Keep Down Flesh.

Nobody likes to be bulky and fat, and nearly every one suffering from obesity is willing to submit to treatment to reduce the weight. We have heard it said, time of mind, that "exercise" is the greatest of all remedies for obesity. Just what one should do and how he should do it is ably told by Dr. William Brady, in the Illustrated World (Chicago, October). He says: "People are too stout mainly for two reasons: The first is they eat too much and exercise too little. The second, which is more important, is that there is some defect in their oxidation apparatus, some failure of certain of the ductless glands. In young persons obesity is often attributable to deficient secretion in the pituitary gland. Such persons have an abnormal appetite for "sweets," but reducing the consumption of "sweets" will not cure the obesity." For normal individuals Dr. Brady says: Sugar is a good, digestible food, and a natural fondness for it, as in children, does not cause indigestion nor obesity. He goes on: "The most common type of obesity is merely a matter of excessive intake of fuel coupled with plain laziness. Let us hasten to add what laziness means, in the indictment, lack of real exercise; as a rule, the unfortunate does not know how to play.

"As long as a fat man (or woman) is still ready to play, even if he feels that he is making a monkey of himself, there is hope. When he reaches the point where he hesitates to get down and roll, to turn somersaults, or at least try valiantly to act the part of undignity, he is a fat man for keeps, diet or no diet.

"Some obese individuals are anemic, short of blood, while others are plethoric, damned with too much blood. Anemic obesity develops frequently, during periods of enforced rest, as after operations, typhoid fever, fractures or other confining disability. Victims of incipient tuberculosis sometimes develop anemic obesity from rest and forced feeding carried to extremes.

"In plethoric obesity the subject is generally over 30 years of age, and, for a time, rather proud of his hearty good health. Somehow we plethoric Americans imagine a small "bay window" and a couple of chins go very well with the florid cheeks of plethoric obesity, the minute, dilated blood vessels of the face that should serve as a warning signal of approaching arteriosclerosis (arterial hardening.)

"Life insurance companies, unromantic corporations as they are, rather smile upon 10 to 20 per cent. overweight in young persons, but coldly do they receive an applicant over 30 who boasts of more tissue than he ought to be carrying around.

"Muscular exercise is the natural draft for the oxidation process, the physiological accelerator of the vital fire which must be kept burning freely in order to prevent or remove piled-up fuel. For the average individual four miles a day—rain or shine, roast or shiver—should be the rule. If there is any heart trouble the walks must be carefully graduated by the medical attendant, according to the heart's efficiency. Room gymnastics are more particularly adapted to the reduction of excessive fat deposits about the hips, back and abdomen.

"Another very efficacious measure is fasting. After all, a three or four day fast is no great strain upon the fat man, for he is literally stuffed with good nourishment which will tide him over safely. The main thing is to get away from that fool notion that it is dangerous to skip a meal or several meals now and then. The human stomach, like most other useful pieces of machinery, is none the worse for a rest once in a while; in fact, the whole metabolism gets a better grip on duty after a brief fast. Of course this is a matter of medical supervision, too.

"Since cold water increases the secretion of gastric juice when taken at mealtime, the obese, with an abnormal appetite, should deny himself this boon of the dyspeptic; a small drink of hot water half an hour before the meal is preferable, if fluid must be taken. Anemic obesity is certainly made worse by much water drinking; plethoric obesity may be improved by water drinking."

For anaemics and persons in poor health Dr. Brady does not advise abstinence from mixed foods, although he does advocate healthy obese persons eating but one kind of food at a meal. He says that by taking a little fat food patients will find it easier to get along with a minimum of starches and sugars. He recommends crisp bacon as one of the most digestible, satisfying forms of fat to eat. All fresh, green vegetables which grow above ground, excepting beans, peas and lentils, are necessary in the diet, and bread, with very little butter. Lean meat may be taken once or twice a day when other items are limited, especially by the anaemic obese. He further says and warns his readers:

"There are many cases of obesity in which brilliant results are obtained by administering thyroid extract. These cases differ from other kind of excess weight as honey does from molasses; yet the United States public health authorities found it necessary recently to issue a warning to the public against the many alleged anti-fat nostrums sold to the public by mail order concerns, because of the thyroid extract present in the "perfectly harmless" formulas. Administered by a physician in appropriate cases thyroid extract may prove wonderfully beneficial, but he who monkeys with such a potent poison on his own responsibility courts worse evils than he dreamed of.

"Alcohol is bad medicine for the obese subject, because it depresses the physiological activity of the ductless glands, and because it is itself to a certain extent oxidized, instead of the stored-up tissue, thus tending to preserve the fat already present.

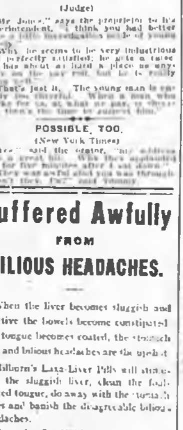
"Massage and various baths are sometimes of value in the treatment of patients who are obese, not to reduce weight, but to meet other requirements of the individual's altered metabolism. Any method or system of treatment for obesity which does not at the same time improve or at least preserve the general health is bad and should be avoided."

Was Not Much of a Believer in Patent Medicines

But Milburn's Heart and Nerve Pills Are All Right.

Mrs. Wm. McIlwain, Temperance Vale, N.B., writes: "I am not much of a believer in medicines, but I must say Milburn's Heart and Nerve Pills are all right. Some years ago I was troubled with smothering spells. In the night I would wake up with my breath all gone and think I never would get it back. I was telling a friend of my trouble, and he advised me to try Milburn's Heart and Nerve Pills. He gave me a box, and I had only taken a few of them when I could sleep all night without any trouble. I did not finish the box until some years after when I felt my trouble coming back, so I took the rest of them and they cured me."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years. The testimony of the {users} should be enough to convince you that what we claim for them is true. H. and N. Pills are 50c per box, 3 boxes for $1.25; at all druggists or dealers, mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.



EVENING GOWN OF WHITE VELVET.

Metallic lace and bead embroideries impart a twinkling splendor to this evening gown of white velvet.

SUSPICIOUS.

(Judge)

"Mr. Jones," says the proprietor to his superintendent, "I think you had better have a little investigation made of young Pretty."

"Why, he seems to be very industrious and perfectly satisfied; he gets a raise. He has about as hard a place as anybody on the pay roll, but he is really doing well."

"That's just it. The young man is entirely too cheerful. When a man who works for us, at what we pay, is cheerful, there's the time to suspect him."

POSSIBLE, TOO.

(New York Times)

"Yes," said the orator, "my address was a great hit. Why they applauded me for five minutes after I sat down."

"They was awful glad you was through, wasn't they, Pa?" said Tommy.

Suffered Awfully FROM BILIOUS HEADACHES.

When the liver becomes sluggish and inactive the bowels become constipated the tongue becomes coated, the stomach foul and bilious headaches are the upshot.

Milburn's Laxa-Liver Pills will stimulate the sluggish liver, clean the foul coated tongue, do away with the stomach gases and banish the disagreeable bilious headaches.

Mrs. J. C. Kidd, Sperling, B.C., writes: "I have used Milburn's Laxa-Liver Pills for bilious headaches. I suffered awfully until I started to take them. They were the only thing that ever did me any good. I never have any bilious headache any more."

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Germany and Russia

The Germans have their own atrocity grievances against the Russian Cossacks, whose doings in Eastern Prussia in the fall of 1914 must console them when too many unpleasant truths are being told about Belgian atrocities. Very likely the charges against these wild Russian tribesmen are true. They have a reputation for ferocity. But remembering what went on in Belgium and northern France in the summer of 1914, one has somehow less interest in the reprehensible activities of Cossack raiders, in spite of the well known axiom that two wrongs do not quite make one right. Germans have always feared Russian "barbarism." An old folk saying with which to quiet children used in Prussia not over fifty years ago was, "The Cossacks are coming!" It is an antipathy that must go back to remote causes in a time when the two peoples were more nearly on a "kultur" level than latterly.

German statesmen seem to have kept alive this almost unreasoning terror of the vast "undisciplined hordes" over ready, as they imagine or tell their people, to pour over Germany from the dark east. Some wise men think it was this instinctive fear of Russia, of what she might be plotting, what she might be able a few years hence to accomplish, that stirred Germany to egg Austria on into this war. "If Russia were allowed to complete those strategic railroads in Poland already under way, if Russia reorganized and improved her army, if Russia developed another ten years in industrial ways as she has developed in the past ten," etc., etc. We all know this sort of hypothetical argument. I do not pretend to understand the rights of the question. It is plain enough that Germany hates and despises her great neighbor—fears the sheer weight of her population in too close proximity as a dangerous influence through "infiltration," in lowering the high standard of German civilization.

For Russia, according to the German view of things, is manifestly in a far inferior state of cultural development than herself—truly barbarian—and Germany seems to think that the menace of Russian barbarism ought to be self-evident to every intelligent western European and American. A year or so ago the German propaganda had much to say about this Russian menace and the necessity of forming a "buffer state" between the high kultur of Germany and the low barbarism prevailing in Russia. Since those early months of German propaganda the world has had to ponder the alternative between two sorts of barbarism and decide which kind it might prefer to be overrun by, the intelligent, submarine, poison gas sort, or the unintelligent, wild Cossack sort. And the world after a year and a half of contemplation and pretty thorough instruction, seems at present writing to prefer the more remote to the nearer barbarian. It may possibly not be compelled to accept either.

It is easy enough to understand why the Germans consider the Russians to be so obviously beneath them in civilization. For the two races represent cardinally opposed principles of life. Mr. Stephen Graham in his enticing book, "The Way of Martha and the Way of Mary," has pointed out this antagonism between the spirit of the west and that of the east by unmistakably vivid instances. His is one of the most moving books I have come across in months; it makes me long to see Russia and realize a little what that mysterious, obscure Slav force is like, as anything Russian of Tolstoi or Gogol or Dostoievsky always makes me curious about the spirit behind this vast nation.

Of course, a German with his tidy cities, his thriftily cultivated fields, his industrious and efficient bureaucracy, his excellent technical schools, and all the rest that go to make his boasted kultur, must despise Russian filth, poverty, ignorance and graft — also the atrociously inefficient Russian government and the primitive industrial conditions. Everything that the Russians seem to consider the only really vital human interests the Germans often speak of as "soft sentimentality."

What would you? If man is to be considered primarily as a successful economic machine and the end of his life the accomplishment of increasing wealth and luxury—of more telephones, telegraphs, fast trains, big shops, huge factories, semi-detached cottages, etc., etc., of course Russia lags woefully behind the western world in the race for the kingdom of heaven. Germany is in many respects —an I say this with no belittling intention—the supreme expression of human materialism, of the dominant creed of western Europe that man's first and last duty on this earth is to himself, his first obvious obligation being to make his abode healthier, pleasanter, richer, more luxurious.

The country that has achieved the most civilization is the one where the average of physical well being is the highest, and with this test the two modern states that are admittedly foremost in spreading the blessings of industrial science farthest and deepest are these United States and Germany, and I suppose every one would admit that Germany had employed her resources more intelligently than we have. Russia is perhaps the only great country left on the earth whose people seem to consider that man's first duty in this life is not to himself but to God, and that consequently it matters very little what he makes of himself industrially and materially provided his soul has entered into right relations with its maker.

I shall not try to say which I think to be the sounder view of human life and destiny. Sufficient for my present purpose to realize that two great peoples holding sincerely these two opposed views of human life must misunderstand each other forever and that the materially minded one must fear the other minded one because of the danger of loss of the things which the materially minded care for quite as much as life itself—that is, comfort and security. The one principle utterly excludes the other. If the western or German ideal should get the upperhand — either peacefully or through force, then inevitably the Russian ideal must change. Mr. Graham says that under German influence, especially with aid of favorable tariff arrangements, a considerable western European bourgeoisie or middle class has sprung up in Russia during the last decade, with our own ideals of comfort and progress.

If the German ideal represented by those manufacturers and traders were to prevail, Russia would see more factories, develop her rich mines, in (Robert Herrick in Chicago Tribune). short, become what we call "a modern, progressive state," which naturally Germany would very much like to have happen if she could obtain the position of guide, philosopher, and friend to "awakening Russia." Incidentally the enervation produced by material development would eliminate that peril of Russian barbarism.

What might happen if the Russian hordes should pour out over Germany would be harder to predict. They might become westernized and lose their racial faith more rapidly than the conquered peoples of western Europe could assimilate the Slav religious fatalism. Yet something surely of the Slav ideal would remain in the composite, and I for one believe that there is much need of certain Slavic elements in the thought that animates to-day industrial Europe and America.

For the Slav, as every one knows, is first and last a religious person, not the Czar's entourage, nor the army, nor the bureaucracy, nor the new middle classes—the elements that control the Government of the great Russian nation—but the people themselves, the numberless millions of moujiks, those "hordes" of which the Germans have such contempt and fear. Even the corrupted, westernized upper classes, with all the cynicism of our civilization, seem to have retained the religious instinct, the feeling that possibly this life of material accomplishment is not all. We speak of the Slav religious manifestations as superstition, medieval. We have little "use" for their ikons, their monasteries, their hermits and saints and coddled beggars. We seem to think they belong to an era in man's experience through which we "enlightened peoples" have passed and left behind in the gloom of the dark ages.

In leaving behind these simple religious symbols, have we not also abandoned the essential moving spirit as well? It is not that the Russian plasters his dwelling with ikons or still goes on pilgrimages that makes it into use "primitive"; it is because he is more concerned with the state of his soul than with his material comfort. We cannot imagine a sane, healthy human being who would abandon a good home, his position in the world, and wander over the roads in search of some inner satisfaction which should resolve the enigma of existence.

It is just because I have seen so much material progress around me, so many "improvements," so much industrial "development" and their accompanying selfishness and bestiality, that I for one am growing skeptical of the pretentions of our western ideal even when fulfilled by expert efficient Germans! "What profits it for a man to have all these and lose his soul?" comes to my lips as I look over our skyscrapers, hotels, railroads, millionaires, automobiles, express steamships, etc., etc. Has the inner spiritual life risen on the average one kilogram through the enormous increase in national wealth the last twenty years, both in Germany and the United States? Is it not really at a lower ebb in all vital manifestations than ever before—in art, in literature, in politics, especially in leadership? And is not that nation which has pressed the material method of winning the world farthest just the one that any merciful, benign God would forever exclude from his heaven? Have we done so much to exterminate human wretchedness, to raise the mental and spiritual life in the mass, that we can feel superior to the benighted Russian peasant, who seems chiefly concerned, when he is not drunk, with his God?

* * *

Russians have not developed telephones and telegraphs, railroads and automobiles, stock markets and trusts, and all the rest of what the ordinary man means by civilization. Their towns are said to be filthy; poverty abounds. Life is altogether on a low plane, judged by the standard of German smugness. With cities composed of large, grandiose buildings, with many churches and shrines, pilgrims and saints and ikons, endless talk over the samovar of unrealities, the Russian seems to belong to another, remote world, possibly to a fresher, sounder world that remembers the finite nature of the body. What profits a man to possess the world in the German and American sense if he has no personality, no soul fit to enjoy it or govern it?

Is there not something which both Germany and the United States have to learn from "the Russian hordes" and that to reckon the satisfactions of the body at a little less?

Close fitting turban, whose severity of crown and brim is set off by the introduction of parrot wings and a dashing velvet loop.

WATER METERS.

(Philadelphia Record)

The rapid introduction of water meters in Philadelphia has been of great benefit to the city, inasmuch as, by reducing consumption, it has delayed the day when expensive additions to the present system must be made, but this positive gain is no reason why the municipality should continue to furnish water to consumers using meters at less than cost. An ideal solution of the problem would be a much more general use of meters, which check waste, and the fixing of a price which would insure a fair return to the city for its very heavy expenditures in providing a water supply and purifying it. There has grown up in Philadelphia a foolish idea that water should be as free as air and that everyone should be at liberty to use it most profligately and extravagantly, while paying a minimum price for it. This is all wrong. The city's water is an expensive product and should not be sold for less than cost. The Finance Committee is on the right track in trying to close this very serious leak in municipal finances.

DIFFERENT.

(Judge)

"We lost England and France simultaneously and never felt it," proudly declared the man with the wilting collar.

"Could you stake me to $1 till tomorrow, Bill?" asked his acquaintance.

"Me? Great Scott! If I had $1 more than I need I'd have it framed and hang it up where I could look at it and see what money looks like."

How Britain Keeps Watch On Her Foes

(By Lewis R. Freeman in Land and Water.)

All who have read "Kim" will remember Mr. Kipling's description of the Great Game. Persons unacquainted with India sometimes deem it mere fiction, but this account from the pen of an American journalist will show how the Great Game was played in Mesopotamia only three years ago.

I had noted on several occasions the surprising amount of detailed information concerning Arabia and the Lower Tigro-Euphrates Valley displayed by certain Anglo-Indian military officers whom I encountered at Peshawar, Quetta and other points along the North-Western Border during my visit of 1911-12, but no adequate explanation of how they came to be so informed was vouchsafed me till my friend, Captain Landers (I will call him by that name because it carries no suggestion of his real one) succumbed to the influence of the seductive atmosphere that broods on spring nights over the storied "Iran's Sea," lifted the mask of his reserve and took me into his confidence for one memorable and magic half hour.

I had played through a Bengal tennis tournament with Landers, followed the cheetah and shot panther with him in Jammu, and circled in his company the big bend of the Upper Indus; but never until the night that our old British India Coaster lay off the Shat-el-Arab bar waiting for the turn of the tide to run up to Basra, did I hear him speak of the things that were really next his heart. A lounging chair, a pipe, and a tropical sea are conducive to confidences the world over, and the combination is never so compelling as on the deck of a Persian Gulf mail packet, with a crisp slice of new moon swinging behind the date palms, the waves lip-lapping under the stern, the whine of Arab pipes welling up from the waist, and the half-guessed odors of goats, camels, musk and rugs mingling in the milk-warm off-shore breeze. At any rate, Landers yielded to the influence, and I, as a consequence, was granted transient vision of the outer strands of the provisionary web Britain was weaving beyond the marches of India against the menace to come.

LIKE AN ARAB.

"For the best part of the last five years," he began suddenly after a long spell of silence, "I have been coming to Arabia and Mesopotamia on 'language study.' In all that time I have not been back to England, and I am almost a stranger to the officers of my own regiment. My speech and mental processes are already more those of the Arab than the white man, and, what with sunlight and dirt that have gone so deep under my epidermis that they will never come out, I shall shortly have the appearance of an Arab. Perhaps in time—you'd never believe the appeal of the Koran till you've bowed toward Mecca, with a Bedouin on either side of you, morning and evening for six months at a stretch—I shall pray like an Arab. I have had smallpox, dysentery—which has become practically chronic—and a dozen varieties of skin disease, and I'm mottled from head to foot with 'Aleppo Button' scars, two of which have never healed. I've been alone so much that I talk to myself even in Calcutta and Simla. The Persians in this region distrust me; the Russians and Germans hate me, and the Turks are perfectly frank in saying that they will send me on 'the long pilgrimage' if ever a fair chance offers.

"All that my government does is to allow my pay to go on and provide me with a passport that will land me at Koweit, Basra, or Bagdad. If I get into trouble they will not—cannot, in fact—do as much for me as they would for a spindle-legged Hindu coolie. And all this on the chance that sometime before I am retired for old age or invalided home, the Russian Bear nosing after warm water, or the Prussian Eagle scratching after 'places in the sun,' may take it into their heads to wander this way. In either of these contingencies, of course, there is no denying the fact that I shall be very much in demand, especially if operations are carried on in my own 'sphere,' that of north-eastern Arabia, and lower Mesopotamia up to about a line drawn from Bagdad to Hitt.

"Afoot or by horse or camel, I have traversed almost every square mile of this region. There is not a bazaar from Kerbela to Koweit in which, disguised, I cannot mingle unsuspected in the throng, or, in case of need, call upon friends who will do anything from giving me a cigarette or a handful of dates to risking their lives to save my own.

BLOOD BROTHERHOOD.

"I also know everyone of the greater, as well as most of the lesser, Bedouin sheikhs, whose peoples roam the deserts between Basra and Damascus; and with one of the most powerful of these—his camels and goats are numbered in hundreds of thousands—I have gone through the 'blood brotherhood' ceremony. The blood of our arms has actually mingled, and each is pledged to stop at no act to serve the other. My friends, I need hardly say, are all Arabs, Chaldeans, Syrians, Armenians, Jews, or people of one of the other subject races of this region; to the Turk, courteous as he is to me socially in Bagdad and Basra, my name is anathema.

"A week hence, for instance, I shall exchange Oriental amenities with the Vali of Bagdad in his garden on the bank of the Tigris. He will toast me in scented coffee and drink to the success of my visit; and all the while a double guard of 'zaptiehs' or mounted police will be watching the gates to prevent my getting away to the desert and my Arab friends. Personally, I know it would pain him immensely if I were to be shot in the dark for—let us say—refusing to answer a sentry's challenge; but officially he is dead keen that something of the kind may eventuate, and there is no doubt that it would do him a lot of good in Stamboul, where he is not in very high favor at present.

"The whole thing, when all is said and done, resolved itself down to about this: If a war involving operations in this 'sphere' comes within the next twenty years, I—and several other chaps who are doing the same sort of work—provided I do not lose my life, or my health, or the best of my faculties in the interim, will probably break all records outside of a Central American revolution for quick promotion. I might easily be a brigadier-General at forty, with ten or a dozen letters after my name. But if, as is overwhelmingly likely, there is no war, I shall probably continue these little jaunts into the desert until my health gives out, when, at best, I shall be invalided home on the half pay of a captain or major. At the worst—well, since some of the best (yes, and the happiest, too) years of my life will have been spent out here, I should probably sleep better under six feet of desert soil than in the family vault.

"So you see," Landers concluded, with a whimsical smile, "my future depends entirely upon whether or not some of our neighbors, or would-be neighbors, see fit to start something in this little neck of Central Asia within the next decade or two. And now that we are in the entente with Russia, and acting entirely in concert with her in Persia, I'm very much afraid that it's going to be a case of the 'hope deferred making the heart sick.'"

IN BAGDAD.

The following day we caught the river steamer at Basra, and four days later arrived at Bagdad, Landers putting up at the grim brown fort which housed the British Consulate, post office and telegraph station. I saw him on and off for a week, usually at tiffins or dinners given for him by some of his British friends. At other times he was not to be found. "Landers Sahib gone to bazaar," his Pathan bearer invariably answered my enquiries; and Landers himself volunteered no more than that he was spending a good deal of time "renewing old acquaintances." Then, at the end of about ten days, without a good-bye to anybody, so far as I could learn, he dropped from sight.

"Landers is off again to his Arabs," said his friends, but all, knowing that the Turks had been watching him like cats, were more or less worried until the Vali, with a wry smile, admitted to the British Consul one day that "the bird had slipped through his nets."

"I am much relieved," the Consul admitted to me that afternoon. "They hung on him like leeches this time, but Landers finally got away by togging up as an Armenian stagecoach [illegible] him as an Arab. The [illegible] came to a native house which Landers had taken, went inside for a few minutes, presently to reappear, climb into his arabanah (stagecoach) and drive off with a load of passengers to Kerbela. In reality this was Landers, who had stained his face and put on the Armenian's clothes. The Turks nabbed the latter when he finally ventured out to the street, but got little out of him, and I don't think they know yet exactly what happened.

"Landers is undoubtedly far in the desert by this time, and the Turks know the futility of going after him among the Bedouins. We shall probably not hear of him again for six or eight months. Either he will come back, or he will not come back; and if he does come, [illegible] go to Indian Army [illegible] Simla, not to me. Captain [illegible], who is working in the same 'sphere' as Landers—and whom you may have heard of as having been awarded high honors by the Royal Geographical Society for the most important work of the year in exploration—was in North Central Arabia for something like eight or ten months without a word coming out from him. When he finally did slip into Bagdad, he was so burned and dirty, and his English was so halting from long disuse, that the Sikh sentry at the gate of the Consular compound would not pass him in. Landers himself, in fact, returned from his last jaunt in such a condition that he refused to approach within ten yards of any of us until he had had a bath.

"It's a queer game, isn't it? And all against a contingency which may never materialize—at least not for years."

GERMAN ACTIVITIES.

This happened in 1912, and at that time no one that I met—least of all Landers, who had the most to gain by such an event—appeared to dream that the blood-drenched plains of ancient Babylonia and Assyria were likely to echo for many years to the tramp of hostile armies. The broad scope of Germany's activities extending far beyond the mere construction of the Bagdad Railway, was evident to everyone; that the Germans had ambitious plans for controlling the incalculably rich Tigro-Euphrates Valley no one doubted, but that German influence should prevail over that of Great Britain and Russia, in Constantinople appeared not to be dreamed of in Mesopotamia, even by the Turks themselves.

The page or two which I have been able to give from my friend Landers' life is probably as far as it would be proper to go at this time in discussing certain of the ways in which knowledge of the country and its peoples have been gained.

MAKING IT FIT.

(London Opinion)

"Did you hear about the defacement of Mr. Skinner's tombstone?" asked Brown a few days after the funeral of that eminent captain of industry.

"No, what was it?" inquired his fellow-citizen.

"Someone added the word 'friend' [illegible] the epitaph."

"What was the epitaph?"

"He did his best."

WHEN A JOKE IS NO CHESTNUT.

(Judge)

"It has been a long time," said a charming young lady, gazing at the array of marrons glaces in the confectioner's window, "since I've heard anyone call a joke a "chestnut.""

"Is that so?" bitterly asks the young man at her side. "Well, if you had to sell enough jokes to buy a chestnut, you'd understand that."

"Now, to illustrate the roundness of the earth," said Columbus, "I will show you an egg." "That doesn't convince me," replied the court astronomer. "If you had waited till the egg became an omelet, it would prove that the earth is flat."—Washington Star.

FARM AND GARDEN

CORN FEED TESTS.

Some years ago the Maryland Agricultural Experiment Station made tests in feeds for cows which are valuable to dairymen.

In a test of alfalfa and cornmeal vs. corn silage and mixed grains two balanced rations were compared—the one made up of alfalfa and cornmeal (seven pounds), home grown; the other of home-grown corn silage supplemented with purchased malt sprouts (three pounds), linseed meal, gluten meal and corn chop (each one pound.) Fifteen cows were fed in two nearly equal lots, and the lots alternated after a month's feeding. In two months the cows on alfalfa produced 7248.3 pounds of milk; those on silage 6972.1, a gain of 276 pounds for the alfalfa.

Alfalfa and Silage Without Grain—Three cows were used in this test, as the alfalfa hay was running short. They were given cut alfalfa and silage mixed in about the proportion to give one feed per day of alfalfa and one of silage. After receiving this for 15 days they again received the silage and mixed grain rations for a like period. Each cow gave less milk without the grain, the total difference in yield for the three cows for 15 days being 70 pounds. Since these two rations were approximately equal in digestible material, and were eaten readily by the animals, it indicates that the digestible portions of different feeds cannot be depended on to produce the same results, even though it is commonly considered that a pound of digestible protein has equal value, no matter what its source. At least these results would seem to show that the protein from alfalfa hay could not be utilized to the same extent in making milk as that from grain.

Rye vs. Wheat Pasture—Wheat proved the better green feed to the extent of one pound of milk daily per cow, even when fed after the rye to animals that were normally shrinking in flow.

Soiling vs. Pasture—Ten cows were used in this experiment; five on pasture with no other food than what they could obtain in the fields between 7 in the morning and 4 in the afternoon, and five fed green corn forage in the barn. In preliminary feeding on identical rations, the cows later pastured were found to give 5 pounds more of milk per head daily; but on pasture they gave 1.3 pounds more per head daily for 35 days, and one of these cows ate 15 pounds less of grain.

Dry Feed vs. Pasture—The milk yield of seven cows during April on [illegible] corn silage and with grain was compared with the yield of the same cows during May on upland pasture. On pasture they ate only three pounds of grain per head daily, while before turning out they had eaten from eight to twelve pounds; yet there was an average daily gain of pasture of 4.7 pounds of milk per head.

POULTRY NOTES.

States that ignore the poultry industry show short-sightedness. The returns from poultry are among the sure things on the farm, not depending on the weather. Rain or sunshine, the poultry grows, and even when neglected pays for its keep, and if given proper care is always a money-maker.

Vigor in the flock is the first essential to [illegible] yields is good, but not at the expense of the future [illegible] of the fowls. A few less eggs and a better hatching and chick record will go a great way in making a better success.

That single-comb Buff Orpingtons are coming into popular favor can be seen in the numbers that are entered for competition not only at the large poultry shows, but many of the smaller ones.

Charcoal is a good thing in the hen ration. While many flocks have been good producers in the way of egg yields, and have kept in good health without its use, nevertheless flocks will be benefited by its use in the ration. The mere fact that the fowls will consume a large quantity when it is placed before them is an indication that it has its use in the poultry flock. The same can be said regarding grit and oyster shell.

After the high record in hens have been accomplished to a satisfactory standpoint then will come the selection of a uniform egg in color and size, as well as weight per dozen. At present there are too many hens that, while they are good producers, lay small and ill-shaped eggs.

FARM NEWS AND VIEWS

The bacteria falling into milk from the air of the stable have long been considered important factors in producing high counts. Investigations made in the stable of the New York Experiment Station, and in several neighboring stables, indicate that under all ordinary conditions the number of germs so entering the milk is negligible. By tests made under an "artificial cow," by which milking conditions could be reproduced without other disturbing factors, it was found that when the number of bacteria in a liter of stable air were 10,000 or less, the numbers getting into the liquid "milked" were so small that their addition to milk of any except the very highest grade could have been detected only by the most careful method of bacterial analysis. In the station stable, under any allowable condition of feeding or grooming the cows, the number of bacteria in a liter of stable air was only one-fortieth of the 10,000 per liter, so the number falling into the milk from this source could not have been detected in the milk. In the other stables where conditions were less favorable than at the station, and in some instances very bad, the number of bacteria in the air exceeded 10,000 [illegible] once. In all the tests, and [illegible] whole [illegible] in only five tests. They clearly [illegible] of tests proved "very milk [illegible] the number falling into [illegible] milking or during [illegible] exposure in the stable, under conditions allowable in any respectable dairy, is so small as to be negligible.

For Iron Rust on Napkins.

Moisten the spots with soft water, rub cream of tartar and then salt on both sides and place in the sun to dry.

"This is a dilution and a snare," remarked Guzzler, when he discovered that someone had been watering his whiskey.

Ottawa Girl's Message of Hope

TELLS TIRED WOMEN OF DODD'S KIDNEY PILLS.

Miss Logan Tells How They Relieved Her of Pains and Aches as Many Run-down Women Know.

Ottawa, Ont., Feb., 21.—(Special.)—"I am glad to say I have found Dodd's Kidney Pills have done me a wonderful lot of good." So says Miss Gladys E. M. Logan, of 261 Queen street, this city.

"I suffered from drowsiness and sharp pains across my back. My sleep was broken and unrefreshing. I had headaches and was subject to neuralgia and rheumatism. I was depressed and low-spirited and troubled with palpitation of the heart.

"I was always tired and nervous and very sensitive and there were hollows under my eyes.

"For two years I was in this worn-out condition, often having to lay off for a day or two. I was attended by doctors and wasted money on useless medicines, but I only found relief when I used Dodd's Kidney Pills."

Miss Logan's statement is a message of hope to thousands of women in Canada. They are suffering just as she suffered. She wants them to know they can find relief in Dodd's Kidney Pills.

REMEDY FOR MIGRAINE.

More Common in Women Than in Men.

Everyone is familiar with this distressing condition. It is frequently hereditary, and it is more common in women than men. It usually develops in early life. Anaemia, gastric disturbances, gout, eye-strain, pelvic disorders, overwork and prolonged excitement predispose to it. The symptoms are easily recognized. The attack is often preceded by malaise, restlessness and perverted vision. A sufferer will frequently say, "Oh, I am blind with a headache!" and she is in reality unable to see clearly. The pain is sharp and stabbing, and is frequently in forehead and temple of side. The patient is very sensitive to light and sound and usually confines herself to a darkened room. In some cases there is nausea and vomiting. The face is pale and the pupil of the eyes large and in other cases the face is flushed and the pupils appear small. The duration of the attacks vary from a few hours to several days. In the intervals, which are often of definite duration, the patient will be quite well.

A perfect cure is rare, but the severity and frequency of the seizures may be considerably lessened by treatment. In the interval the treatment is that of neuralgia, and this should be given by a physician.

During an attack the patient should be kept at rest in a quiet, darkened, well-ventilated room. She should undress and be kept warm in bed by hot water bottles at her feet and at her head. Small hotwater bottles are sold in the shops, which are of a size to easily hold against the forehead. If nausea is not relieved by vomiting, drink six tumblerfuls of water (preferably warm) rapidly one after the other—this procedure will quickly dislodge any offending substance in the stomach and bring it away, and the pain generally subsides instantly, and the patient falls asleep at once. If there is or has been any constipation a bottle of citrate of magnesia should be taken while preparing to get in bed. Tablets to relieve the pain are seldom necessary if one has vomited freely and taken a laxative. The rest in bed with the external applications of warmth and the cleansing of the digestive canal are always a perfectly safe and in nearly all instances a satisfactory remedy for migraine.

CHILD TEMPER.

Great Care is Needed in Restraining Stormy Dispositions.

Temper storms seem to be frequent among the nursery folk. One little boy of about two and a half years of age, with his screams and stamping and flinging himself on the ground, drew the attention of a whole street in pity for his mother. She could do nothing with him, so left him and went on with the other children. At a cry from the bystanders she turned, to see the boy, temporarily demented, rush off the pavement into the street. Fortunately, he was rescued in time; but what a life in that home and what a future for that boy!

The incident brought to mind the urgency for a better understanding of the causes and treatment of the young child's furious temper.

It is often forgotten that neither the reasoning powers nor self-control are strong enough to restrain a child's aggressive energy. The habit of restraint over the primitive propensities has not yet been set up. Consequently, injudicious meat diet, nervous excitement, want of fresh air, or the company of irritable, quarrelsome people foster a mental condition liable to be set ablaze by some slight cause. The will, which can be quite strong even in a baby, is roused to exertion, and then the storm bursts and continues usually until the boy is exhausted.

Apart from the physical aspect of temper and its treatment, there are other methods to be followed. Prevention of an outburst is easier than its stoppage.

The mother or nurse should watch for the immediate cause of these storms and in future should avoid them whenever possible by distracting the attention in time, or so manoeuvring that the conditions are changed. Every outburst avoided is a gain to the child. It is essential in dealing with a passionate child that his whole character and propensities should be understood, so that all that is possible can be done to help him. With control established and energy directed to useful purposes the boy stands a far better chance of developing into a man of strong character than another child of uniformly calm temperament.

Puffiness Under Eyes.

For removing the puffiness under the eyes make a solution by mixing 20 grains of tannic acid with one ounce of glycerine. Paint the skin beneath the lower lid with this, using a fine camel's hair brush, and gently massage there, the movement of the stroke to be from the nose to the outer corner of the eye.

THE LIMIT.

(Life.)

"He's a terrible failure as a dog, isn't he?"

"The limit. I call him Dardy—that's short for Dardanelles."

THE POULTRY WORLD

THE INCUBATOR'S WORK.

Local conditions play a part, especially in regard to moisture—a problem far from being solved. Hatches are always better in the so-called natural hatching season for several reasons. First, the eggs are more fertile and stronger. Second, more moisture is in the air and the conditions better for hatching. With those who steady incubation this is largely overcome by the use in some cases of moisture in the cellar; by applying water under the machines, and in other cases the use of moisture in the machine by using the sand tray—a tray placed under or above the egg tray, filled in part with sand, which is saturated with water and kept in this condition throughout a greater part of the day with good results.

There are two kinds of incubators, both good hatchers, the non-moisture and the so-called moisture; also the hot air and hot water machine. In the past many were led to believe that the hot water machine was better because of the moisture, but this is not the fact. No more moisture comes from the hot water machine than from one in which the heat is obtained from hot air. The only advantage, if any, the hot water incubator has over the hot air, is that in case the lamp which supplies the heat goes out, the hot water incubator would be longer in cooling off. In the large incubators hot water is the only system used, but in the smaller machines the majority of well-known incubators are hot air.

The main essential in successful hatching is the placing of the machine in a cellar, or room that does not undergo great temperature changes, and where moisture can be in a measure retained. The cellar or room should have proper ventilation, without draughts. A well ventilated cellar is the best place, although many good hatches have been made in the rooms above the ground. The second point to consider is in having a uniform temperature for the 21 days. In almost all machines the directions call for 103 degrees for the 21 days and this will produce a good hatch. Temperature should be maintained very evenly, especially the first 10 days. Very low or very high temperatures if kept up for a short time, may not kill the hatch, but will weaken the chicks to some degree. The strongest hatches result from the machine that has been kept at a uniform temperature the 21 days.

Cooling of the eggs should commence at the fifth day and gradually increase as the hatch proceeds. In this cooling the length of time depends largely on the cellar temperature and the time of the year. But cooling in a safe and sane manner has been found beneficial. The moisture problem also depends largely on the cellar or room conditions, and to a certain degree the make of the machine, although there is no question that moisture in some form is essential during certain times of the year during dry periods, such as is found at times in March, when the ground is frozen and high, dry winds the rule. These conditions must be taken in consideration local conditions. One must exercise his own judgment at times. Incubators and the rules given are for general conditions, and those operating machines near the coast, or where the land is low, have more moisture than those who operate machines at a higher level. A dry room is harder to obtain results than a well ventilated cellar.

Many machines are blamed for the poor results obtained, when the real cause was either the operator or the quality of the eggs placed in the machines. No machine can produce good results with eggs that are not strongly fertile. They may have the otherwise strong germs lowered in hatching qualities by keeping them in a room too warm, or too cold. Hatching eggs should be handled with a degree of carefulness.

MAGIC BAKING POWDER
MADE IN CANADA
Magic Baking Powder costs no more than the ordinary kinds. For economy, buy the one pound tins.
E.W.GILLETT COMPANY LIMITED
WINNIPEG TORONTO ONT. MONTREAL

ALL DEPENDS ON THE STOCK.

The time will soon be here when the beginner in poultry will read much in regard to incubating, brooding and care of young chicks, all of which have their place, but before this, for the best success, must come the very foundation of success—the breeding stock. The beginner must know something about incubation. Directions come with each machine which will aid him. Poultry experts will inform him through the press of the finer points in incubation. The same can be said regarding the care of the brooder and the rearing of chicks, all of which have a proper place; but with all this knowledge success cannot be obtained in the fullest measure if the eggs placed in the incubator do not come from good breeding stock. The same can be said of the day-old chicks that may have been purchased.

Many failures can be laid to the breeding stock. Many times the beginner blames the incubator, then the brooder, perhaps the feed, when the fault was with the fowls that produced the eggs. True, in many cases, the incubator could be at fault. Brooders, too can go wrong. Feeds sometimes are faulty. At times the poultry keeper himself is to blame. Too many poultry keepers, especially those still going through the first few years of poultry rearing, do not pay enough attention to the breeding pen. This does not mean pampering the fowls, or every-minute attention, but takes in several essentials that are good to follow if best results are to be expected. First, too many late hatched or not fully matured birds are seen in breeding pens, many times because they have been awarded a prize at some poultry show, and it should be remembered that while the fowl was a fine specimen, and worthy of a prize at a leading exhibit, it is not always advisable that it should be placed in the breeding pen.

Best results (laying results, not alone from a show standpoint) are from fully-matured fowls, properly grown without forcing, that are standard weight and have been hatched early in the spring. Development has been gradual, and a strong frame has been secured. Better still is the yearling hen (in a majority of cases) that has been fully tested as to its merits both in egg production and standard qualifications. This cannot be obtained in the late-hatched pullet, as its laying powers are undeveloped and winter is well on before the first eggs are produced.

Males to head breeding pens should be standard weight and standard looking, shape is the first consideration; also full of vigor and, like the females, well matured.

NOTES.

Look carefully after the breeding stock now. Soon fertile eggs will be wanted and unless the breeders are in good shape fertility will not be up to the desired mark. Freedom from lice, matured fowls, quartered in good poultry buildings, with a balanced ration that does not contain too much corn will give results.

Keep in mind that the early-hatched chicks make the future winter layers. More than that, they as a rule make the best breeders. Every poultry keeper should aim to have at least a few early chicks.

By this time one can make a fairly good guess about the cockerels. Cull out the poorest and sell them as soon as possible. The male to head breeding pen should be as good as can possibly be secured.

Purchase as good a foundation stock as you can afford. The best at any time is none too good. Stock of known merit purchased from breeders with a real reputation will always give results.

Weed out the drones. Every flock has a number of "star boarders" that the rest of the flock must maintain. A few good hens is a paying proposition. A lot of the ordinary kind is a loss. There are too many poor flocks in the country now that are producing from 50 to 80 eggs per year. They can be found on many farms, and some poultry plants.

Incubators and brooders should be purchased now, so that when the time comes for hatching everything will be ready for a good start. Do not wait for the rush comes every spring, when many beginners are sending in their orders having waited until the last moment, and then complain if the order is not filled in a lightning-like manner. Avoid any delay by obtaining the poultry equipment some time before wishing to use it.

Barred Plymouth Rocks have lost none of their popularity and still hold the lead, taking the whole country in consideration, and from indications they are not soon to lose any favor. To-day they are better than ever, and with the leading breeders still working for future progress there is no danger that they will not remain in popular favor.

A SOUTH SEA LEGEND.

One of the most picturesque legends connected with the solar beams is that told in the islands of the South Pacific, where sunbeams are known as "the ropes of Maui." It is related that in former times the sun god, Ra, was not so regular in his habits as he is to-day. In fact, he caused the South Sea islanders much annoyance by setting in the morning, or at noon, or at other inopportune times, just when his light was needed for the daily tasks of mankind.

The great hero Maui undertook to cure him of these erratic habits, and the first step was to make the sun god prisoner. This was accomplished by laying a series of six snares, made of strong cocoanut fibre, along the sun's path in the sky. When the deity next rose from Avaiki, or the land of ghosts, the first noose encircled him, but slipped down and only caught his feet; the second slipped, too, but caught the sun god's knees; the third caught around his hips.

Still Ra pressed on, scarcely hampered by these contrivances. The fourth noose tightened around his waist, the fifth under his arms, and finally the sixth and last caught him around the neck and almost strangled him. Then the sun god confessed himself vanquished and, in fear of his life, promised Maui that he would in future adjust his daily journeys more in accordance with the comfort and convenience of mortal men.

Ra was then allowed to proceed on his way, but Maui prudently declined to take off the ropes, which may still be seen hanging from the sun at dawn, and when he descends into the ocean at night. Hence the islanders say, when they behold the beams radiating from the sun, "Toua te Taura o Maui"—See the ropes of Maui.—Philadelphia Enquirer.

How to Tell Fresh Eggs.

If an egg is "strictly fresh" it will, when placed in a pan of water, lie on its side on the bottom. If stale it will stand on end, and if very old will rise to the surface. When just a few days old the egg will begin to tilt a trifle, and as it ages more and more the angle at which it tilts will increase.

OPERATIONS for APPENDICITIS
And How They Can be Avoided

Operation Ordered

For Appendicitis—Used Dr. Chase's Kidney-Liver Pills and Was Completely Cured.

Mrs. J. A. Ballantyne, Sturgeon Falls, Ont., writes: "My husband was treated for appendicitis and the doctors ordered an operation. But he would not consent to an operation and began the use of Dr. Chase's Kidney-Liver Pills. Since doing so he has had no need of an operation or even of a doctor, as the trouble has completely left him. I cannot find words to speak our gratitude for his cure. Dr. Chase's Medicines have proven of wonderful benefit in our home, as the Ointment cured my little girl of a severe burn, when nothing else would bring relief."

Dr. David H. Reeder writes as follows of appendicitis:—"In considering the treatment of any condition of sickness it has always been my rule to first find the cause. To my mind, it's the only logical way. Many people seem to think that if they have had an operation for appendicitis they are forever immune, and need have no further fear along that line, but I say emphatically, and I think you will agree I am right, that after an attack of appendicitis, even though you have been successfully operated upon and the appendix removed, your troubles have only just begun unless you remove the cause. What was the cause of the appendicitis?

"The thoughtless will say inflammation in the appendix. No, inflammation in the appendix is appendicitis, but what caused the inflammation? Constipation, yes, that is the prime cause. If you were never constipated you would forever be safe. Appendicitis is only one of the results of the retention of fecal matter in the colon for too long a period."

There is no longer any question that the real cause of appendicitis is constipation. By keeping the bowels regular you not only prevent appendicitis, but also a host of other ills, some of which are even more dangerous than appendicitis. Dr. Chase's Kidney-Liver Pills are recommended to you in this connection, not as a mere relief by effecting the movement of the bowels, but rather as a positive cure for constipation. As is well known, the bile secreted by the healthful action of the liver is Nature's cathartic. So long as the bile flows freely into the intestines there is no constipation of the bowels and no clogging of the excretory organs. Hence the wisdom of using Dr. Chase's Kidney-Liver Pills to ensure regular working of the liver, kidneys and bowels. You thereby save yourself much inconvenience from the minor ills of life, and ensure against such fatal diseases as appendicitis and peritonitis.

Dr. A. W. Chase's Kidney-Liver Pills

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free, if you mention this paper.

The Housekeeper

Whiting and ammounia, mixed, makes a good silver cleaner. Polish with dry, soft cloth.

Vinegar and honey mixed in equal parts will relieve a cough and clear the throat.

By using whiting on a cloth, and a very little turpentine in tepid water, white paint can be made to look like new.

A low stool with a broad seat, most convenient for drying the feet for putting on shoes or stockings or pedicuring, is given a touch by one housekeeper that makes it effective and sanitary. The cushion is covered with a neatly fitted slip, with square top and sides made of thick white.

Slightly soiled ribbons if well powdered with French chalk or magnesia and held over the heat from stove for a few minutes will quickly shed any grease or soil. They should be carefully pressed after the powder and soil have been brushed off.

For the women who does her own housework a bottle of lemon juice and glycerine should always be kept in the kitchen. After doing any harsh work rub a little of this well into the hands.

To remove varnish stains from cloth, soak with alcohol, and rub with a firm, white cloth, free from lint.

Try serving orange fritters with ham; it is a delicious accompaniment.

Food for latecomers can be kept hot by covering it tightly and placing it in a pan of hot water.

To remove tar from the hands use the outside of fresh orange or lemon peel and wipe dry immediately. The volatile oil in the skins dissolves the tar, so that it can be wiped off.

If a lemon is warmed before using you will get more juice out of it.

To treat frostbites, rub the affected parts with pure oil of peppermint. This will also prevent the after-effects of chilblains. Only the pure oil, not the essence of peppermint, should be used.

A FRIGHTFUL DEATH SUFFOCATED IN ASTHMA ATTACK

Every sufferer from asthma knows the terror, the abject fear that overcomes them when struggling for breath. The old fashioned remedy may relieve, but never cure. Best results come from Catarrhozone, which cures Asthma after hope is abandoned. It's because Catarrhozone kills the asthma germ that it cures. Choking spells and labored breathing are relieved, suffocating sensations and loss of breath are cured. Every trace of asthma is driven from the system, and even old chronics experience immediate relief and lasting cure. Equally good for bronchitis, throat trouble and catarrh. The large $1.00 outfit includes the inhaler and lasts two months. Sold by all dealers or from the Catarrhozone Co., Kingston, Canada.

WALKING.

It is the Best Exercise, as Well as the Most Economical.

After all, there is probably only one form of exercise that is suitable for all ages and is at all times available, and that is to be taken in the open air—the exercise which is probably the most ideal—walking.

The Grecian women and Grecian men have given us an excellent illustration of the value of this kind of exercise. We are justified, therefore, in concluding that walking is probably the best all-round exercise; and it should be indulged in by every person, if not engaged in physical labor, to the extent of at least five miles a day.

As someone has wisely said, "Probably the best medicine you could take is two miles of oxygen three times a day. This is not only the best, but the cheapest and the most palatable. It suits all ages and constitutions. It is patented by infinite wisdom and sealed with a signet divine. It cures cold feet, hot heads, pale faces, feeble lungs and bad tempers. If two or three take it together it has still a more striking effect. It has often been known to reconcile enemies, settle matrimonial quarrels and bring reluctant parties to a state of double blessedness. This medicine never fails. Spurious forms are sometimes found in large cities, but get out into the country among the green fields or on the mountain tops, and you have it in perfection, as dispensed in the "great laboratory of nature."

Benjamin Franklin, who was a wise philosopher as well as an eminent statesman, believed that one hour walking was worth four hours horseback riding, and more than equal to lolling in a carriage all day. He was loathe even to compare the latter as a form of exercise, and doubtless would have been equally uncharitable towards auto-riding. In the summer there is no better form of exercise than rowing, which has the beneficial results similar to walking.

It is interesting to note the stress that is being placed by administrators of public health on the value and importance of physical exercise. The organization for the promotion of life extension in New York City has repeatedly drawn attention to this, as has also the United States Public Health Service at Washington, especially in a pamphlet recently issued through that Department prepared by Dr. F. C. Smith, Past Assistant Surgeon.

The money that you will save in street car tickets by walking will return to you enormous dividends in better health and in that which goes to make life more worth while.

Girls Must Carry Books On Back.

The schoolgirl of Berlin must not carry her books in a handbag, but in a knapsack on her back. The Minister of Education is responsible for this new rule. The rule is directed to teachers, parents and the girls themselves. The Minister declares that the habit of carrying books in hand bags is likely to lead to curvature of the spine and derangement of internal organs.

"How," asked the captain of the train robbers, "did you manage to go through so many passengers alone?" "I had only," rejoined the ordinary brigand, "to carry a whisk broom in my hand and they suspected nothing."—Puck.

THE ACUTE PAIN FROM NEURALGIA

Permanently Cured Through the Use of Dr. Williams' Pink Pills.

A clever medical writer has said that "Neuralgia is a cry from the nerves for better blood." In other words, neuralgia is not a disease—it is only a symptom, but a very painful one. Neuralgia is the surest sign that your blood is weak, watery and impure, and that your nerves are literally starving. Bad blood is the one cause—rich, red blood the only cure. This gives you the real reason why Dr. Williams' Pink Pills cure neuralgia. They are the only medicine that contains in correct proportions the elements needed to make rich, red blood. This new, rich blood reaches the root of the trouble, soothes the jangled nerves, drives away the nagging, stabbing pain, and braces up your health in other ways as well. In proof of these statements, Mrs. A. T. Oulton, Little Shemogue, N. B., says: "A few years ago my mother was an intense sufferer from neuralgia, which was located in her face, head and shoulders. The pain, especially in her head, was intense. She doctored for some time without getting relief, and there seemed to be no ceasing of the pain whatever. Instead it seemed to be extending, and her whole nervous system became affected. Finally she decided to try Dr. Williams' Pink Pills. After taking them for a while the pain in her head became less severe, and of course this was a great relief to her. Under the continued use of the Pills she felt herself growing better and stronger each day, until she was no longer a sufferer, and was completely cured, and as felt no symptoms of the trouble since."

You can get Dr. Williams' Pink Pills from any medicine dealer, or by mail, post paid, at 50 cents a box, or six boxes for $2.50, from The Dr. Williams Medicine Co., Brockville, Ont.

ART OF BATHING.

To Get the Right Idea Just Inquire of Any Healthy Boy.

The art of bathing has never been fully understood. It ought to be put on its feet. Some people feel that in order to bathe it is necessary to call in the services of a physician. Others bathe at the slightest provocation—on railroad trains and when they are visiting a family of ten with only one bathroom. Such people would call for a bath anywhere—on a trolley car, on an excusion steamboat or when crossing the desert of Sahara.

Between these two extremes, the bathers and the non-bathers, there lies a vast gulf. If these people could only be brought together — by arbitration possibly—what a benefit to society!

Boys are the only ones who have the right idea. No real boy likes to take a bath or to be presented with one on a marble slab. Any healthy boy will sink to any necessary moral level to avoid this. But any boy will go in swimming. In short, if there be about the bath the spirit of adventure, then the boy—whose instincts are natural—will seize the bait. Swimming in April, with the water somewhat above zero, it is a joy for him which would be properly resented in a bathroom. If we must bathe indoors therefore the boys ought to be in charge of the proceedings. And if they were all the mean, contemptible bathtubs would be abolished and every house would have a swimming pool. Everybody has a motor car. Why not a swimming pool?

THE STRAIN ON OUR EYES.

Modern Conditions, Not Poorer Vision, Necessitate Glasses.

The question, "Are our eyes weaker?" is frequently asked by people who observe closely and who are dismayed by the remarkably large number of persons who wear glasses to-day as compared with a generation or so ago. Our eyes are not degenerating. The eyes of the present generation are in no wise poorer, weaker or inferior to those of our ancestors, notwithstanding the fact that a far greater percentage wear glasses than formerly.

The probabilities are that the eyes of the human race are neither weaker nor stronger to-day than were those of our forefathers, unless it can be proved that the whole physique of the race to-day is weaker or stronger. As is the whole physical body, so are the eyes.

But much more is required of our eyes now than was ever required of our ancestors. The strenuous struggle for existence to-day, the ever increasing complexity of our modern civilized life, the multiplying knowledge of the world in all lines of human endeavor, knowledge that must be mastered if we would hope to achieve success, put far greater strain on the eyes of this generation than on those that have gone before.

Our schools are far more exacting and severe, the business and scientific world require closer application and more painstaking care than ever before. Electricity has turned night into day, and much more work is now done by artificial illumination than in the past. Sharp competition in every line makes it necessary to have the best vision obtainable.

Because of these exacting demands on our eyes, latent imperfections, errors of refraction, causing eye strain, are brought out and made manifest by symptoms of discomfort and distress, compelling us to seek the improvement of vision and the comfort afforded by properly fitting lenses.—Journal of the American Medical Association.

Thunder.

Winter thunder is considered throughout Europe to be of very ill omen, but April thunder is considered to be very beneficial. In Devonshire and other cider counties of England there is a saying that "when it thunders in April you must clean up the barrels"—in readiness, that is, for a plentiful crop of apples. The French consider April thunder to be indicative of a good yield from vineyards and cornfields.

WHY NO INSPECTION?

Why is the milk that the people of Walkerton use daily not inspected? It may be the very best of milk, but that is not the point. The Provincial statutes provide for the periodical inspection of the milk sold in any municipality, for the inspection of the premises where the cows are kept, and for the examination of the cows by a veterinary inspector. No one will argue that these provisions were not wisely made by the provincial authorities. It is of the utmost importance to the public to know about these things. In many towns the inspector's reports get full publicity through the local papers. This is a matter that should engage the attention of our town fathers who are responsible for the proper regulation of all such matters.

HEARST AND PEEL

"It would have been better if Premier Hearst followed the lead of Premier Borden and said, 'You have no place within the lines of our party in the Legislature and the fitting and proper thing is to retire from public life.' I understand that Mr. Blain, M. P. is going about using Mr. Hearst's letter as a testimonial to Mr. Fallis. I think it is up to Premier Hearst to make clear his position on the matter."—Mr. Rowell at Caledon, Feb. 18th.

"Mr. Hearst's whitewashing letter to Fallis will grieve and surprise the Premier's admirers."—Port Arthur Chronicle.

"Does Mr. Hearst, Premier of Ontario, really think that whitewashing Mr. Fallis, M. P. P. for Peel and officially condoning his virtual stealing from the public chest, is calculated to stimulate recruiting?"—Peterboro Examiner.

"He (Mr. Fallis) has been badly advised in the course he has taken and the responsibility for this blunder must be shared by Premier Hearst."—Brantford Expositor.

"Mr. Fallis donated his profits to patriotic purposes, but he would have kept them if exposure had not put him to shame. This is the man nominated by the Conservative Convention in Peel with the approval of Premier Hearst and his colleagues."—Kenora Examiner.

"Approved by Premier Hearst and endorsed by the Tories of Peel, J. R. Fallis is the Conservative candidate in the bye-election."—Collingwood Bulletin.

The best equipped job plant of any town weekly in Canada, can now be fairly claimed by the Renfrew Mercury, which has been making extensive additions to building and plant. Mr. Smallfield who is at present the president of the Canadian Press Association, has already enjoyed the reputation of publishing one of the best country weeklies in the Dominion.

+ + +

A correspondent makes a good suggestion in a letter to the Telescope, which appears in another column, to the effect that some sort of literary or debating club be formed in Walkerton. Other towns and cities have Canadian Clubs, Round Table Clubs, Debating Clubs, etc., where the art of thinking on one's feet is successfully acquired by its members. In the rural sections too, the Farmer's Club is filling this purpose. Walkerton has scores of men who would profit abundantly by active work in a debating organization.

LETTERS FROM ENGLAND

Boys are Anxious to Get to the Front—Zeppelin Raids do Great Damage Not Reported in the English Papers.

LETTER FROM ENGLAND

Miss Agnes G. Smith received a letter from her cousin, Private D. J. Smith, from Granville Canadian Special Hospital, Ramsgate, Kent, England, dated Jan. 22nd:—

Dear Cousin Agnes:—

You will be surprised to hear that your letter of Oct. 23rd only reached me about a week ago. Well, it is hard to say where it had been but I expect it was laying at some of the hospitals I went through. My arm went useless with me over at the Front, so I had to be shipped back to England. It is doing fine now but it will be some time before it will be just alright again. It was in poor shape when I went to France anyway, and I guess if I had stayed behind then I would have been alright now, so I guess I got what was coming to me. Well, Aggie, I didn't see any actual fighting over there but I saw plenty of the effects. In fact I see that every day here for there are all sorts of cripples in this place. All Canadians. My nephew, Lorne Bell, is over here in the 43rd Batt., at East Sandling, but I have not seen him yet. He may be up to see me tomorrow (Sunday). It is just about 2½ months since I left the regiment and since then they have been turned into the 1st C. M. R. Batt. and are doing infantry drill. A lot of the boys have been killed or wounded since I left them. In fact there are five of us here now, one of the boys was never over to France, but got left behind on account of rheumatism. This is a great country for getting rheumatism, it is so damp a climate.

It is pretty rough over there, I can tell you. In a good many ways the mud and water is something fierce and the heavy guns. Well, I don't think any writer could give a description to convey an idea of what they are like. I was pleased to hear that you were all well and able to do something to boost victory along, for of course that is the only thing that will end the war, victory for the Allies. I never was so proud before of being British born, as I have been since I came over here, and I can tell it would be something pretty severe that will ever make me want to leave its protection. People who have never been in different parts of the Empire can hardly realize what an immense one it is and it sure is one to be proud of. We have a splendid building here. It was the Granville hotel before the war and the Canadian government leased it for a hospital for two years. All the cases here are for special treatment. It will hold about 600 patients and there must be about 600 here now. A lot will be able to go back to the Front, and a lot more will be fixed up as well as they can be, and sent back to Canada. We had the first death here since the Hospital opened up last night, Lt.-Col. Yates, so I expect there will be a military funeral in a day or so. The building is right on the front over the main promenade and the Channel. There are always a large number of boats laying out in the Channel that are held up to be searched for contraband. Ostend is almost opposite here across the Channel and on a real clear day, we can see the French coast, down towards Calais. We are only about 24 miles from Folkestone, near where we were camped last summer, and I don't think we're more than a couple of hours' run from London. Well, the boys in the next ward are having a little concert of their own, with the aid of a mandolin and flute, and a pair of bones. Well I must close with best love to all

Your cousin,
DAVE.

+ + +

THOSE ZEPPELIN RAIDS

That the extent of the damage done by Zeppelin raids in England, has not been allowed to become public is pretty well understood. The following extract from a letter received by Mr. Gordon Scales from his mother in England, gives some idea of what a Zeppelin raid means:—

"I have just come home from Chapel. We have been getting tea for ministers and deacons. Last night we were having our annual meeting and all at once we got word that the lights had to be put out. The street cars were stopped at once and left standing where they were. All trains were stopped and stations put in darkness. The Zeppelins got through and blew up part of Derby station, also a large munition factory at Loughbrough. a lot more damage done at Loughbrough, ten men killed and a great many wounded. They got as far as Burton-on-Trent, blew up their station and killed a lot of people. They also destroyed many places near Birmingham but did not touch the city."

+ + +

A LINE FROM "GABE"

Contractor Alex. Haas had an interesting letter from his son, "Gabe," who is with the 34th in England:—

Dear Father:—

I had a letter from Louise yesterday, the first that I received from her since Christmas. They intend to make a move here pretty soon. I noticed that the 35th Batt. were packing up today and they intend to move out of here tomorrow. They were the first Battalion on these grounds and we were the second and as they are moving tomorrow, we will very likely be the next to move, but the sooner we get there the better. Don't you think so? The quicker there the sooner back, eh?

I had a letter from Tom Irving the other day. Very good of him, wasn't it? They had me over before Major Head yesterday morning and I had to answer about fifty questions such as how old I was, where I was born, where you were born, how many languages I could speak, and I told him I could speak a little German and there were a lot of other questions not worth mentioning. The picture of Spegal and I did not turn out very good but thought I would send you one anyway, and the other is a snap taken inside the hut. We have had some nice weather here all this month and I hope we will have some more but by the looks of things I don't think we will be here long enough to appreciate it. We have reveille at 6 a.m. tomorrow and drill at 8 a.m. till noon, then from two till 4.30 p.m. so we will be pretty busy from now on. Give my best to all.

Your loving son,
GABRIEL.

Jan. 30th, 1916.

LETTER FROM LOUIS DIPPEL

The following interesting letter was received by a Clifford friend, from Gr. Louis W. Dippel, son of Mr. and Mrs. H. G. Dippel of Walkerton:—

Westenhanger, Kent
Jan. 10, 1916.

Miss Evelyn May Welton
Clifford, Ont.

Dear Friend:

I suppose you have often wondered if your "News from Home" ever reached its destination, and also just where that place was. To-day it is Kent, England, for some peculiar reason called the "Garden of Eng'and" (must be on account of weeds or mud), to-morrow it will be "Somewhere in France" if all goes O. K. I am on the B. C. party (battery commander's staff) and to have a horse of my own "Cuty" described in the Vets book as a dark bay mare, 6 years old, white star and snip, black tips with off hind leg white sock. So tonight at 2.20 a. m. the afore mentioned Cute carries saddle with a roll on black (cantil) containing two blankets and some other stuff of your own (very little per force), in the pommell, a saddle cover with a little more stuff (mostly the horse's), on the various D's on the saddle are attached to—as tin, (feed bag, shoe case, for the horse), reel o wire, grooming kit, hay net with hay, etc. The SPARE room is for the rider encumbered with water-bottles haversack, bandolier with 50 rounds and any other instruments belonging to the gang.

I should have acknowledged receipt of "News" before, but directly after its arrival we went for firing practice at Larkshill and since then I have been very busy. Anyway if you knew me better you would know that the scribulation of epistles is the bane of my existence, and in the army where nothing is conducive towards pen pushing, letters ought to be appreciated very much. As we are going away this letter will probably be censored, likely by some English bloke, so I will refrain from describing this country as it would be like wasting sweetness in the desert air as he would start to whitewash the sheet with black or red ink. However there is a pretty spot here also "London." Had three week-ends there and not a dull moment. But I can't possibly begin to describe, (Parker's guide to European cities is good) etc. but this note has almost grown into a letter and as usual, the farther I go in writing, the more careless I get, so I will have to cease rambling soon or the rest will be illegible and anyway I will have to get "us" (Cute and myself) ready directly. Incidentally it is just as about hard for me to quit writing as to get started and as I always detest formal closings (doubly hard to sign a first letter) I will close abruptly and sign myself as

Your friend,
Gr. L. W. Dippel.

News About Town

Capt. (Dr) O. A. Cannon, a former Walkerton boy, who returned a few months ago from the Dardenelles, where he was serving with the Canadian Army Medical Corps, has been appointed to an important post in the department of the director of medical services at Ottawa. Capt. Cannon is at present attached to the divisional headquarters staff at London.

+ + +

Late Mrs. Robt. Findley.

The death occurred at her home, Braeside Farm, Brant, on Feb. 14th, of Mrs. Robert Findlay, a very old and highly esteemed resident of Brant, aged 77 years and 11 months. She had been ill only about a week, pneumonia developing from a heavy cold. The subject of this sketch was born in Bytown, now the City of Ottawa, on March 30th, 1838. Her maiden name was Jennie Gordon. Her father, John Gordon, at that time was a well-known contractor and builder in the Ottawa Valley. On Jan. 20th, 1858, she was married to the late Robt. Findlay, at Portage-du-Fort, in the county of Pontiac, Que., where they resided for a number of years. Afterwards moving to Aylmer, Que. In 1876 they came to Brant. The late Mrs. Findlay was a woman of kind and unselfish disposition, a devoted wife and mother, and a friend to all in distress. She was a member of Malcolm Presbyterian Church and took a keen interest in all that tended to the good of mankind. The surviving sons and daughters are:— Mrs. R. W. McMorran, of Somerset, Man.; Mrs. J. A. Flett, of Vancouver, B.C.; James A. Findlay, of Vancouver; Mrs. A. E. Fee, of Killam, Alta.; Walter and Russel Findlay, of Brant; Miss Jessie, at home.

BRUCE TP. PEOPLE ROUSED

At a meeting held in Ripley, the following resolution was unanimously carried, by a standing vote:— "Resolved, that this mass meeting of citizens of the township of Huron in the County of Bruce, assembled in the Village of Ripley, this ninth day of February, 1916, view with alarm the fresh exhibitions of German barbarism in Britain and in Canada, as well as in the countries of our Allies. That we are more thoroughly convinced than ever before, that the cause of righteousness and the future of humanity and civilization demand that everything possible be done to crush the diabolical power of the German combination. That this war is Canada's as much as it is the war of our Motherland; and that, therefore, the people of the Township of Huron will endeavor to do everything in their power, in the way of money and men, to assist in bringing the war to a triumphal ending." Meetings were held both in the afternoon and evening and were attended by large crowds. His Honour Judge Barron, of Stratford, was the principal speaker and the audiences were delighted. Great interest was taken in his speech which was considered a treat by every one present. Enthusiasm for the cause, runs high in the Township of Huron, and there is no doubt that that district will always be a shining example of Bruce's loyalty to our King and country.

LOYAL GERMANS OF BRUCE

Former Walkerton Boy Writing in His Paper "J. P.'s Weekly" Points Out How Walkertonians of German Descent are Serving the Empire.

(J. P. McConnell in "J. P's. Weekly")

How easy it is to generalize on a question like that of interning enemy aliens. The Sun for months past has been making frantic demands, "a campaign of violence" it coyly admits, for the internment of all aliens, and it is apparent the Sun is quite indifferent as to whether they are really enemies or not.

The following from the Toronto Star is interesting and apropos. The Star says:

When the 34th regiment, of London left for overseas, marching side by side with men more than twice his years went young Gabriel Haas, a lad of German descent, who has volunteered to be one of the several million men required to repel the hordes of Hun invaders and crush for all time the forces of Kaiserism and German militarism. Young Haas, who has just passed his seventeenth birthday, is a brother of Mrs. W. J. Fulton, 52 Albany Avenue, and the youngest son of Alex. Haas, contractor, Walkerton, who was himself of German parents in Alsace-Lorraine. The father lived under German rule until 16 years of age, when he migrated to Canada, and long ago became a naturalized subject of this country. Mrs. Fulton, questioned by The Star as to the sentiments which led her father, a German-born Canadian, to send his youngest son to fight the Germans, said: "No persons who know us need to be told that we are intensely pro-British. My father is determined that the Kaiser should and will be hanged, and to show that he is doing more than hoping, he is sending the only son he has left at home to help in the great cause of the Allies. No, you can't make it too strong that all our family are death on German militarism. It breaks our hearts to see the baby of our family go, but then we felt it must be done."

Young Haas enlisted at Walkerton last summer, and has been in training ever since at London. At the time of enlistment the lad was under age, and it was necessary for the father to sign his release papers for him.

The above story is one which sheds an interesting light on the "Germans" in Ontario at least. I am personally acquainted with the family of Haas, the lady mentioned having been a school mate of mine. The case is typical of hundreds of others in Ontario and of scores of which I have personal knowledge. A very large proportion of the so-called "German" families in Ontario are really conquered and denationalized Frenchmen from Alsace-Lorraine. These people were busy hating the Kaiser while the rest of Canadians were either regarding him with indifference or amusement. I can recall dozens of such "Germans" in my old county, many of whom I chummed with as a boy in Bruce. The young men of many of these old families came west and prominent among them is Jos. Reichenbach, of New Westminster, and his two brothers, all of whom were bonny lacrosse players in the old days and are just as good Canadians and loyal Britishers as the best of us. A nephew of Mr. Reichenbach is in the trenches of the Allies.

Then there is Ed. Wettlaufer, known to every hockey fan in Canada, one of the same breed. Ed. is gray, fat and "bantam" in stature, but his purse has been opened wide to many friends since the war began. One of his brothers is at the front with the Allies. Mr. Wettlaufer comes out here regularly on business trips and is well-known in Vancouver. For years Ed. and his brother and father were the backbone of the old 32nd Battalion band in my old home town.

At this moment another "German" school chum of mine, Otto E. Klein, is recruiting officer in Walkerton, where for years he has been a company commander. A third to a half of the boys who have been enlisted in the east half of Bruce county have German names which originally were French. In one month Bruce county has enlisted 800 men of the 1000 required for the 160th Overseas Battalion. And this does not include the contingent of several hundred already at the front. And as showing the spirit of these "German" lads from Bruce county, here is an extract from a letter written by young Haas from Bramshott. He says: "Please thank Mrs. O. E. Klein for the box of home-made candy. We had a General here this morning inspecting us in order to pick a battalion to go to the front and I don't know whether we succeeded or not, but I hope we have. I had a letter from Harry Wettlaufer the other day and he is in the hospital pretty sick. Ernie Cartwright and I intended to go up to Shorncliffe in a week or so and try to see some of the Walkerton boys."

It doesn't sound downhearted, does it?

Bruce county's per capita contribution to the Patriotic Fund is over two dollars, while the average for Ontario is $1.60. And the population of Bruce county is at least half "German."

Quite well as a boy do I remember how Capt. Klein's father explained to me in his broken English why he hated the Prussians—it being the story of Alsace-Lorraine since 1870. He had a large family of boys, one of them a county judge in Bruce, who were all brought up in that faith.

Most of the Germans in this country, that is the honest settlers, not the floating adventurers, are in Canada because they hate Prussian militarism and all that it means. And many of them, like the Haas and Kleines and Wettlaufers are doing their bit to put the Kaiser and his warbund out of business—to hang him, as Mrs. Fulton says. They have reasons for hating Prussia of longer standing and quite as deeply rooted as our own.

So, when in some quarters there is a demand for the internment of all Germans, and suspicions are raised against everyone with German names, it should be remembered that there are "Germans" and Germans, and care should be taken to avoid giving offence to people who, even though they speak with an accent or have German names, are yet loyal subjects and whole-heartedly in sympathy with the allies, and this statement applies to the great majority of the citizens of German origin in Ontario and their sons who have come west and to many good men who settled direct from Europe in this province.

Visit the
Good Roads Congress
at Sohmer Park, Montreal, March 6th to 10th inclusive.

Every citizen who is interested in the welfare of his community should take advantage of this opportunity to obtain information about the kind of good roads that will create better and more economical living conditions in that community. See our

Concrete Road Exhibit

and learn without cost the advantages, the practicability and economy of the "best good road"—the Concrete Road.

Our road engineers will be in attendance to give you the fullest detailed information of the economy of Concrete as a road building material. Don't wait for someone else to take the lead. Come in person and get first-hand facts. Ask for our free booklet "Concrete Roads".

News About Town

A very fine specimen of wild cat was shot by Mr. Ernest Morris, caretaker of the Rockcliffe Anglers' Club of Owen Sound, in the Long Swamp, about six miles from Owen Sound.

A woman and daughter were at sea during rough weather. After a silence of some time the mother asked:—"Are you seasick, dear?" "No, I think not," replied the daughter; "but I'd hate to yawn."

The cross-eyed man was watching the activity of Niagara. "What a big waste," he remarked to his friend. The very stout lady standing nearby looked at him angrily. "Mind your own business."

Mr. Norman Cunningham took a party of friends out to his uncle's, Alex. McKinnon, Greenock, last Wednesday. A good social time was enjoyed by all. Mr. Cunningham left on Thursday for Melfort, Sask., where he is engaged in business.

Wm. Small, who had the honor of being the first young man to step upon the platform to enlist on Friday last in response to Major Tolmie's rousing call, is the seventh member of the Enterprise staff to join the colors in the present war.—Chesley Enterprise.

Mr. P. Ritchie has received word that his son, Robert, of Tessier, Sask., who was operated on for appendicitis in the hospital at Saskatoon, is recovering rapidly. Mr. Ritchie was in very bad shape before going to the hospital and was thought to be suffering from gall-stones.

The other day a recruiting officer in Toronto in discussing recruiting had the following to say: "When you recruit your friends don't tell any man he is yellow because he is not wearing the khaki. You don't know about that man's personal affairs. Tell him he might as well go among friends now as go ultimately among strangers."

Colonel Weir, Major Osborne and Captain Clark drove up from Cape Croker last Friday and examined the local squad, and pronounced it a fine set of men, second to none in the county. He considered the boys had the right cut for the heavy hard work. Twenty-six names are on the roster, and drilling started yesterday in the town hall.—Lion's Head News.

The extra day in February which constitutes the entire year "leap year" provides a calendar different from any enjoyed since the centennial year 1876, forty years ago, and different to any that will follow for 28 years longer, when 1944 will have begun. This is a leap year beginning on Saturday, containing fifty-three Saturdays and fifty-three Sundays, such as no person under 40 years of age ever knew before, and such as probably a very few will see again repeated in the millennial year—eighty-four years hence.

Two rams had a fight to the death in the G. T. R. shipping pens last week. A spectator says it was the most business-like proceeding he ever witnessed. Each animal would back up to the fence and then make a bee line for its opponent. When they came together with a crash at the centre of the yard, the impact made a noise that could be heard a block away. They would then back up to the fence again and try another round. This performance was repeated until a sharp crack broke the back of one of the animals. The man who saw the fight did not anticipate a fatal ending or he would have attempted to stop the interesting "scrap."

The Reeve of Elderslie is a man of strong convictions and has very little encouragement for young men who can and ought, but will not, imitate the splendid example of his own son, John, by enlisting now. A young man of military age, single, when he heard that John Cass had enlisted, applied to Mr. Cass for his position, but Mr. Cass replied: "I will let my farm grow up in grass first!" Mr. Cass has done splendid patriotic work, and the township of Elderslie has reason to be proud of him. The Reeve says that if there is another regiment formed, he will go himself.—Chesley Enterprise.

+ + +

A Good Move.

The Militia Department have decided to allow men training for overseas service to go to their homes and take part in the seeding operations in the spring. Also if the men are in the country when harvest is on, they will be given leave to help harvest. This ought to help considerably in enlistments from the country. It will be a nice change for the young men who would like to go back home and help the old folks, and it will help to make the acreage sown and harvested as great as ever. The move is a good one, and the militia authorities are working in the right direction.

+ + +

Inspector Was Pleased.

Major J. C. Osborne, who was here last week inspecting the 160th Batt., is a genial soul, and a thorough-going soldier. He has been twenty odd years in the Imperial Service, having been formerly Sergt.-Major in the Dragoons Guards. Major Osborne went over to France with the First Canadian Contingent and was in some of the worst fighting last year. Incidentally he saw Fritz Robinson, the first Walkerton boy to give up his life in the present war, killed by a piece of shrapnel. Major Osborne was invalided home last Fall, returning in the same boat with Major and Mrs. Moffat, who were returning at the time from England. The two majors got pretty well acquainted coming over and it was a pleasant surprise when they met the other day. Major Osborne is at present acting inspector for this Military District. He was greatly pleased with the way he found everything here and discovered that the 160th was leading the newly formed County regiments not only in recruiting efficiency but in a great many points in office system as well.

ARE YOU GOING WEST THIS SPRING?

If so, bear in mind that the Canadian Pacific Railway offers the finest possible equipment and exceptionally good train service; operating through Standard and Tourist Sleepers, also Dining Cars to Winnipeg and Vancouver, via one of the most picturesque routes in the world.

If such a trip is under consideration, apply to any C. P. R. Agent for full particulars or write W. B. Howard, District Passenger Agent, Toronto, Ont.

Country Correspondence

SOLWAY

Ed. Threndyle has been confined to his home with the la grippe for a few days.

John Craig moved his stock and household effects to his new home near Paisley on Tuesday. His many friends here regret to see Mr. Craig and family leave this vicinity. Every one here joins in wishing them prosperity in their new home.

There are a few cases of measles in this vicinity.

Charles Ormiston moved into the house vacated by Mr. Craig on Wednesday.

The death occurred of Mrs. Robert Findley at the home of her son, Walter, on Monday. Mrs. Fee, from the West, is here for the funeral.

Ed. Threndyle spent Saturday of last week in Riversdale.

Mr. Bush, of Walkerton, piano agent, was convassing in this section last week.

A few from this vicinity attended the box social held by the Maple Hill Girls' Club in the Forester's Hall Friday last and report an enjoyable time.

GLAMIS

On Saturday evening, Feb. 12th, a number of the young people of the Glamis Baptist Church, gathered at the home of Mr. and Mrs. J. Groves, and presented their son, Albert, who has enlisted for overseas service with the following address and presentation:—

Mr. Albert Groves,

Our Dear Friend and Brother:—

We, the young people of the Glamis Baptist Church and congregation have gathered here to express our appreciation of your presence and companionship through the days that have passed all too quickly.

We are sorry that you are going from us now, but we trust that you will soon return. We admire the manliness and courage that have led you to offer yourself for His Majesty's service. There will be much of hardship and sacrifice in the army of King George, but we are assured that you will bear whatever comes manfully and well. You will never forget your home or the training you have received there. You will not forget your friends in Glamis and you will know that we have not forgotten you.

Accept this wrist watch as a slight token of the esteem in which we hold you and remember that the gift is accompanied and will be followed by the wish that you may return to us even stronger and more noble than you go from us.

DUNCAN McLENNAN,
MARGARET McKINNON,
JOHN CURRIE.

Glamis, Feb. 12th, 1916.

The address was read by Miss Laura Cunningham and Mr. C. Young made the presentation. Following this was the singing of the National Anthem after which all the young people journeyed over to the home of Mrs. Arch. McKinnon, 10th Con., Kincardine, to present her son, Mac., (who has also enlisted for overseas service in 160th Bruce Batt.) with following address and presentation:—

To Mr. Mac McKinnon,

Our Dear Friend and Brother:—

We, the young people of the Glamis Baptist Church and congregation have come here to voice our admiration of the spirit that leads men and women to give themselves in service for others. Our country's need is a serious one and you have answered to her call. We are not unmindful of the fact that this means and will mean, sacrifice for you and for others.

But we remember that nothing heroic has ever been accomplished without its accompanying hardships and heart rendings and we are confident that you will be equal to your share of the difficulties and dangers of the struggle for right in which our empire is engaged and to which your brothers and sisters are so nobly giving themselves.

As a small evidence of our friendship and appreciation accept this wrist watch and know that we shall not forget one whose presence and fellowship we are so loathe to lose.

DUNCAN McLENNAN,
MARGARET McKINNON,
JOHN CURRIE.

Glamis, Feb. 12th, 1916.

Mr. McCauley read the address and Miss Margaret McKinnon presented the watch. A couple of hours was then spent in games and music after which lunch was served. The party broke up by the singing of Auld Lang Syne.

BRUCE TOWNSHIP

Bruce Township held a fine Recruiting Meeting in the Hall at Underwood recently. Reeve James Johnston very ably performed the duties of Chairman. The speakers for the evening were: J. J. Hunter, of Kincardine; Capt. A. W. McNally, of Walkerton, and Hugh McKerracher, of Paisley. The Hall was well packed and great interest was taken in the speeches, which is another evidence that the people of the County of Bruce are determined to do their share in sending men to take part in the great conflict in Europe. Three or four recruits came forward at the meeting and more are to follow. The following resolution was carried unanimously by a standing vote:—"Resolved that the Dominion of Canada having set forth an earnest appeal for 500,000 men to aid the Empire in this hour of grave peril, in which life and liberty and human freedom are at stake, it has become the serious duty of every citizen of our country to aid and encourage to the very utmost of his power, the work of recruiting the various Battalions which are being raised in the defence of our homes and our honour. Therefore the citizens of this district in mass meeting assembled, hereby individually pledge themselves to exert every effort to recruit the 160th Battalion, and for this purpose we engage ourselves to assist and support the officers appointed for that work, and to faithfully care for the families of those who offer themselves for their King and Country." Lieut. Mackay, of Tiverton, who has charge of the recruiting in Bruce Township is to be complimented on the results of his operations. Between thirty and forty men are now signed up and quartered in Tiverton, with several other prospects in sight.

SOLDIERS ENTERTAINED

Baptist Ladies Prepare a Royal Spread for the Khaki Boys at Town Hall —Good Program of Music and Speeches.

The local unit of the 160th Battalion spent a very enjoyable evening on Tuesday last, in the auditorium of the town hall, at a banquet served by the ladies of the Baptist and Christian Church. The evening will be remembered by the boys in khaki as one of those enjoyed most during their sojourn in Walkerton.

The banquet hall was beautifully decorated for the occasion with flags of the Allies, bunting, flowers, and maple leaves, which together with four long tables, heavily laden with good things prepared by the ladies, and decorated with flags etc., presented an appearance which stirred the heart of every loyal Canadian present and caused many compliments to be paid to the ladies who could arrange decorations so tastefully and produce such an abundance of victuals.

The soldiers, numbering about 120, accompanied by the band arrived at the hall at 6.20 and took their places at the tables. The only other guests present were the officials of the church. After those present had partaken of the many delicacies and satisfied their appetites, the programme commenced. Rev. Mr. Roch occupied the chair and proved a most capable toastmaster. He welcomed the 160th and proposed the first toast, "The King," which was answered by the audience rising and singing the national anthem.

The second toast, "Canada," was proposed by Rev. D. McLennan, who dealt at some length expounding Canada's position among the nations of the world, with regard to her almost unlimited territory, her commerce, her natural resources, her waterways, etc., concluding his remarks by giving some figures from government papers, showing what Canada was and is doing to help the mother country in the great world struggle.

Mr. D. McKechnie was chosen to answer to the toast to "Canada," and his speech was listened to with interest and appreciation. Mr. McKechnie dealt with Canadianism comparing the spirit of today with that of the early pioneers, when the settlers fought and gave their life's blood to protect the homes which they had hewn from and erected for themselves in the forest. "Canadians, today," he said, "are as ready to fight for home and liberty." He compared the militia of the pioneer days when on "muster" day, there would congregate, the hunters, the trappers and backwoodsmen, in their picturesque costumes (some in swallow-tailed suits brought from the old country) for a day's military training, with the neat uniforms with which the volunteers of today were supplied, when they gathered for training, to fight the battles of the empire.

The toast, "Our Guests," was given by Mr. Morgan, principal of the High School, and in the absence of both Col. Weir and Major Moffatt, was ably answered by one of the junior officers in the person of Lieut. Roy Whitehead.

The last toast, to "The Ladies," was proposed by Capt. Shaw and seconded by Mr. James Whitehead, in his usual jovial manner.

Other numbers on the program were:—Trio by Messrs. A. B. Royce, N. A. Walford and H. A. Stephan; piano solos by Mrs. C. Cooper, Miss H. Whitehead and Pte. Walter Eidt; Solos by Miss W. Loughleen and Miss H. Whitehead; recitation by Miss Irene Everett; mouth organ selection by Pte. Aumann and comic monkey act by Ptes. Aumann and Wislor.

In his closing remarks Rev. Mr. Roel, drew attention to the church honor roll which stood on the platform. On it are the names of eighteen young men of the congregation who have enlisted. The singing of the National Anthem dispersed the gathering and drew to a close the excellent evening's entertainment.

A LITERARY AND SELF IMPROVEMENT SOCIETY

Editor Telescope:—

Don't you think that it would be a good plan for our town's people to organize a Literary and Mutual Improvement Society, with the view to improve the mind, and help to develop the mental faculties that lie dormant in so many for want or lack of cultivation? The writer has known where such a Society exists, that it has developed many bright and useful minds. Debating clubs would as a matter of fact help to draw out the thinking and speaking qualities and bring into use the mental resources and talents that lie unused for want of development and it would also direct their reading into the lines required to argue or debate the subject in question, also teach them to express their thoughts in an intelligent manner.

Along the same lines lectures might also be given on various topics, such as business and business principles, on which public transactions ought to be carried on, other lectures might be given on scientific subjects of various kinds that would both interest and profit. We would like to find out what the public think of such a scheme.

—W.

FACTS ABOUT BRUCE

Farmers of This County Have Property Worth 50 Millions

A bulletin just issued by the Bureau of Industries gives some interesting statistics in regard to the various Counties of the Province.

The value of farm property, stock and implements in Bruce totals $49,832,662. This amount is made up of: land $25,482,440, buildings $11,641,802, implements $2,690,600 and livestock on hand $9,408,760.

The County has 153,500 acres of assessed land. Of this amount, 685,500 acres or 62 per cent is cleared, 118,718 acres are woodland, 117,430 acres slashland, and 121,018 marsh or waste land.

For every thousand acres of cleared land in the County of Bruce, there was 47 acres of fall wheat, 6 of spring wheat, 36 of barley, 100 of oats, 28 of peas, half an acre of beans, 1 acre of rye, 7 of buckwheat, 20 of corn, 8 of potatoes, 12 of other roots, 290 of hay and clover, 90 of mixed grains.

The Tone of the New Edison
Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so life-like, that one can scarcely distinguish it from the original.
A REVELATION:
This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

The Decrees of Society

(BY ETHEL M. CHAPMAN)

Violets and white ribbon and a deep long breath of the old happy days! The girl buried her face in the mass of dewy blossoms and breathed deeply the heavy fragrance, because he had sent them; then she held them away from her and gazed into the delicate velvety mass with a misery of hunger in her brown eyes. Dr. Ross had sent her flowers before, but to-night the violets brought back so vividly the old happy days before Jimmy went away, the days when as children they had gathered violets in the hollow on the slope of the pasture land, the days when Jimmy was just her idolized brother, before he went to the West and people began to call him "wild." Then he had ceased writing so suddenly, and they had never heard from him since. People often wondered why she never seemed perfectly happy, but no one knew.

A wonderful tenderness drove away the agony of the dark eyes for a moment as she fastened the exquisite blossoms against her dress, but again as the luxury of their beauty and fragrance smote her senses, she wondered when had Jimmy seen violets. Perhaps, to-night, when the whole world was aclang with the bells of Christmastide, when hearths were bright with blazing logs, and wreathed with holly, perhaps Jimmy was cold and starving, and dear knows where. Reports had come to her of his haunting saloons and gambling dens, and her imagination had been ruthless in its pictures of the rest. A sickening sensation overcame her at the thought of her own unnecessary luxury in its horrible incongruity with the want that might be his. It is true that the flowers did not breathe of elegance more than the white satin gown, but it was a part of the game. If she was to make a living as a professional musician, her dress was as much a matter of necessity as either her voice or violin at society functions. Society had, ever been a little more gracious toward her than circumstances required. She was a stranger and it had taken her in, because, of course, it did not know about Jimmy.

It was Christmas Eve, and she was to play at an at-home. A carriage was sent for her, and as she was driven through the crowded streets, from every house poured forth floods of light and sounds of festivities. When she reached her destination an even more brilliant glare of lights told of the gaiety within. The drawingrooms were dazzling with a confusion of variant soft tints in delicate dresses, and gleaming shoulders and jewelled hair, the air was heavy with the spicy fragrance of cut flowers, from the ball-room came the dreamy strains of the orchestra, and everywhere, the silvery laughter and light chatter told of intoxicating pleasure. It was Christmas Eve, the anniversary of that night, when, in a little stable in Bethlehem, because there was no room in the inn, the Christ that came to redeem the world, was born; and they were celebrating it.

She tuned her violin absently, but with the first sweet, full, chords upon its strings, her whole soul poured itself into the music, and everything else was, for the time, forgotten. The rythmic flow and tender passion of the thrilling strains transfigured the musician's face until it glowed, as with the touch of an artist she drew her bow across the strings in one long pathetic finale. For a moment a breathless hush filled the room; then the applause came with a crash. She was presented with a huge sheaf of crimson beauty roses, and still they applauded.

Just as she was raising her violin to respond to the encore, her eyes were irresistibly drawn to a window. For an instant she stood motionless, with eyes fixed on the spot where a white face had for a minute looked straight into her own, then suddenly withdrawn. The violin dropped to her side, and forgetting everything but the face at the window, she passed quickly from the room. What if he should be gone before she reached him! She ran through the halls and opened the door just in time to catch a tall, dark figure going down the steps.

"Jimmy!"

He stopped in astonishment, and the next instant he felt her bare arms about his neck and her cheek wet against his own.

"Oh Jimmy, I'm so glad!" she cried hysterically, "I've waited so long. Come on inside."

He looked down at her thin dress and bare throat. It was too cold for her out there, and he couldn't leave her like this, so he inquired cautiously:

"Is anyone in the hall?"

"No."

She led him into the cosy reception room, and he turned the key carefully. Then when the light fell full upon his face she could not hide the pain that passed over her own. The eyes that had once been so merry and flashing, were filled with uneasiness and shame; the mouth told of weakness and discouragement; an unusual whiteness and misery covered every feature.

"I had no right to follow you here," he said, in a whisper, "but I wanted to see you before I go west again."

"But you won't go west again?" she pleaded.

"I'm going to-night. Listen! If I go no one will ever suspect it's your brother. To-morrow the papers will be full of it. You see, I've just got out." A dull red mounted slowly to his forehead. "I could kill myself for it, but I've disgraced myself and everyone belonging to me. I might as well tell you. I got in beyond my depth and used the bank's money, and—was sent down for two years. You didn't know, because they didn't have my right name; that's why I didn't write; but I owned up at last, because, well, it would seem queer that I should care, but it didn't seem just square, so I told who I was, and to-morrow the names of those whose time is up, will be published. Still, if I go to-night, no one will ever think of me being any connection of yours."

He raised his eyes for the first time to his sister's face. It was white and drawn, with dilated eyes and parted lips, but instead of scorn or reproach, he found in it only pity and love. With a sudden rush of tears, he threw his arms impulsively about her.

"I've been a brute," he cried, "to bring you all this trouble; but that was the worst. I never did anything worse than I have told you—just drank and gambled and used the bank's money. I meant to pay it back. But I'm going to fight it down. Really, if it would give you any comfort to know it, I could go back to-morrow to the old farm and the old church, and all, and be contented just to start all over again."

"Then we'll go together," she replied, promptly.

"No no. Everyone would know; they would stand aloof from both of us. That's the way of society," he ended, bitterly.

Footsteps sounded in the hall. He pushed her away from him, and sprang towards the door, but she stood against it, a wild terror in her eyes. If he went out again into the night, alone at Christmas time, an outcast from society, and with his disgrace published by the press, what hope was there that he might not again seek the old haunts that were always so hospitable? The footsteps drew nearer, but she still stood with her slight form pressed rigidly against the door, as if to forcibly prevent his escape.

"Good-bye," he said, as he kissed her forehead. "God knows I'd give the world to stay, but it wouldn't do." He took her by the shoulders and moved her away away from the door. At the same instant she slipped the key from the lock and threw it straight across the room into the glowing coals. Then she looked up, white and trembling.

"Tell me you don't want to go," she pleaded.

"To-morrow we will go home together. Mother has been breaking her heart for you. We'll get a Christmas tree from the cedar swamp, and light the old fireplace and open the piano."

A boyish smile that was half a safe guard against tears, lighted up the wretched face until it was almost happy again. The door opened from the outside, and the hostess entered to see what was detaining her violinist; but she was all forgiveness when the girl, with an unmistakable pride at which he marvelled, introduced her brother; and the smile and wonder had not passed off when he left her and she knew she had won.

It was nearly midnight before Dr. Ross came in, but then he was often late, and no one was surprised. He exercised a most reckless freedom in ignoring the claims of society for the sake of his patients. He made his way through the crowds of jaded dancers to the one woman who was never jaded, a woman with a pair of sweet eyes, who wore his violets against her breast. She had finished her programme and was putting away her music when he found her, and seeing the weariness behind the welcome in her brown eyes, he hesitated for a moment before he asked:

"I wonder if you are too tired to come down to the sanitorium with me? I've been there since six o'clock with a young fellow who can't live till morning, and can get no comfort from anything. I'm afraid it would be pretty hard for you, but if you could come and play just once for him, I believe it would do him more good than anything else."

As they passed down the crowded streets she began to realize more keenly than ever before what this man's friendship meant to her—why it had been such a pillar of security to her in her little difficulties of the new city life. And it was not the broad shoulders or keen intellect, or professional skill that gave this strength to his manhood, so much as his disregard for the conventionality that robs life of its highest things, and the sympathy with weakness, which is, after all, the real element of strength. He was worthy her priceless Christmas gift, a woman's whole-hearted respect for a strong man, and it was with a keen sense of loss that she realized they had come to the dividing of the ways. To-morrow the whole city would read of her brother's disgrace, and her "friends" would whisper it from house to house in holy horror. To think that they had received into their circles the sister of an ex-convict! Of course, if some relative, a wealthy father or uncle, had paid the debt and smoothed things over, that would have been different. Society would have smiled, and said he was "sowing his wild oats," and that it had all come about through a fondness for company. But a "jail bird!" Of course, they must guard their young people from such an associate. It was presumptuous to expect anything else.

Inside the doors of the sanitorium it seemed as though the rejoicing and gaiety of the Christmas season belonged to another world. As they passed the rows of white cots, great, wistful eyes gazed out from white, emaciated faces—eyes that were staring desperately into the future with dread, discouragement, hope or resignation, but when the doctor slipped his arm under hers and held it tight as he led her around a screen that separated one cot from the others, a sudden horror seized her. There on the pillow she saw the face of a young man, a face that had some time been beautiful, but which now, even in its deathly pallor, was drawn in lines of bitterness and discouragement.

At the strong pressure of the doctor's hand clasp, a warmth passed over the rigid features, and the wild, hopeless eyes opened. They glanced in annoyed indifference from the girl's satin shoes up the delicate gown and white throat, then stopped at the sweet face as though they had discovered something they had not expected to find.

"I brought Miss Alway to play for you," the doctor explained.

"Did you tell her what you were bringing her to?" the patient inquired quickly. "I see you haven't. Well, I'm face to face with the end now, and I'm not going to stand for the lie any longer." A wild light of delirium filled the glazing eyes as they gazed into her face. "Life is all a lie—but death—there's no lie there. I'll be meeting it any time now, and I'll meet it squarely. I'm about as low down as you find them, a drunkard, and, well, that covers everything. I don't know how it started, but before I knew it, it was too late. But there was a time when I believe I could have quit it. I made up my mind to throw up my job, chuck the old friends and go home, and start in fresh. I had a sister, a beautiful girl, but when I came home she was going to be married to a man a king in the stock exchange and a pillar of society, and of course it wouldn't do to have me around just then. Poor Ann—I don't blame her. I was a disgraceful-looking wreck, but there didn't seem to be any other place for me, so I just drifted back."

"And your sister—does she know? Where is she?"

"Dead. He soon tired of her, and broke her heart—killed her, by degrees of course. It's nothing unusual."

"Then you're looking forward to meeting her in Heaven?"

"Heaven! I never calculated to get to Heaven; [illegible] thought about it since I was a [illegible]ad, until now—and, oh, [illegible] blame!" He tossed uneasily in a torment of hopelessness, then he cried fiercely, "I've been bad, too bad for decent people to associate with; but I've tried, really tried sometimes, but it was just the same. People didn't expect anything better of me. But, say, this is Christmas eve; they wouldn't take Him in either, would they? It didn't weaken Him, of course; but don't you suppose He would—kind of make allowance?"

The wild eyes brightened for a minute, then sank again in agony of despair. "I'm a fool to think of it," he said, brokenly. "I've wasted my chances, and it's too late now."

There was a tense silence for a minute, then softly, to the farthest corner of the ward, rose the sweet, tender tones of a violin, notes athrill with feeling, and so distinct in the familiar old strains that a spirit voice seemed to pronounce the words:

"There were ninety and nine that safely lay
In the shelter of the fold,
But one was out on the hills away
Far off from the gates of gold,
Away on the mountains wild and bare,
Away from the tender Shepherd's care.

"Lord, Thou hast here thy ninety and nine,
Are they not enough for Thee
But the Shepherd made answer, this of mine
Hath wandered away from Me,
And although the road be rough and steep,
I'll go to the desert to find my sheep.

"And all through the mountains, thunder riven,
And up from the rocky steep,
There arose a cry to the gate of Heaven
'Rejoice, I have found my sheep,'
And the angels echoed around the throne,
'Rejoice, for the Lord brings back His own.'"

As she finished she raised her tear-blinded eyes to the face on the pillow, where the doctor with his arm about the powerless form, supported it. A smile of mysterious happiness transfigured the dying features.

"It's all right," he whispered. "I'm glad—you told me. 'Brings—back—His—own.' That means—me."

The labored breathing ceased. The doctor laid the limp form back on the bed. A nurse came and drew the screen closer, and they went away.

As they passed down the ward, a girl's eyes followed them wistfully. The violinist stopped, and bending over her, asked gently, "What is it?"

"It's yer dress. I had a dress like that once. I was to be married in it, but—Lemme touch it?" She stroked the silky folds dreamily, then the reminiscence overcame her, and burying her face in the pillow, she sobbed brokenly, "It wasn't my fault. They sent me away from home, but they couldn't understand." The slight frame was shaken in an agony of dry, hollow coughing. She was a mere girl, scarcely a woman, driven from the protection of her father's home, and thrown upon the tender mercies of life in a big city. No wonder the charity hospitals were full! In the compassion of her eternal instinct, the motherhood in the truest sense that is the glory of all beautiful womanhood, Miss Alway gathered the grief-shaken form in her arms, crushing the sunny curls against the fragrant violets. The girl ceased sobbing in amazement. Never in her life since that happened had she been treated like this.

"Violets!" she gasped. "Folks used to send me violets once."

The musician took some from the white ribbon and left them with her, and long through the silent night the nurses heard her murmur while she clasped the flowers tightly in her thin fingers.

"An' she touched me. 'Tisn't often the likes o' her touches the likes o' me."

"I'm afraid that was an awful ordeal for you," Dr. Ross said, half apologetically, as they left the sanitorium and turned into a delightful little supper-room, which at this midnight hour was almost deserted. Certainly he might imagine the ordeal had been a very severe one, judging from her white face and brimming eyes. But the eyes looked very bravely into his own now, as she said:

"My brother came home to-night. He robbed the bank, and—has been in prison for two years."

"Yes?" If he was surprised he didn't show it.

"You know the only reason that half of society isn't suffering the penalty of the law is that they haven't been caught."

"But if he had gone back west to-night, what might not have happened to him?"

"But he didn't go back. His life is still before him."

"You are very good," she said, with a faint smile of gratitude, "but society, of course, will not look at it in that light. Don't understand that I am ashamed of Jimmy. I think I care for him more to-night than I ever did, but it would be useless for me to try to go on with my music here now, so we are going home to-morrow, and he can begin again."

"Do you mind giving up your life here very much. I mean the social side of it?"

"No. After what I have seen to-night of the other side of life, I hate it—the frivolity and dress, and show and emptyness. I hate it all."

"So do I, but are you so very glad to leave—everyone?"

"Well—" She was not at all pale now, and he saw beneath the fluttering lids what he had waited for. He leaned across the table as far as was permissable in such a place.

"Then you'll come back soon, won't you? For I want you so much," he said.

A FAMOUS BATTLE.

The battle which is known in history as the "Victory of Victories" took place at Nevahend, in Ecbatana, and was fought between the new Moslem power in 632 and the empire of Persia, then one of the most powerful of the eastern monarchies. It was one of the most absolutely decisive battles in the history of war, and it was all the more amazing by reason of the fact that it was won by a people who twenty years before had been unknown barbarians, lost in the deserts of Arabia.

Arabian historians place the Persian loss in a single day at 100,000 men killed. This may be and probably is an exaggeration, but the fact remains that the Persian dynasty came to an end when the battle was over and that Zoroastrianism, which had been the religion of Persia for over a thousand years was at once supplanted my Islam. Its modern representatives, as is well known, are now the Parsees of India.

The victory was so absolutely decisive that it extended the Arabian dominions over the whole of the region, lying between the Caspian Sea and the Indian Ocean. With the exception perhaps of the battle of Tours, no single fight ever made such a difference in the after history of the world.—Exchange.

RUB YOUR STIFF NECK AWAY TO-DAY-- GOOD OLD "NERVILINE" WILL CURE

Fifteen Minutes After Using Nerviline You Are Well.

Cold, excessive strain and exertion are a common cause of stiff neck, soreness or inflammation.

Generally the cause is so deeply seated that only a liniment as powerful and penetrating as Nerviline will effect an immediate removal of pain.

Nerviline is powerful, yet penetrating, is the most rapid pain-expelling agent the world knows.

Millions have proved its reliability, and millions will share the relief its marvellous properties confer upon suffering people.

Nerviline is sold upon a positive guarantee that it is more prompt, more powerful, penetrating and pain-expelling than any other remedy.

If you have failed to obtain relief for rheumatism, neuralgia, sciatica or lumbago, try Nerviline. Good for small pains, the surest to drive out the big ones.

Nerviline is guaranteed to quickly cure any pain or soreness in the joints, and is sold by druggists everywhere. Large size, 50 cents; trial size, 25 cents, or direct from The Catarrhozone Co., Kingston, Canada.

ANTIQUES

In a recent notice under this heading mention was made of that most celebrated antique, the Portland vase, and the influence its substance, form and decoration had upon the artistic industries of the last century and a half. It was Sir William Hamilton, British Ambassador to the Court of Ferdinand IV., King of Sicily, who secured and sent this treasure from Italy to England. Sir William was a great patron of the arts and crafts of his time, and accomplished much in the way of rescuing gems of ancient art from the seclusion of the tomb and other secret hiding places, and restoring them to usefulness as models for craftsmen in every kind of material capable of being manipulated into artistic form, workers in gold, silver, bronze, brass, ivory, marble, clay-baked and unbaked, glass and wood, all essaying to reproduce their beautiful features of form and decoration and by this means developing craftsmanship and creating wealth in many directions.

Next to the Portland vase came the scarcely less renowned Warwick vase as a proof of Sir William Hamilton's forethought in selecting objects of art to serve two great purposes, viz., as antique specimens for museums and as examples for artistic craftsmen to reproduce.

The Warwick vase was sent by Sir William to England about 1774, and eventually sold by him to his nephew, the second Earl of Warwick, hence its name of "The Warwick vase."

The vase was discovered in 1770, in the bed of Lake Pantanello, in the neighborhood of Tivoli, near Rome, while excavating the ruins of the Tiburtine Villa, the favorite retreat of Hadrian Augustus. It was sculptured by Lysippus, of Sicyon, a Greek artist, who lived in the fourth century, B. C., and is of white marble, standing 5 feet 8 inches high, with a diameter of 5 feet 8 inches, and has the liberal holding capacity of 163 gallons. The form and decoration is suggestive of the Bacchanalian trophy. The body is in the shape of a colossal wine cup. A grape vine forms the principal part of the upper decoration, with the twisted branches forming the handles, and the leaves and fruit distributed naturally over the surface. Bacchanalian masks and emblems are around the centre of cup, and the lower part is draped by means of two panther skins, with heads and feet distributed to complete the full trophy scheme of decoration. Perhaps the most satisfactory reproduction in recent days of this antique is that made in the "Black Basalt" body, invented by Josiah Wedgwood, about 1760, a specimen of which was recently exhibited in New York.

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by this method. Write to-day. Address: Mrs. M. Summers, Box 8, Windsor, Ont.

To Remove Scorch Spots.

All traces of the damage done by an overheated iron can be removed by wetting the scorched place with water, and then applying to it a thick paste made of ordinary lump starch, with just enough water added to make it stick well. Use plenty of the paste and let it dry on the material. Then, when dry, be sure to rinse all the starch out with water, so that the iron will not scorch the garment in the same place again.

HER TERMS.

(Punch)

Lady (to prospective charwoman)—What do you charge per day?

Charwoman—Well, mum, two-and-six if I eats meself and two shillings if you eats me.

CUTTING DOWN EXPENSES

A great number of people have, unfortunately, had their earnings reduced since the war, and consequently they deem it wise to cut down living expenses. One sensible plan is to eat less of the highly refined foods and meat and more of the coarser and more nutritious cereals such as Dr. Jackson's Roman Meal. This is the most wholesome, most nourishing, and most healthful cereal food on the market, and costs much less than the highly refined breakfast foods.

Sold by live grocers at 10 and 25 cents.

Try the ready-cooked Roman Meal Nuggets. They are delicious with hot milk.

Made by Roman Meal Co., Toronto.

World's Harvest Calendar.

The world's schedule for cutting grain is as follows:

January—New Zealand, Argentina.
February—East India, Upper Egypt.
March—Egypt, Chili.
April—Asia Minor and Mexico.
May—Asia, China, Japan and Texas.
June—Turkey, Spain and Southern United States.
July—United States, Austria, Southern Russia, England, Germany, Switzerland.
August—Canada, Holland, Belgium, Denmark, Poland.
September—Scotland, Sweden, Norway, Siberia.
October—Northern Russia, Siberia.
November—South Africa, and Peru.
December—Uruguay, Australia.

Then it all starts over again, beginning with New Zealand and Argentina.—Farm and Fireside.

Minard's Liniment Relieves Neuralgia

To Make Bandages.

Bandages can be prepared from the good parts of worn sheets or pillow slips, if perfectly clean. Rolls six to eight yards in length are most convenient—one inch wide for fingers, two inches for feet, two and one-half to three inches for head and arms and four inches for legs. A good way of keeping them in condition for use is to seal the rolls in a perfectly clean glass fruit jar.—Philadelphia Record.

VALID CAUSE FOR COMPLAINT.

(Tit-Bits)

A mother once sent this somewhat satirical note to the teacher of her small son:

"Pardon me for calling your attention to the fact that you have pulled Johnnie's right ear until it is getting longer than the other. Please pull his left ear for awhile, and oblige his mother."

Evolution of the Checker.

That formidable person, the chancellor of the exchequer, who levies toll on the House of Commons today, draws his lofty lineage from the reign of Henry III. Henry, thinking it desirable that the lord high treasurer should be provided with a guardian, gave him one in the name of a "check." The checker, keeping his [illegible], has now become the [illegible] of the treasury [illegible]. The Lord High Treasurer disappeared with the Duke of Shrewsbury, whom Queen Anne appointed a few days before her death. It was George I. who put the office of Lord High Treasurer in commission in 1714, and in commission it has since remained. Five persons have the honor—the first lord, three junior lords and the chancellor. But the chancellor proved too strong for all of them and the board, once a reality, has, like the board of trade, long since ceased to meet.—London Chronicle.

A Cure for Hiccoughs.

Sit erect and inflate the lungs fully. Then, retaining the breath, bend forward slowly until the chest meets the knees. After slowly rising again to the erect position, slowly exhale the breath. Repeat a second time and the hiccoughs will stop.

Gentlemen,—My daughter, 13 years old, was thrown from a sleigh and injured her elbow so badly that it remained stiff and very painful for three years. Four bottles of MINARD'S LINIMENT completely cured her and she has not been troubled for two years.

Yours truly,

J. B. LIVESQUE,

St. Joseph, P. O., 18th August, 1900.

HIS NUMBER.

(Harper's Magazine)

Teacher—I'm surprised at you, Sammy Wicks, that you cannot tell me when Christopher Columbus discovered America! What does the chapter heading of the week's lesson read?

Sammy—Columbus—1492.

Teacher—Well, isn't that plain enough. Did you never see it before?

Sammy—Ye'm, ye'm, but I always thought it was his telephone number.

ASSOCIATIONS.

(Harper's)

A few days after a farmer had sold a pig to a neighbor, he chanced to pass his place and saw his little boy sitting on the edge of the pig pen watching its new occupation.

"How d'ye do, Johnny?" said he. "How's your pig to-day?"

"Oh, pretty well, thank you," replied the boy. "How's all your folks?"

SANDWICH FILLERS.

Nourishing and Tasty Mixtures for the Children's Luncheon Basket.

Minced Cold Roast Beef—Mince the beef; then season with pepper, salt and a teaspoonful of chopped tarragon leaves. Lay upon rye bread.

Pineapple and Cream Cheese.—Soften a package of cream cheese with a little sweet cream, add a pinch of salt, a tablespoonful of sugar and two tablespoonfuls of freshly grated pineapple. Use with gluten bread.

Minced Chicken and Mayonnaise.—Mince the chicken and add a tablespoonful of chopped celery and enough mayonnaise to make a spreading mixture; with white bread.

Broiled Tomato Rounds. Dip slices of fresh, firm tomatoes in eggs and crumbs and then brush with melted butter. Broil carefully and sandwich between rye bread rounds.

Apple Butter and Cheese.—Mix with one package of cream cheese two tablespoonfuls of apple butter and a tablespoonful of chopped nuts; add a little cream if the paste is not soft enough to spread and lay upon gluten bread.

Apple Sauce and Brown Bread.—Add to a little good apple sauce a tablespoonful of chopped nuts, spread the bread rounds with fresh butter and spread with the mixture.

Minced Tongue and Marmalade.—To a half cupful of minced tongue add two tablespoonfuls of orange marmalade, mix to a paste and spread on thin slices of graham bread.

Banana Sandwiches. Slice the bananas thin and let them stand in lemon juice, sugar and a dash of nutmeg for half an hour; then drain and roll in chopped nuts and spread on whole wheat bread.

Get More Vim! Renew Your Strength!

If you are tired, nervous, sleepless, have headaches and languor, you need Dr. Hamilton's Pills; they tone the stomach, assist digestion, brace you up at once. Taken at night — you're well by morning. Sickness and tired feeling disappear instantly. Vim, spirits, hearty health, all the joys of life come to everyone that uses Dr. Hamilton's Pills. No medicine so satisfactory. Get Dr. Hamilton's Pills to-day, 25c per box at all dealers. Minard's Liniment Co., Limited.

The Crippled Bird.

A very remarkable instance of the sympathetic kindness of one bird to another is given by a lady who witnessed the incident in her garden. Upon the lawn there was a basin, which was kept supplied with water for the birds to drink. Among the birds coming to the garden was a crippled rook, which had lost one leg altogether and had no foot upon the other, so that it was very helpless when it rested on the ground. One day when this cripple was upon the lawn three other rooks came and drank. Two of them flew away at once, but the third, seeing the cripple, became interested and went up to have a look at him. The inquisitive rook gazed at the cripple for a little while, put his head down to the ground several times, as if he were trying to make out what was wrong, and walked round the helpless bird, puzzled perhaps for a moment what to do. Then suddenly he made up his mind, and, putting his wing under the cripple's wing, he partly dragged and partly supported him to the water, giving him an extra tug to lift his head to the edge of the basin. Then his friend in need was seen to fill his beak with water an drop some of it into the cripple's mouth. After being shown in this kindly way where the water was the maimed rook was able to help himself to it.

KEEP LITTLE ONES WELL IN WINTER

Winter is a dangerous season for the little ones. The days are so changeable—one bright; the next cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or grippe. What is needed to keep the little ones well is Baby's Own Tablets. They will regulate the stomach and bowels and drive out colds and by their use the baby will be able to get over the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

The Worse Golfer.

An amusing incident was witnessed on the Braid Hill golf course. A gentleman, evidently a tiro, was going over the course, making futile attempts to propel the ball in the direction required, and, indeed, sometimes missing it.

His caddie meekly followed at his heels while he continued his exertions, and eventually the gentleman broke one of his clubs. At this he turned round and remarked deprecatingly to his caddie: "I don't suppose there are many worse players than I?" "Oh, ay, sir," responded the caddie, "but I dinna think they play."

A Message.

This birdie's a carrier pigeon,
Who darts 'mong the clouds in the sky;
I wonder if he'll take a message
Way up, until going so high,
He reaches the gate of God's Heaven,
The home o' the good folks that die.

You see, they say mother has gone there,
An' how in the world could she know
That I'm thinking o' her every minute,
Jes' lovin' and missin' her so!
That's why I'm givin' the birdie
A message and biddin' him go.

Perhaps in God's Heaven it's lonely,
For people who loves you, you see—
And so I'm tellin' the birdie
To fly jes' as fast as can be
I know he'll remember the message;
A kiss for my mother from me!

The Grave of Cecil Rhodes.

"The grave of Cecil Rhodes, I think, is the most remarkably silent place I have ever visited," says Mr. Ambrose Pratt in his book, "The Real South Africa." "It is a serious though inspiring, sombre, forbidding and desolately grand place. While one stands gazing at the tomb scores of lizards, blue, green and gray, crawl from the crevices among the rocks and steal like brilliant phantom streaks across the tor. They are almost fearless of intruders, but they make no sound. Sometimes the distant shrilling of cicadas wounds the stillness with a faint yet piercing dagger thrust of song. But soon and always the eternal hush returns, and silence reigns supreme again. The world is full of great tombs, vast and awe inspiring, but there is neither pyramid nor tomb nor monument in all the world which can equal that of Rhodes' sleeping place in simplicity and majesty."

Minard's Liniment Cures Burns, Etc.

For Your Egg Beater.

An egg-beater will last longer and give better service if a drop of olive oil is occasionally put on the pivot at the centre of the large wheel. The cogs of the wheels should also be slightly oiled. Do not wash the wheel or the oil will all be removed.

Minard's Liniment Cures Dandruff.

To Clean Tapestries.

Pour boiling water over a handful or two of bran. Let it stand until tepid and then plunge the tapestries into it. Use no soap and do not rub, but just shake the goods up and down in the liquid. Wring them out, rinse well in tepid water and hang out in the wind. When dry, shake them well to remove the particles of bran.

The Servant Problem—who ever heard of it in the home where the housewife knows Shredded Wheat? In five minutes you can prepare a wholesome, satisfying meal with Shredded Wheat Biscuit without kitchen worry or work. For breakfast heat the Biscuit in the oven to restore crispness, and serve with hot milk; for lunch serve with [illegible] bananas or other[illegible] Canada.

ELLA'S RECOMPENSE

This, of course, was small importance to him, only it was a relief to turn from sentimental questions and reminiscences, the pocket-handkerchief business and head-tossings of his quondam flame, to her cousin's unembarrassed composure and ready intelligent talk. It never crossed his mind that Mrs. Vereker had first prepared Miss Marston's mind to view him as her kinswoman's lover, and then, when that impression had evaporated, conveyed to her the conviction that her right to him was not to be interfered with, at peril of displeasure and disruption.

This was the source of Ella's repeated rejection of Cecil's offered escort back to the pension when he had found her still reading or talking to Lyall on his return to the hotel late in the afternoon.

Of her circumstances he was profoundly ignorant. He perceived that she was in some way under her cousin's domination or protection, but that she had been so early cruelly taught to rely on herself alone he had no idea.

Her resolute independence piqued and irritated him, and the tendency of his thoughts to hark back perpetually to the whys and wherefores of her conduct, made him indignant with himself. Everything was tiresome and disagreeable, and as soon as ever James Lyall was well enough to be left he would hasten away to Scotland, where a hearty welcome and good shooting awaited him at his brother-in-law's.

Meanwhile, Lyall shook off the feverish attack which had troubled him, and absolutely spent the evening with his sister, accompanied by his chum. It was by no means an amusing soiree. Mrs. Vereker screamed at the idea of cards, and put her handkerchief to her eyes at the mention of music. So Ella produced a drawerful of photographs which they had collected during their summer wanderings, and talked very pleasantly and gently about them, Cecil joining in and getting a little more attention than usual. On leaving, Lyall, to Ella's great delight, said: "They give 'Robert derTeufel' to-morrow night, and I feel quite up to going, so I'll get places and ta

s in a domicile
e next day. She
's going where she could

not in consequence of her own declaration that the sights and sounds of worldly amusements were insupportable to her, and she was partly consoled by the idea that Colonel Cecil had accepted her invitation.

But Ella's anticipation of the evening's delight raised her far above the reach of Mrs. Vereker's tantrums.

To her the theatre was a supreme joy, and one she had rarely tasted. From the moment she took her place and sat gazing at the drop-scene, waiting with delicious thrills of expectation until the world behind it was revealed—listening, with fullest faith in the harmonies to come, to the tuning of the violins, and lost to every thing save the drama that was going on, until the dark, inexorable curtain fell—all was unmixed delight.

"How nobly you open the door!" cried Mrs. Vereker, as Ella entered, dressed for the evening, with a bouquet in her hand, and found James Lyall sitting with his sister, who had some account-books before her and was scratching calculations on the back of a letter.

"Did I? I am sorry. Good-evening, Cousin James. Are you not very early?"

"I am. I have my dinner in my own room, you know, so I came off as soon as I finished."

"Look at this beautiful bouquet, Mrs. Vereker! Herr von Reichenberg has just sent it—"

"Oh, indeed!" carelessly; "just put it in water, though it isn't much use—the flowers are mere wired things—and Captain Von Reichenberg might have saved himself the trouble. I am not to be imposed upon by the attentions of a fortune-hunter."

Ella listened for a moment with a puzzled expression, which relaxed into a smile, as she obeyed her mistress' injunctions. "May I have one or two, as you do not care about them?" she asked.

"Oh, as many as you like."

"On my word, Miss Ella, you have got yourself up very well!" exclaimed Lyall, as she proceeded to place the blossoms.

She had put on a black silk dress, the open corsage and short elbow sleeves simply trimmed with black beaded lace, which sparkled prettily against the white softness of her throat and arms. Her bright hair was simply braided, without any ornament. She looked fresh, graceful, girlish, as she fastened a bright flower or two and a few fern-leaves in an angle of her bodice.

"Why, Ella, is that my old gown?" cried Mrs. Vereker, an echo of regret in her voice. "How nice it looks! Where in the world did you get the lace?"

"I was at it on the sly, Mrs. Vereker. I braided it myself. Don't you remember telling me at Konigsruhe that I should blind myself with black work?"

"Well, wasn't it a handsome present, James?"

"Why, it's not so bad; only you must give her a spick-and-span new article next time."

"Oh, Cousin James, I am very thankful for old clothes."

"Old clothes!" interrupted Mrs. Vereker indignantly. "That is a very disrespectful word, Ella, very; I am surprised that a girl who has to earn her bread by the sweat of her brow can talk in so silly a manner."

"By the sweat of my brow! Rather by the chilblains on my feet," cried Ella, laughing. "Sitting still in a cold school-room must be worse than following the plow, I assure you I value any thing you give me very much."

"Come along," said Lyall, who had listened to this colloquy with much attention, drawing shrewd conclusions. "Come along, time is up."

"Is Colonel Cecil going with you?" asked Mrs. Vereker.

"He was still at table when I left and I never know what he is going to do. He goes moping and mooning about, and isn't like the same man he was at Toeplitz."

Mrs. Vereker cast down her eyes and sighed. "Good-bye, then," she said; "I hope you will enjoy yourselves."

Ella wrapped a large soft shawl of black Shetland wool round her and followed Lyall to the carriage.

"Hum!" said that gentleman sententiously. "There are no fools like old fools. I suspect those flowers were meant, not for Mrs. Vereker, but for Mrs. Vereker's little 'courier maid.'"

Ella laughed merrily. "If so, Cousin James, we cannot accuse Herr Von Reichenberg of being a fortune-hunter."

"We'll see about that. How tremendously these confounded droskies rattle!"

CHAPTER V.

At the door of the theatre, as if waiting their arrival, stood Colonel Cecil, and Ella, sparing an instant's thought from the treat before her, noticed how distinguished he looked in evening dress.

"Oh, you are there, are you?" cried Lyall. "I did not know you were coming."

"You never asked me to join you, so I fished for myself, and have found a place next yours."

He only greeted Ella with a bow, and they hastened to their seats.

Ella sat entranced. She had not a word, a thought, for any one. After the dice-throwing song, with its gay, reckless refrain, she clapped her hands in delighted admiration; the weird ballet thrilled her with an odd sense of repulsion, but the great scene between Robert and Isabella, admirably given, shook her nerves. Unconsciously her hand strayed to Lyall's arm, and clung to it, as if to assure herself of safety and sympathy.

Lyall smiled, and kept quite still. Cecil, who had a natural though uncultivated love of music, and knew the opera, observed her movement with a curious undefined sense of pleasure. Perhaps he liked to see the sort of mute appeal to a higher strength than her own, perhaps the fact of her turning to Lyall instead of himself suggested that she looked on her cousin as a more fatherly kind of person than his friend, who sat quite as near on the other side.

Between the first and second acts, when many left their seats to stroll in the cool corridors, Ella was startled by Herr Von Reichenburg's voice close to her ear: "And does the dear Fraulein like Eichwald, the prima donna?"

"Oh, she is charming, lovely! and what a voice!"

"Yes, I saw you were absorbed. I have been watching you from up there," pointing to the boxes, "and I was grieved and offended that you had not deigned to carry my few flowers."

"But—" began Ella, coloring, anxious, yet puzzled how to explain without betraying Mrs. Vereker's vanity.

Herr Von Reichenberg interrupted her: "Nay, I am happy now, I am more than content. You have done my poor flowers the infinite honor of placing some near your tender, noble heart." All this in German, the last words in a tone half conceited, half admiring—which made Ella feel inclined to tear the blossoms out and throw them away. Cecil looked sharply around at the intruder, but took no further notice of him.

"You see these bright colors look so well against a black dress. I am much obliged to you for thinking of sending the bouquet," replied Ella in English, whereupon Lyall nudged her with his elbow.

Von Reichenberg poured forth a few more speeches, insinuating that his thoughts usually ran in the same channel—Ella, when she spoke, always replying in English. Then the people began to return.

"You are under a double guard to-night," said the baron, rising. "I hope to discuss the music with you, dear fraulein, to-morrow," and he was gone.

"Who is that jackanapes?" asked Lyall.

"Herr Von Reichenberg. He is too large for such a term," replied Ella, laughing. Then the drop-scene rolled slowly up, and she was again lost to this present world.

But the most charming of operas does not last forever; in due time the climax was reached, and even while the prima donna and tenor were bowing and picking up bouquets, Lyall tore his young cousin reluctantly away.

"If you don't object, I'll just send you home with Cecil," said Lyall. "I have a tremendous toothache, and the sooner I get in bed the better—"

"Very well, Cousin James, if Colonel Cecil will be so kind. I am very sorry you are feeling unwell. I am afraid I am to blame for making you sit out that long opera, but you have given me great, great pleasure."

"Good night, then. I will just cut across here to my hotel, and so to roost." He shook hands kindly with her, and was gone.

Colonel Cecil had struggled into a light overcoat by this time, and was standing forward, trying in vain to secure a conveyance.

"I am afraid all these droskies are engaged, Miss Marston."

"Never mind, if you do not object, I should so much like to walk back. There is such a splendid moon to-night!"

"Walk! Yes, by all means; it is a capital idea." And Ella drawing a corner of her black shawl over her head, they sallied forth into the moonlit Platz, one side of which was occupied by the sculpture-gallery and the belt of ornamental garden before it, over which two fountains sent forth their soft murmurs and refreshing spray, looking silvery and ghost-like in the mild radiance of a glorious night. Opposite, in a deep shadow, was a large thirteenth-century church, across the front of which a road led to the bridge, the river forming the fourth side of the quadrangle.

"Let us keep in the shadow for a little," exclaimed Ella. "I saw Baron Reichenberg near the door. He might join us, and I would rather he did not."

"So should I," returned Cecil, with complete concord, as he walked erect and stately beside her.

"Is it not beautiful?" resumed Ella.

"It is; and the river must look well, too."

"Yes, lovely."

"Would Mrs. Vereker be very angry if we were to go round by the walls, instead of direct to Wilhelm Platz?"

"No, I think not, as I am with you; and it would be so delightful."

"Let us go by the walls, then," cried Cecil, a little surprised at his own eagerness, even while reflecting: "She thinks me as safe as if I were her grandfather. She would not be as ready to go with that big, showy self-satisfied Reichenberg, and very right, too."

What a dainty darling she looked, with the moonlight glancing on the golden hair that peeped from under the corner of her black shawl, a soft, earnest expression in her eyes, a religiousness, as it were, ennobling her whole face! She had not yet recovered from the emotion stirred within her by the music. How gracefully and smoothly she walked! and this sensitive, delicate creature fancied she could stand alone and face the battle of life without help! A strange yearning suddenly filled Cecil's heart—tenderest pity for her youth and inexperience, and a something more—a strong impulse to take her in his arms and tell her how sweet and charming she was. This latter tendency he immediately repressed as unworthy, as altogether reprehensible. He ought to remember that she could have been scarcely a year old when he held his first commission.

Meanwhile, they had crossed the Platz, and were ascending the long flight of low, broad steps that led to the Terrace, as the walk on the walls was termed.

Reaching the top, they paused to look at the river which rolled beneath, shimmering in the moonbeams. Cecil, after a moment's silence, began to sing in a low tone the air, "O, Fortuna."

"Ah, you love music, or you would not have remembered that air," cried Ella, turning to him. "I did not think you would have cared for it."

"I suppose you think I am just a stiff, cranky martinet, without any taste save for [illegible] my regiment?" said Cecil, smiling.

"Oh, no; not now that I know you better. The first day we met I thought you rather severe, you seemed so shocked at me, but I begin to believe that you are—" she paused.

"Pray finish your sentence, Miss Marston."

"Quite human, I was going to say."

"Thank you!" A pause.

Ella, feeling oppressed with heat before leaving the theatre, had taken off her gloves, and now laid one arm on the rough stones of the parapet, leaning over to watch the swift flowing stream.

Cecil could not take his eyes from that white round arm and slender wrist, it was so softly feminine, such a physical protest against the theory of woman's emancipation and independence.

"What a lovely voice! what grace!" exclaimed Ella out of her thoughts, as she gazed at the river without seeing it.

"You are thinking of the prima donna—of Fraulein Eichwald?"

"Yes. What a glorious gift to be able to sing as she does!—to move a thousand hearts and draw them to you with your voice!"

"Do you envy it?" asked Cecil, thinking that the rugged wall must surely hurt the arm that rested on it.

"No, not envy, but rather adore. I should be glad, not frightened, to possess such a dower."

"I am glad you do not, better any obscurity for a woman than such triumphs as Fraulein Eichwald's."

"Why?"

"Why? It is self-evident. What man could bear to see the woman he loved stared at, gazed at, and applauded and made a fuss about."

"I do not understand why you should object to it. I do not see why a woman who has a glorious voice capable of giving exquisite pleasure to hundreds of people, should keep it only for a few who are related to her. If she is good, and sings noble music which may touch the hearts of men, and lead them back to Heaven again, I do not see any reason for shrinking from publicity. Why should we disdain and distrust the applause of our fellow-creatures?"

"I should not have thought you vain and ambitious, Miss Marston."

"Ambitious! me? Ah, that is too absurd. I shall never know what ambition means; but if I had a voice like that, I should certainly sing in public."

"I am glad, as I said before, you have not. I haven't had the pleasure of knowing you long, but—it would—it would be horrible to see you [illegible] in the face of a noisy crowd of admirers. Better keep within the shelter, the obscurity of home and its affection. The less a woman has to do with the rough contact of things of life, the better for her in every way."

Ella sighed. "Suppose," she said, thoughtfully, "suppose a woman can not shrink from them; suppose she has no refuge from them; that her only means of existence lie in facing and conquering those rough, common things? Is it not a little cruel to say—to think—that she forfeits her title to tender respect because she struggles bravely to do the best she can?"

"You put it strongly. I see the force of what you say, but—"

"Oh, do not let us argue any more," interrupted Ella. "Let us enjoy this heavenly night. Look at the lovely shadows thrown by that old tower in the projecting angle! Let us forget the uncomfortable, real world for half an hour, and remember only the beauty and music we have just left—let us believe in truth and hopefulness—" She stopped.

"Complete the triad—and love," added Cecil, with a degree of feeling in his voice which surprised her.

"Ah, love, real love, includes all," returned Ella, with a frank freedom from hesitation or coquetry that shamed her companion.

(To be continued.)

That inward eye which is the bliss of solitude.—Wordsworth.

SUNDAY SCHOOL LESSON

Lesson IX., February 27, 1916.

The Seven Helpers.—Acts 6, 1-15.

Commentary.—I. An increasing church (v. 1). 1. In those days—Some time from A. D. 31 to 36. It was while the apostles were still witnesses of Jesus in Jerusalem. Multiplied—This is a strong term expressing a marvelous increase in the number of the disciples of Jesus. It was not a case of adding a convert now and then, but the number of believers was doubled or trebled again and again. There arose a murmuring of the Grecians against the Hebrews—There were three classes of Jews in Jerusalem, including the proselytes. The Grecians were Jews of foreign birth who generally spoke the Greek language. The proselytes might in a sense be classed with them. They were pagans by birth, but had turned toward the Jews, having renounced paganism, but had not submitted to all the required rites of the Jews. These also spoke the Greek language. The Hebrews were Jews who were born in Palestine and used the Hebrew language of that time. Because of the rapid increase of converts there was not sufficient superintendence in temporal affairs to provide for the wants of all, hence the murmuring here mentioned. It is probable that the apostles and their assistants did not know the Grecian Jews as well as they did the Hebrews, hence this apparent neglect. We would not infer that there was any intentional partiality shown. In the daily ministration—The work of the apostles included, in addition to preaching the gospel, the temporal care of the needy. The knowledge that some of the destitute converts had been overlooked in the pressure of labors, owing to the rapid increase in the number of the community, called for immediate action. "The property was contributed doubtless with an understanding that it should be equally distributed to all classes of Christians that had need. It is clear from the Epistles that widows were objects of special attention in the primitive church, and that the first Christians regarded it as a matter of indispensable obligation to provide for their wants (1 Tim. 5. 3. 9, 10, 16; James 1. 27)."—Barnes.

II. A plan proposed (vs. 2-4). 2. then—When information was received. the twelve—The twelve apostles were the basis of the incomplete organization and took the lead in making the necessary arrangements for the care of the needy. called the multitude of the disciples—All the converts were in consultation over the steps to be taken. It is not reason—The apostles had been commissioned and empowered to preach the gospel, and that was their first business. Under the arrangement then existing, they would be obliged to spend some of their time in looking after the temporal affairs of the community. leave the word of God—Neglect the preaching of the word. serve tables—This may mean either a money table or a table where food was dispensed. The apostles had to receive the money brought them by the benevolent, and must disburse it for the benefit of the poor. It was not reasonable that all this should fall upon the apostles. 3. look ye out among you seven men—Although we do not read here that the Lord directly commanded this course to be taken, yet it is evident that he was leading the church to adopt such a measure. There were in this Christian community those who were fitted for the work in hand. Seven men would be enough for this service. Those who were to be thus employed must have several important qualifications. of honest report—They must have a good reputation to command the confidence of the church, both those who contributed funds and those who received aid. full of the Holy Ghost and wisdom—The high qualifications of the deacons implied that even they were not to be limited to a mere manual service. To feed the poor and tend the sick in a Christian way require service to the soul as well as the body. In point of fact we find that of two of the of the seven preaching was largely the providential duty.—Whedon. whom we may appoint—The multitudes of the disciples were to make the selection, and the apostles were to set them apart for their work. 4. to prayer, and to the ministry of the word—The apostles would not only have all their time for their spiritual service, but without these taxing temporal affairs their minds and hearts would be better fitted to do effective work in preaching the word. The demands made upon them by the spiritual needs and desires of the inhabitants of Jerusalem and the throngs that were there from distant places, would tax their time and strength, but it was a satisfaction to them to preach to those who were eager to hear about the Christ whose resurrection they were proclaiming.

III. Helpers appointed (vs. 5-7). 5. The saying pleased the whole multitude—The people saw at once the reasonableness of the suggestion. Two ends would be gained by the proposed arrangement. The needy would be more carefully provided for, and the apostles would have more time and strength to devote to preaching the gospel. They—The multitude of Christians. Stephen, etc. This name, as well as the name of the other six, is Greek. It appears that the seven helpers appointed to look after the temporal interests of the needy were Greek Jews, the nationality of those concerning whom complaint was made. Stephen and Philip alone were mentioned after this in the scriptures. It is evident that the seven gave some attention to the spiritual work that was done by the Christian community. A proselyte—One who turns from one religion to another. 6. Before the apostles—The church brought the seven men whom they had chosen to the apostles. Prayed—The Christian body resorted to prayer that direction and power might be given to this new class of workers. Laid their hands on them—This act showed that they were particularly set apart for the work of the Lord, and it symbolized the impartation to them by the Lord of special qualification for their new duties. 7. The word of God increased—The apostles being freed from temporal duties, were able to preach the word more widely and frequently. The truths of the gospel were more generally spread abroad. Multiplied—The expression indicate a rapid increase. Priests were obedient to the faith—Many of the Jewish priests were exceeding bitter against the followers of Jesus, but there were some who were so affected by the labor of the apostles through the Spirit that they were converted. "The word faith here is evidently put for the Christian religion. Faith is one of the main requirements of the gospel (Mark 16: 16), and by a figure of speech is put for the gospel itself. To become obedient to the faith, therefore, is to obey the requirements of the gospel (Rom. 10. 16). By the accession of the priests also no small part of the reproach would be taken away from the gospel, that it made converts only among the lower classes of the people. Compare John 7. 48."—Barnes.

IV. Stephen persecuted (vs. 8-15). Stephen was a Spirit-filled man. While he headed the list of helpers for temporal work, he was used of the Lord to work miracles. Because of his labors opposers connected with various synagogues in Jerusalem withstood Stephen and attempted to destroy the effects of his labors. They were unable to meet his arguments and to prove his teachings unsound, and secured witnesses who would testify falsely against him. In this way they stirred up the people and the Jewish leaders, and Stephen was arrested. They brought him before the Sanhedrin and accused him of speaking blasphemous words against the Jewish system of religion. A surprise awaited those who were sitting in judgment upon him, for they "saw his face as it had been the face of an angel." "He who was accused of blaspheming Moses bears the radiance that authenticated Moses in his own face (Exod. 34. 29-35)." While the mob was raging around Stephen, he was in communion with God, and that communion left its impression upon the face of the martyr. The face is an index of the character and the emotions. There were expressed in Stephen's countenance, faith, serenity, steadfastness, charity and holy joy. This sight would be one that the persecutors of Stephen would be likely to remember.

Questions—What results attended the labors of the apostles? What complaint was made? Who were the Grecians here mentioned? What duties devolved upon the apostles? What consultation was held? What decision was reached? By whom were the seven helpers chosen? How were they set apart to their work? What class is mentioned as being obedient to the faith? Who opposed the work of Stephen? What charges were brought against him? How did he look before the council?

PRACTICAL SURVEY.

Topic—Church efficiency promoted.

I. By the division of labor.
II. By the increase of laborers.

I. By the division of labor. With multiplying numbers in the early church new dangers arose. It was more difficult to maintain the unity for which the disciples had been so distinguished. A small thing sufficed to create disturbance when latent differences already existed as they did between the Greek and Hebrew Jews. The disposition to murmur was the greatest danger the church had yet encountered. While guiding the church with inspired wisdom, the apostles usurped no authority as rulers. They claimed no distinction, only as servants of the Lord. The work had evidently grown beyond their power of personal supervision. They gave prompt attention to the murmuring which reflected on them. They did not rebuke the murmurers, neither did they justify themselves. Kindness, straightforwardness and discretion at once surmounted the difficulty. Having to deal with a people's question, they consulted the people. Their plan of procedure was equally orderly and efficient. The supreme conception of apostolic service was itself ennobled by the trust which the apostles reposed in the people. The apostles thus magnified their office. They took the most effective plan to quiet the trouble when they took the people into their confidence. Temporalities were important in themselves, and in their influence on spiritual concerns. The church had its part in choosing seven most suitable men, a work requiring good judgment and involving responsibility. The apostles had their part. They originated the plan, stipulated the qualification of the men and confirmed their election. Unblemished reputation, eminent godliness and practical sagacity were required of those selected. The deacon's office was instituted for the relief of the spiritual officers of the church. With the ordination of those seven men a new page of history opened. It brought a new element into activity. Those men belonged to that section of the church whose complaints had led to the election.

II. By the increase of laborers. The seal of divine favor rested upon this division of labor in the building up of the church and in overcoming schism. Being counted worthy to serve is ever the Christian's high honor. In that office Stephen developed his true quality of mind and heart. His spiritual and intellectual gifts, with which God had endowed him, found a wider and more public sphere. The occasion was one of special responsibility for Stephen, inasmuch as he was employed to bring into prominence the comprehensiveness of Christianity. Stephen was a pioneer in the spread of the truth and in suffering for it. He was an example of the transforming power of Christianity. The Hellenistic Jews had a very strong and ardent attachment to the law of Moses. Their dread and dislike of Stephen arose from their apprehension that Christian doctrine was in its nature destructive of their own tenets. Stephen had profound veneration for the temple and the law, yet he had an intelligent apprehension of the place which each held in the system of true religion. He believed that history revealed the hand of God, made known his character, principles and relationship to man. The narrow-minded Grecian Jews, anxious to vindicate their orthodoxy, which was doubted by the Hebrew brethren, distorted Stephen's wider and grander conception into a charge of blasphemy against him. The rabble was wild with rage while Stephen was calm and collected. Stephen had stirred into activity the furious hatred of the fiercest fanaticism. When those advocates of strict Judaism were defeated in argument, they appealed to physical force. They formed an alliance with liars, and further turned to popular excitement to compass their purpose upon the man who was seeking to lead them into the kingdom of truth and life. They were hostile to a truth they felt an utter incapacity to deny. Men who had accepted a bribe came forward to defend orthodoxy. Suffering as a Christian Stephen was not ashamed.—T. R. A.

Country Cousin—I suppose the motto of you women in New York is to eat, drink and be merry. City Cousin—No, dear; it is to eat, wink, but be wary.—Judge

Mankind's Big Debt to Fire

One of man's earliest and most important discoveries was fire. The story of the finding of fire, the gaining of knowledge about it, and the preservation of this blessing is shown by a remarkable collection of objects and implements assembled and arranged by the National museum, and now on display in the Smithsonian exhibit at the Panama-Pacific exposition in San Francisco.

To appreciate the true value of fire to the world, it is necessary to imagine an existence without fire, and lights and heat, its accompanying features, as well as the industries, arts and sciences dependent thereon.

We would at once drop back to the stone age in daily occupations and social life; houses would be unlighted at night, food uncooked, communication with the rest of the world would be broken, and only by foot or on the back of domesticated animals could we journey. Not only this, but we would be unable to renew our existing stock of tools, apparatus, supplies and everything made or fashioned with the assistance of heat. We would be carried back to the early days of the world by the loss of fire alone.

No one really knows just how primitive man came to discover fire, and utilize it; but at some far distant period, he certainly found that fire existed in nature, derived from the volcano, lightning, or friction, though he seems to have made no use of it for a long time. He may have come to know that it could be transported or transferred, having seen red-hot volcanic rock ignite dry grass, leaves, or wood, or possibly by having seen the lightning strike and set fire to trees.

He may even have obtained a light, as it were from one of these sources and carefully preserved it for years, by keeping something constantly burning. It became invaluable to him, because it cooked his food and kept him warm, as well as gave him light at night.

But it was at least a long time before he realized that he could himself create or make fire by rubbing two dry sticks together. Once discovered this process was used for centuries, before it was found that by knocking flint and pyrites together, sparks capable of igniting tinder might be struck. Somewhat later, in the Iron Age, flint and steel were substituted, a common method employed in fire making until late in the seventeenth century. A little later there came chemical inventions gave way to matches.

The use of fire also marks the beginning of artificial illumination, developed successively through the bonfire, torch, lamps, and candles, to the gas and electric lights of to-day. To fire as well, the beginnings of metallurgy, ceramics, and other arts which have attained a high degree of perfection in this century, owe their origin.

Specimens exhibited by the United States National museum show the implements used in making fire by the friction of wood, percussion of minerals, compression of air, focussing the sun's rays, and through chemistry, and terminate with the electric lighter. The series itself is preceded by three drawings: The first illustrating volcanic action, the hot lava setting fire to a forest; the second shows a forest fire ignited by the lightning; the third illustrates the primitive camp-fire and the method of conveying fire from one camp to another. The first two are presumptive natural sources from which man may have obtained fire before he knew a manner for kindling it himself.

The progressive steps of man's acquaintance with fire are three: The knowledge of fire, the means of utilizing it, and the means of preserving it. The last step is fully illustrated by the series of different apparatus and materials. Many improvements have followed the first steps in man's progress, and each method has been subject to various modifications by different peoples. What was probably the first method, that of rubbing two sticks together with the hands, was improved by reciprocating motion effected; the twirling of one stick held vertically between the palms and resting on a second lying horizontally on the ground; then by the addition of a bow and socket, followed by the weighted stick, as in the pump drill, and, finally, the machine with cog-wheels and crank as employed in Sudan. The Indians of the two Americas, Ainus, Somalis, Kaffirs, Veddahs, and Australians, were generally exponents of the simple two-stick method. The four-piece apparatus was used by the Eskimo, Hindus, and Dyaks, and the weighted drill was employed by the Iroquois and the Chukchis.

The second method is that of sawing, and the apparatus comprised a thin strip of bamboo which was drawn edgewise across a section of the same wood in which a corresponding groove had been cut across the grain, the sparks created falling through the groove upon some inflammable substance lying beneath the large section. This was also accomplished by drawing a thong of rattan across a stick in which a longitudinal slot had been cut partway through, the sparks igniting some tinder placed in the slot. These methods were used by the Malays and Burmese, as well as some other races.

Fire was also made by ploughing, that is, a thin piece of wood was forced along a narrow slot cut lengthwise in a larger piece until the friction ignited the tinder. This system was evolved by the Polynesians, the Australians, and the Papuans.

Another, and more advanced system, of striking fire was by percussion, first employed through the use of flint and iron pyrites, or stone containing iron, by the Eskimo and Northern Indians, and later superseded by flint and steel, a custom which became quite general and remained popular for many years.

The collections of the museum, which include several examples of different forms of apparatus under the above subdivisions, are supplemented by examples of more recent devices. One is a tinder pistol, an English adaption of the flint and steel in a gunlock, which threw sparks on some tinder. What was known as a fire piston was made by the Siamese and Malays. This comprised a cylinder of wood with a closely fitting wooden piston, a smart thrust of which kindles tinder within the cylinde

We are able to recall
effort only a comparat
our innumerable memor
repeated experiments an
of common knowledge se
cate that under certain co
experience that we may hav
be recalled by us. As one
gist puts it:

"Whatever has gone into the mind can come out of the mind."

Obviously there must be a region of the mind wherein are stored these multitudinous memory images. It is to this region that psychologists refer when they use the term, "the subconscious."

But the subconscious is not only a reservoir for the storage of memory images. It is also a workshop for their manipulation, so that on occasion they may emerge, not simply as they went in, but in pleasing and often remarkable combinations.

This function of the subconscious is exemplified in many ways, from the picturesque and vivid dreams of sleep to the "inspirations" of men and genius.

In its hidden depths, it would seem, the mind is perpetually active. It is not content to hold its memory images in inert form. It must fuse and collate them, choosing for its purpose those memories in especial that are most closely linked together in a network of associated ideas.

That is why one man's subconscious is more serviceable to him than another's.

Through conscious study and reflection he has packed the secret chambers of his mind with a mass of memory images relating to one specific subject or subjects, hence naturally linked by association of ideas.

And just because he consciously focuses his attention in this direction he sets his subconscious working for the same end with the special material his conscious thinking has accumulated for it.

In a word, there is really nothing occult or mystical in the subconscious. It is simply a convenient term to designate one phase of our mental life.

Tommy—Pop, what does the Bible mean when it says, "Having eyes they see not, and having ears they hear not"? Tommy's Pop—Chaperons, my son.

HONESTLY BELIEVED
HE WAS GOING INTO
CONSUMPTION.

DR. WOOD'S
Norway Pine Syrup
CURED HIM.

Mr. Frank E. Anthony, 69 Ellen Street, Winnipeg, Man., writes: "Having taken several bottles of Dr. Wood's Norway Pine Syrup, during the past few weeks, to relieve a chronic cough and general throat trouble, allow me to express my unbounded satisfaction and thanks as to its sterling qualities. A short time ago I became suddenly subject to violent coughing fits at night, and directly after rising in the morning, for about an hour, and found I was gradually losing weight. All my friends cheerfully informed me that I looked as though I were going in consumption, and I honestly believed such was the case. However, after having taken several bottles of 'Dr. Wood's' I am pleased to relate that the cough has entirely disappeared, along with all the nasty symptoms, and I have since regained the lost weight. I have no hesitation in recommending Dr. Wood's Norway Pine Syrup as a sure cure for all those troubled in a like manner."

When you ask for "Dr. Wood's" see that you get what you ask for. It is put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

His Face Was Covered
With Pimples.

Pimples are not a serious trouble, but they are very unsightly.

Pimples are caused wholly by bad blood, and to get rid of them it is necessary to purify the blood of all its impurities.

Burdock Blood Bitters has made many remarkable cures; the pimples have all disappeared, and a bright, clean, complexion left behind.

Mr. Lennox D. Cooke, Indian Path, N.S., writes: "I am writing you a few
s to tell you what Burdock Blood
ters has done for me. Last winter my
ce was covered with pimples. I tried

TOWN AND COUNTRYSIDE

News From the Neighboring Towns and Villoges Written for The Telescope by a Staff of Live Correspondents.

GLAMIS

On Tuesday, Feb. 15th, 1916, the marriage took place of Miss D. Myrtle Carrutcers, daughter of Mr. and Mrs. J. Carruthers, "Walnut Grove" Muncey, Ont., to Mr. Fred O. Atton of Gallivan, Sask. The groom is well known here having lived here up till 10 years ago and also visited here last month at the home of his uncle, Jos. Cunningham. The young couple have the good wishes of his many friends here.

Mr. Thos. McIntosh Jr. of Stratford is visiting his parents, Mr. and Mrs. Thos. McIntosh.

Mr. Lorne Carr of 14th con. has accepted a position in the Royal Bank and went to Kincardine on Monday.

Mrs. J. K. McLennan, and Messrs. Duncan and Hector McLennan assisted on the programme at the "At Home" in Tiverton on Wednesday evening given for the Soldier Boys.

The privates in training at Tiverton spent the week-end at their homes here. They have all got their uniforms and look good in them.

Mr. and Mrs. Macdonald of Ripley spent the first of the week with his sister, Mrs. Chas. McKinnon.

Mrs. Peter McLean was called to West Superior, Wis., last week owing to the death of her sister, Mrs. Ross.

Mr. and Mrs. Alex. McSweeny and family of 2nd con., Bruce, have taken up residence in Mr. Gordon's house here in the burg.

There will be a patriotic entertainment in St. Paul's Church on Friday evening of this week. Major Osborne, a returned officer, and also Mr. McKerracher of Paisley will assist on the programme. The soldier boys from Tiverton will be here. Everybody come and help to encourage the boys.

Mr. John Ferris has been on a visit to friends near Proton.

Quite a number from here attended the C. O. F. box social and dance in Pinkerton on Thursday night.

Mr. James Thompson delivered a team of horses to Mr. Wm. Smith of Kinloss on Friday. They will go in his car to Sask.

Miss Lizzie Ferris is home from Toronto on a visit.

Mrs. John Kitchen and babe are visiting her sister, Mrs. Fred Griffith, of the 5th con., Kincardine.

Mr. Dave Robertson had the misfortune to hurt his hand on Friday. He will be off work for a few days.

Patrick O'Reilly's hay pressing outfit from Eden Grove is working in this locality.

Mr. Joseph Wrighton made a business trip to Kincardine on Friday.

BORN—To Mr. and Mrs. Alex. Gilchrist, con. 2, Bruce, on Saturday, Feb. 19th, 1916, a son. Congratulations.

SOLWAY

The Red Cross Tea given by Mrs. Julius Holm at her home here was well attended and the program by local talent was much enjoyed by all present, on Friday afternoon.

Miss Bernedetta McGarrity who spent the past month in Toronto arrived home Friday last.

Mr. Findlay from Ottawa attended the funeral of his sister-in-law here on Thursday of last week.

Mr. and Mrs. Walter McGregor from Chesley spent Wednesday at their cousin's Mr. Michell's prior to leaving for their home near Gull Lake on Monday.

Mr. and Mrs. Alex. Stroeder from the South Line spent Sunday at Mr. John Stroeder's.

Mrs. Petray is on a extended visit at the home of her nephew, Mr. Walter Findlay.

BORN—To Mr and Mrs. Malcolm McIntyre a son on Feb. 21st.

MAPLE HILL

Judging from the way things went at the sale on Tuesday, "war times" does not mean hard times to the farmer.

Our polling division (No. 3,) has so far only furnished one recruit. Our boys are undecided as to whether their duty is behind the gun, or behind the plough.

Mr. Wm. Sickel has hired James McNaughton as assistant engineer at the power house. Jim is a good mechanic and we think is the right man in the right place.

Miss Edna Hamilton of Paisley has has been visiting her sister, Miss Jean, the South line school teacher.

A large number of our people attended the box social at the South line, and report having had a very enjoyable time.

Miss Isabelle Gowanlock of the Walkerton Business College is spending a few days at her home here.

Mr. Wilfred Voelzing left on Tuesday morning for Alberta. He is taking a car load of horses out for Peter Kerr, of Hanover.

Mr. Jno. Jagelewski is visiting his brother Tony, in Cleveland.

Mr. Herb. Cunningham has bought a portable sawing machine.

Miss Grace Tanner spent Sunday with Mrs. August Schilling.

Mr. Oliver Inglis and Mr. Robert Gowanlock of Deloraine, Man. visited friends in Allan Park this week.

Mr. Wilford Felzing leaves this week for the West.

Mrs. Norman Brockelbank has been on the sick list with an attack of La Grippe.

The Red Cross Box Social which was held in the Foresters' Hall under the auspices of Girls Aid was a success in every way. The hall was packed and every one listened to a good program of recitations, choruses and solos. The proceeds of the evening amounted to $55.00

GREENOCK

Mr Linus Bruder had a very successful bee last Monday, hauling wood to Formosa.

Mr William and Miss Ida Pinkerton took in the Box Social in Pinkerton Thursday night.

Miss Pauline and Marie Forsythe went to Toronto last Tuesday.

Norman and Chester Cunningham were around the burg last Saturday bidding good-bye to their friends. Chester left on Monday for Galt and Norman left on Tuesday for Forward, Sask.

Jack and Olive Schurter took in the Zimmer and Antony wedding near Teeswater last Tuesday.

Miss Pinkerton was on the sick list for a couple of days last week but is able to attend her duties again.

Barney Kraemer is working for Mr. John Walter near Chepstow for a couple of weeks.

We wonder where the big sleigh-load went Monday night.

PINKERTON

The Box Social which was held under the auspices of the C. O. F. Lodge here on Thursday evening last was a success in every way. A full house to a short but excellent program. After which the remainder of the evening in dancing. The proceeds amounted to $83.00.

Mr. and Mrs. Colin More returned to Manitoba on Tuesday after spending a couple of months at Mr. Jos. Rennay's.

A number from here attended the Paisley Rink on Saturday evening.

A good number of the people of Pinkerton and vicinity took the opportunity of hearing their former pastor, Rev. Mr. Mason of Harriston at Cargill on Sunday. A number also attended the Tea Meeting on Monday evening.

Mr. Willie Coswell left on Tuesday for Success, Sask. with a car load of horses.

A sleigh load of young people attended a dance at Mr. T. Brick's on 18th, Con. on Tuesday evening of last week.

MILDMAY

The sad death of Viola, daughter of Mr. and Mrs. J. T. Kidd, occurred on Friday last, death being due to valvular trouble of the heart. The funeral took place on Monday afternoon. Service was held in the Presbyterian Church by Rev. Mr. Perdue of Walkerton, after which interment was made in the Balaclava cemetery.

Mr. and Mrs. John Ripke of Bruce Township, were visitors at Mr. Chas. Wendt's this week.

The hockey match between Wingham and Mildmay on Friday night last, proved to the best game of the season. It was fast, clean and strenuous. At the end our boys were ahead the score being 7—5. Mr. McLaughlin of Chesley refereed the match.

Pte. Tyrwhitt Kidd of Toronto was a visitor in town this week, on account of the death of his sister.

Corp. Ray Keelan, Galt, was in town for a few days this week.

Rev. Capt. Fenton of the Brantford Battalion, occupied the pulpit of the Methodist Church at both services, preaching in uniform. At the evening service he spoke about the battle of Ypres and how the Canadian soldiers acquitted themselves. Everyone was delighted with his remarks.

Miss Dora Wendt and Mrs. Reba. Schwalm left on Saturday for a visit to Guelph and Toronto.

Mr. Chas. Pletsch was slightly injured in last Friday's match, receiving a cut above the eye with the puck.

Mr. William Pomeroy has sold his 200 acre farm on the town line to Mr. Barhardt Bender, the price being $11,000.

Mr. George Mackie is spending a week with Stratford friends.

The Public School was closed on Monday owing to the death of the Principal's daughter, Viola.

MALCOLM

The Malcolm Club of the united farmers of Ontario, held their regular monthly meeting on Monday, the 14th of Feb., Routine business such as settling accounts, ordering grain seeds and sugar, and discussing ways and means of shipping produce and stock was disposed of.

P. W. Fisher and John O'Neill who were appointed representatives from this club, to the annual meeting of the organization in Toronto, gave very interesting and profitable reports of business transacted, creating enthusiasm and predicting a bright future for organized farmers after the successful ending of the war.

A very pleasant evening was spent at the home of Mr. and Mrs. Geo. Fiddis 12 h Con. Brant, on Friday evening, the 18th of Feb., the occasion being the presentation of an address, also a signet ring and purse of gold to Mr. Gordon Fiddis, youngest son of Mr. and Mrs. Fiddis, who has enlisted with the 123rd. overseas Battalion at Toronto and is home for a few days recuperating after spending a few weeks in the hospital where he was confined with measles. The evening was spent in patriotic addresses by Geo. Lamont, D. Willoughby, W. G. McCallum, Alex. Robertson and M. A. McCallum. Music was provided by a chorus of young ladies and Messrs Jas. Schwindt, McCartney and Prockmow sang and gave instrumental music galore. After the singing of "He's a jolly good fellow"; "Auld Lang Syne" and "God Save our King", with three cheers for the King and for Gordon Fiddis the company dispersed for home with mingled feelings of regret and pride that another of our number has joined the ranks in defence of home and country.

The following is a copy of the address presented to Mr. Fiddis.

Mr. Gordon Fiddis

Dear Sir:—

Though this is war time, those that have gathered here to-night are not foes but friends. We heard with admiration and yet with regret, that you had offered yourself for the defence of your country. We admire the patriotic spirit that led you to resign a good position and go to the defence of the Empire. We regret that there was any necessity for such action. We are glad to see you well again after your sickness and hope that when the war is over, you may return to us none the worse for the hardships you will have to endure.

We desire to show our appreciation of your conduct by presenting you with this ring and purse of gold as a slight token of our regard. We have no delight in war but we are proud that our young Canadians are rallying to the help of the empire in her time of need. Our prayer is that the Supreme One may strengthen you for the conflict and preserve you in danger.

Signed on behalf of the subscribers
D. Willoughby,
Jas. Schwindt,
M. A. McCallum.

Township of Brant, Feb. 18th, 1916.

SOUTH LINE

The Box Social given at S. S. No. 4, on Friday night was a great success. The receipts of the evening totaled $72.55, leaving a balance after paying expenses, of $68 for the Red Cross. The attendance was splendid considering the fact that there were other counter attractions the same evening, including the carnival at Walkerton and the big reception at Hanover. Chas. Jeurgens occupied the chair in good style and Mr. Geo. Helgartner of Hanover made an excellent auctioneer.

The program given by the young people of the section and the school children was first class. A recitation by Mr. Harry Threndyle, a violin solo by Mr. Chas. Linus of Saskatoon, Sask, and a flag drill by the children instructed by Miss Hamilton, were among the best numbers.

OTTER CREEK

The farmers here are busy hauling wood to town this last week.

Mr. and Mrs. Harry Hall intend leaving for their home in Nalcomas, Sask., on Wednesday, after spending the past months with their parents. Mr. and Mrs. Henry Wolfe.

Mr. and Mrs. Emerson Schumacher spent Sunday with their parents, Mr. and Mrs. Philip Gress.

Mr. and Mrs. Noah Oppertshauser of Mildmay, paid their last visit with friends here, before leaving for their new home at Listowel.

Miss Mary Dickison from the 12 con. was united in marriage to Mr. Roy Teglar from Edmonton, Alta., on Tuesday last. They intend leaving for their future home in Edmonton this week. We all extend hearty congratulations to the young couple.

Miss Lillian Gress intends leaving for Hanover this week after spending some time with her parents here.

Mr. Peter Wolfe of Clifford spent Sunday with friends here.

FOR SALE

The property of the late Joseph D. Taylor, situated on the west side of Yonge Street, south of McGivern St. in the town of Walkerton. On the property there is a brick house with eight rooms with town water, also a barn with stone foundation, accommodation for 8 horses and 4 cattle; water in barn. Poultry house and pig pen. 12 acres of good land, all available for crop, drained; 1 acre in orchard, young bearing trees, apple, plum and cherry. For particular apply to Joseph D. Taylor, R.R. No. 2, Eden Grove or to Geo. D. Mackay, Walkerton.

C. NELLES, Pres. J. DUFF, Sec'y

FOR SALE

Part of lot 21 and 23 Concession 3, S. D. R., Brant Township, containing eight acres. There is a brick house and a stable and driving shed on the premises, also good orchard and hard and soft water. This is the property belonging to the late James Coulter, and is about one-half mile from Walkerton. Immediate possession will be given. For particulars apply to Mrs. Coulter on the premises or to A. Collins, Walkerton.

Mechanics' SHOES

We call the working men's attention to our excellent shoes built purposely for the mechanic. Nothing in them but good solid leather. Heavy durable soles with uppers of heavy calf or kangaroo. Nothing omitted that would in any way add to their durability, and while they are built for hard usage they are built to be comfortable. They are good looking and moderately priced.

NEWS OF CARGILL.

The Telescope Correspondent Sends a Spicy Budget.

Dr. Bradley of Berrie, was in our burg on Thursday.

W. Bro. W. J. Loughleen D. D. G. M. paid his official visit to Teeswater on Thursday evening. He was accompanied by Mr. Roy Hood.

Mr. Joseph Clancy shipped 2 cars of cattle to Toronto on Saturday.

Mr. Frank Smith of Walkerton is the new teller in the Royal Bank. Mr. Kirvin leaves to-day to spend a week in Guelph and Toronto before going in training at Walkerton.

A number from here attended the funeral of the late James Alexander at Eden Grove on Thursday last.

The ice harvest has been completed for this season and we should hear no complaints of soft butter or warm beer during the coming summer.

Mr. Peter Rosenburg of London, spent Sunday at Louis Bester's.

Mr. Fred Baldson entertained a number of his gentlemen friends to a euchre party on Monday night and all report a good time.

Mr. Norman and Miss Eleanor Jordan returned on Saturday after spending the past month in Fergus and Grand Valley.

Pte. Pete Loughleen of the 71st Batt. Galt, spent the week-end with his parents, Mr. and Mrs. Jno. Loughleen, Sr. He expects to cross the pond shortly.

Mr. Thos. Mahoney and Miss Emma Loughleen were in the County Town on Saturday.

Mr. and Mrs. Geo. Welsford of Guelph are spending the week with friends here.

Mr. W. D. Cargill M. P. P. left for Toronto on Tuesday, to attend the opening of the Provincial Legislature.

Mrs. J. MacFeiggan who has been visiting in Elmira N. Y. for the past few months returned on Monday.

Mr. John Baldson of Pickering, spent a few days with his brother, Fred.

Rev. W. J. Fiddes was in Sheffield on Sunday and his brother Rev. H. Fiddis occupied his pulpit here on Sunday.

Mr. and Mrs. Felix Scharbach, who spent the past week with the former's brother Joe, return to Young, Sask., to-day.

Miss Groves of Hamilton, spent the week-end at the parsonage.

Miss Margaret Schnitzler returned on Tuesday, after a week's visit in Hamilton.

Corp. Jas. Hamilton, who has been assisting in recruiting here for the past two months, has gone to Walkerton to take a course in N. C. O. He did valuable work here and the large number of recruits secured is evidence of his influence.

A number from here are attending the sale of pedigreed cattle in Walkerton to-day.

Mrs. Norman Jordan was in the County Town on Tuesday.

Mrs. I. Abell of Dunkeld visited in the village on Tuesday.

The Times last week made some reference to the bachelors preparing for field kitchen work, but presume it will be mostly kitchen and no field.

Lieut. Bland is now recruiting officer at Mildmay. Privates Webb and Zettle are helping him.

Mr. Richard Fraser came up from Hamilton to attend his sister's wedding on Thursday last.

Steele Brigg's seeds, the purest, cleanest and most reliable. We sell them. Goode & McKay.

Ammann and Wisler, fresh from the jungle, have arrived. Don't miss seeing them, Friday night.

Red Cross Flour $3.00 per bag, Peerless Pastry Flour $2.75 per bag, at all first class grocers or at the mill.

The "Cat and Mouse" scene at the Minstrel Show on Friday night, will certainly amuse everybody.

Mr. Barry Galbraith of Shelburne who is well known here, has joined the 16th battalion band.

Rev. M. J. Warner of Woodstock, formerly pastor of the Walkerton Baptist church, has enlisted.

Sylvester Reinhardt, Neil Alex. McNeill and Thos. Gordon Connell are the latest recruits to enlist here.

The ice harvest has been underway all week and it is expected that everybody will be supplied by Saturday.

Mr. Chris. Kolpine, agent for the Dodge and Gray Dort autos, now has the latest models of these classy cars on exhibition.

Mr. and Mrs. Marshall Anderson, who have been visiting Mr. and Mrs. E. Gibson, left for their home at Calgary on Tuesday.

Rev. Thos. Wilson was taken to the Hospital on Monday with a heavy cold which is hoped will prove nothing worse than the grippe.

Miss Ada Fraser has gone to Ashland, Pa., where she has taken a position as dietitian at the Fountain Springs State Hospital.

Sergt. K. Mathieson who has just returned from the Machine Gun School at London, is back on instruction duty at Kincardine.

Rev. Mr. Rock will preach anniversary sermons at Port Elgin on Sunday. His work here will be taken by Rev. Mr. Barker, of Port Elgin.

Copies of "Max of the North", a great Canadian story by "Magnus A. Bruce" (Father Magnus Schumacher) may now be had at McCrum's bookstore.

Mr. Will Lindsay, of the Bank of Commerce, Peterborough, visited his old home here on Sunday. Will has joined the Brockville Overseas Regiment.

Nine men of the Walkerton Company are doing recruiting work over at Ripley this week. The party consists of:—Sergts. G. L. Wilson and D. G. McKerracher; Corps. G. M. McCarter and J. Hamilton: Ptes. H. B. McDougall, J. H. Rennie, B. McKinnon, Wm. Weldner and J. Henderson.

Mr. R. N. Player returned from Philadelphia Friday night. He found his brother considerably improved although his general condition is very poor.

Call and get fanning mill sieves for red or alsike clover and all kinds of grains. Orders sent by express. R. H. McKay, manufacturer, Walkerton, Ontario.

Are you interested? Sugar gone higher again this week, the future tendency for sugar is upwards. No decline is looked for so now is the time to buy. Goode & McKay

Mr. Peterson M. P. P. of Sask., who is involved in the recent bribery charges, is a nephew of the late Judge Kingsmill of this town. Mr. Peterson denies absolutely the charge against him.

Just as a man is judged by the company he keeps, so is the grocer by the goods he sells—always "Quality goods" adds to our reputation as a seller of dependable goods. The Grocers, Walkerton, Goode & McKay.

How good it smells! Yes and it looks good too. There is no doubt about the goodness of Bread baked from Red Cross Flour. We sell it—your money back if not satisfied. Goode & McKay.

A card from Pte. "Gabe" Haas to his father, Mr. Alex. Haas, states he is well and enjoying some lovely weather and had just been over to see Ray Hyslop who had been drafted and would likely be off to the Front in a week or two.

Mr. and Mrs. J. B. McGregor's three children have been sick with a combination of measles and whooping-cough. Their little daughter, Mary, has been very seriously ill, inflammation of the lungs having set in, but she now shows some improvement.

The following men leave this week to take a course in bayonet and gymnastics at Montreal;—Lieut. J. C. Little of Teeswater; Sergt. J. D. Reichenbach of A. Co.; Sergt. A. D. Mathieson of B. Co.; Sergt. H. Gregg of C. Company; Sergt. D. G. Ross of D. Co.

Mr. and Mrs. Robert Harrison suffered a sad loss in the death of their bright little babe yesterday morning. The little fellow, who was just thirteen months old, was seized with a combination of measles, whooping cough, and pneumonia. Much sympathy is felt for the parents.

Lieut. Horace Parker of Paisley, will be one of the two machine gun officers of the 160th. He was formerly a lieutenant in the 32nd Regt., but went as a private in the 71st. He has just completed a second course at London and has complete qualifications for his new position.

Mr. W. H. Adams, gen. secretary of the Ontario Reform Association, who had charge of the Campaign in Peel was greatly pleased with the result. The Globe says: — Mr. Adams praised the efforts of the local workers and aid given by independent Conservatives who had risen above party affiliations and condemned the actions of Mr. Fallis. "But for the latter we could not have won," said Mr. Adams. "They must have turned out well in support of Mr. Lowe and others had remained at home."

+ + +

A Pretty Wedding

A quiet but pretty wedding took place at the home of Mr. F. J. Fraser on Thursday last at one o'clock, when his daughter, Louise Charlotte, was united in marriage to Mr. William H. McNeill of the South Line, Brant. The ceremony was performed by the Rev. D. A. Walker, in the presence of the immediate relatives. The bride, leaning on the arm of her father, entered the drawing-room to the strains of Lohengrin's wedding march played by her sister, Mrs. Vernon Johnston of Stayner. Upon the conclusion of the ceremony and after partaking of a tempting repast, the young couple left on a short wedding tour. Upon their return, they will reside at the groom's farm in Brant.

On Sunday evening after church, a free illustrated lecture will be given in the Town Hall by Mr. T. H. Race, Field Secretary of the National Sanitarium on "A Winning Fight Against the Great White Plague." Mr. Race is a very able speaker and has something worth while to say.

Capt. R. A. McLean Chadwick, a former officer of the 32nd. Batt., arrived this week from Saskatoon and joined the 160th Bruce Overseas Batt. Capt. Chadwick, who is an old Teeswater man and former signalling officer of the County Regt., will be in command of Company D. Capt. Chadwick is one of the most qualified officers in the Regt.

+ + +

Walkerton Boy Wounded

Mrs. Beachey had a post card from Belgium on Tuesday announcing that her son, Pte. H. Van Hatten of the grenade company, 21st Batt., Second Canadian Contingent had been wounded in the left elbow on Feb. 11th and is now in the hospital. The last word received from him was a letter to Donald Wallace, dated Feb. 6th, in which he stated that he was quite well. This is his first mishap after eight months in the trenches. Mrs. Beachey has given two other sons to the Service, both of whom are in England, Henry Van Hatten, who was transferred from the 34th to the 23rd at Sandling Camp, and Pte. Chas. Van Hatten with the Canadian Artillery at Shorncliffe.

+ + +

Death of Mrs. Waechter

Death came to the home of Mr. Andrew Waechter, a well known Brant farmer, on Sunday under distressing circumstances. In the removal of the young wife, six small children, the eldest fourteen years of age, the youngest two months old, were left motherless. Two days later the babe followed and was laid in the casket beside the remains of the mother. At the same time Mr. Waechter was confined to his bed as a result of an accident in Truax's millyard two weeks ago when he had several ribs fractured, and is still unable to move. The late Mrs. Waechter, whose maiden name was Elizabeth Montag, was in her thirty-ninth year. She was a woman devoted to the home and family above all things and highly thought of in the community. La Grippe was the cause of her demise. The funeral which was held on Wednesday from the R. C. Church was largely attended, the whole countryside turning out to show their respect and sympathy for the departed.

DIED

McINTYRE—In Brant, on Feb. 25th, the infant son of Mr. and Mrs. Malcolm McIntyre.

GRIERSON—At Bruce County Hospital, Walkerton, on Friday, Feb. 24th, the infant son of Mr. and Mrs. Arthur Grierson.

GREAT PATRIOTIC WORK

Walkerton I. O. D. E. Has Made Up Nearly 60,000 Articles for the Soldiers—Officers Elected for the Coming Year.

The annual meeting of the Walkerton Chapter, I. O. D. E., was held in the Town Hall on Saturday, Feb. 19th, when the following officers were elected:—

Regent—Miss Shaw.
1st Vice Regent—Mrs. J. J. Wisser.
2nd Vice Regent—Mrs. Benton.
Secretary—Miss McGregor.
Treasurer—Mrs. Skelton.
Standard Bearer—Mrs. Krueger.

The Regent in her address spoke of the way the great struggle for the freedom of the world touches each one of us as nearly all have one or more dear ones taking part in the fight. And she honored the men in khaki, each one of whom as he dons the King's uniform, realizes that his life may be demanded of him. This war has developed a moral force hitherto unknown, and the Regent asked the women to consider how the work they were doing, compared with the sacrifice these soldiers—many of them mere lads—are making for the Empire.

The reports showed much work accomplished and donations to many funds. Contributions have been made towards the Belgian Fund, the Tobacco Fund, the Motor Ambulance Fund, given by the Chapters of this military division, horse motor ambulance, British Red Cross, Christmas Fund of War Contingent Association, annex to King and George and Queen Mary Hostel for Canadian soldiers on leave, and support of a war prisoner. In addition to the money sent by the chapter for the Trafalgar Day Fund, the sum of $77 the proceeds of a carnival was handed to the Walkerton Trafalgar Day Committee, the Chapter has, besides, given a supper for the Walkerton boys of the 34th Battalion, sent 4 barrels of jam to the soldiers, sent gifts to the Walkerton boys in the trenches, and opened a club room for the soldiers of the 160th Battalion. The Chapter is very grateful to all who have helped to make the Club Room comfortable. The contributions include a gramophone, 3 tons of coal, reading matter, and many other useful things. The Executive reminded the members that this work is a national one, and a work in which one woman should be as vitally interested as another, and the Committee urged that ALL of the 174 members should become active ones, and not have the whole fall on a few.

Since the Chapter began the work of making surgical supplies, it has used to date 9,000 yards of gauze, and 273 lbs. of absorbent cotton at a cost of $251.92. This material has been made up into 3,276 large pads, 14,508 small pads, 10,008 compresses, 28,208 sponges, in all 54,000 articles. Also there has been made 1,932 roller bandages, 102 wash cloths, 16 pillow cases, 2 towels, 3 sheets, 12 bed rings, 26 bed pads. The following field comforts have been shipped 832 pairs of socks, 234 shirts, 69 pairs of wristlets, 121 scarves, 6 caps and 5 cholera bands.

'TWIXT LOVE AND PRIDE

CHAPTER I.

"Of course, my dear George, if you wish very much to have these people here, they must be asked," said Lady Caroline, regarding her husband attentively through the handle of the teaurn. The children had just left the room, so she thought it a good opportunity of finally learning his wishes on this subject without the intervention of Mildred's rather vehement opinions. "It is a dreadful nuisance," she said—"and I don't suppose they are the very nicest people in the world for the girls to know; but, if you see no way out of the difficulty, of course there is nothing more to be said."

"Nothing: it cannot be helped now, at all events," Sir George returned, running his eyes ruefully over a letter which he held in his hand. "He was an old schoolfellow of mine, you know; and, when he expresses a wish to come and see me, what can I do but write and say how welcome he and his family will be?"

"Exactly so," assented Lady Caroline, "but it is a horrible bore for all of that. And how they are to be amused is more than I can tell you. There is a son, is there not, and a daughter?"

"Yes, a son and a daughter. As to amusing them, the young gentleman will hunt, I suppose, and probably ruin one of my best hunters before he leaves; and the girl—oh, I should think she will do very well!" said Sir George, cavalierly. "Mildred will manage about that, and will get some fellows to meet her."

"How did he make his money?" Lady Caroline asked, presently, and then began to think with dismay of what the whole country-side would say. It was eminently aristocratic, the countryside, and never had it as yet introduced within the sacred boundaries of its circle such a horror as a family polluted by trade. Lady Caroline, it appeared, to her own discomfiture, was on the fair road toward being first to open the guarded gates to admit this horror, and very "hard lines" the poor woman felt it to be.

"Cotton," answered Sir George, briefly; and then indeed his wife felt that the cup of her affliction was full.

"If it only had been wine!" she said, hopelessly. "I am sure I don't know what the Deverills will think; and of course the girl will be unbearable. Besides"—with a sigh—"it will be such an additional expense."

"True," returned her husband, and the lines laid by care became more clearly defined; "but, as I said before, darling, it cannot be helped, so we must only make the best of it."

But Lady Caroline could not "make the best of it" just then and so went out of the room to consult with Mildred, of whose sympathy she was certain, the girl being more opposed to the coming of their visitors than even she could be.

About twenty-seven years before, Sir George Trevanion—then a young man of about twenty-one or so, only just fallen in for his title, and the paltry four thousand pounds a year accompanying it, by the death of his uncle—made up his mind to join a party who were off to the "Land o' Cakes" for fun and grouse shooting. Here he saw fit to fly at higher game than his companions did, having fallen head-over-ears in love with the second daughter of a poor Scotch lord, who had not so much as a "bawbee" to divide between his sev[illegible] and endeavored manfully [illegible] Lady [illegible] to forsake he[illegible]ive land and return with him to his Devonshire home.

Being handsome, tall, good-humored, and altogether as nice a young man as one could meet, it presently came about that Lady Caroline, in bed one night, under cover of the friendly darkness, confided to her younger sister, who was a most delightful girl, although she had red hair, that in her opinion George Trevanion was the dearest fellow in all the world—the only man she should ever care for—that, if he did not ask her to marry him, they might dig her grave in the nearest churchyard without any further delay, and that he had said to her that evening in the garden so-and-so and so-and-so, and ever so many other things.

Whereupon Lady Janet—who really was a most delightful girl, and fully deserved the man she got afterward—declared that there was not a doubt in the world but that George Trevanion wanted only one word from Carry to make him propose in due form, and that she—Lady Janet—had long seen how desperately in love the poor dear fellow was, and that she clearly foresaw now how her darling Carry would soon be taken miles and miles away from her into a distant land—which pitiable ending to her prognostications only seemed to raise the spirits of the ungrateful Carry, who went to sleep immediately and dreamed all sorts of rose-colored dreams.

She acted on her sister's advice, however next day, and, having given young Trevanion the "one word" needful, was informed by him on the spot that she was the "light of his life" and the "darling of his heart"; he also afforded her the comfortable assurance that, if her father refused his consent—which was the usual thing for all fathers to do, he believed, being hard-hearted—he would certainly either run away with her in a coach-and-four in open daylight, or put a period to his existence.

It turned out that nothing so awful as the latter contingency was at all necessary, as old Lord Monkly was a shrewd old nobleman, and considered a bona fide baronet with four thousand pounds a year by no means "a thing to be sneezed at." So he gave his consent, after a decent show of hesitation, together with a very sincere blessing, and an inward prayer that Providence would very soon again throw just such another George Trevanion in his or rather one of his daughters' path. And so young Trevanion "won his Genevieve, his bright and beauteous bride," and took her back with him, a very willing companion, to Kings Abbott, in Devonshire.

After a little time—as it appeared to her—there came a letter to Janet Monkly, telling of an heir born to the Trevanions. "He is the bonniest boy in all England," wrote his mother proudly. And then, as the years went on, came many other letters, all containing news of either a son or daughter born to the happy parents, until at length Sir George discovered one morning—quite accidentally, of course—that he was the father of four as handsome boys and three as pretty girls as any man could boast. About the same time, also, he made a second discovery—not quite so pleasant a one, perhaps, as the first—to the effect that he was by no means as rich a man as he had been. Four thousand a year and a young wife is a very different thing from four thousand a year when the young wife has brought into the world seven healthy children and they were all healthy, bless them!

First there was Charles, the heir before mentioned, a great, tall, good-looking fellow, with a careless, sweet temper—"as like his father at that age," said his mother, "as ever a boy could be." He was about twenty-six at this time, and held a commission in a cavalry regiment. He was a kind, lovable, not over-brilliant young man, and as great a favorite with his brother-officers as he was with everybody else who knew him. After him came Florence, who resembled nobody in particular, and had married during her first season—very desirably indeed—a Mr. Talbot, a very prepossessing appearance—when he had any expression on his face, which was seldom—and the owner of considerable property about twelve miles from King's Abbott.

It was always a great source of comfort to Lady Caroline's anxious mind that Florence had "got off" so well before Mildred was old enough to make her bow to the world. Had Harry Talbot dallied in his love-making for two years longer—as some young men are in the habit of dallying—instead of coming to the point at once—like a much-to-be-applauded gentleman, as he was—Lady Caroline would not have answered for the consequences. Mildred, her father's darling, was so much more beautiful—such a slight, exquisite girl she appeared, with the darkest violet eyes, and the most enviable golden hair imaginable.

And yet, in spite of her beauty, she had not half the number of lovers her sister Mabel could count, who was barely eighteen, and not nearly so handsome. Mildred being cold and proud, and almost haughty in her manner to strangers. Pride of birth was the rock on which she stumbled. Any family without a pedigree, no matter how rich and how well received by society in general, was an abomination in her sight. She might, indeed, under the pressure of circumstances, consent to know them in the very coldest sense of that word—might even condescend to put her hand in theirs; but as to associating with them—never!

With the poor and with her father's tenants it was of course different. They could never have the presumption to put themselves on an equality with her, and therefore she could afford to treat them with a friendliness and sweetness that endeared her to them all. The Trevanions in general were looked upon with very loving eyes by the majority of the under classes about Clifton, but Mildred gained by far the largest share of affection and respect. Miss Trevanion, of the House, as they called King's Abbott, was heartily welcome everywhere, and, as she sat on rickety chairs and shaky stools, to hear how Tom got over his last attack of "rheumatiz" or how finely Polly's baby was doing—bless him!—or how well the lad with the broken arm was getting "thanks to all the things you sent him, Miss Mildred," it would have been difficult to connect her with the haughty beauty who walked through crowded rooms and past aspiring nobodies with her handsome head well in the air.

By degrees, as she grew older, this pride—this great fault in her character—became better known, and those not exactly up to the mark according to her standard of what constituted good blood disliked and feared her, as of course was natural. She was never rude—she could not have been that [illegible] time—but those brought into contact with her against her will never cared to renew the acquaintance.

"It was her look, my dear—her look!" said old Mrs. Hatton, whose late husband had amassed his half million by means of corn. "It was worse than words, I tell you. She looked my June straight down, she did—a proud, conceited minx!"

Mildred inherited this "wretched nonsense not so much from the mother's as from the father's side. Not that dear Lady Caroline herself possessed an atom of it, beyond what was due to her position; but still it had shown itself very distinctly in other members of the Monkly family—witness old Lady Eagleton, Lady Caroline's aunt, who, it was well known, had taken to her bed for three days after a dinner party given by Lord Lindon, in consequence of having been obliged to sit at table next to a man whose great grandfather had dealt in coal. He was a very nice man indeed, handsome, intelligent, and well dressed; but that didn't matter. In her eyes he was begrimed and covered with soot, and Lord Lindon was never forgiven. Some people, indeed, had the ill-nature afterward to give it as their opinion that Lady Eagleton had imbibed too freely of both champagne and Burgundy—her favorite wines—to admit of her leaving her bed for those three momentous days. But those miserable people were, of course, properly snubbed; and "we who know the right story can afford to frown down their abominable calumnies."

This pride, then, was poor Mildred's principal fault. Without it she would have been as perfect a girl as one could wish to meet, but as it was, she made for herself more enemies than friends. In spite of her beauty, also, she had few lovers; though it must be confessed that those she had were more deeply wounded in the encounter than those who flocked around the banner of the gayer sister, Mabel.

In between those two came Eddie, who was about nineteen at this time, or from that to twenty—a merry, reckless fellow, handsome as an Apollo, and the acknowledged pet amongst all the women in the county, far and near, old and young. He was allowed by the most enterprising of mothers to flirt with their darlings, even when tolerably eligible men were forbidden. He was considered harmless, as up to the present he had shown no disposition to place his heart in the keeping of one fair lady more than another, and certainly did not seem likely to do so. So Laura, and Emily and Gertrude, and half a dozen others, claimed the handsome boy for their own, and made use of him, and coquetted with him when out of more useful running, just to keep their hands in, until at nineteen he was as charming and gentlemanly a lad as ever a mother was blessed with.

Nevertheless it must be confessed he was just a degree wild. His college life was ornamented here and there by sundry small escapades that certainly were not the most creditable parts of his career. At such times, when news came to her from different quarters that her pretty Eddie was not everything her heart could wish him, his mother would look grave, and write him long letters of admonition that were considerably skipped now and then. But, when the boy came home again at his vacations, his brightness and his handsome face put an indefinite stop to all proceedings against him; and even Sir George could not find it in his heart to speak words that should bring a cloud on his happy countenance.

Eddie and Mabel were somewhat like each other, both being much darker than the rest of the family, who were rather Saxon in their general appearance. Mabel, or "Queen Mab," or "the queen," as she was indiscriminately called, on account of a little stately walk she had that contrasted funnily with her face and manner, which were gay in the extreme, had dark eyes of a soft hazel, and hair nut-brown to match. She was quite as tall as her sister, and, though by no means as beautiful, was pretty enough to create a sensation anywhere. At eighteen she was an incorrigible flirt, but amiable and sweet enough to prevent her from running into extremes, and causing uneasiness in the home circle. Young men adored her, and old men did their best to pet and spoil her—ineffectually.

For all that, however, calm Mildred was more the "hearth-angel" than she was. To her, as to their mother, came all the boys, with the numerous griefs and annoyances that usually beset a school-boy's path. Charles was very fond of asking her advice, and Eddie believed most firmly in her wisdom, generally addressing her under the title of "Minerva." Her father and mother had few secrets from her, and even Florence, who was lightly self-sufficient, and given to assert herself, at times, with astonishing boldness, had been known, on two or three occasions, to come all the way from Ryelands to ask Mildred's opinion upon certain subjects.

Mildred at home and Mildred abroad were very different persons. She was most capable of loving, but her unfortunate coldness of demeanor prevented this from being universally acknowledged. Only her own people knew her tender, loving heart, and returned her affection in kind.

There were two other boys, mere youngsters, named George and Ernest, who were at present undergoing the discipline of school in some distant shire.

Sir George had discovered some years previously, that he was not as well up in this world's goods as a man had need to be with seven growing-up children. But at that time he had put the evil thought behind him, and considered it no more, until about a year back, when several circumstances had happened again to force it upon his memory. Debts somehow had begun to accumulate of late years, and now began to declare themselves with very disagreeable openness. The family lawyer shook his head solemnly; and Sir George in self-defense went home, and, having sold two of his favorite hunters most disadvantageously, walked about his farm, doing gloomy penance, and was cross to his wife for the first time for a number of years.

But this state of things only lasted a very few days indeed, and at the end of that time, his third hunter having fallen lame, one of those disposed of was bought back again, at a very different price from that paid for it to Sir George, and presently the other followed suit; after which the master gave up the gloomy penance, to the great relief of the household at King's Abbott, who were considerably put out by it, and having kissed his wife, did not go round the farm for several days.

Lady Caroline, of course, soon discovered that they were in difficulties—indeed Sir George's face was incapable of concealing a secret—and then Mildred was told; upon which they spent rather a low-spirited day, these two women, in "mamma's" boudoir, discussing probabilities and improbabilities, and the selling of "papa's" hunters, until Mildred at length suggested that the annual visit to London should be given up—for this year at all events.

This was a severe blow to the mother. It was during a London season that Florence had managed her little affair so comfortably, whereby she had fallen into such a pleasant place as Ryelands—Florence, who was neither as beautiful nor as sweet as her Mildred, who might, the fond mother believed, marry a marquis if so inclined, indeed, last season when Miss Trevanion made her second appearance, a desirable young baronet had laid his heart and a very respectable fortune at her feet; and, though Mildred had seen fit to reject both his heart and the respectable fortune on some very insufficient grounds, still that was no reason why this year another desirable young baronet might not do likewise and be accepted. It seemed quite dreadful to poor Lady Caroline that this golden opportunity should be thrown away.

"My dearest," she said, "I hardly think it would be my duty to retrench in that way. Consider what an injustice I should be doing you and Mabel."

"Never mind the injustice—I do not feel it," Mildred returned; "and, besides, I think it unlikely that I should meet anybody there whom I could particularly care for. I fancy, somehow I shall never marry; when Mabel is old enough to come out—in about two years from this, I suppose—perhaps papa will be better able to afford a London season."

"But I am not thinking of Mabel—I am thinking of you," Lady Caroline said, laying one of her hands tenderly upon the girl's clasped fingers. "Do not tell me, Mildred, that, with your beautiful face and affectionate heart, you are going to be an old maid. You have not seen 'him' yet, my dear, that is all; but you will, depend upon it. See how well Florence got off by going to London."

(To be continued.)

She had rejected his offer of marriage. "Do you think you could love me if I were rich?" he asked bitterly. "Well, I could try harder," she replied encouragingly.

The Congestion from a Bad Cold Loosened Up in One Hour

Nerviline Rubbed On At Night ---You're Well Next Morning.

Nerviline Never Fails

When that cold comes, how is it to be cured?

This method is simplicity itself: rub the chest and throat vigorously with "Nerviline," rub it in good and deep: lots of rubbing can't do any harm. Then put some Nerviline in the water and use it as a gargle; this will ease the cough, cut out the phlegm, assist in breaking up the cold quickly. There is no telling how quickly Nerviline breaks up a hard racking cough, eases a tight chest, relieves a pleuritic pain. Why, there isn't any liniment with half the power, the penetrative qualities, the honest merit that has made Nerviline the most popular American household liniment.

A large 50 cent bottle of Nerviline cures ills of the whole family, and makes the doctor's bills small. Get it to-day. The large size is more economical than the small 25 cent size. Sold by dealers everywhere, or direct from The Catarrhozone Co., Kingston, Canada.

ANTIQUES

An important artistic industry of recent years is that of sculpturing glass, in manner of manipulation, and in effect, as the more generally known shell cameo cutting. The Portland vase has been mentioned several times in these notes upon antiques, and it again comes up as the inspiring motive in the art of glass sculpturing, an art which must have been practised in very early times among the ancient Greeks, in the opinion of the writer of these notes, as far back as the fifth century before the Christian era. This opinion was formed during the time when the Portland vase was reproduced in its original material, glass, in the seventies of the last century, and was based upon the historic fact that Phidias—who about 420 B. C. produced this class of low relief sculpture—worked in all the then existing mediums, as gold, silver, bronze, brass, marble, and wood, and though it is largely guesswork to name a period for the origin of the Portland vase, there are good grounds for supposing that the great sculptor of the Parthenon marbles used glass also.

One cannot wonder why sculptural glass, in its highest form of treatment, is not so widely known to the general public as other fine arts, when the time, labor and skill required to produce it is considered. The time and labor considerations were not such important factors with the ancients who cultivated this exquisite art, when perfection only was the aim and purpose, yet no doubt they had a great deal to do with the limitation of the number of specimens.

The artist of to-day, however, who usually produces this work commercially has other considerations, yet it is pleasant to record that even these considerations can be put aside occasionally and the best of work given for the sake of art alone.

With a knowledge of the vast technical difficulties to be overcome in reproducing antique models by modern methods, light is thrown upon the wonderful skill and ingenuity of the artists of ancient times. At first the Portland vase was supposed to be of natural formation, and many explanations were offered on this subject, as will appear upon the story its decoration illustrated, but Wedgwood's study of the original, preparatory to reproducing it in fired clays entirely dispelled this supposition as to material, and established the fact that it was an artificial substance—glass—and not chalcedonic. To have carved the vase from a natural stone would not have been such an advance in the arts as the creation of an artificial substance as the medium for the skill of the producer, nor would it have offered the same inspirations to later craftsmen.

Fruits as Medicine.

Medicinal virtues are often credited to fruits.

But fruits are food and never actually medicine.

It was once commonly thought that tomatoes caused cancer.

And certain fruits were honestly recommended as good for brain-workers.

On account of their contents, the sugar fruits and the acid fruits are good foods for certain conditions.

Some fruits, like the pineapple, contain very active ferments, but the value of these ferments as an aid to digestion is denied.

The juice of acid fruits like the lime, lemon, orange, pomelo (grapefruit) and the kumquat stimulates the appetite and is good food, but we do not need to invest these fruits with power as medicines.

New Stays.

They're Important

Don't dream of having your new suit fitted over your old corsets.

And, no matter how full our skirts and frocks may be, according to fashions, our stays must still give slim, sylph-like lines.

Along with the newest lingerie, the newest corsets are very dainty and feminine—there are striped and figured broches and coutils, daintily lace-trimmed.

Though all the new corsets are very long below the waistline, none are very high above it, and some are quite topless.

Minard's Liniment Relieves Neuralgia

Geometry.

Plato is said to have written over his door, "Let no one ignorant of geometry enter here." To-day such a restriction would reduce his visiting list. Perhaps outside the professional mathematicians he would have no one at all. All the artists, the philanthropists, the historians, to say nothing of those ladies and gentlemen of leisure whose critical faculties are so importantly developed nowadays, would certainly be absent and, worse still, would suffer very little at their exclusion. Yet, going back into the centuries for guests, a distinguished company might have been assembled of those who without being famous merely for mathematical studies, were known to have understood and loved the subject. The Greek philosophers would have been there in a body. Alphonse X, Omar Khayyam, Albert Durer, Leonardo da Vinci, Descartes, Pascal, Napoleon and Lewis Carroll.—Exchange.

Minard's Liniment Co., Limited.

Gentlemen,—I had my leg badly hurt, the pain was very severe and a large swelling came above the knee. I expected it would be serious—I rubbed it with MINARD'S LINIMENT, which stopped the pain and reduced the swelling very quickly. I cannot speak too highly of MINARD'S LINIMENT.

AMOS T. SMITH.

Port Hood Island.

REMBRANDT'S CAREER.

It is a Sermon On the Fickleness of Popular Approval.

The career of Rembrandt, now generally acknowledged to be one of the very greatest of painters, is an illustration of the fickleness of popular approval. During the last twenty-three years of his life he disappeared "in a shadow like that which envelops the mystery of his painting."

In "Sketches of Great Painters," a book by Edwin Watts Chubb, there is an interesting paragraph—interesting alike to the philosopher and to the lover of art. "A generation after the death of Rembrandt his great-nephew observed that 'a short time ago the ignorance of reputed connoisseurs was so gross with regard to the work of the mighty Rembrandt that it was possible to buy one of his portraits for sixpence.'

"Two centuries later an American millionaire, according to current reports, paid $600,000 for one production, 'The Mill.' When he died 13 florins were spent on his funeral; in 1906, when celebrating his tercentenary, Leyden and Amsterdam spent thousands in his honor. When he lived his house, Saskia's home, was sold under the hammer of the sheriff; now the municipality has purchased the property, which has become the shrine of worshipful admirers, who came from all parts of the earth to see the place where once lived Rembrandt. Within a generation of his work criticism believed that 'the vulgar and prosaic aspects of a subject were the only ones he was capable of noting' and that his was a 'manner founded on delusion.'

"To-day we say that Rembrandt was universal in his sympathy, seeing where others were blind; that the catches as well as the saint, the aged beggar as well as the prince, the wrinkled old Dutch vrouw as well as Cupid, were seen as worthy of the interpreting brush of the painter or needle of the etcher; that he is of the race of Michelangelo and Velasquez, of Titian and Raphael, of Leonardo and Rubens."

Minard's Liniment Cures Dandruff.

She Needed Them.

"I wish, John," she said wistfully, "I had had sense enough not to destroy all the letters you wrote me during the year and a half of your courtship."

He smiled in a gratified way. "I knew you would regret that some time," he said.

"Indeed I do," she replied. "I need a little change the worst sort of way, and the man who buys rags and old paper was here to-day. How wasteful we are in your youth!"

He looked at her reproachfully, and almost involuntarily his hand sought his pocketbook. It is seldom, indeed, that a resourceful woman has to make a direct request for money.—Chicago Post.

OUR CHEESE BEST

Report of Dairy Commissioner On Conditions in England.

The report of the Dairy and Cold Storage Commissioner for the fiscal year ending March 31st, 1915, recently issued, and which can be had on application to the Publications Branch, Department of Agriculture, Ottawa, will doubtless be received with more than ordinary attention. The commissioner, Mr. J. A. Ruddick, briefly records his experience on a visit to Europe as Canadian Government delegate to the Sixth International Dairy Congress, held in June, 1914, at Berne, Switzerland. Returning via England, he found that Canadian cheese stood in the highest possible favor, commanding even a better price than that of New Zealand, where special and unremittent efforts are being made to capture the British trade in dairy products, and where the cheese factories have recently greatly increased in number. Canadian cheese, Mr. Ruddick testifies, has become the standard for all importations. He paid a visit of inspection to the centres of the Cheddar cheese industry in Shropshire, Flintshire, and Cheshire, and was surprised at its extent. An interesting account is given in the report of the extension of marketing facilities and of the operations of the Finch and Brome Dairy stations. Other matters dealt with are the dairy herd records, excess of water in butter, inspection and weighing butter and cheese, the activities of the Precooling and Experimental Fruit Storage warehouse at Grimsby, Ont., cold storage progress, publications and meetings.

SELECT MEDICINE CAREFULLY

Purgatives are dangerous. They gripe, cause burning pains and make the constipated condition worse. Physicians say the most ideal laxative is Dr. Hamilton's Pills of Mandrake and Butternut; they are exceedingly mild, composed only of healthgiving vegetable extracts. Dr. Hamilton's Pills restore activity to the bowels, strengthen the stomach, and purify the blood. For constipation, sick headache, biliousness and disordered digestion no medicine on earth makes such remarkable cures as Dr. Hamilton's Pills. Try a 25c. box yourself.

THE UNIVERSE.

Our Own Stellar System and What May be Beyond It.

In one of the latest conceptions of astronomers the stellar universe has a diameter of [illegible] light years and, with a thickness of [illegible], and our sun lies a place a little removed from the centre. It embraces 25,000,000 to [illegible] stars within the range of telescopic visibility, with dark and invisible bodies whose number cannot be computed.

So far as can be determined the stars are surprisingly uniform in mass, the range of variation being not more than fiftyfold, but in density the range is from more than twice that of the sun to only one-millionth and in absolute luminosity or brightness from 5,000 times that of the sun to about one three-thousandth. The temperature range from near absolute zero in the nebulae to 20,000 degrees C. in certain giant hot stars.

It is suggested that our universe may be not the only one and that the small Magellanic cloud, for instance, may be a relatively small universe of about 1,000 light years in diameter.

Another separate star system at similar distance is possibly, astronomers hold, the Andromeda nebula.

PILES CURED at HOME by New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P, 8, Windsor, Ont.

Proportions to Remember.

Four eggs to one quart of milk for custards.

One teaspoonful of vanilla to one quart of custard.

Two ounces of gelatine to one and three-quarters quarts of liquid.

Four heaping tablespoonfuls of baking powder to one pound of flour.

One teaspoonful of soda to one pint of sour milk. One teaspoonful of soda to one cup of molasses.

One teaspoonful of baking powder is equal to one-half teaspoonful of soda and one teaspoonful of cream of tartar.

In preparing for baking, mix dry materials in one bowl and liquids in another, combine them quickly, and put at once into the oven.

The oven for baking bread should be hot enough to brown a teaspoonful of flour in five minutes. For biscuits it should be brown in one minute.

Rubbing a pie-crust with butter a few times before it is time to take it from the oven will make it crisp.

Minard's Liniment Cures Burns, Etc.

Preparedness.

Obadiah, trying to cross the field where the bull was, attracted the attention of the beast, whereupon began a foot race of great personal interest to Obadiah. His neighbor, Silas, saw the race start in a fair field and saw Obadiah putting his best foot forward and mending his gait at every step in an eagerness to make the creek, a good mile away. Obadiah, legging it at the peak of his effort, managed to make the bank a scant few feet in advance of the bull and essayed to leap the thirty feet between the banks. He landed in the middle of the creek. Silas observed this dispassionately and looked back over the mile of fi[illegible] a judging eye. He hitche[illegible] der and spoke:

FOR SALE—FANCY PIGEONS AND flying homers; prices reasonable. L. J. Holton, 62 Caroline street south, Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCATION to train for nurses. Apply, Wellandra Hospital, St. Catharines, Ont.

CHARM OF VENICE.

"The White Swan of Cities" It Was Called by Longfellow.

Venice is the mecca of tourists because of its beauty and its history. It was the link connecting Rome and Athens. It felt the influence of Arabia and of Persia. It saved some of the Greek masterpieces from oblivion. Its architecture shows the effect of all the ancient civilizations. Seated on 117 islands, with canals for streets, it has been renowned as—

The pleasant place of all festivity,
The revel of the earth, the masque of Italy.

Longfellow called it the "white swan of cities," and other poets have celebrated its glories above those of any other city of the world. Its political history is of entrancing interest. It is saturated with romantic traditions. The numerous churches, the bridges, the tombs, the palace of the doges, the old library, the campanile and the Academy of the Arts are among the most attractive show places of Europe. The masterpieces of those master artists of the sixteenth century, Titian, Tintoretto, Giorgione, Bellini, Paolo Veronese, Sansovino, Palladio and Daponte, have given city undying glory.

In Venice the renaissance is seen at its best and at its worst. Realism and idealism have vied for mastery. Perhaps in no other city of the world is there preserved such a rich collection of the styles of painting and architecture of the different centuries.

GUARD THE BABY AGAINST COLD

To guard the baby against cold nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little ones stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy and good-natured. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

One of the Family.

Boarding round, as the old-time district school teacher did, was not al[illegible] but occasional[illegible] writes Sophie E. [illegible] book, "In Old South Hadley," teachers were able to administer needed discipline by reason of their intimate knowledge of the family life of their pupils.

There were some teachers who did not need the usual injunction to "make yerself to home" [illegible] one day [illegible] to her desk a boy whose widowed mother she was then boarding. She gave him what she called "a good ferruling," although he had no idea for what offense he was being punished.

"There," she said, when she had finished, "now we'll see whether you will make up faces at your mother the next time she tells you that you are to have hasty pudding and milk for breakfast!"

Pasteur's Modesty.

In 1862, when the international congress of medicine first met in London, Pasteur was the most distinguished of the foreign delegates present. With his usual anxiety to avoid publicity, he came over accompanied only by his son and son-in-law and took rooms in Clarges street. For [illegible] days be[illegible] his arrival invitations were [illegible] to the famous Frenchman at the bureau of the congress, but no one called for these, and he was not seen till he entered St. James' hall to attend the opening meeting. One of the stewards was leading him to the place reserved for him on the platform when he was recognized, and immediately cheers rang through the hall. Quite unconscious that these were meant for him, he said, apologetically: "No doubt the Prince of Wales is arriving. I ought to have come sooner."

It's a mean sort of bu[illegible] crows over failure.

ELLA'S RECOMPENSE

If she dared to be independent, at least she was guiltless of the small affectations which are perpetually holding out danger-signals to create that which they affect to guard against.

A slight breeze came up at that instant, bringing freshness from the hills, and nearly carried Ella's programme, which she held loosely. Stretching her hand forward to catch it the sharp edge of one of the stones scratched her arm. She uttered a slight cry, and held it up.

"You have hurt yourself!" exclaimed Cecil, seizing her hand and unceremoniously turning the arm to the light. "I have been expecting this! It made me shiver to see your arm pressing on these rugged stones. Why, it is bleeding!"

He drew out his handkerchief, which he proceeded to fold round her arm, and tie with the skill of an old campaigner.

"Indeed, you are giving yourself too much trouble—it is nothing," said Ella, strangely moved by the lingering tenderness of his touch, by the grave solicitude of his manner.

"There, that's not too tight, is it? Now, as there is nothing to make a sling of, you must let me keep your arm in mine for the rest of the way."

"But, Colonel Cecil, it is a mere scratch."

"But, Miss Marston, it is a very ugly scratch, and you must be guided by me. So, for the remainder of the walk homeward, Ella found her arm gently imprisoned, while some spell seemed to have released Cecil's lips from "the cold chain of silence" that usually "hung o'er them"; he spoke well and warmly of the music he had heard in London; of his experiences in travelling through Italy; of an interview he had had with Garibaldi, frequently interrupting to ask Ella if her arm felt stiff—if he held it comfortably. She could hardly believe that he could be the same man she had thought so severe and taciturn.

How soon they seemed to reach Frau Gudscher's! and yet they had walked very slowly.

"It must be late," exclaimed Ella. "The lamp has been put out. I have the key of the great door, but the stairs will be terribly dark."

"I will come up with you," said Cecil, promptly.

"But, then, how will you manage about locking the door?"

"Oh, I shall persuade Frau Gudscher's neat little maid to see me off the premises."

The great door opened creakingly to admit them, and drawing Ella's arm again through his own, Cecil exclaimed: "I am certain you are suffering; why, I can feel you tremble."

"It is curious I should, for I am in no pain; it may be a chill."

"Lyall will say that I have been an indifferent caretaker. I hope to find you all right to-morrow. Good-night; don't dream of Robert and Isabelle."

Here they reached the door, and Anna smilingly and readily lighted Cecil down stairs again.

His last words were still echoing in her ears, and her heart was beating quickly with a sudden startling recognition [illegible] and [illegible] power under the severe stateliness of his exterior, as Ella ascended to her cousin's room (for Anna told her "the gracious lady still waited,") feeling that punishment of some kind awaited her.

Mrs. Vereker was seated by the window, a book on her knee and her watch in her hand. As Ella opened the door she rose in her wrath, her lips quivering, her eyes blazing. "This is a nice hour to keep me up in—to keep the house open!—to set every one talking, and—and—wondering how I could have such a creature about me! It is half-past ten! Sir John and Miss Browne have been back more than three-quarters of an hour. I should like to know what has kept you, and I have a right to know! Was that stupid James so thoughtless as to take you to his hotel, or—"

"No, Mrs. Vereker," said Ella, recovering from the shock of this attack. "Your brother did not feel well, so he went back to his hotel at once, and, as there was some difficulty about a droskey, Colonel Cecil walked here with me."

"Colonel Cecil!" screamed Mrs. Vereker, and then paused to take in the horrible idea. "It didn't take you three-quarters of an hour, or rather a whole hour, to walk up here from the theatre."

"It was such a fine night we came round by the Walls."

"By the Walls! Alone! with a man like Colonel Cecil!"

"Why, Mrs. Vereker, he is your friend—and by your own account a model of all that is high-minded and chivalrous."

"Don't answer me in that manner!—don't talk in that ridiculous way! I am disappointed in you, and—and—disgusted with you! You set up to be a teacher and guide to youth, when you don't know how to behave yourself; running about with strange men in [illegible]—first with that horrid [illegible] then with Colonel Cecil—[illegible] higher position than [illegible] amuses himself [illegible], no doubt, laugh at [illegible] he goes back to [illegible] listen to what [illegible] it's disgrace[illegible] raving in [illegible] Mrs. [illegible]

to her relief. Excited and charmed by the music she had heard, moved in a mysterious way she could not herself understand by her delightful confidential talk with Cecil, she was already unstrung when she came under the fire of Mrs. Vereker's attack. The mention of her mother brought vividly before her the isolation of her existence—its bareness, its struggle. What would she not give to have that mother with her, to lean her head upon her bosom and tell her all her troubles! But Mrs Vereker's words respecting Cecil struck deeper still. Had she indeed made a fool of herself by speaking out of the abundance of her heart to this stranger? He had seemed as earnest, as confidential as herself. Why should she doubt that he was kind and friendly? But Mrs. Vereker, though a spiteful little idiot, had lived among men and known them, and she, Ella, had never known any, except grave and sober professors worried into a condition of numbness and indifference by a succession of incompetent, inattentive pupils. With these she had rarely exchanged a word, except on the subject of their special branches of knowledge, so the nature and habits of men were quite unknown and mysterious to her.

Such a man as Cecil she had never met before, and his looks, his manner, his speech, had made a strong impression on her that night.

The idea of a rigid elderly martinet was entirely superseded by her remembrance of the speaking dark eyes which had said so much more than words could express, of the varying tones of a voice generally cold and commanding, of the indescribable dignity which yet was instinct with veiled tenderness, that characterized his bearing and manner.

Still she might be mistaken, and Mrs. Vereker might be right; but it is all no matter—she must turn away from the possible pleasantness dawning upon her and go back to the routine of her monotonous life. Destiny had marked out her road, and she might as well make up her mind to keep to it; but she would not stay with Mrs. Vereker to be insulted. No, she had five pounds and some shillings in her purse: that was enough to take her back to Miss Griffin. Once in England, she would look out diligently for employment. It was a good time of the year for her search, and she would not allow Mrs. Vereker's unreasonable, insolent violence to discourage or oppress her.

At last sleep lulled her into forgetfulness; and her troubles, and wrath, and yearning for pleasures so dear to youth, but denied to her, faded away into the blessed unconsciousness of complete repose.

She was still in the realm of dreams when she was roused next morning by the voice of Augustine, who was standing beside her bed.

"The gracious lady wants you, my Fraulein. She is ill. Her head aches—she wants a cup of tea."

"Oh, very well. Will you get some tea made, while I dress, Augustine?"

"Yes, certainly."

"And be sure the water boils."

"Ja wohl!"

Ella dressed rapidly, and before she was ready, the faithful Augustine reappeared with the tray.

Carrying up the cups carefully, Ella finished her toilet and then took the desired cup to her irritable mistress.

"Here is your tea, Mrs. Vereker."

The unhappy widow was lying on a pile of pillows, with her face to the wall, and at the sound of Ella's voice turned with an impatient movement, raising herself to receive the cup, her abundant gray hair in the wildest confusion, and her eyes still red from the showers of angry tears they had shed.

"You might have thought of bringing me a cup of tea without my having to ask for it," she began in a querulous tone, yet very different from that of the night before, "after upsetting me and making me miserable, but I have ceased to think of [illegible] the heartlessness of some people is amazing."

"I was still asleep when the servant called me," said Ella, calmly, as she brought Mrs. Vereker a dressing-jacket and put it on her. "I lay long awake last night."

"And so did I. Ah, Ella, you make a bad return for all my kindness. Give me a pocket-handkerchief! I have been crying my eyes out all night—no wonder my head is splitting!"

"Drink your tea, it will do you good," returned Ella, tranquilly. "I will bring you some bread and butter—you had better eat something."

"Eat!" with a small shriek. "I don't think I could ever eat again, but I could drink the [illegible]."

Ella stood silently waiting for the cup and Mrs. Vereker drank, complaining between each mouthful. Then she had another cup, and grew more composed.

"I will try to sleep a little. I could not come down to breakfast, Ella; you might bring me some. I have been sadly upset."

"Very well, Mrs. Vereker," removing her dressing-jacket, and arranging her pillows; this done, Ella walked across the room to a large chest of drawers on the top of which stood a row of books, and took from among [illegible] a continental "Brad-shaw," to [illegible] to study her route; but her [illegible] was arrested.

[illegible] are you taking that "Brad[illegible]?" cried Mrs. Vereker, who [illegible] watching her.

[illegible] to find the most direct [illegible] don."

[illegible] re determined to—to [illegible] uel, wicked girl! to [illegible] one and helpless— [illegible] te do up my hair! [illegible] 's in from your [illegible] touched it last [illegible] hours to get [illegible] are unkind.

[illegible] you, Mrs. [illegible] cke to [illegible] you [illegible] ing came near me, and you keeping Colonel Cecil all to yourself in that selfish way? I went quite distracted: you know you ought not—"

"I keep Colonel Cecil, Mrs. Vereker! I did nothing of the kind," cried Ella, firing up. "Could I help his going to the theatre? or prevent him from returning with me? Would he have had anything to do with me if I were not your cousin?"

"Oh! don't talk so fast, Ella, for goodness' sake! your voice goes through my poor head! There is some truth in what you say, and as it is my nature to be kind and forgiving, and easily imposed upon, I will look over your shameful conduct this time, and never say a word about it; so put away that book and—"

"I can't see that my conduct was shameful, Mrs. Vereker; but if you think so, I am not fit to be with you. I should much prefer leaving," interrupted Ella, standing very straight in the middle of the room, the tea-cup in her hand, and "Bradshaw" tightly tucked under one arm.

"You dont' mean to say that you will desert me for a few hasty words! you are a heartless thing, Ella!" sobbed Mrs. Vereker, feeling about among her pillows for her handkerchief, and beginning to weep.

"You could easily find a German maid who can speak English," said Ella, relenting. "There are plenty of very respectable fraulein, who would be glad enough to be half maid, half companion to a lady like you."

"I dare say; but I don't want them. I want you. I want you, at any rate, till I go back to England, and I can get an English or a French maid; you know I speak French quite well—like a native. Do stay with me, Ella! there, I have asked you!"

After a little further persuasion Ella, whose wrath was rapidly evaporating, yielded to her entreaties, feeling that in the struggle she had come off conqueror.

On the whole she was not sorry that peace had been patched up before any one knew that angry words had passed between her and her silly mistress.

Mrs. Vereker was exceedingly amiable all the morning. She gave her young cousin a jet bracelet, one side of which was cracked, and a Berlin iron necklet, a good deal rusted, to which she added a photograph of the deceased and sainted general's gravestone, describing for the fifth or sixth time the ceremony of his funeral, with exceeding minuteness. To change the subject, Ella suggested a stroll in the Stadt Park, a large piece of ornamental ground which stretched along the eastern or nearer side of the town. This suggestion was accepted, and Mrs. Vereker took the opportunity of a prolonged tete-a-tete to impress on her young relative the necessity of caution and prudence in her intercourse with men so far above her in position as Colonel Cecil; telling her that he, or any man like him, would consider her vanity and pretension fair game; and that it would be more becoming and correct of her to avoid meeting him as much as possible. Mrs. Vereker had observed these things she did not approve, and she shook her head, but to Ella's quick question, "What things?" she would or could give no definite answer.

"Well, Mrs. Vereker," cried Ella, as they turned to go back to the Pension in time for early dinner, "you may be sure I shall keep out of the way in future, and, apart from anger or ill-feeling, I wish you would take a temporary German maid, and let me go back to England."

CHAPTER VI.

Lyall was considerably fatigued after the unwonted exertion of going to the theatre. He thought he would feel better for a drive with Ella, and asked Cecil to call and tell her to be ready to half past three. This errand the colonel willingly undertook. He was, in truth, very eager to see his interesting companion of the night before. She had pervaded his waking and sleeping thoughts in a ridiculous way. The memory of her sweet, frank eyes, her straightforward simplicity, dwelt with a kind of fragrance in his thoughts.

After all, a certain degree of strength was desirable in a woman, provided it was not rude or unfeminine.

He hoped that scratch on her arm did not hurt her. He knew well enough it was a mere trifle, but it had been a pleasure to hold the arm and wrap his handkerchief around it. Such meditations made his way to Wilhelm Platz seem short; arrived there, he found to his infinite disappointment the ladies were out.

After some hesitation he strolled into the Stadt Park, but happening to take the opposite side from that selected by Mrs. Vereker, they missed each other, and he returned to his hotel with Lyall's message still on his mind.

Later in the day he volunteered to repeat the attempt, somewhat to Lyall's surprise.

"Ay, do," he said, "though I am pretty sure to find my little reader at home and alone. I do not fancy the Widow Vereker lets her have too much freedom."

Probably the same idea occurred to Cecil, for he started with much alacrity. This time he was more fortunate. "The gracious ladies" were both at home.

Mrs. Vereker only, however, was in the salon when he entered. She received him with much sweetness and cordiality, with a little bending of the head to one side, and a slightly coquettish yet pensive smile—small tricks he had once thought so fascinating.

"I hope Miss Marston is none the worse for her walk home last night," said Cecil when the first greetings had been exchanged.

"Oh, no, not at all. She was here just now; I am sure I do not know where she has gone"—this was a little fib—"but I have given her a good scolding for walking all around the Walls with you last night."

"Why should she not?" exclaimed Cecil, rousing up. "I am an old friend of Lyall's, of your own. I cannot seem a stranger to her."

"Oh, I know that; but you see I am obliged to keep rather a strict hand over Ella; she is kindhearted and all that, but such an awful flirt that she makes me quite angry sometimes."

"She does not give me that idea though," said Cecil, bluntly.

"Oh, she is I assure you. I was astonished at the way she went on when we were at Konigstein; there was an old Russian there who used to give her bouquets, and even offered her a diamond ring, which she had the grace to refuse, and then this Baron Reichenberg—all that nonsense began there—when I took no notice of him, he began to make quite a fool of Ella."

(To be continued.)

SUNDAY SCHOOL LESSON

LESSON X. March 5, 1916.

The Death of Stephen.—Acts 7: 1-8: 2.

COMMENTARY.—I. Stephen's defense before the Sanhedrin (7: 1-53). It was charged by the council that Stephen had spoken blasphemous words against the temple and the law, and when he was asked if the charges were true, he began the task of proving their falsity. He addressed the Sanhedrin most respectfully, saying, "Men, brethren, and fathers," thus identifying himself with the Jewish people. He traced the history of the nation from the call of Abraham to the time of the prophets. He showed that the Lord had led His people in all their journeyings, and had taught them his will. Instead of speaking blasphemously of Moses and the law and of the temple, he showed that God was through them working out his great plan of redemption. After giving an outline of Jewish history, he declared that his hearers were not attentive to the voice of God and were far from obeying his law. As their fathers had persecuted the prophets who had prophesied of the coming of Christ, so they had rejected him when he appeared and had put him to death. His address showed that he was not afraid to tell the truth that was needed by his hearers, even if it was most distasteful to them. They had come far short of observing God's law. As we read the addresses of Peter, the fence Stephen made and the argument of Paul, we are struck with the harmony in matter and plan in all these discourses. There is a setting forth of the history of God's chosen people and the proof from the scriptures of the Messiahship of Jesus.

II. The martyrdom of Stephen (7: 54-60). 54. These things—That the Jews had not kept the law and were guilty of putting to death the Just One. Cut to the heart—The word used here indicates the cutting made by a saw. The Jews were irritated to the point of desperation. Gnashed on him with their teeth—Their anger was apparently beyond control. They gnashed their teeth as if they were angry wild beasts. Stephen had calmly and fearlessly, yet in love, told them the truth, but they had firmly set themselves against it. 55. He—Stephen. Being full of the Holy Ghost—This declaration had hardly been made more than once regarding Stephen. He was appointed one of the seven helpers after it had been decided that men full of the Holy Ghost must be chosen, and in 6: 5 it is expressly stated that he was "a man full of faith and of the Holy Ghost." Looked up steadfastly into heaven—In the midst of the violent expressions of hatred of the angry company the man of God was calm and looked intently upward. His spiritual vision was clear and he was granted a view into heaven. Saw the glory of God—Stephen saw the brightness of the divine glory that constitutes what is named the Shekinah in Jewish phraseology. "The martyr, like Moses, was for the moment permitted to see God face to face, even before quitting his veil of flesh. He was filled with the Holy Spirit, and thereby the eyes of of his own spirit were so quickened that no material object and no distance could prevent him from beholding, as through an opening heaven, the very presence of the Ancient of Days. He who in the first clause of his speech affirms in effect that Abraham beheld the glory of God now beholds that glory himself!"—Whedon. Jesus standing on the right hand of God—He saw him who was crucified for the salvation of men exalted to the right hand of the Father, infinitely and eternally exalted and glorified. 56. Behold, I see the heavens opened—The fury of his opposers did not interrupt his communion with heaven, and he was ready to testify as to what he saw. The coraged company saw a calm, fearless and humble follower of Jesus, but he, from his high, spiritual plane, triumphantly looked to heaven. The object which the Jews sought was far different from the one which was sought by Stephen. He was fearlessly and devotedly seeking to show the people Jesus Christ, the only way of salvation. He was laboring for their good. The Jews were seeking to hold up the decaying system of Judaism. They saw a fine preacher condemned to die; he saw an opened heaven and the glorified Saviour.

57. They cried out—The Jewish leaders had listened to Stephen's recital of their national history with interest, but when he came to preach Jesus to them, declaring their responsibility for His crucifixion and saying that He was exalted to a place at the right hand of God, their anger and hatred overleaped all bounds, and the great Jewish council became a tumultuous mob. Stopped their ears—To that they would not hear what they considered as blasphemy. Ran upon him—Eager to denounce and kill him. 58. Cast him out of the city—According to the Levitical law executions must take place outside the camp, hence the walls of Jerusalem corresponded to the limits of the ancient Israelitish camp. Stoned him—This was the Jewish mode of execution. The trial and condemnation of Stephen proceeded in an irregular manner. There was the partial semblance of a trial, for the prisoner was given a hearing after the false witnesses had given their testimony; but when he declared the truth about Jesus, the council broke up with a demand for his execution. The Sanhedrin had no right to inflict the death penalty, but at this time the civil authority was largely ineffective and the council took matters in their own hands from time to time. The witnesses—The law provided that there must be at least two witnesses to the same act. In case of conviction of a capital offense the witnesses must be the executioners. Laid down their clothes—The witnesses threw off their outer garments in order to have greater freedom of motion in hurling the stones upon the victim. Saul—This is our first introduction to the zealous Jew who later became the great apostle of Christ to the Gentiles. He was then in favor of the plan of putting Christians to death.

59. Calling upon God—While the Jews were unjustly and unlawfully putting Stephen to death, he was praying the Lord Jesus to receive his spirit. The first Christian martyr used much the same language in death as did his Master in his final utterance upon the cross (Luke 23. 46). The prayer in this verse and the one in the verse following are both addressed to Jesus as God. 60. He kneeled down—Stephen placed himself in the attitude of earnest supplication. Cried with a loud voice—Those who would have Stephen put to death had made a loud outcry in expressing their demand. The martyr prayed with a loud voice for his persecutors and murderers. Lay not this sin to their charge—His prayer was strikingly like that of Jesus who said on the cross, "Father, forgive them; for they know not what they do" (Luke 23. 34). Fell asleep—The verb here used is the same as that in the passage, "The saints which slept" (Matt. 27. 52), and of them it is said that they arose after the crucifixion of Christ. Stephen was still alive, though his body was in the embrace of death.

III. Saul, the persecutor (8: 1-2). 1. And Saul was consenting unto his death—These words belong properly at the end of the preceding chapter. Saul of Tarsus felt toward Stephen as did his murderers. He was bitter in his persecution of the followers of Jesus. A great persecution—The spirit that pursued Stephen to his death turned upon the whole Christian community. Scattered abroad—The entire body of Christians, except the apostles, was driven out of Jerusalem. The twelve remained there in spite of the persecution, for their work was not yet finished. 2. Devout men—Men devoted to God and to the cause of Christianity. Carried Stephen to his burial—The traditional place of his stoning is near the gate, called in memory of him St. Stephen's, in the east wall of Jerusalem. 3. Made havoc of the church—Saul was commissioned to stamp out Christianity. He was thorough in his efforts, for he searched every house and imprisoned all the followers of Jesus he could find. He was a man of culture, and was therefore, in connection with his fanatical hatred toward Christianity, a powerful opposer of the new faith. He threw into his mission his whole strength, and expected to see the new religion swept from the earth. He did not yet realize the odds that were against him, and it was not long before he acknowledged himself conquered.

Questions.—What was the occasion of the address of Stephen which is recorded in Acts 7? Give an outline of the address. How did it affect the Jewish council? Describe Stephen's trial. What did he say about heaven? How was he put to death? Repeat the last utterances of Stephen. How is Saul introduced to us? From what motives was Saul working? What qualities were prominent in his character? Compare Stephen with Saul.

PRACTICAL SURVEY.

Topic.—An Historical Crisis.

I. Confirmed Jewish obduracy.

II. Defined Christian activity.

I. Confirmed Jewish obduracy. Stephen was a man of approved wisdom, able to discern things that differ while rejecting pernicious error. He had the courage of deep conviction. He was free from Jewish prejudice. He had spiritual conceptions of God and his worship. His view of Jesus and his mission rested on the whole past history of the nation a nation called to a spiritual destiny in the purposes of God. His address was advancing to an appeal to faith on the basis of the new outpouring of the Holy Spirit, which it was broken off by the riot which ensued. In that hour of trial and danger he summed up testimonies to the truth of his doctrine from the pages of holy scripture. He could not retract what he had spoken according to the oracles of God. He urged that God's direct spiritual dealings with men always had been strictly independent of form or ritual or temple. He declared that the Jews under every succeeding form of divine revelation had resisted God's spirit, that it had been their national failing to cling to present and material things whenever God called them to higher spiritual good. He implied that the Jews who rejected Christ were turning away from the meaning of God's revelation to Moses. As he traced the history of his nation view after view, opened up before him of the perversity, bigotry and wilful opposition to truth which had characterized them at every period, and was then putting the finishing stroke upon their sin. He called attention to the fact that Moses, who had brought Israel out of Egypt, was he who predicted the coming of Christ, the rejection of whom was the national sin of the Jewish people. Stephen had a well-defined plan. He sought to gain attention and soften the hearts of his opponents. His defence was logical, clear and forcible. It was faithful, consistent and unanswerable. He wholly forgot himself in his intense eagerness to expound to the council the formative principles and historical career of the kingdom of God. He gave a remarkable explanation of accepted facts. His forecast swept away at once all the privileges and profits connected with the religious position of Jerusalem and thus destroyed the political prospect of the Jewish people. He finished his discourse with that vigorous denunciation which led to his death. The truth laden with rebukes and personal application could not be gainsaid.

II. Defined Christian activity. To his devoted servant, God vouchsafed an exceptional manifestation of himself, an extraordinary proof of his divine favor and assurance of support. As the fury of the persecutors increased, so did the ecstasy of the martyr. He forgot his surroundings and ceased to think how unsympathetic an audience he had. He exhibited the constant attitude of his soul. The inward likeness to Christ which was manifest in the life of Stephen was also conspicuous in his death. His character, his attainments and triumph were explicitly ascribed to the Holy Spirit. While his enemies gnashed upon him, Stephen was privileged to behold his beloved Master at the right hand of God. Never was his faith so strong or his vision so unclouded. The earthly high priest sat before him as judge with fury on his countenance and condemned him. The heavenly High Priest stood as his advocate with the Father, ready to receive him in fulfillment of his promise. That sight changed all things to Stephen. His last conscious effort was prayer. At his death, by showing such love for his prosecutors, Stephen revealed how full his mind and heart were of the thought of his Saviour and how deeply he had drank of his Spirit. In Stephen we have a pattern of faith, an example of unshaken constancy, of obedience to God, of pious resignation and forgiveness. Stephen's martyrdom was an argument for Christianity. It confirmed his teaching that the crucified Jesus was then living, exalted, glorified and divine. It marked a great crisis in the history of the new faith. The Sanhedrin had determined to persecute and, if possible, destroy the Nazarene sect. Stephen's death was the signal of a general outbreak against them. It was in reality, in the ordering of God's providence, the favorable moment for the commencement of missionary work. Out of the seeming disaster came enlargement.

A Big Settlement

(By Edith V. Ross.)

"You say, my boy, that this young lady to whom you have engaged yourself is a saint. Very well, you will know more about her saintly qualities in future. However, that is your affair, not mine. I desire to give you every opportunity in my power to avoid the calling forth of those traits which may lie dormant in your angel. For this purpose I will settle on you an amount equal to the young lady's property."

"Her aunt has told her that she will give her what I shall receive."

"I think it better that this aunt and I should confer on the matter. Give me her name and address, and I will call upon her."

The young man wrote a name and address on a card and handed it to his uncle. The name was a common one, and after glancing at it the older man put the card in his portemonnaie. His nephew hurried away to post his fiancee on what was about to happen.

"I fear," he said, "when my uncle meets your aunt they will get to quarreling and there will be no settlements. He is as fierce a woman hater as your aunt is a man hater."

"Aunt Helen is not a man hater, she considers herself to have been badly treated on one occasion by a man, but she does not condemn the whole sex."

"Well, let us hope for the best. Uncle will call upon her this evening. Do what you can to put her in a good humor, and warn her that she is to meet a man who needs skillful handling. A great deal for us depends upon the meeting."

At 8 o'clock the same evening Mr. Edward Cutler rang the bell at the residence of Miss Emily Brown and was admitted to a drawing room, where he amused himself looking at the pictures on the wall while he waited. A portrait of a girl of 20 caused him to start. At the same moment Miss Brown entered the room. The two stod looking at each other in astonishment.

"Edward Cutler!"

"Emily Brown!"

"Are you William Gifford's uncle?"

"Yes. Are you Ethel Wheeler's aunt?"

"I am."

There was an awkward pause, which was broken by Mr. Cutler.

"We meet for a purpose of great importance to two young persons. It seems that they are about to make fools of themselves as we did eighteen years ago. Let us not stand in their way, but help them on. You and I found each other out before being tied up together. Perhaps they will not have such good luck."

"There was nothing in me for you to find out. I have never been any worse or better than I have appeared."

"Then why did you turn me down a week before we were to have been wedded, and that, too, without giving me a reason?"

"And why did you take your dismissal so coolly? It was plain to me that the story I heard about you and Winifred Baldwin was true. You seemed happy in your release."

"Winifred Baldwin was nothing to me, and, as for being happy at my release, you wouldn't have had me whimper, would you?" His eyes turned from the lady to the portrait. "You are not so much changed as I would have expected," he added. "To look at that innocent young face one would not suppose its owner would have"—— He checked himself.

"Recriminations after so many years will not mend matters. Let us proceed to business. I understand that you will settle on your nephew an amount equal to what I give my niece."

"I will."

"Very well; I have fixed upon $25,000. If you give the same they will have $50,000. This invested at 5 per cent. interest will give them $2,500, which, with William's salary, will make $5,000 a year."

"Quite enough to keep the wolf from the door."

Meanwhile Mr. Gifford had come in, and he and his fiancee were listening at the door. When they heard these words they embraced and, taking no further interest in the interview, went to another room, where time flew so rapidly they did not realize that more than an hour had passed before the two elder persons, leaving the council chamber, entered the room where the young couple were. Instead of wearing the appearance of having quarrelled they seemed to be radiantly happy. Mr. Cutler called upon Miss Brown to state to the young couple what had been agreed upon for their comfort, and Miss Brown signified that she would prefer Mr. Cutler should make the announcement. After an "Ahem," the gentleman proceeded:

"The aggregate settlements will be $250,000. Miss Brown has consented to give $100,000, and I, preferring to lead in the matter, will give $150,000."

The young lovers looked at each other in amazement at this increase over what had been expected.

"There is another matter it becomes my pleasure to speak of. Miss Brown and I when we were about your respective ages became engaged. Through my fault"——

"I beg pardon," interrupted Miss Brown, "through my fault."

"Anyway, I made a fool of myself and threw away eighteen years of happiness. We have decided to make up for what we have lost and are to be married on the same day that you two are united."

Out of the Mouths of Babes.

Ethel's mamma had ordered a dressed chicken. When it arrived the little miss said: "Why, mamma, this chicken isn't dressed: It's perfectly nude!"

* * *

Twins arrived at small Margie's home one day, and when the little miss was taken to see them she exclaimed: "Oh, mamma, I'll bet you found them kids on the bargain counter, or you wouldn't have bought two!"

* * *

"What does 'Exit' mean, mamma?" asked small Edna, pointing to the word over the door of a moving picture theatre.

"I know!" exclaimed her little brother. "It means entrance out."—Chicago News.

Minister (calling on inmate of prison—Remember, Mr. Kenney, the stone walls do not a prison make, nor iron bars a cage. Kenney—Well, they've got me hypnotised, then, that's all.—Dallas News.

CONSTIPATION

Is Productive Of More Ill Health Than Anything Else.

If the truth was only known you would find that over one half of the ills of life are caused by allowing the bowels to get into a constipated condition, and the sole cause of constipation is an inactive liver, and unless the liver is kept active you may rest assured that headaches, jaundice, heartburn, piles, floating specks before the eyes, a feeling as if you were going to faint, or catarrh of the stomach will follow the wrong action of this one of the most important organs of the body.

Keep the liver active and working properly by the use of Milburn's Laxa-Liver Pills.

Mrs. Rose Babineau, Amherst, N.S., writes: "Having been troubled for years with constipation, and trying various so-called remedies, which did me no good whatever, I was persuaded to try Milburn's Laxa-Liver Pills. I have found them most beneficial, for they are indeed a splendid pill. I can heartily recommend them to all who suffer from constipation."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

NEWSPAPER AND NATIONAL ADVERTISING.

(Buffalo News.)

Advertising is a bid for business and the great problem of the national advertiser is how to make each dollar expended in publicity produce the maximum efficiency in reaching the customer. For the purposes of nearly every national advertiser every citizen is a possible purchaser, therefore it is logical to assume that the newspaper which is the people's medium should be used as the most effective means of bringing about the desired result. However, as often happens, the obvious is the thing we do not see, and so when the question of apportioning an appropriation for advertising arrives we find that the newspaper is relegated to the rear, and the advertising agent selects a discreet list of, say, a score of magazines and presents them to his client with the assurance that here is the royal road to success. "These magazines have a national circulation and are read by the cream of society, by men and women who have money to spend." That may be true, but no man has yet been born who can tell how potential a given circulation is in purchasing power. There are clerks who spend their money more freely than their bosses. When it has been said that the magazine has perhaps a wider circulation than the newspaper, right there the accuracy of statement must end. There are many reasons why newspapers should be the chosen media for national advertising, and Francis A. Adams in Newspaperdom groups them in two general subdivisions: First, because newspapers permit of a perfectly concentrated appeal in one state, one section of the country, or in a group composed of the leading cities. This cannot be done in magazine advertising as there is no practical way of zone selection. Second, the newspapers offer the most insistent media for reaching the people. The advertising is not segregated, nor is it scattered in a lumpy aggregating manner all over the pages. Newspaper advertising is bold, striking, and there is no waiting for results. It either rings the bell at once or falls at once, and it is this quality of quick returns that is making newspaper advertising stronger every day. It is cheap, economical and direct, and for reaching the masses and creating impressions it beats the magazine 5 to 1 in [illegible] thousand of circulation, [illegible] in space obtainable [illegible] every dollar spent. The department stores and automobile industries are fully alive to the efficiency of newspaper advertising, and a living monument to the business-bringing power and influence of consistent insistent hammering home of the merits of their commodities by the daily newspaper. Great successes are being scored in the newspapers in an advertising way every day the great mass of the people are reached and educated to the merits of the advertiser's products in a manner calculated to arrest his attention, create in him a desire to buy and impel him to obey that impulse. Undoubtedly the newspaper is the national advertiser's best medium.

Ten Wars in Eighteen Years.

The historian of the twentieth century, which was ushered in with the thunder of South African battlefields, will have to record eight wars in the first fifteen years of its span. These eight are the following:

Boer war, Russo-Japanese war, Franco-Moroccan war, Italian-Turkish war, the two Balkan wars, the war in Mexico and the pending European war, greatest of all time.

If we add the two wars with which the nineteenth century closed—the Greco-Turkish war of 1897 and the Spanish-American war of 1898—we have a record of ten wars in eighteen years.

HIS PROOF.

(Chicago Journal)

Professor—What are the chief properties of heat?

Stewed—The chief property is that it causes bodies to extend, while cold causes them to contract.

Professor—Excellent. Give an example.

Stewed—In summer, when it is hot, the day is long; in winter, when it is cold, the day is short.

DOAN'S KIDNEY PILLS

Relieve The Kidneys and Bladder Like Ordinary Medicines Do The Bowels.

When the kidneys get out of order the back is sure to become affected, and dull pains, sharp pains, quick twinges all point to the fact that the kidneys need attention.

Plasters and liniments will not cure the kidneys, for they cannot get to the seat of the trouble, but Doan's Kidney Pills do, and cure the kidneys quickly and permanently.

Mrs. Lizzie McLanson, Plympton, N.S., writes: "I am sending this testimonial telling you what a wonderful cure Doan's Kidney Pills made for me. For years I had suffered so with my kidneys I could hardly do my housework. I used several kinds of pills, but none of them seemed to be doing me any good. At last I was advised to try a box of Doan's Kidney Pills. When I had taken the first box I found relief. I have used five boxes, and to-day I feel like a new woman. I cannot recommend them too highly."

Doan's Kidney Pills are 50c. per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

WALKERTON, MARCH 2nd, 1916.

PEEL BYE-ELECTION.

Although it is recognized, as Mr. Rowell says, that the result in Peel was a victory for the people, rather than a victory simply for a party, yet it is a prevalent opinion widely expressed, that the Hearst Government is seriously affected. They could have prevented Fallis running at all as their representative if they had cared to do so; and could have denounced him, as Sir Robert Borden at Ottawa read De Witt Foster and Garland out of the Conservative party. Instead of that, they not only did not say anything against him, but according to Mr. Fallis and Mr. Blain, four or five Cabinet Ministers would have been glad to take places on the platform beside Mr. Fallis, had they been asked to do so. The chief complaint against the Government is their quality of weakness in the matter. The World (Conservative) says: "The Ontario Ministers are to be congratulated upon a lucky escape. They will have to bear some reproach for not taking a more active part on the right side, but we do not think their hearts were in the acquiescence which appears to have been compelled from them by Mr. Fallis and his supporters. "Compelled from them by Mr. Fallis and his supporters"! This is surely the severest kind of indictment against any government, to say that they were compelled by Mr. Fallis or anybody else, to give him their support. Where has the strength of mind and decision of the Ontario Government itself gone to? As a matter of fact, according to their own men, one of the chief characteristics of the present Ontario Government, is their failure to make decisions. Even Mr. Hearst himself, in his famous remark, has said that a "zig-zag" course is often the best one to pursue. This is quite in line with the Toronto World's criticism levelled against the Government a short time ago, when it accused it of being a "wibbledy wobbledy" government.

EDITORIAL COMMENT

The Grand Duke is the regular Old Nick for fighting.

+ + +

The young manhood of this country has scarcely been touched as yet.

+ + +

"If I was only the proper age, I tell you I'd be there." Well, back it up by trying to get a recruit.

+ + +

Isn't the Bruce battalion good enough for you? You'll enjoy the company of the old home lads on the battlefield.

+ + +

Young men, the country looks to you first. Don't wait till spring. Get in with the local company now, and help make it the best drilled in the battalion.

+ + +

Canadians cannot understand why President Wilson should be afraid of Germany. In case of trouble Canada's army would protect the United States. —Goderich Signal.

+ + +

Easter Sunday this year is the latest in thirty years—April 23rd. At any rate, one of our exchanges says so—we can't be bothered figuring it out for ourselves.

+ + +

The Parry Sound North Star tells of a man who walked six hundred miles to enlist and was rejected because he had flat feet. No wonder; anybody's stumps would be worn off smooth after a tramp like that.

+ + +

A statement of the "Dry Ontario" returns by counties shows that in Bruce county the petitions were signed by 7,784 voters, which is 74 per cent. of the 10,481 who marked ballots for the Ontario elections in 1914.

+ + +

Patriotism begins at home, and has its root in the home neighborhood. It includes the home town, the home store, the home school and the home church. The man who is true to his home and the community in which he lives is not likely to fail in national enthusiasm.—Port Rowan News.

+ + +

The Petitions circulated recently in Bruce township were signed by 534 electors. The total vote in the last Provincial election was 528 so that the Petition was signed by 101 p.c. of the total vote, Bruce therefore stands in the front of the Prohibition ranks. The thanks of all are due to the men who so faithfully performed the work involved in the circulation of the petitions.—Port Elgin Times.

+ + +

The "Dry Ontario" petitions from all the province make a prodigious package. It is reported that two of the largest motor trucks obtainable will be required by the Citizens' Committee of One Hundred to transport the documents to the Parliament Buildings on March 8th at 2 o'clock p.m. Between twenty-five and thirty thousand temperance advocates are expected to accompany the petition, and the executive committee is now busy choosing the speakers and making other arrangements. A large procession, including over a thousand motor cars, will be organized. The lists of signatures on the petition will be bound, each county or town having its own book.

THE JOY OF BEING ALIVE AND WELL

Restored To Health By "Fruit-a-tives" The Famous Fruit Medicine

MDE. ROCHON

Rochon, P.Q. March 2nd, 1915.

"I have received the most wonderful benefit from taking 'Fruit-a-tives'. I suffered for years from *Rheumatism* and change of life, and I took every remedy obtainable, without any good results. I heard of 'Fruit-a-tives' and gave it a trial and it was the *only medicine that really did me good.* Now I am entirely well; the Rheumatism has disappeared and the terrible pains in my body are all gone. I am exceedingly *grateful to 'Fruit-a-tives'* for such relief, and I hope that others who suffer from such distressing diseases will try 'Fruit-a-tives' and get well".

MADAME ISAIE ROCHON.

The marvellous work that 'Fruit-a-tives' is doing, in overcoming disease and healing the sick, is winning the admiration of thousands and thousands.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

POETS' CORNER

THE WAY TO WIN

"Strike," while the iron is heated,
"Pause" and the iron is cold.
If you strike too late on a hardened plate
The weld will never hold.

"Seek" and success will follow;
"Wait" and it passes by.
Be quick to grasp, then hold it fast,
And trust for a better try.

"Work" and the world works with you.
"Loaf" and you loaf alone.
This strenuous world's a continuous whirl;
It offers no place for the drone.

"Life" is an undertaking;
"Death" is a battle fought;
So let life's light illumine the night
With the deeds that you have wrought.

News About Town

This war is never going to be won by singing "We'll Never Let the Old Flag Fall."

The only results of the fire investigation at Ottawa so far are that they have found out that there was a fire there.

Mr. and Mrs. David Ritchie and daughter, of Teeswater, were visitors with Mr. and Mrs. D. Ritchie, on Thursday last.

Chesley won the championship of District No. 1, Northern League (Sr.) by holding Owen Sound (147th) to a score of 4 to 1 on their own ice.

The Listowel Banner celebrates its 60th Anniversary this week. The Banner has never been as bright or newsy as it is now under the editorship of Mr. C. V. Blatchford.

Mrs. Timothy Hanley, of Chepstowe, received a number of interesting post cards last week from Pte. William Hanley, who has been enjoying a visit to Dublin, Ireland, on leave from the trenches.

Corporal (to soldier reporting sick)—"What's the matter with you?" Tommy Atkins—"Pain in my habdomen." Corporal:—"Habdomen be 'anged stomick, you mean. It's only hofficers as 'as habdomens.

The Tom Marks Co. played here to fairly good houses. The show was up to the usual standard of this well-known Company and Tom Marks reports the show business good throughout the country at present.

Capt. Allen Todd, the genial quartermaster of the 160th, visited a number of recruiting stations in the county the past week, checking out the equipment. The rapidity of enlistment the past few days has called for a big lot of equipment.

Many men give their business as an excuse for not enlisting. Mr. E. Gordon Scales, proprietor of the Savoy Restaurant, is not one of these. "Scotty" has quit business and locked the front door to answer the call of King and Country. The building will now be remodelled and occupied as a residence by Mr. Fred Benninger, who owns the block.

The small boy who can scare up a pain in his tummy is going to be in clover. When said pain developed, a dose, or a threatened dose of castor oil, generally worked wonders, but, joyful word it is castor oil becometh scarce and scarcth in price. The price in fact has gone up about 500 per cent. since the war started. Blame the war. They are using great quantities of this delightful summer drink for the manufacture of war munitions. Some castor oil used to come from the East Indies, but now the growers there are shipping all their sbed to England.

+ + +

A Clean Sweep

If the recruiting "bug" is really an infectious germ, the Savoy Restaurant premises must be badly in fested Every person connected with this establishment since it was first opened in Walkerton fifteen months ago has enlisted and on Saturday night next Mr. E. Gordon Scales the present proprietor, will walk out and lock the door, having already signed up with the 160th. Two town boys, Reg. McCarter and Frank Patten started the Savoy on November 20th, 1914. "Reg" is now with the 34th in England and Frank is with the Grey Batt. at Owen Sound. When these boys sold out to Gordon Scales, the latter engaged Ross Woodman as cook. Ross left shortly afterwards to join his Majesty's forces in England. Gus Jenkins who succeeded him joined the 34th very soon, and his successor, Charlie James, joined the 160th. The present helper, Herb. Hauck tried to join the 160th this week but failed to pass. "Scotty", the proprietor, is now in khaki and some of these days the boys of the 160th may be enjoying his delectable dishes.

SPRINGTIME'S OPPORTUNITY

Those who contemplate going West this Spring will do well to bear in mind that the most fertile and prosperous sections and all the business centres of the Great West are reached by the Canadian Northern Railway. New equipment, new route, new opportunities—a chance for all. Cheap fares during March and April. If interested apply to Mr. J. E. Attwood, Canadian Northern Agent, Walkerton, or write to R. L. Fairbairn, General Passenger Agent, 68 King St., East, Toronto, Ont.

Mr. John Marsh, soloist at Knox Church, sang "The Broken Pinion," very acceptably last Sunday evening.

Mr. and Mrs. John Skalitzky, of Viking, Alta., are visiting the latter's parents at Dunkeld. Mr. Skalitsky, who formerly managed a creamery at Dunkeld, has been engaged in the cattle business in the West for a number of years. His wife has been very poorly with rheumatics but is now greatly improved.

Mr. Alph Stevens had an odd experience one day last week with a prize cock bird which he bought recently at Toronto. While feeding in the yard the bird suddenly keeled over and turned up its toes and to all appearances was dead. Mr. Stephens had visions of losing a snug sum of money which he had paid for the bird only a few weeks ago. The use of a stomach pump revived Mr. Bird however, and he was soon as lively as ever. Eating food with salt in it was what made him turn up his toes. That gets the feathered fellows every time.

+ + +

Strong for British.

Speaking in St. John's Lutheran Church, at Waterloo, on Sunday night, Prof. Laury, president of the Waterloo Lutheran Seminary, emphatically declared his belief in the righteousness of Britain's cause, and noted the fact that out of seventy million people of Evangelical Lutheran faith in the world, over half of them are identified with the cause of the Allies. Over one hundred of her priests have been put to death in Belgium by the enemy.

+ + +

A Great Meeting.

Four young men offered their services to the 160th Batt., at the big Recruiting Meeting at Port Elgin, on Thursday night. Rev. J. Archie Barker, pastor of the Baptist Church, said: "I have offered my services as Chaplain for the 160th, but if I am not chosen, I must still go whether it be as a private or in whatever capacity I am chosen. I must go." The speakers of the evening were: Judge Klein, John Rowland, David Robertson, J. J. Hunter, E. Roy Sayles, Reeve Izzard and others.

+ + +

A Worthy Example.

While a great many Germans in this locality receive credit for not being burned up with loyalty to the British Empire we have many of that nationality who are made of the right stuff. Last week George Heisz, of Mildmay, a dental student at Toronto, enlisted as a telegrapher but was objected to on the ground that his father was born in the U. S., as was also the son. Mr. Heisz, Sr., on hearing of this condition of affairs, was anxious to remove all obstacles in the way of his son joining the colors, and went to Walkerton on Monday morning to swear allegiance to this grand old empire. George is now able to enlist, thanks to the action of his loyal parent.—Mildmay Gazette.

+ + +

He Was Non-Suited.

Mr. Telmlo was a great friend of the late Hon. Dr. Landerkin, and he used to tell a "good one" that the Doctor "got off" on him once. It was after the election of 1896. Mr. Telmlo had been a widower for several years and the Doctor one night at dinner pointed to a woman seated at another table and said: "John, that woman is a widow and she is worth four hundred thousand. I think I can get her for you if you will give me a reasonable commission." Mr. Telmlo told him to go on with it and if he succeeded he could name the commission. For two days he inquired how the Doctor was getting on and the doctor was able to report progress. On the third day the following conversation took place: "Well, Doctor, how are you getting on with that fair widow?" "Oh, it's all off, John." "Why, what went wrong?" "She saw you." Mr. Telmlo, who was able to appreciate a joke at his own expense, took pleasure in telling this one.—Toronto News.

ARE YOU GOING WEST THIS SPRING?

If so, bear in mind that the Canadian Pacific Railway offers the finest possible equipment and exceptionally good train service; operating through Standard and Tourist Sleepers, also Dining Cars to Winnipeg and Vancouver, via one of the most picturesque routes in the world.

If such a trip is under consideration, apply to any C. P. R. Agent for full particulars or write W. B. Howard, District Passenger Agent, Toronto, Ont.

DECISIONS RESPECTING NEWSPAPERS

Any person who takes a paper regularly from the post office, whether addressed in his name or another's or whether he has subscribed or not, is responsible for payment.

If a person orders his paper discontinued he must pay all arrears, or the publisher may continue to send it until payment is made, and then collect the whole amount whether the paper is taken or not.

The courts have decided that refusing to take newspapers or periodicals from the post office, or removing and having them uncalled for while subscription remains unpaid, is prima facie evidence of intention of fraud.

PTE HANLEY WRITES HOME

Farmers are Busy with Their Spring Cultivating in Flanders—Chepstow Boy Visits Dublin and Daniel O'Connell's Tomb While On Leave.

Pte. William Hanley, has been enjoying a short respite after a long siege in the trenches and spent his ten days' leave paying a visit to Dublin, Ireland. We publish below two interesting letters received by his father, Mr. Timothy Hanley, of Chepstowe:—

Jan. 25th, 1916

Just a short letter to let you know that everything is going well with me in Flanders, and only hope this letter will find you all in the best of health. The weather is most beautiful here in Flanders. The mud is fast disappearing and the green grass is showing itself over the once muddy fields where we used to sink from ankle depth to knee deep. Many of the farmers here are busy cultivating their land in readiness for the seeding season.

The big twelve inch guns were busy for the past week or more bombarding towns back of German lines. Bombardments by our artillery still keeps fairly active and surely we must be playing house with the German positions. The aeroplanes also show themselves in large numbers.

I expect to go on a ten days' furlough to Dublin, Ireland, on the 25th of January. It will surely be much welcomed to be away from the noise of battle for that period. I have collected a few German shell noses, which I hope to be able to send you from Ireland. They were picked up by us boys a few yards back of our front line or firing line. Enclosed find two addressed envelopes I just received that were seven months finding me. I just received them yesterday. They will surely be a grand souvenir. I received a very nice parcel from Charlie and my godfather, Father Ferguson. I also received some from Lizzie Murray, Toronto, my cousin Bertha Hanley, Toronto, and others from friends in England. Very few in the battalion received so many and of such good quality parcels as I did. Thanks to the liberality of my relations and friends. They are surely some of Canada's best citizens. Excuse me this time for not making my letter more lengthy. Will write you from Dublin. May God bless and protect us all. With best wishes to all,

W. P. HANLEY.

+

Dublin, Ireland,
February 1st, 1916.

I will likely be leaving Dublin tomorrow for London, Eng., en route for the firing line in France again. I spent a very enjoyable time here. Especially grand were the Catholic Cathedral and the Cemetery. I was down in the archway of Daniel O'Connell's tombstone and surely there would be nothing that would please anyone with truly Irish blood than to witness the beautiful tomb of Daniel O'Connell, the true-hearted liberator of Ireland. His coffin can be seen quite plainly and those of all his relations. It surely must have cost thousands of dollars to build such a structure. There were also beautiful tombs of other prominent Irishmen. Another fine sight was the brewery of Guinness. The one building covers over forty-two acres of ground. I hope you will receive the souvenir book of the brewing plant. I sent you a German shell-nose by mail. I hope you will receive it in good order. Keep it as a souvenir. I also sent one to Rev. Father Ferguson. The both noses were picked up, one about ten yards back of the firing line and the other about ten yards in front of the firing line, which in our version is "No Man's Land," because no one can travel in it in daylight without being killed. I hope not to forget to get some views of Ireland and send them. The weather here is very fine, only a warm breeze to make it more agreeable. I hope all are well at home. I must close for this time as my time is limited for the time being. I hope you received the two envelopes that were travelling between six and seven months before they reached me.

WAR POTATO PATCHES

Bruce School Children Raise Over $150 For Patriotic Purposes.

As the result of the efforts of Bruce school children in cultivating potato patches the past year and turning in the proceeds to Mr. N. C. McKay, of the Agricultural Department, the neat sum of $163.50, has been realized in this county for patriotic purposes. This money will be turned in with similar funds from other counties in all, $1500.00 will be contributed to some special need, the contribution to be known as "The Ontario School Children's Gift."

Some of the children in this neighborhood who grew potatoes and the amounts which they made towards the fund, are given below:—

District No. 1:— No. 1 Brant, no report; No. 2, Brant: Elsell, Elroy, $1.25; Elsell, Irene, $1.25; James children, $1.25; Misch children, $1.25; Himphent, Mary, 75c; Wilhelm, Annie, 50c; Ashley, Gertrude, $2; Michlhausen, Amos, 55c; Eckenswiller children, 30c; McNally, Jessie, 75c; Ellis, Eleanor, 75c; Plowright, Tom, $1; total, $10.35. No. 3 Brant: Cunningham B., 50c; Schilling, Gordon, 50c; Leach children, $1.25; total, $2.25. No. 4 Brant: Kirstine, Graeme, $1. No. 5 Brant: Holm, Graham, 90c. No. 6 Brant: McWhinney, Ruby, 25c. No. 9 Brant: Milne, Jimmie, 50c. No. 1 Brant: Chisholm, Aileen, $1; Abell, M. $1; Garland, Bernice, 75c; Garland, Allen, 75c; total $3.50. No. 2 Carrick: Hossfeld, Annie, $1. No. 3 Carrick: Hopf, Ethel, 90c; Dickison Charlie, 25c; Dickison, Minnie, 25c; Scott, Harold, 50c; Pletsch, Harry, 50c; Pfohl, Dalton, 50c; Scott, Laura, 50c; Miss Pletsch teacher, 60c; total, $4.00.

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so lifelike, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

S. W. VOGAN

A Heroine of Marne

(By Pitts Sanborn.)

She is just a woman. When you have said that you have perhaps said enough: in France to-day every woman is a heroine and every other man a hero. But some of the heroines are actresses, singers, women of letters, women of science, and "society queens." The limelight of publicity falls on their lives and deeds. Many are physicians, many are nuns, inured by profession to self-sacrifice. Juliette Caron is none of these. She is just a woman, like another, in a time when to suffer and not tell, to do great deeds and hide them, is the daily bread of thousands of humble, unknown people, who veil their heroism as they veil their bitter sorrows, in a proud and noble silence.

It is only by accident, when one lives and moves among the French, that one unearths a history of splendid daring and of a devotion to La Patrie such as hers. Then you have to dig the facts out slowly, painfully, one by one. The French nation is in this war as a unit; never did the individual seek less his own advertisement. A joyous forgetfulness of self, an unceasing sacrifice of everything for France, a universal faith in the ultimate victory, these three are the determining factors of French life to-day, and on all three the women are, if possible, more insistent than their men.

Dropping quite by accident, one evening, into an unpretentious cafe, from whose windows you see the Paris Opera—the near presence of that overpowering fact in stone has not yet disturbed the cafe in its modest obscurity.—I learned the story of Juliette Caron and met the woman whose devotion is now set forth in print for the first time. She was in the company of another woman on whose breast glowed the little piece of crimson ribbon which signifies that she is one of the few women whose talent has won her the proudest distinction the French Republic can confer—membership in the Legion of Honor. It was this woman who told me Juliette Caron's story, which Juliette Caron herself could not be induced to tell.

ON THE LINE OF WAR.

When the war broke out our heroine happened to be in London, and let me say at once that she speaks English fluently, a fact that has an essential bearing on her story. Her first thought was of service to her country, as she hurried back to Paris to see what she could do to help. Finding no opening in the capital, war service for women in those days and nights of supreme and unexpected stress were as yet little organized, she decided that she would betake herself to Bethisy St. Martin, a village in the Forest of Compeigne, where her family own a country cottage, in the belief that there would probably be work for her nearer the firing line. Already the Germans were steadily advancing on Paris and all passenger trains in the direction of Compeigne had been suspended. However she managed to find a place in a troop train that would pass by Bethisy.

She did not have to look farther for her work. It came to her, like the mountain to Mahomet, for her village lay right in the line of that awful retreat from Mons and the German pursuit. In the early dawn of September 1 the thunder of cannon awoke her suddenly. As she pulled aside the curtains to look out she saw a shell, a German shell, drop its sinister message into her very garden. She had hardly time to fling herself into some clothes before a lusty shout from outside brought her to the window again. Leaning against her garden gate she beheld a young soldier in khaki, his head covered with blood.

"For Gawd's sake, lidy," called the lad in richest cockney, wiping the blood from his mouth, "do get me a bicycle! I cawn't mike 'em understand me next door, but I thought they said you were English."

Running downstairs and out to the gate, she helped the boy indoors, listening while he poured forth an incoherent story. "Our battery's over there," he gasped, pointing in the direction of the next village, "and the Germans are wiping 'em out! For Gawd's sake get me a bicycle, so I can go for help!'

She promised the bicycle if the boy would go with her to the convent across the road and let Sister Benoit bandage his head while she was fetching it. Then she half led, half carried the fainting lad to the convent. Leaving him in the care of Sister Benoit she was in the act of closing the convent door when a gruff voice, speaking French, startled her with the question: 'Have you seen any English here?"

PISTOLS IN HER FACE.

Whirling around she found herself facing a patrol of uhlans, every man of them, including the officer, pointing a revolver at her as they bestrode their horses in the village street.

"Mais non, Monsieurs, returned the quick-witted Frenchwoman, without turning a hair—or it would have been all up with the Sister Benoit and herself, to say nothing of the English soldier boy, as she perfectly well knew. Evidently satisfied with her answer, the uhlans dropped their guns and trotted off in the silent, catlike manner of their approach. The nonplussed woman found herself taking note of the fact that the horses of the patrol were shod with rubber!

With uhlans in the village itself, it was of course hopeless to look for aid for the doomed battery. Instead, Juliette Caron sought out the village cure, the chemist, and the doctor, and prepared to see what could be done for the wounded survivors.

The battery in question proved to be the famous L Battery of the British Royal Horse Artillery. The men had spent the night in bivouac just outside the village, accompanied by a detachment of cavalry, and had been surprised while breakfasting at 4.30, by an attack from eight German guns, which the Germans had noiselessly got into position 500 yards away. Battery L was in a hopeless case, but put up a magnificent fight, although there was only time to get two of the guns into action. Every officer was killed and every man either killed or wounded, and one of the guns silenced. With the remaining gun the sergeant-major, wounded as he was, succeeded in silencing four of the German guns, and soon afterward another British battery arrived and completed the work. All of the German guns were captured.

HER HOSPITAL.

When Juliette Caron reached the scene with her hastily gathered ambulance corps the place was like a shambles. On carts and wagons they carried the wounded men into the village, where the little parish theatre had been rapidly turned into a hospital. The cottagers furnished beds and linens and Juliette Caron and her companions went to work with might and main to save the lives of the desperately wounded soldiers who had come from England to help save France.

The following morning the staff of the little hospital was roused by the heavy tramp of marching men. It was the German advance guard on the way to coveted Paris. And for 13 days, hour after hour, day and night, the German legions marched in endless procession through the village streets. Sometimes a regiment rested for the night, and then there was hell in Bethisy St. Martin. Every poor cellar was looted, and every woman hid in the forest, full of fear that had marched with the invaders like a plague. Less dangerous were the men that did not tarry. As a rule they only sang as they passed by. But always the village street was foetid with the stench of unwashed German troopers.

Day after day the huge, pink faced, heavy-jowled, be-monocled doctors of the German army would draw up at the door of the little hospital and insist on examining the British wounded. Happily the latter were all too ill to be disturbed, and the Germans were in too great a hurry to reach Paris to waste much time on them.

RISKED HER LIFE.

During the intervals of scrubbing floors, washing linen and the hundred other tasks, Juliette Caron was often called away from the hospital, to go to secret places in the quarries near the village and act as interpreter between British soldiers, wanderers from the great retreat, and to devoted villagers, who risked life daily to hide and feed the strayed Englishmen till they could safely depart on their way to rejoin French's "contemptible little army," which was even then preparing to hurl the invaders back forty miles into their trenches on the Aisne. Had she or they been discovered by any prowling German, a fate as dreadful—and as splendid—as that of Edith Cavell would certainly have been hers.

The last of the German horde had scarcely passed through the village when the victory of the Marne relieved that part of the country of their presence for good, and during several months thereafter Juliette Caron was able to devote her energies undisturbed to nursing her sorely wounded soldiers back to health. Eventually, every patient that entered the transformed village theatre was discharged well on the road to convalescence, and Juliette Caron could boast that not a single death occurred among her little flock. In all, 127 wounded men (including a number of French soldiers) passed through the little temporary hospital before official Red Cross-dom, in all the knotty splendor of the red tape, alighted on its devoted threshold and closed it.

The bitterest moment of Juliette Caron's life was when one day a resplendent official, accompanied by a bevy of richly-dressed "lady" nurses, most of them returned refugees who had hit the trail for Bordeaux in the speediest manner possible at the very time when our heroine was striving to edge her way into a troop train for the forest of Compeigne, arrived on a "visit of inspection" and roundly condemned the total lack of "scientific method" in the poor impromptu little village hospital. The remaining patients the gorgeous official packed off forthwith to Paris and silence, leaving Bethisy to its forest calm once more, with nothing as a memorial to the recollection they bore in their hearts of the months of self-sacrifice, hard work and love of their fellowmen. Official France forgot the little hospital.

The British soldiers whose lives I had saved did not forget it. They brought to the knowledge of King George what Bethisy had done for some of his fighting men. A few weeks ago the monarch commissioned his eldest son to drive over to the forest village from the British headquarters at St. Omar. The Prince of Wales took with him on that drive two gold crosses of the Order of St. John of Jerusalem. One he pinned on the breast of Juliette Caron; the other on her friend and helper, the Sister Benoit.

"England has been very good to France," Juliette Caron said to me dreamily, when her friend had finished the tale of her achievement, as we three sat together in the modest cafe under the shadow of great Opera. "I am only too glad I have been able to nurse some of her soldiers back to health."

SAVED HIMSELF, UNAWARE.

Showing How the Eye Sees More Than One Thinks it Does.

Writing on psychological subjects in the Ladies' Home Journal, H. Addington Bruce says:

"From Dr. A. H. of Pennsylvania, one of our well known psychologists, I have received this impressive piece of testimony to the power of the eye to see more than one consciously apprehends:

"'Three summers ago, when I was on a visit to my old home town, I took a short cut across familiar fields where a fair growth of weeds covered the ground. I was going along at a rapid gait, with my mind wholly occupied with matters other than my path, when suddenly, quite reflexly, my left foot, instead of going down on the spot where it should, jerked itself over to the left, and I went on fully ten steps before I realized that I had made the sharpest kind of an offset in my path. I wondered what made me do it, turned, retraced my steps and found an adder still coiled and ready to strike, exactly, as I judged, where my foot should have gone.'

"Dr. A. H., recognizing the correct explanation of his fortunate misstep, adds:

"'During my boyhood summers I used to go barefooted much of the time. Through sad experiences with stubble fields, brier patches and stony paths I learned automatically to pick my way without giving thought to the matter. As a result, I find myself frequently in my walks avoiding obstacles which at the moment I do not consciously discern.'"

HER OWN FAULT.

(Detroit Free Press)

It being leap year she decided to propose.

"Will you have me for your wife," said she sweetly.

"Since you have suggested it, I will," he replied. "But just remember, Mame, if I don't turn out to be all that you expect you have only yourself to blame."

Perhaps the good die young on the principle that we should come early and avoid the rush.

Chats With the Doctor

(By a Physician)

COMMON MALADIES.

One of the most common maladies which attack man is the presence of parasites in its intestinal canal. The sub-human animals—those especially which are domesticated, and therefore lead a non-natural life—are even more liable still. And this proneness of the cat and dog to worms—with the conditions of ill-health thereby directly resulting—furnishes a strong argument against the too great multiplication of domestic pets in the household, particularly where there are children about. Although I am fond of animals, and like to see them well treated, I cannot refuse to admit that there are far too many in our modern towns and houses for the maintenance of wholesome sanitation.

The most common parasite again in the human species here is the thread-worm, to which children are most liable—but from which no one is altogether exempt. Many people suffer without knowing the worms are there, and the presence of this parasite is one of the most frequent causes of troublesome itching at the lower extremity of the alimentary canal, which is its accustomed habitat—that is, I mean, the portion next within, called the rectum.

The thread-worm is very minute, white in color; the male being only 1½ lines in length, the female 3-6 line. A copious deposit of thick mucus in the evacuation is usually the index of its presence. The eggs probably enter the body in drinking water, and with vegetable food taken uncooked, such as watercress. The best safeguard is plenty of salt, with attention to the purity of the water, and with care to cleanse thoroughly green edibles of the above kind.

Thread-worms are local, inhabiting the rectum, and in bad cases the whole length of the colon (large intestine). Hence you cannot get at them to any appreciable extent at least by medicine swallowed. You must apply the remedy directly in the form of enema. You have choice of two curative injections. One is a tablespoonful of common salt to a pint of warm water. The other is an infusion of quassia chips, made by soaking a handful of these in the same quantity of warm water for an hour.

For an adult you would use the full pint of warm water; for a child, half that quantity. The enema should be administered once a week for three weeks. Plenty of salt should be taken in the food. If the trouble recurs, as it too frequently does, repeat the process, taking internally (the adults' dose) 15 drops of tincture of iron-perchloride in water three times a day for three weeks.

TAPE-WORMS.

Here we have a relatively uncommon intestinal parasite in this country; but in others the taenia is far more prevalent. I believe that in Abyssinia everybody suffers from this creature, of which many species are known. The taenia solium consists of white, flat, ribbon-like segments of about a third of an inch broad, and a quarter of an inch long. You may have a thousand of these segments, each practically a separate individual, united to form a single tape-worm, whose length is from 9 to 31 feet. There is a small, thread-like head to this long body, and it attaches itself to the intestinal mucous membrane by small claws. To cure yourself you must get this head expelled. Otherwise that will go on ad infinitum, developing new segments in place of those broken off and carried away in the evacuations.

The one cure for tape-worm is oil of male fern, which kills it. In order that the remedy may gain access to the head, you give, first, an ounce of castor oil at bedtime. Then at 5 o'clock in the morning you give from a drachm to 1½ drachms of extract (substituted in the Pharmacopoeia for this oil) of male fern in a little brandy and water or coffee. At 9 a.m. you take a second dose of castor oil to carry off the creature. But you do not always succeed in destroying it at the first attempt, and have to repeat once or twice, a few days afterwards, until you do.

ROUND WORMS.

Then the round worm (ascaris lumbricoides) occupies an intermediate position in the point of prevalence, is not so common as the threadworms, or so relatively rare as the tape ditto. For this you take 3 grains of santonin in milk at bedtime, for three successive nights—for children a slightly smaller dose.

It should be remembered that all these intestinal parasites, beside impairing the general health, are apt to produce obscure nervous symptoms. Many cases of convulsions in children are traceable to them. The worst case of chorea (St. Vitus' dance) I ever saw was in a young girl of 17, who died from it; and who was subsequently found to be the host of a huge tape-worm.

ULCERATED LEGS.

Ulcers on the legs are par excellence the affliction of the poor. They are nearly always associated with varicose veins. They are often also a remote result of disease contracted in youth, which impairs the purity of the blood ever afterwards, and impedes the repair of casual injuries.

In order to cure quickly these sores, you must rest as much as possible; and, if you can manage it, lie in bed for a week or two. You first get some lint, and cut it up into pieces of exactly the size of the ulcer.

Supposing you to be unable to undergo the speedy rest cure in bed you spread one of these pieces thickly with an ointment composed of 1 part of Peru balsam to 7 parts of benzoated lard; and apply it to the ulcer before you get up in the morning. Then you bandage the leg with the ordinary "water-dressing" bandage the chemist sells; winding the bandage round and round from the toes to just below the knee. At night you take off the bandage, apply another dressing of lint and ointment; and keep it on through the night with a handkerchief. In the morning you repeat the process, carefully bandaging as before.

It is important to rest the affected leg up on a chair when you sit. Do not stand; either walk or sit down. Do not bathe the ulcer; only wipe off the discharge with a soft rag. If there is pain after the dressing, sit for half an hour with the foot well raised—any resting on the mantelpiece. Go early to bed and avoid all stimulants.

SORE THROAT.

For the ordinary sore throat which is brought on by exposure to cold you should gargle frequently with hot water pure and simple. This will often remove it immediately.

If the sore throat has continued several days and is attended with ulceration or with inflammation of the little gland follicles, you take 15 grains of potash-chlorate, dissolve it in a little warm water, and take it every two hours—gargling slightly with it as you swallow it.

If there be tonsillitis (acute inflammation of the tonsils), you should take an ounce of mistura quiaci every three hours.

If the sore throat be diphtheritic—you recognize that by the whitish pellicle on the tonsils and about the soft palate, coupled with some difficulty in swallowing and a feeling of extreme weakness—you ask the chemist for a mixture containing a drachm of sulphurous (not sulphuric) acid, and two teaspoonfuls of syrup, to the dose. These you swallow every two hours in an ordinary case—in a bad one, every hour or half hour. The mixture has a pleasant nutty taste, and children take it well. To them you would administer half the dose above. Given in this way the course of diphtheria is usually very rapid, and there are no bad after consequences, such as paralysis—a trouble I at least have never met with.

This design by a Fifth Avenue firm secured first prize at the Winter Garden Show, New York. It is of black tulle, black satin and gold embroidery. The tulle is draped over a Velasquez reed which holds the material well out from the figure.

SCIENTIFIC ODDS AND ENDS.

In the United States from 20 to 40 per cent. of the cases requiring charitable relief are due to sickness.

The pocket flask may be put out of business by the discovery of a French chemist, who has devised a process by which all liquors may be solidified and carried in the form of tablets.

An object viewed through a foggy atmosphere seems larger than it really is.

In 1911 the mica produced in the United States was valued at $328,716. The output of sheet mica amounted to 656,2[illegible] pounds, and that of scrap mica amounted to 3,730 pounds.

The railway system of Japan is practically a government monopoly, only 265.58 miles of railway being privately owned on March 31, 1915 (the latest date for which statistics are available), out of a total mileage of 5914.

An electric drill for dentists' use has been made so compact that it may be carried in the pocket. With it dental work can be done at the patient's home.

Piano-player rolls may be made at home by any one who understands music by means of an exceedingly simple apparatus recently patented.

A cent's worth of electric energy will lift 100 gallons of water 100 feet.

Since the American occupation of Hawaii the leper population has been about halved.

The 12 leading Detroit automobile companies are at present engaged in enlarging their plants. The total amount of this increase is given at $5,000,000 cost, 850,000 square feet of floor space, with offering employment to 5,000 additional men.

Except along the Caspian coast, Persian agriculture is dependent almost entirely on irrigation.

The fear of contamination from the books of a public library seems to have been overestimated. The dust gathered during a cleaning of the Yale library was found by chemical analysis to be entirely harmless.

Five per cent. of the population of the United States earns its living directly or indirectly in the electrical business.

In order that the chauffeur may open the automobile door without leaving his seat, the invention of Thomas A. Porter, of Tuckahoe, N. J., provides a sliding door which is spring closed, but can be opened by closing an electric circuit operating in connection with a solenoid which moves an armature connected with one arm of a bell crank lever whose other arm is connected with the door.

The re-export coffee trade leaped this year in the States from almost nothing up to 61,481,903 pounds.

Measures have been taken by the Dutch authorities to prevent the extermination of birds of paradise in the Dutch East Indies.

The Royal Astronomical Society has just had its charter amended so that women are eligible for election as fellows and associates.

According to the manufacturing plans of the 30 large rubber tire companies in the United States, their output during the present calendar year will exceed 1,000,000 tires, of an average value of $20 at retail.

An investigation made by W. M. Mosseri revealed the fact that there is an immense quantity of underground water available in Egypt, both for drinking purposes and for irrigation, which is now drained away into the sea during the period of low water and lost entirely, when good use might be made of it agriculturally. The gentleman suggests that the subterranean water supply be developed, and proposes constructing a network low deep wells parallel to the coast of the Mediterranean, at a distance of about fifty miles from the latter. He estimates that the water drawn from these wells, and that is now lost to the sea, would amount to 1,500,000,000 cubic meters during the period from March to August, and that the withdrawal of this water would hardly affect the subterranean flow toward the Nile during low water or the amount required by lands. It is claimed that the cost of this project would not be excessive.

BIRD WEATHER PROPHETS

Many Kinds Foretell the Approach of Storms.

To one who understands the habits of birds their actions foretell changes in the weather with as much accuracy as the observations of the government scientists, who base their forecasts on telegraphic reports and their own study of atmospheric conditions. Indeed, there is nothing more remarkable in nature than the ability to forecast the weather which most birds instinctively display, and which a little study enables anyone to profit by.

If birds which are known to fly high and for long distances, such as martins and different kinds of swallows, are observed flying close to the earth, or keeping near their homes, it is almost a certain indication of a storm, with heavy rainfall.

The reason for this action of such birds is simply because these birds depend upon insects flying in the air for food, and insects do not fly high preceding a storm, because the atmosphere is too heavy. During fair weather the atmosphere is lighter, and insects can fly higher, and consequently birds have to fly longer and higher distances to secure their food.

An unusual silence is frequently noticed among many birds a short time prior to a severe or sudden wind or thunder storm. Robins sometimes sit upon a high twig and sing long and loud just before what is called a "growing" shower, but seldom do so if the storm is going to be a severe one.

Bats flying high in the air in the late evening indicate fair weather. This is because the insects which the bats are after are flying high, when the lightness of the atmosphere allows them to do so with ease.

For centuries persons who have observed closely have insisted that rain is certain to come when birds and barnyard fowls are to be seen vigorously oiling their feathers. Others declare that when fowls rub themselves in the dust and clap their wings vigorously, rain is indicated.

The Zuni Indians have made many interesting and valuable observations concerning the weather changes, and these people declare that when chimney swallows, martins and other species of swallow fly in circles, and cry out loudly, there is certain to be rain in the next few hours.

When cranes scream and make a loud noise, and seem to be restless, and when herons fly swiftly up and down, and seem to be dissatisfied with any location they may take along a stream, it is sure indication of rain soon.

When great horned owls are heard hooting in the deep wood for more than a few minutes at a time, a storm is indicated, either rain or snow, according to the season. If grouse are heard drumming at night, we are told by the close observing Indians that we may expect a heavy fall of snow. This drumming is a peculiar sound, seldom heard nowadays, as forests containing this very intelligent bird are growing very scarce.

When crows fly in pairs and to great heights, we may expect fair weather, while if they fly lower and wheel in great circles, making an unusually loud noise, rain is near at hand. Crows flying alone are also certain indications of an approaching rainy period. When crows make a very loud noise they are usually engaged in a great battle, and these contests are certain indications of a sudden and very marked change in the weather.

When peacocks and guinea fowls are very noisy we may expect a sudden squall and heavy rain. Their chatterings foreshadow rain and wind as surely as any first-class barometer.

At sea, or near large bodies of water, gulls are seen soaring very high and uttering shrill sounds before a change in the weather, especially if the change is to be a stormy one. Sailors long ago learned to heed their warnings.

Blackbirds singing quite early in the morning, and continuing their song well into the forenoon, foretell rains. When they utter very sweet and liquid notes fair weather is indicated.

Pigeons which are in the habit of making long flights return to their homes or make only short flights just before a rain.

Not Quite.

"Young man," inquired her father sternly, "will you give her a home like the one she has been used to?"

"No," replied the truthful suitor, "for there will be no grumpy father to come home and make every one miserable by his kicking over trifles and swearing at matters in general. There will be no mother to scold her from morning to night for wasting time merely because she wants to be neat. There will be no big brother to abuse her for not doing half of his work and no little brother to make enough noise to drive her crazy when her head aches. There won't be any younger sister to insist on reading some trashy novel while she does all the work. She will not have with me a home like she has been used to, not if I can help it."—Boston Journal.

There ought to be a law forbidding janitors to get sick. Getting up on a January morning and finding no fire in the furnace and the ashes not removed is a severe trial to a man's religion.—Kansas City Journal.

FIVE HEROES WON THE V. C.

Latest List of Brave Deeds Which Got Highest Honor.

His Life for His Officer—Naval Hero at Kut.

Five new V. C.s, granted for bravery in France and Flanders and Mesopotamia, have been announced:

No. 1665, Corporal Alfred A. Burt, 1st Battalion, Hertfordshire Regiment, (T. F.)

At Cuinchy, on September 27. His company had lined the front trench preparatory to an attack, when a large minenwerfer bomb fell into the trench. Corporal Burt, who well knew the destructive power of this class of bomb, might easily have got under cover behind a traverse, but he immediately went forward, put his foot on the fuse, wrenched it out of the bomb, and threw it over the parapet, thus rendering the bomb innocuous. His presence of mind and great pluck saved the lives of others in the traverse.

No. 9720, Private John Caffrey, 2nd Battalion York and Lancaster Regiment.—

A man of the West Yorkshire Regiment had been badly wounded and was lying in the open, unable to move, in full view and about 300 to 400 yards from the enemy's trenches near La Brique on November 16. Corp. Stick, R. A. M. C., and Pte. Caffrey at once started out to rescue him, but at the first attempt they were driven back by shrapnel fire. Soon afterwards they started again under close sniping and machine-gun fire, and succeeded in reaching and bandaging the wounded man, but, just as Stick had lifted him on Caffrey's back, he himself was shot in the head. Caffrey put down the wounded man, bandaged Stick, and helped him back into safety. He then returned and brought in the man of the West Yorkshire Regiment. He had made three journeys across the open under close and accurate fire, and had risked his own life to save others with the utmost coolness and bravery.

Private John Caffrey was born at Cork, and enlisted for service at Nottingham in the South Staffordshire Regiment in 1910, when eighteen. He was transferred to the Second Battalion, York and Lancaster Regiment, and going to France on the outbreak of the war has been through some of the heaviest fighting.

No. 5107, Corporal Alfred Drake, 8th Battalion, Rifle Brigade—

He was one of a patrol of four which was reconnoitring towards the German lines near La Brique on Nov. 23. The patrol was discovered when close to the enemy, who opened heavy fire with rifles and a machine gun, wounding the officer and one man. The latter was carried back by the last remaining man. Drake remained with his officer and was last seen kneeling beside him and bandaging his wounds regardless of the enemy's fire.

Later, a rescue party crawling near the German lines found the officer and corporal, the former unconscious, but alive and bandaged, Drake beside him dead and riddled with bullets. He had given his own life and saved his officer.

No. 1117, Corporal Samuel Meekosha, 1/6th Battalion, West Yorkshire Regiment (T. F.)—He was with a platoon of about 20 non-commissioned officers and men, who were holding an isolated trench near the Yser on Nov. 19. During a very heavy bombardment by the enemy six of the platoon were killed and seven wounded, while all the remainder were more or less buried.

When the senior non-commissioned officers had been either killed or wounded Meekosha at once took command, sent a runner for assistance, and, in spite of no fewer than 10 more big shells falling within 20 yards of him, continued to dig out the wounded and buried men in full view of the enemy and at close range from the German trenches. By his promptness and magnificent courage and determination he saved at least four lives.

Corporal Meekosha was awarded the D. C. M. for this same act in December last, special report of his conduct on the occasion leading to the V. C. Meekosha, who is 22 years of age, lives in Tennant street, West Bowling, Bradford, and he joined the 1st 6th West Yorkshire in February, 1911.

Lieut Commander Edgar Christopher Cookson, R. N. (killed)—On Sept. 28 the river gunboat Comet had been ordered with other gunboats to examine and, if possible, destroy an obstruction placed across the river by the Turks. When the gunboats were approaching the construction a very heavy rifle fire was opened on them from both banks. An attempt to sink the centre dhow of the obstruction by gunfire having failed, Lieut.-Commander Cookson ordered the Comet to be placed alongside, and himself jumped on to the dhow with an axe and tried to cut the wire hawsers connecting it with the two other craft forming the obstruction. He was immediately shot in several places and died within a very few minutes.

Heart Was So Weak Could Not Go Up Stairs Without Help

When the heart becomes weak it does not do its work properly the nerves become unstrung and the whole system seems to go "all to pieces."

When this happens you need a remedy to build up both the heart and nerves, and Milburn's Heart and Nerve Pills will accomplish this for you. Do not let your case run on and allow it to become chronic.

Mrs. Evangiline Loveduke, Coulonge, Que., writes: "Last fall my heart and nerves were so bad I could not sleep at night, and my heart was so weak I could not go up stairs without help. My doctor said he could do no more for me as my heart was completely done. A cousin of mine came to see me and told me that Milburn's Heart and Nerve Pills cured her completely. I immediately gave her 50 cents to get me a box, and since that day there is a box always on my sideboard. I am well, and my heart and nerves are better than when I was a little school girl. I advise anyone with heart trouble to try them. No doctor can beat them."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25; for sale at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

EAT RAISINS.

They Combine High Nutr Value and Delicious Flavor

As the fall weather advances the appetite sharpens, and persons are generally eager for foods that are richer and heavier than those served in summer-time. The nip in the autumn air makes every one keen and willing to partake of food. The natural demand is for food to generate warmth. Among our foods that are appetizing not all are valuable as heat-producing foods. To maintain health modern teaching says our rations must be balanced. Every one knows, in a general way, that meats and rich foods are necessary to keep one "warm in winter," and that green vegetables and fruits are "cooling foods" for summertime. The chemist and the physician, however, give the exact food value of every article used in the dietary. Appetizing and pleasantly flavored foods are always the most enjoyable, though oftentimes they have small nutritive value. Whenever flavor and food value can be found combined in an article of diet it is a fortunate thing for the doctor, patient and the merchant.

The food value is estimated by the number of calories in a given proportion of a substance. Among the articles of diet available in the winter months there is none more agreeable to eat than raisins. Raisins are an excellent food. They make a nutritious as well as appetizing dessert alone or eaten with nuts. As a food the raisin holds a good place; the value is 1,560 calories to the pound. This is more than either whole wheat bread or cornmeal contains. A handful of raisins eaten when hungry, will furnish more warmth and nutriment than a slice of bread. The raisin contains enough nutriment to supply energy in the forms of heat and muscular power. The housewife has always used the raisin in her cakes and puddings as a flavor, and never knew she was stirring in extra nourishment as well. Raisin pie is the most nutritious of all pies and less liable to cause indigestion than other kinds of pie. In whatever combination raisins may be used—whether mixed with flour, as in bread or cake—they add to the food value of the loaf. They make nutritious and delicious sandwiches for the children's lunch basket, the raisins or nuts chopped together and spread between the thin slices of buttered bread. The autumn pack of raisins will be on the markets in abundance within a few weeks. Eat them every day! Chew them thoroughly, too, as they will cause indigestion if the skins and seeds are not well broken up.

Food Values.

When buying remember some facts.

Food values are body-building and energy-making.

The lowest-priced food is sometimes the most valuable.

One cent's worth of oatmeal equals in energy stuff 75 cents' worth of oysters.

You will pay six cents for milk and nine cents for round beefsteak to get the same amount of strength as that from one cent's worth of oatmeal.

A cent invested in oatmeal gives the same energy value as 11 cents spent for canned corn, or for mutton, or cabbage or salt cod, or eight cents for ham or for salmon.

And beans! Think of it! One cent' worth of beans equals in body-building power 35 cents' worth of bananas and 25 cents' worth of salt pork and of celery.

FARM AND GARDEN

RICH OR THIN CREAM.

y farmers are skimming low- cream, as any butter maker you. Such cream is harder to than a richer cream, usually a poorer quality butter, and is satisfactory all round from the vpoint of either producer or manu- cturer.

he farmer who separates cream ing from thirty to forty per cent. aves much more skim milk than man who skims cream containing fifteen to twenty per cent. fat. eeps this skim milk at home and izes its value as a stock feed, in- d of giving it to the creamery perhaps to buy it back as but- milk. Though comparatively lit- ertility is removed from the farm dairy products are sold, cream es with it much less fertility does skim milk.

hen rich cream is produced there ss milk to handle and transport. amounts to quite a saving when necessary to haul the cream some nce or to ship it. Fewer cans needed to contain it and there is work in washing cans. Rich am keeps better than thin cream. terial growth takes place in it re slowly. On account of its small- bulk it can be cooled more quickly, ving less time for undesirable fla- s to develop. Better quality means ter prices and better returns to the ryman.

f the separator is working properly re will be no more butterfat lost in skim milk when skimming rich m than when skimming a thinner m. A good separator should just n as closely when delivering fifty cent. cream as when delivering nty per cent. cream. Just as accu- te tests can be made of rich cream of poor cream, the samples keep ter and are not so liable to become mpy, a frequent cause of unreliable ts.

The manufacturer also prefers high-testing cream. In making butter he an use more starter with rich cream, which gives him greater control over the flavor of the butter. If he pasteurizes much more satisfactory results can be obtained from rich cream, especially if it is sour or has started to sour. The richer cream churns better, with less loss of fat, and gives the maker closer control of the making processes.

If sweet cream butter is being made, as is demanded in many markets now, the high cream is in every way better than thin cream. A large part of the poor butter on our markets to-day will be found to have been made from low testing cream.

If the cream is to be used for ice-cream making a rich cream is again preferable. It gives the ice cream maker a chance to standardize the cream to any desired richness.

Therefore, for any commercial purpose the farmer will find a high-testing cream in demand. It costs him less to produce and to market; and at the same time will yield greater returns.—W. H. Cooper, in Prairie Farm and Home.

THE TIME TO ACT.

The old saying has it "there is no time like the present." That this applies with telling force to the selection of good dairy cows, will be admitted by every thoughtful dairyman. Selection may be made on the evidence of certain well known external indications [illegible] milking qualities with special attention paid to the udder, loin, skin, barrel, ect.

But no matter how skilled the expert judge of dairy quality in a cow may be, he is not infallible as to the amount of hard cash that any one cow in the herd will earn in a year. He may be, the ordinary dairy farmer, too, may be considerably mistaken in his judgment. One system will give him accurate results, that of selection of dairy records. It is easy to weigh and sample, it is easy to add up a few figures for each cow, it is easy to compare such totals, and it is eminently satisfactory to know for certain which cows are best to keep and breed from.

Now is the time to act, prepare to keep records all season; write the Dairy division, Ottawa, for free milk record forms, either 3 times per month, or daily. You will never regret it.

NOTES

One of the secrets of successful dairying is conveyed in the one word — cleanliness. This has been an underlying principle from time immemorial, and we must never ignore the significant importance attaching to the strictest methods of cleanliness in all departments of the dairy. Cleanliness is certainly attractive to the general public, and a dairy farm run on hygienic principles will never lack customers. It will meet a ready sale for all its products, and after all it is the market end of farming that provides the profits. It should be remembered that dirt and foul odors quickly taint dairy products and inoculate them with disease germs. It is for this reason that sterilized and guaranteed milk is so much appreciated and finds such a ready sale. The careful individual will have this class of article at any price, knowing it to be reliable. This by no means shows any excessive de- of fastidiousness on the part of r. When the ordinary upply is placed on the tisfactory manner and there will be no ly prepared, and higher priced ith plenty of cows and pro- a habit for the dairyman to turn out a product which is as pure and healthy as proper care can make it. The profit in following such a course amply repays one for any extra trouble there may be in inaugurating up-to-date methods.

While we often notice some professed horsemen [illegible] their horses in the stalls with a blanket on them so their hair will [illegible] the animal is led out to rid or drive, such a practice is not wise, since the horse is sure to chill before he can be hitched up and driven enough to start a good circulation of the blood, unless the blanket is kept on until the team is started.

Like most of the weeds, birds and insects that are considered to be pests in this country, the dandelion is not a native American plant, having been introduced from Europe centuries ago. The name "dandelion" is said to come from the French, "Dent de-Lion," which means the tooth of the lion, and refers to the tooth-shaped edges of the leaf of the plant.

Go your limit on a good bull. If your cows are deficient in the flow of milk, buy a sire that will make up the quality. If their milk is deficient in butter fat, breed from a sire whose tendency is to build up along that line.

If you have eight cows or more you need a silo. And if you want a steady rain-or-shine income you sure need eight or more cows.

The busier a cow's tail is in fly time the less milk she will manufacture. It doesn't take long to spray some fly dope onto the cows and it costs lots less than the extra milk they will give is worth.

When a ton of corn is sold from the farm it takes with it $8.60 worth of plant food. When a ton of butter is sold it takes from the farm only 64 cents' worth of plant food. For the land's sake let's milk more cows.

Rape makes a pasture crop for hogs that experiments indicate is second in value only to alfalfa. Of course, it isn't as good for the land as is alfalfa, but if a man wants quick pasture rape is the thing to sow. It is ready in six or eight weeks.

It costs more to feed poorly than it does to feed well. An animal that is poorly fed neither gains in flesh nor produces profitably. Besides, there is always more danger of loss from disease in the case of animals that are not kept in a thrifty, vigorous condition.

WOMAN'S HEALTH NEEDS CONSTANT CARE

Work and Worry Leaves Her a Victim of Many Distressing Ailments.

Every woman's health is peculiarly dependent upon the condition of her blood. How many women suffer with headache, pain in the back, poor appetite, weak digestion, a constant feeling of weariness, palpitation of the heart, shortness of breath, pallor and nervousness. If you have any of these symptoms you should begin to-day to build up your blood with Dr. Williams Pink Pills. Under their use the nervous energy of the body is restored as the blood becomes red and pure and the entire system is strengthened to meet every demand upon it. They nourish every part of the body, giving brightness to the eye and color to the cheeks and lips.

Mrs. Jas. S. Francis, Oakwood, Ont., says: "I should have written long ago to tell what Dr. Williams Pink Pills did for me, but I suppose it is better late than never. In June, 1913, I had to go to a hospital for an operation for female weakness. I was in the hospital for a month, before I was able to get home. Three weeks after this I started for a trip to the Pacific coast, in the hope that my health would further improve. On the way I stopped to visit a sister in Southern Alberta, and on arriving at her home (after a 35 mile drive) I was completely done out. I found my sister ill, her baby having been born the week before. As there was no one to help, I had to take care of the child and do the household work, and in the three weeks that passed before my sister took charge I was completely worn out, and again nearly ill. However, I started on my westward trip, and decided to stop off at Banff, where I remained a week, but it did not seem to help me, and I resumed my journey. On the train I took sick, and could not eat, and as I was alone my condition was pitiable. Finally the porter wired ahead to North Bend for a doctor to see me. The doctor wanted me to leave the train and go to a hospital, but I determined to continue my journey to Vancouver. The medicine the doctor gave me did not help me, and I was getting worse all the time. And then a young man who had the opposite berth asked me if I would try Dr. Williams Pink Pills and gave me a box he had. I used these and the porter got me two more boxes, and by the time I reached my journey's end I was feeling some better. I stayed two months on the coast, and continued taking Dr. Williams Pink Pills all that time. I had gained in weight and appearance, and when I started for home I felt better than I had done for years. Now I always keep Dr. Williams Pink Pills in the house, and both my husband and my young daughter have been benefited by their use. I bless the day that young man on the train gave me his box of pills, otherwise I might never have tried them, and would have still been an invalid."

You can get Dr. Williams Pink Pills from any medicine dealer or by mail, at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

THE POULTRY WORLD

FOR CROP BOUND HENS.

(S. C. Heindel in Prairie Farm and Home).

Practically everyone who has ever kept any number of chickens has had some deaths resulting from "crop-bound." Though authorities will tell you that chickens properly fed should not be afflicted, the fact remains that young chicks especially are inclined to eat things that are not adapted to their digestive powers.

There are essentially two forms of crop-bound: One is the result of a paralyzed condition of the crop muscle and is most likely to occur among old fowls or young ones of low vitality. It may sometimes be possible to cure this condition by medical treatment, but unless the birds are very valuable it will be more profitable to kill the sufferers and devote all energy to finding the contributing condition and correcting it in the rest of the flock.

The other type of the ailment is most likely to occur among young birds that have had insufficient green feed, and have as a result attempted to swallow a cabbage rib, a tough blade of grass, or some other bulky article, which has obstructed the outlet of the crop and has finally become so impacted, together with other food, that the mass presses on the windpipe, or fermentation sets in, and induces a form of poisoning. This type of crop-bound is usually easily recognized, as a moment's careful massaging of the crop will locate the offending matter.

The treatment usually prescribed is an injection of castor oil into the crop, followed by massage and an effort to remove the contents through the mouth. However, this is a matter of some difficulty, and often, because of the size or shape of the offending matter, is nothing less than impossible.

In such a case there is but one remedy—a surgical operation. If the bird is a vigorous one, a pound or more in weight, the operation is not difficult nor very risky.

Preferably, one person should hold the bird while another performs the operation. The light should be good and the air fresh and clean, to lessen the danger of infection. The instruments needed are a very sharp knife or scalpel, a pair of small scissors, a spoon, and a needle threaded with white cotton thread, white silk or surgical gut.

With the scissors trim closely the feathers from a space one by two inches over the crop and shorten any others that may be in the way. With the fingers of the left hand draw the skin tight, and carefully make an incision in the outer skin near the centre of the crop. Insert the point of the scissors and enlarge the slit until it is about an inch and a half long. Some small blood vessels will be plainly seen, but it is usually easy to avoid cutting any except the very smallest. If a few drops of blood flow, remove them with absorbent cotton.

Carefully draw the slit in the skin about half an inch to one side, and make a cut through the crop wall, enlarging it also with the scissors. Remove the contents of the crop, using the spoon handle as a scoop. Wash out the crop with a solution of permanganate of potash—a pinch of the crystals in about half a cup of tepid water.

Sew up the crop wall, making the stitches an eighth of an inch apart and tying them carefully. Draw the outer skin together and put a few stitches in it.

Swab off the wound with a mild solution of carbolic acid or some other antiseptic and put the fowl in a clean, comfortable place to rest. In an hour the bird may have water colored with permanganate to drink. Probably by this time it will be looking for food, but this should be withheld for twelve hours. Give a light feed of an easily digested mash at the usual feeding hours for a couple of days then the usual grain and green feed for another day. If apparently normal the bird may go back to the flock.

The operation may readily be accomplished in fifteen minutes. It is practically painless, and if the bird is in otherwise good health and an ordinary degree of cleanliness is observed it will be successful.

POULTRY NOTES.

Nothing does growing stock so much good as a change on to clean, dry land. Any moveable houses should be moved onto land directly crops are removed.

Do not allow a diseased bird to remain in the flock. No matter what is the complaint, isolate and be on the safe side. Unless with very valuable stock, the cheapest way out is to kill at once whilst it has some food value.

The old theory of a dozen years ago that chicks must be fed early and late and every two hours is dead. Five times daily for the first week, four the second, and after that three feeds daily will grow the best of stock.

Broody hens will do quite well for winter rearing, but should not have more than ten chicks. With brooders, the temperature must be closely watched, starting at 90 degrees and cooling down about a degree a day. The so-called 100-chick brooder is the best size, with not more than 50 in it.

At the present price of eggs, it pays to increase the nitrogenous part of the foods. Birds so fed are now moulting easily, and most of them laying the whole time. Correct feeding seems to be the most important factor in poultry management.

Prepare now for the 1916 season. In no business is an early start so essential as in poultry. A few weeks' difference often makes the difference between profit and loss. For winter layers it is the early hatches that make the largest profits. Especially is the beginner wise in getting early hatches if properly equipped for the work.

Purchase breeding fowls in December, that they may become accustomed to the new quarters and be ready to shell out eggs early in January and February for hatchable quality. Much depends on the proper breeders and their care for best results in poultry.

Indications point to a better poultry year in 1916. Already a demand has been noticed for equipment and stock. The only discouraging feature, which will improve with education along the line, is the demand for cheap goods. Poultry writers should discourage the beginner from the purchase of eggs for hatching day-old chicks or stock at but market quotations. Cheap goods can never give lasting returns, and are dear in the long run.

Colds will be frequent in the wet season. Predisposing causes are hot mashes and sufficient ventilation. When sneezing commences, an astringent such as a teaspoonful of sulphate of copper to sixty fowls or 100 three-parts-grown chicks, daily, melted and mixed in the soft food, will probably be sufficient to stop it. If not, they must be put in a large house and kept at an even temperature. For medicines, five drops spirits of camphor, or three drops tincture of aconite, or six drops of eucalyptus oil are all good, once daily.

OUR PRIVATE POWER PLANT

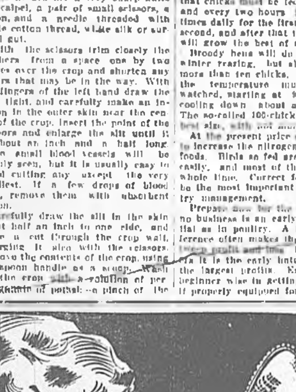
Nature Produced It, and Science Has Never Equaled It.

The most complicated manufacturing plant that ever existed is the human body as controlled under the scientific management of the brain and nervous system. No factory ever housed a more efficient producer plant for converting fuel into energy. No plant ever had so well designed a pumping system nor one so perfect for the disposal of waste and sewage. Talk of heating and ventilating up to date or interdepartment telephone! The best that our modern science can put into our shops is crude indeed as compared with that furnished by the Great Designer. Suppose that you went to a pump manufacturer with the following specification:

Wanted, a pump with capacity of one-quarter gallon a minute to handle warm salty fluid, to work for seventy years night and day without a shutdown, at the rate of seventy strokes per minute. Must be guaranteed to operate for the full period of time without repairs or adjustments, to require no attention; must have automatic control and contain its own motive power and must have a duty per million foot pounds superior to the best triple expansion high duty unit ever made.

Do you think the manufacturer would bid for the job? If he were a timid man he would probably agree with you and tell you to come around next week, meanwhile edging you toward the door before your insanity took a violent form or if he were not afraid of lunatics, he would say: "You poor bug, such a pump you speak of never existed nor ever will exist in the brain of a perpetual motion freak such as I see before me." Which shows how much he knows about it, for both you and he carry such a pump around with you, and each of you thinks too much of your possession to sell it for any money.—John H. Van Deventer in Engineering Magazine.

"Mother, Mr. Flatbush has asked me to be his wife. What shall I do?" "Consult Bradstreet and Dun, my dear; also a competent lawyer, and your heart."—Louisville Courier-Journal.



WHAT DOES YOUR MIRROR TELL YOU?

Your mirror has a message for you. Is it one of health and good cheer? Or do you read there signs of disease and a warning to take action?

Is your complexion pale and sallow? Lips, gums and eyelids without color? Is there puffiness under the eyes?

These are indications of anaemia or poor quality of blood. Other symptoms are shortness of breath, palpitation of the heart, faintness and dizziness, swelling of the ankles, indigestion and irritable temper, ringing in the ears and dimness of vision.

The blood is watery. It is lacking in the red corpuscles which supply nutrition to the nervous system and go to build up the cells and tissues of the body. You need just such help as is best supplied by Dr. Chase's Nerve Food. In this food cure you get in condensed and easily assimilated form the ingredients from which good, rich, red blood is formed. Gradually and naturally the weak, listless body is restored and the vital organs resume their various functions.

Since the Nerve Food cures by the building-up process, you must expect to keep up the treatment for some little time. The thoroughness of the cure will more than reward you for your perseverance, and in the meantime your mirror will tell you of improving health and the return of color to the cheeks.

50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Dr. Chase's Nerve Food

The Housekeeper

To make beautiful buttonholes, even on the sheerest of summer materials, mark them first and stitch the outlines once around on the sewing machine. This not only adds to the durability of the buttonhole, but makes the working of it far easier.

If the sewing machine is all dust and clogged up with repeated oilings, alcohol applied with absorbent cotton will befound an excellent means of removing all dust and oil quickly, and save soiling any delicate material you are working on.

A thin piece of rubber should always be tacked to the supports of a step ladder, to keep it from slipping.

If a pinch of soda is added to the vinegar used in making mayonnaise it will never curdle.

To soften a paint brush which has become hardened beyond use, place it in a bowl containing sufficient vinegar to cover the brush, and it will come out like new.

Cold tea is excellent for cleaning all sorts of painted wood, except white.

A lemon sucked will dissolve a fishbone in the throat.

To wash off concrete walks so that they will appear white use: One pound of lime, a handful of salt and a gallon of water.

Stain on flannels may be removed by applying the yolk of an egg and glycerine in equal parts. Leave it on for an hour and then wash as usual.

Do not dry a silk garment after washing, but roll it up in something soft, as tightly as possible and let it remain for at least an hour before ironing it.

To form a good broomholder, nail two spools to the wall about two inches apart. Hang the broom upside down between the spools.

TO TRIFLE WITH CATARRH IS TO RISK CONSUMPTION

Usually it comes with a cold. Being slight it is neglected—but the seed is sown for a dangerous harvest, perhaps consumption. To cure at once, inhale Catarrhozone. It destroys the germs of catarrh, clears away mucous, cleanses the passage of the nose and throat. The hacking cough and sneezing cold soon disappear, and health is yours again. Nothing known for colds, catarrh and throat trouble that is so curable as Catarrhozone. It cures by new method that never yet failed. The one dollar outfit includes the inhaler and is guaranteed to cure. Smaller sizes 25 and 50c. Sold everywhere.

AID SET FROM THE COLONIES

Overseas Britons From Earth's Ends Give Planes.

Little Known Places That Are "Doing Their Bit."

The Secretary of State for the Colonies intimates that the Overseas Club announces the following further gifts to the Imperial Aircraft Flotilla:

No. 42—Pretoria. 70-h.p. biplane, costing £1,500, presented by the people of Pretoria, through the Pretoria branch of the Overseas Club.

No. 43.—Ashanti 70-h.p. biplane costing £1,500, presented by the Chief of Ashanti through the Crown Agents for the Colonies.

No. 44.—Shanghai Race Club. 70-h.p. biplane, presented by the members of the Shanghai Race Club, through Mr. H. H. Bead, Shanghai. Cost £1,500.

No. 45.—Accra. 70-h.p. biplane, presented by the residents of Accra through the Crown Agents for the Colonies. £1,500.

No. 46.—Akin-Abuakwa. 70-h.p. biplane, presented by the residents of Akin-Abuakwa Division of the Gold Coast, through the Crown Agents for the Colonies. £1,500.

No. 47.—Rhodesia. No. 3. 70-h.p. biplane, costing £1,500, presented by the people of Rhodesia, through the British South Africa Company.

No. 78.—Poverty Bay, New Zealand. Henn Farman biplane, costing £2,-039, presented by the Poverty Bay district of New Zealand.

No. 49.—South Australia 100-h.p. Gnome-Vickers gun-mounted biplane, costing £2,250, presented by the people of South Australia, through His Excellency, the Governor, Lieut.-Col. Sir H. L. Galway, K.C.M.G., C.B., D.S.O.

No. 50.—Nigeria No. 2. 70-h.p. biplane, costing £1,500, presented by the people of Nigeria through His Excellency the Governor, Sir F. D. Lugard, G.C.M.G., C.B., D.S.O.

No. 51.—Lady Ho-Tung, Hong Kong. 70-h.p. biplane, costing £1,500, presented by Lady Ho-Tung, Hong Kong.

No. 52.—Sir Robert Ho-Tung, Hong Kong. 70-h.p. biplane, presented by Sir Robert Ho-Tung, Hong Kong. £1,500.

No. 53.—Shanghai Exhibition. 100-h.p. Gnome-Vickers gun-mounted biplane, presented by the residents of Shanghai through Mr. H. H. Bead, Shanghai. £2,250.

The Government of Grenada has remitted to the British Red Cross Society through the Crown Agents for the Colonies, a further sum of £750 contributed to the society by private subscribers in the Colony.—British Exchange.

A Preparatory Course.

There is a judge in Salem, Mass., who behind a benignant exterior, hides an occasional surprise for persistent evil-doers. Not long ago there came up before him for sentence two young youths who had been guilty of a long sequence of misdeeds. Both were under age, each having just passed his nineteenth birthday. Having been caught with the goods on them, they had pleaded guilty in the hope of getting off with a light punishment.

The judge adjusted his glasses and through them beamed softly at the young lawbreakers.

"Now, then, boys," he said softly, "I'm going to send you two to the state reformatory for two years apiece"—his voice suddenly changed, "and while you're there you can both be studying for the state penitentiary."—Saturday Evening Post.

The Soubrette—Those quartette singers seem to get on well together, don't they? The Comedian—Yes. They represent a strange paradox. "What do you mean?" "Peace without harmony."—Youngstown Telegram.

Were a Boon to a Paisley Man

DODD'S KIDNEY PILLS CURED PAIN IN HIS BACK.

Mr. Jas. A. Bryce Tells Why He Recommends Dodd's Kidney Pills to All Who Suffer from Kidney Disease.

Paisley, Ont., Feb. 27.—(Special)—"I can highly recommend Dodd's Kidney Pills to anyone suffering from pain in the back," says Mr. Jas. A. Bryce, well known and highly respected in this neighborhood. "I had been troubled with a pain in my back for about a year.

"Reading the self-examination page in Dodd's Almanac led me to believe that my trouble came from my kidneys, so I sent and got a box of Dodd's Kidney Pills. Before they were done I was feeling as well as ever.

"Dodd's Kidney Pills were certainly a great boon to me."

Dodd's Kidney Pills act directly on the kidneys. By putting them in condition to do their proper work, they accomplish the cures so regularly reported. Healthy kidneys make pure blood and the man or woman who has pure blood coursing through their veins can laugh at nine-tenths of the ills of life.

THE CANADIANS' NO MAN'S LAND

British Correspondent Visits Our Trenches at the Front.

High Praise Given—Territory is Now "Canada."

As the mist and rain descended and the horizon shrank from ten miles to one we journeyed to the trenches in the plain, where a horizon from 200 to 30 yards is all that a man needs. Down there in "the common crofts" certain advantages belong to thick weather.

Where the communication trench is a slough you may clamber on to the bank and try to feel as confident as your guide that the enemy will neither see you nor [illegible] you. You [illegible] here and there, trusting that the [illegible] of the working party is quite accurate when he assures you that the interval is "dead ground for bullets," though the [illegible] has an uncomely sound.

To-day a [illegible] thought rather ominous silence is over everything; and when at last we reach the [illegible] trench the crack of a sniper's rifle just round the traverse sounds as loud as a battery.

But the trenches themselves give every confidence. A general who had been through them a day or two earlier had told the Canadians that they were the best in the line. They were certainly the best I had yet seen. [illegible] No Man's Land flowed out under the duck-boarding that everywhere served as flooring. Even the slime of this [illegible] mud-clay had been kept tame by wire and wood; and the millions of sandbags were piled in the newest and most scientific manner.

As I stopped leaning up against "the leafer-furnished wall", while someone else was peering through a spy-hole, I became aware of a sort of rabbit-hole below me. The inmate, with the usual quick Canadian hospitality, offered me the freedom of his dwelling. He could not receive the whole of his guest; there was not room for that. I considered the invitation as extending to my head, and that could enter far enough to see and appreciate the whole of the Dutch interior. The owner sat low before a tiny stove, and he held in his hand a well-lathered shaving brush. His cheerfulness, conspicuous even in this cheery [illegible], was due perhaps to the prospect of a clean shave, and the preface to a [illegible] whose fumes already made a pleasant accompaniment to the toilet.

MEN'S LIVELY SPIRIT.

It is difficult at such a moment to understand and feel the hardship and danger of their daily warfare. The men make you forget it, so natural and jolly they are, though each is in some sense "impositus cineri doloso" (a paraphrase of Horace, who was thinking of the fire "beneath the treacherous lava crust") is trending on a mine. Everyone looks at home. From the next dugout I pass came the gay [illegible] of "Susanne, Susanne, we love you to a man." On the back wall at the traverse beyond was a little handmade weathercock, such as you see in a village garden at home. Who would ever have thought that it was put up to indicate the winds favorable to a Hun gas attack?

The gongs fixed to the walls here and there have a domestic look, though they are made of empty shell cases. But most of all the household ways of the men and their lively spirit keep aloof the sense of danger and death. Yet they never for a minute lack a reminder.

There, lying on a mud heap, are two French rifles dug up yesterday, relics of a stubborn fight on this same spot a year ago. The place is fathom-deep in the crudest form of war record. Here and there, in the area of the trench and at its edges, rough circles and crosses mark the burial spot of the often nameless dead. And you may see more direct evidence than this. Nor can the most buoyant talk quite avoid the tale of losses and scenes still printed on the mind and distinct on the retina. In spite of all no one is less morbid than the man who fights daily. He thinks first and last of his job; and great thinkers have reached no sounder philosophy or source of comfort.

The day was remaining quiet as well as thick. The mist, now turned to rain, seemed to have blanketed the animosity of guns and grenades, always excepting the rifle of the sniper. And sniping, the most interesting occupation, is also the favorite theme of trench conversation as may easily be understood. In this very trench a single sniper had just earned a few days' leave after killing his thirty-first German. They were all down in the notebook as certainties with details. Some, of course, were just lucky shots.

THE NEW "CANADA."

Many are the tales of the skill of one particular German sniper. His prowess was even shown off to visitors as if he were a recognized attraction of the locality. "Just you watch him," a man would say, and thereupon raise a tin on a stick. Before the visitor was well aware of what was being done the tin rattled and flew off the stick to the otherside of the trench. "Pretty good, isn't he?" the showman would add, with conscious pride that his pet had come up to promise.

Skirt Styles.

They are many and varied—quaint and attractive—this spring.

One smart affair of blue serge was very tailored-looking, laced at the side with white and finished at the foot with a broad band of white silk braid.

All sorts of picturesque affairs there are, too—shirred and smocked skirts, skirts with side ruffles, skirts with 1830 girdles, skirts with cording.

All the tailored skirts flare at the foot, fit snugly over the hips and almost invariably boast pockets of some sort.

WASN'T CALLING HER DEAR.

(Kansas City Star)

Desirous of buying a camera, a certain fair young woman inspected the stock of a local shopkeeper.

"Is this a good one?" she asked, as she picked up a dainty little machine. "What is it called?"

"That's the Belvedere," said the handsome young shopman politely.

There was a chilly silence. Then the young woman drew herself coldly erect, fixed him with an icy stare, and asked again:

"—and can you recommend the Belved?"

Lovely New Spring Coats

Included are many new styles in smart, short belted coats and ne t yoked coats. Military styles and longer coats with the wide flaring skirts. They come in beautiful new tweed mixtures, Shepherds checks and cream and striped Polo Cloths. Extra values at $8, $10. & $12.50.

The Newest Neckwear for Ladies.

White frilly collars in fine Organdy, Ninon & Georgette Crepe in Puritan Shawl and Cavalier styles with beautiful Venetian Lace edges, also handsome collar and cuff sets.

You'll find a big variety of the newest things in neckwear and there'll be no difficulty in choosing a collar that will be both becoming and stylish

New Spring Prints.

TOWN AND COUNTRYSIDE

News From the Neighboring Towns and Villages Written for The Telescope by a Staff of Live Correspondents.

GLAMIS

Mr. and Mrs. Peter McKinnon and children left on Saturday for their home at Cancre, Sask., after a couple of months visit with relatives here.

Mrs. Farquhar Beaton, son and daughter of Toronto are visiting relatives here.

Mr. and Mrs. T. G. Percy visited in Kincardine last week.

Mr. and Mrs. Dave Barrie returned to their home in Watrous, Sask., last week.

Mr. Jack McKinnon went to Toronto on Friday on business.

A number from here took in the carnival at Tiverton on Wednesday.

Mr. Thos. McIntosh jr. returned to Stratford on Saturday.

Mr. D. M. Bell of Pincher Creek, Alberta, is visiting at his home on the 10th con. Kincardine.

Mr. and Mrs. John McIntyre celebrated their 64th wedding anniversary on Saturday. Congratulations.

Mr. James McCormack, who has been home for the winter, returned to Edmonton this week.

Misses Rita McKinnon, teacher of S. S. no. 11 Kincardine, and Flossie McLennan, teacher of the Glamis school, exchanged schools on Wednesday and Thursday.

A merry sleighload of youth and beauty from Pinkerton spent Thursday evening with Mr. and Mrs. J. D. Robertson.

Messrs. Wilson, Carr and George McKay have the job of cutting J. Cunningham's wood.

A few from here attended the recruiting meeting in Paisley on Wednesday.

Mr. Creba Leddicoat of Superb, Sask., after spending the past two months here, returns to his home this week.

Mrs. J. C. McIntyre received the sad news this week of the death of her sister Mrs. Anne McLean of Toronto. Mrs. McLean has visited here on several occasions. Deepest sympathy is extended to the bereaved ones.

Messrs. Jas. McLennan and Kirstine Bros. delivered their pressed hay to Pinkerton station on Saturday and Monday.

Rumor has it that Mr. James Thompson purchased an Overland car.

Mr. Wm. Gilchrist and Miss Belle Gilchrist attended the funeral of the latter's uncle, Mr. John McKinnon of Paisley, on Saturday.

Miss Margaret Symons spent last week with Mrs. Welsbiord of Paisley.

Miss Annie F. McDonald was a week end visitor at Mr. Neil Currie's.

The young girls of the village have organized a "Helping Hand" Society, which will meet every Saturday afternoon at the different homes.

Messrs. Allan McKinnon Jr. and George McKay, Misses Mary McKinnon and Margaret Currie, spent Saturday afternoon and evening at Paisley club.

Mr. Lorne Carr, who last week entered in services at the Royal Bank, Kincardine, has since signed up with the 160th Bruce Battalion.

Another of our young men, Walter McKenzie, signed up for the 160th Bruce Batt. last week.

Mr. Edgar McAfee has entered in training at Tiverton.

The Patriotic entertainment in St. Paul's Church on Friday evening under the auspices of the Guild was a decided success. Mr. W. J. McKeeman was chairman for the evening. Addresses were given by Trooper Knight, (a returned soldier from the front), Lieut. McKay, Capt. Bland, Mr. McKerracher of Paisley and Rev Mr. Poulter of Tiverton. Solos were rendered by Misses Mary Gillies of Tiverton and Elizabeth Campbell of Glamis, Messrs Trooper Knight and Duncan McLennan. The programme throughout was highly appreciated. Mr. Robert Russell tendered a vote of thanks to all who took part, after which the National Anthem was sung. Proceeds for Red Cross amounted to about $43. The invited soldiers from Tiverton and also those assisting on the program were given an invitation to the basement where lunch was served also a presentation was made by the Guild to Mr. John Thompson of a wristlet watch.

WESTFORD

Mr. Frank Murray and Mr. Will Spitzig of Chepstow visited friends here last week.

Mr. and Mrs. Reg. McBride are at present visiting friends in Algoma.

Mr and Mrs. Andrew McHague who have been spending the winter with the latter's parents Mr. and Mrs. James Thompson have returned to their home in Alberta.

Mr. Ed. Kelly of Chepstow visited at Mr. Dan Murray's last week.

Quite a number from here attended the sale at Mr. Ed. Hodgins on Wednesday.

Mr. and Mrs. John McGlynn attended the dance at Peter Valad's on Wednesday evening.

Charlie Walt and Wilbert Haldenby attended the Box Social at Salem on Friday night.

Wedding Bells are again ringing in our Burg.

A very enjoyable time was spent by about sixty of the friends and neighbors of Mr. and Mrs. Peter Murray on Friday evening last. The evening was spent in games and dancing to the best of music furnished by the Westford Orchestra. After partaking of a sumptuous lunch their many friends joined in thanking the kind host and hostess for the good time they had given them and all went home well pleased.

MILDMAY

Linwood and Mildmay crossed hockey sticks at a N. H. A. game here last Friday night. The Mildmay boys outclassed the visitors in every way. Dr. Zinn and Pletsch each played a star game and it was a good clean game all through. The final score was Linwood, 4; Mildmay, 13.

On Tuesday an extraordinarily large crowd gathered together to view the parade of some 140 soldiers in uniform headed by the Regimental band. It was a novel sight to many here. At the Patriotic meeting in the Town Hall, the building was packed to the doors, many being turned away. Our townsfolk took an intense interest in the affair and no doubt this event will bring the war nearer to us.

Mr. Albert Fiddler, a young man employed by John Coutts, enlisted here on Tuesday along with Mr. Geo. Smith of Belmore.

A large shrapnel shell sent by Mr. Herbert Wilton of Hamilton, was on exhibition in Liesemer & Co's store window last week.

Mr. George Heise a student at Toronto University, has enlisted at Toronto.

Miss Myrtle Lambert spent Sunday with Harriston friends.

Mildmay played the return game with Wingham last Wednesday night and won after a tight game with a score 5—4.

A very successful Red Cross carnival was held on Tuesday night in the Mildmay rink. A very large number of masqueraders and spectators were present. The prizes awarded were as follows: best patriotic dress, ladies', Miss I. Hunsperger; best dressed lady, Miss Tena Hergott; best dressed man, Herbert Weller; best comic costume, Ed. Wittich; men's race, Alfred Sauer; boy's race, Brown Grenache; ladies' race, Miss Clara Schwalm. The proceeds were given to the Red Cross.

OTTER CREEK

A very enjoyable evening was spent last week consisting of speeches, addresses and games at the home of Mr. and Mrs. Joseph Frieburger showing the high esteem in which the old couple were held before leaving for their new home in town.

Quite a number from here attended the box social on the sixth Con. of Carrick. A good program was rendered of speeches, dialogues, recitations songs and flag drills.

Mr. Dan Wolfe spent Sunday at Clifford.

Mr. and Mrs. Ezra Schmidt from 8th con. Carrick, were visiting Mr. and Mrs. Henry Wolfe.

Miss Pauline Hofforth was united in marriage to Mr. John Kuppetschmidt of Deemerton Tuesday Feb. 22nd. and will take up their new home on the farm in Deemerton. We send our Congratulations to the young couple in their new sphere of life.

Mr. Edward Fenner and Miss Katie Gress returned on Wednesday last from attending the funeral of the late, George Gress who died in Grand Rapids Mich. Feb. 14th 1916. The Deceased was born 1848 in North Dumfries, Waterloo County six miles west of Galt. He moved up to Carrick in 1875 and remained here until nineteen years ago. Then he left for Grand Rapids Michigan and remained there till his departure. He was a member of the reformed Presbyterian church and a Grit in politics. He leaves to mourn his departure two daughters, Mrs. Henry Beld of Grand Rapids Mich. and Mrs. Nicholas Essenburg of Holland, Michigan, and two sons, Messrs. Hugh and Milburn at home and three sisters and three brothers, Mrs. John Fenner, Mrs. David Bell and Miss Katie Gress and Messrs. Philip and David Gress of Carrick and Mr. Jacob Gress of Galt.

G. A. Fenner has had two batches of early chicks already. About fifty the first of last month and a hundred two weeks later, white leghorns and Orpingtons. The little fellows are thriving pretty well for so early in the season.

PINKERTON

Mr. Neil Murray has returned after a two months' visit at Chicago. Although Neil is an American by birth, Canada is good enough for him.

Pte. Elmer Gregg, who has been home on sick leave, returned to Galt this week.

Thursday evening of last week will long be remembered by those who attended the surprise party at Mr. and Mrs. D. Robertson's, of Glamis. Messrs Dick Donnelly and Jack Wilson chaperoned a large load of youth and beauty over the bare hills to Glamis. The evening was spent in dancing and card playing and Mr. and Mrs. Robertson proved themselves most capable host and hostess. On the return home in the early hour of the morning, a mild upset occurred, but fortunately nobody was hurt.

Mrs. A. C. McKee had a Bell phone installed in her home last week.

Miss Mary Desmond left this week to train as a nurse in St. Michael's Hospital, Toronto. We wish her success.

A number from here attended the reception at Mr. Young's, of Chepstow, on Friday evening.

CARLSRUHE

Pte. Lindsay Manser of Chatham, spent Monday with his parents, Mr. and Mrs. J. W. Manser.

Mr. Fred Baumbach and Mrs. August Baumbach of Stratford, are spending a week with Mr. and Mrs. John Witter.

Quite a number from here attended the Carnival in Neustadt, on Thursday evening.

Misses Edna and Florence Dietel visited friends in Mildmay on Thursday.

Mr. Fred Geise of Toronto, visited Mr. and Mrs. J. W. Manser, on Thursday.

GREENOCK

The Box Social Friday night was a great success. Miss Kirktown handed over to the Patriotic Fund $60.

Miss Florence Cunningham, of Walkerton, visited at John Cunningham's last week.

Another one of Greenock's old pioneers have gone to rest in the person of Sam Fisk. He died on Feb. 23rd and was buried on Sunday. The funeral was very largely attended.

Sam and Henry Fisk are down from the Northwest attending their father's funeral.

Hugh Winter hired with A. Wattcher for the summer and started his duties on March the 1st.

A sleigh load went back to Mr. M. Kuffer's Monday where a very pleasant evening was spent playing cards and dancing.

Alvin Fisk enlisted Friday. We like to see that as we would like to have a few in the Bruce Battalion from our burg.

Quite a few from Riversdale attended the Box Social Friday night.

Miss Abbie Eriswell of Walkerton, spent Saturday and Sunday at Greenock.

SOLWAY

Miss Mary Whitehead spent a week at the home of her sister Mrs. Ben Nicholl.

Mr. Noah Gateman moved his farm stock & implements to his new home on the ninth of Brant on Tuesday.

The party given at Mr. Frank Lange on Wednesday night was enjoyed very much by the large crowd present.

Mrs. John McWhinney is sick at her home here.

Miss Ethel Vera Nicholl spent the week-end with her sister Mrs. G. Burrol, Maple Hill.

Miss Jessie Con... is spending a couple of weeks with Mrs Moore, Durham.

Mr. John Strader is confined to his home here with an attack of La Grippe.

DIED—At the home of Mr. Malcolm McIntyre on Friday Feb. 25th, their infant son.

Mrs. Arch Weir has returned after spending a vacation in Toronto.

The engagement is announced of Mr Joe Lang to Miss Kunkle.

FORMOSA

The Brewery housed their ice last week and the Hotels and farmers will get theirs this week

We had pretty cold weather the last two weeks.

J. B. Goetz is on the sick list the last three months being confined to the house.

Saw-logs are coming in to Weiler's mill lively now.

Philip Weiler is still busy working at his store-house.

A number of visitors from the North West left for their home.

The marriage takes place Tuesday of next week, of Miss Sadie Schell, daughter of Mr. Andrew Schell, to Mr. Alf Bildstein, son of Mr. and Mrs Charles Bildstein of Culross.

FOR SALE

Part of lot 24 and 25 Concession 3, S. D. R., Brant Township, containing eight acres. There is a brick house and a stable and driving shed on the premises, also good orchard and hard and soft water. This is the property belonging to the late James Coulter and is about one-half mile from Walkerton. Immediate possession will be given. For particulars apply to Mrs. Coulter on the premises or to A. Collins, Walkerton.

Mechanics' SHOES

We call the working men's attention to our excellent shoes built purposely for the mechanic. Nothing in them but good solid leather. Heavy durable soles with uppers of heavy calf or kangaroo. Nothing omitted that would in any way add to their durability, and while they are built for hard usage they are built to be comfortable. They are good looking and moderately priced.

GREENOCK

Mr. John Wallace, who has been on the sick list a couple of weeks, is getting better.

A few from around the burg took in the party at Mr. Fred Gilntz's Thursday night and report a good time.

Miss Marie Forsythe returned home on Saturday after spending a couple of weeks in Toronto.

Fred, Alex. and Hannah Kraemer spent Sunday visiting friends near Ambleside.

A sleighload of young people journeyed to the home of Mr. A. Scheffer on Tuesday night and report having spent a very pleasant evening.

Mrs. Harry Goodhand of Rochester, is visiting her parents here for a couple of weeks.

Bert Whyte and Gordon Ritchie went to Kincardine on Friday for a load of salt.

Mr. Louis Keller visited his sister at Ambleside for a couple of days last week.

Mr. Joe Lawrence of Clifford visited at Geo. Winter's last week.

Miss Annie Ernewein, after spending a month at her home here, returned on Tuesday to Walkerton where she has a position.

We are having pretty cold weather this last week. It doesn't look as if we are going to get a very early spring this year.

Geo. Brindly is working at Mr. J. G. Carter's for a few weeks cutting wood.

Another farm has changed hands. Mr. Jake Kraemar bought the corner 80 acres next to his farm from Mr. R. Chambers last week, the price being about $2200.

Mr. and Mrs. Gordon Ritchie spent Sunday at Pinkerton.

MAPLE HILL

Wedding bells are ringing.

Miss Lilly Alexander of Edengrove is visiting at the home of Mr. Robert Pinkney.

Mr. John Teeple of Paisley is visiting his sister here.

Miss Jean Hamilton of the South Line spent Sunday with friends here.

Mr. George Phohl is coming back to live on the old homestead. Mr. and Mrs. Phohl were very much missed in social circles when they moved away and we welcome them back.

Mr. David Frook who has been very seriously ill is on the way to recovery.

Mr. John Leech has had a very bad attack of La Grippe.

Miss Maggie Rae of Malcolm is visiting her Aunt, Mrs. J. Threndyle.

Maple Hill Girls' aid held a very successful patriotic dance at the home of Mr. August Pietsch.

Mr. Peter McRitchie of Maryland came home last week.

PINKERTON

The social under the auspices of the Red Cross, which was held on Monday evening last for the boys who have enlisted from Pinkerton or vicinity, was well attended and a very pleasant evening was spent by all.

Miss Hattie Gale returned on Saturday from a visit to Alma.

Lieut A. E. Reid of 71st Batt., Guelph, spent a few days at his home.

Ptes. Gregg, Reaburn and Sawyer of 71st Battalion and Ptes. Garland, McAfee, Beaton, Stewart, Robson and Parker attended the social on Monday evening

The Young People's Social which was held at Mr. D. Pinkerton's on Wednesday evening was well attended and an enjoyable time was spent by all.

Miss Jessie Murray returned home this week after spending some time in the employ of Ballachey, Laidlaw & Co., Paisley.

Miss J. Andrews is visiting at Molesworth.

Mr. Jas. Clark lost a valuable horse last week.

A number from here attended the Paisley skating rink last Friday night.

FINE STRAPPING FELLOWS

One Hundred and Ten Soldiers Here For Non-Coms School Include Many Veterans—School is Now in Full Swing at Rink

A smarter-looking bunch of men would be hard to find than the 110 soldiers of the 160th who are attending the school for non-commissioned officers at the Rink. They are fine strapping young fellows just out of school, not a few smart looking young business men, and several rare old veterans who have been through soldiering from A to Z and have seen active service in all parts of the Empire. These men while old in soldiering are still below middle age and should prove a valuable asset to the regiment.

A typical veteran is Corp. Frank Holdsworth, who joined the 160th at Kincardine. Holdsworth is a former member of the Leicestershire regiment with which he spent eight years, serving in Ireland, Egypt, India, and South Africa. He holds a first-class gymnastics certificate and is in charge of that work at the rink, putting the boys through their facings for an hour each morning.

Private Roberts, who enlisted at Tara, is a well set up British soldier who looks the part every inch. He has had a remarkable experience in the service. He belonged to the 17th Lancers "Death or Glory Boys," and soldiered in India and Egypt. In Egypt he was Kitchener's orderly, he was afterwards orderly to Earl Roberts in India, and he finished the service in '99 as letter orderly to Her Majesty Queen Victoria at Whitehall. Private Roberts has given three sons to the service, one with the Canadian Artillery in France, one with the 34th in England, and a third son with the 160th Bruce regiment.

Corp. Kennedy, who enlisted at Southampton is a braw Scot who completed service with the Seaforth Highlanders. Sergt. Holmes of Hepworth served twelve years with the Territorial Engineers in England. Corp. McFadyen is a former member of the Royal North West Mounted Police, holding the rank of Sergeant. His four years' term having recently expired, he hastened east to join the 160th. Corp. Steinard of Tiverton belonged to the 4th Essex and holds the Queen's medal for service in the South African campaign. Pte. W. Pilkington of Kincardine, formerly of the 3rd East Lancashire Regt. wears both the King's and Queen's medals for service in South Africa. Private W. Weidner, of the first Canadian Contingent, invalided home, is attached to the School, and an effort is being made to have him transferred to the 160th Bruce. These are a few of the veterans at the school. No doubt there are others.

The School opened Monday afternoon in charge of Capt. Chadwick and Lieut. Parker, both highly qualified officers, reference to whose appointment appeared in last week's Telescope. Eight instructors have been appointed for the school, and before the course closes in six weeks' time, every man of the 110 will have had his turn in instruction.

FIRE AT WALKERHOUSE

Top Story Destroyed and Interior Badly Damaged Early Tuesday Morning.

The top storey of the Walker House, owned by Mr. John Ward, was gutted by fire early Tuesday morning, and the walls and furnishings of the entire building badly damaged by water. The fire broke out in a room of the third storey about 2 a. m. and quickly spread. The flames got into the space between the floors and very soon the top of the building was a mass of flames. The firemen did their best by pouring water on the third storey and succeeded in confining the flames to that part of the building. The interior was badly water soaked from cellar to garret and the loss on interior furnishings is heavy. The loss has not yet been estimated but we understand the proprietor is amply protected, both on buildings and contents, in several stock companies with J. J. Schumacher & Son. The fire is supposed to have caught from some old electric wiring at the top of the second floor.

Sold Liquor to Minors

William Brillinger of Elmwood appeared before Magistrate Robert Richardson here on Monday, charged with selling liquor to minors. The Magistrate assessed him $20 and costs. Licence Inspector J. M. White laid the information.

+ + +

Mildmay Taking Hold

Mildmay is taking hold of the recruiting movement and it looks as if that village will yet be well represented in the 160th. Privates Geo. Helwig and Wendt enlisted during the past week and the former has been placed in charge of the recruiting office there. Dr. Zinn is joining the Dental Corps and will probably be attached to the 160th when the time for mobilizing comes. A big recruiting rally will be held at Mildmay next Tuesday.

Miss Edna Reaburn assumed her new duties at the Electric light office last Wednesday.

Pte Sawyer of the 71st Batt., Galt, called on friends in town Saturday on his way to Cargill.

Mr. N. Hiscox, C. P. R. agent, has recovered from his recent illness and is back on the job.

James Stalker of Toronto University spent Sunday with his parents, Dr. and Mrs. Stalker.

Miss Hulda White left on Thursday for Park Hill where she takes charge of a millinery parlor.

Mr. G. D. Stevens, who has been visiting the old home town, returns to Hartney, Man., today.

Pte. Wilfrid McKay returned to Galt last week after spending several weeks sick-leave at his home here.

Capt. O. E. Klein returned Saturday night from London, where he completed his course of instruction.

Miss Nettie Kenney was brought home from the Toronto Gen. Hospital last night in a serious condition.

Rev. Father Cummings was called to Hamilton the last of the week owing to the serious illness of his father.

The recruiting party of local soldiers who worked around Ripley last week, landed nine recruits for the 160th.

Mr. R. M. Gowelock who has been visiting his old home at Maple Hill leaves for Deloraine Man. on Friday.

Mr. James Warren is representing the local temperance organization at the big Toronto demonstration Wednesday.

Congratulations are due Capt. A. J. McNally, Adjutant of the 160th Regiment on his promotion to the rank of Major.

Mrs. Carr who has been visiting her brother, Mr. Robert Steele of Brant, returned to her home at Detroit on Friday.

Dried fruits, apricots, peaches, prunes and figs, also raisins and currants at the Central Grocery. W. G. Searle.

A meeting of the Brant Farmer's Club will be held at Mr. Jacob Dippel's on Tuesday evening, March 14th. Ladies welcome.

Rev. Mr. Barker of Port Elgin who exchanged pulpits with the Rev. Mr. Rock on Sunday, preached a powerful sermon on the war Sunday night. The reverend gentleman is enlisting as a private with the 160th in case he does not get the chaplaincy.

J. E. McGregor has removed from the fruit farm to a portion of his large double-residence opposite the Methodist church.

A fresh supply of Ciscoes, Bloaters, Kippered Herring, Chicken Haddie, Fillets and Codfish at the Central Grocery. W. G. Searle.

Every minister in Bruce County will co-operate in a plan to have recruiting sermons from every pulpit on Sunday, March 19th.

Messrs. Wm. Van Horne and Frank Bolden left on Wednesday to attend the annual meeting of the Orange Grand Lodge at Hamilton.

Don't miss the St. Patrick's supper at the Soldiers' Aid Tea Rooms, Wednesday, March 15th, from 5.30 to 7.30. A meat supper for only a quarter.

R. E. Truax, M.P., came home from Ottawa for the week end. He has quite recovered from his recent illness and is feeling like himself again.

An epidemic of grippe is on at the House of Refuge. Mr. and Mrs. Whiles and family and practically all the inmates are on the sick list.

Mrs. W. F. Mapes (nee Florence Smith) of Everett, Washington, writes:—"I surely enjoy every copy of the Telescope and would not like to miss one."

St. Patrick post cards at Hunters. C. P. R. Homeseeker's Excursions to west each Tuesday. Special round-trip faretickets and berth reservations at Hunter's Drug Store.

Mr. T. H. Race, Field Secretary of the Muskoka Free Hospital, was well pleased with the results of his visit to Walkerton. Nearly a hundred dollars was subscribed to the work.

The first round of the Cargill trophy series has been played off at the rink. The following skips remain in the running:—Messrs. Collins, Lippert, Ley, McBurney, White, Rourke.

Rev. Mr. Wilson returned home from the hospital on Monday but is still suffering from the severe cold which settled in his throat. Mr. Wilson hopes to be able to resume his pulpit again next Sunday.

Mrs. H. J. Bean and babe have returned from Guelph. Her mother Mrs. Leslie, who recently underwent a serious operation has now passed the critical point and it is hoped will be completely recovered before long.

Mr. Bob. Irwin of Irwin Bros. returned home Saturday night from a three weeks' business trip to the West going as far as Saskatoon. He experienced very cold weather with the exception of a few mild days. Irwin Bros. have been shipping large consignments of horses all winter and Mr. Irwin expects to make another business trip to the West in a few days.

The Telescope stated recently that Mr. Bob Ferguson, son of chief Ferguson, enlisted at Vancouver, B. C. To be more accurate, he enlisted at Salmon Arms, B. C and is now in Kamloops with the drum and bugle band of the 172nd Rocky Mountain Rangers (Cariboo Fighters) as a drummer. "Bob" was the first of the three Ferguson brothers to enlist, having signed up on December 1st.
